But this is a remarkable day, and before calling attention to that for which it is remarkable, I am here for the purpose of stating, on the part of the Directors of this Society, what they have done, and their present position, in reference to another subject which has been a topic of agitation in this Society for some years, and in regard to which the Directors have given their final deliverance, which I believe is now in the hands of all of you. This subject was introduced at the last general meeting, not in opposition to the resolutions which were then proposed, and which you have now adopted, but as a seperate subject, or, as those who were in favour of those views considered, a relative subject. And I think some of the members who were in favour of these special views stated that the resolutions we have now adopted were in a right direction, and an instalment of the views they themselves entertained and urged upon the Directors. That these resolutions were in a right direction there can be no doubt; but if they were in the direction of the scheme which has been urged upon the attention of the Directors otherwise, and an instalment of it, they would be in no right direction at all; but, on the contrary, as an authority which has been produced by those persons themselves states, they would revolutionise the Society and bring it to a speedy dissolution, whatever other structure these gentlemen might attempt to rear upon its ruins. (Applause.) The two things are in opposite directions. Our resolution will be carried into effect without, in any degree, altering the constitution of the Society, and without injuring the present or future interests and rights of a single member, but on the contrary, in furtherance of its principles, and of the rights and interests of all its members. (Applause.) The scheme of these gentlemen, according to the authority which has been put into the hands of the Directors within the last two or three days,—being the opinion of certain gentlemen in London,—would produce a revolution in the Society, and bring it to an end. Well, gentlemen, I wish to state, in the first place, what the directors have done, because I think whenever any plan of alleged improvement is brought under the notice of the Directors of such a Society as this, it is their duty, as well as their interest, to consider the matter in the most thorough manner. We undertook to do so in regard to those views which have been urged so much upon us, and I think we have fulfilled our promise; and I wish to state, in a single sentence, what it is that we have actually done. This agitation—if I may so call it—or these views, were first brought under our notice in the year 1860. At the meeting of 1861, it was urged upon the Directors that they should consider the subject, and consult Actuaries in regard to it. I think there were some gentlemen then present who stated that, if the Directors would do that, they would be perfectly satisfied with the decision that they might come to. I do not mean to say that any gentleman who so expressed himself has subsequently withdrawn from that, and not been satisfied with the resolution of the Directors; but undoubtedly that was very much the ground, or at least one of the statements made, to induce the Directors to take this matter into consideration. The Directors agreed so to do; and immediately they consulted three gentlemen—Mr Jellicoe, Mr Tucker, and Mr Samuel Brown—who came down to Edinburgh, and before whom all the books, papers, and calculations of the Society were exposed. They examined into everything that had been done from the first, every calculation that had been made in regard to the investigation of 1859; and they gave their opinion in regard to the subject in December, 1861—a most decided opinion against the scheme in all its parts; and that opinion was placed in the hands of all the members. Still the Directors were urged in regard to this matter notwithstanding that opinion, and so it was kept continuously before us. In the report for 1863, therefore, which was placed before the Society at the meeting in May, 1864, there was produced the opinion not only of the three gentlemen who had previously given their opinion in 1861, but of two others who were united with them for the purpose of considering these resolutions which we have now adopted, and at the same time of considering the further views which had been urged upon us by the honourable gentleman, Mr Sturrock, and those who supported him. In that opinion, which very shortly dealt with this subject, they said that "the distribution of the whole free surplus is assumed in what has been said, and is, indeed, a necessary consequence of the new arrangement. Of course, no part of the loading on future premiums will be anticipated in the periodical investigation for ascertaining the divisible surplus." The Directors, when they drew up this report, supposed that gentlemen, after what had taken place, would have been satisfied with these opinions, and in consequence they did not deal with the matter at length in that report; but, as the subject was still agitated, there was read by the Manager, at the meeting in May, 1864, a letter from the consulted Actuaries, written at the time that they were considering the subject, along with the other change which has now been adopted, and that letter I beg now again to read to you as the opinion which the Directors have received, and upon which they have proceeded. The letter is in these terms:—

Continuation of Scottish Widows' Fund Advertisement.

"London, 8th April, 1864.

"Dear Sir,—In forwarding our opinion upon the changes proposed in the principles on which the septennial valuations of your Society's liabilities and assets are conducted, we think it right to mention, that in the course of the consultations we have held, our attention has been specially called to the suggestions of certain members, that the whole, or at all events a considerable portion, of the loading on future premiums should be anticipated, so as to divide a larger sum than would result from the mode of valuation now proposed.

"We emphatically deprecate the adoption of any such suggestion as erroneous and hazardous, considered financially, and certain to weaken seriously the character of the Society in the public estimation. Without giving in detail the reasons for this conclusion, which would occupy too much space, it will suffice merely to refer to a recent case of a Life Assurance Company of large business and considerable standing, which has found itself under the necessity of closing its doors, solely because its profits had been anticipated in the manner proposed.—We are, dear sir, faithfully yours,

CHAS. JELLICOE.
SAMUEL BROWN.
ROBERT TUCKER.
ARTHUR H. BAILEY.
T. B. SPRAGUE.

"Samuel Raleigh, Esq., Scottish Widows' Fund."

We presumed that, after all this, gentlemen would be satisfied that their own individual opinions were at least not to be set against such opinions as we had received. But notwithstanding

Digitized by Google

Continuation of Scottish Widows' Fund Advertisement.

this the matter still was urged upon us; and accordingly, in publishing the report of the proceedings of that meeting we appended a note, in which we referred again to the subject and stated that our opinion was decisively against the adoption of such a scheme as had been urged upon us. That was in June, 1864. Since that time, the Directors have published a document, called an "Explanatory Memorandum," prepared by the Manager, which fully embraces the whole subject, and I think no one who has read it will say that it does not deal with it in a most masterly and comprehensive manner. (Applause). They have prepared and circulated that document, and it is now in the hands of the members; and any one who has not got a copy of it may get as many as he likes. The opinion of the Directors is now in the hands of the members of the Society in the most available shape, and their decision upon it has been as I have stated. I am happy to say that we have received many letters stating how completely satisfactory that memorandum is—(applause); and one letter, in particular, I beg to mention that we have received from a learned friend of mine, who was here at the last General Meeting, and took a most active part at that meeting in favour of the views of those other gentlemen. I refer to my friend, Mr Guthrie Smith, who writes that, after having read that document, and with all the information which he has derived from being a party to what I may call the other side of the question, he is entirely satisfied, and regrets that he has been prevented by other business from being here to-day, that he might publicly state the fact. (Applause). Now, gentlemen, when that "Explanatory Memorandum" was passing through the press, there was put into our hands, and I suppose into the hands of others, a document signed by Mr Sturrock, with a relative paper called "A Case for Members of the Society," with an opinion attached. It is not my desire to enter into a critical examination of these documents. I think every gentleman who looks at them—any man of intelligence—is able to judge of the matter for himself; and I shall be much surprised indeed if the opinion that any man forms of these documents is not this—that they are entirely condemnatory of the leading views which have been urged by Mr Sturrock upon the Directors, and confirmatory of the views which the Directors themselves have maintained. (Hear, hear, and applause.)

And now, gentlemen, I have just one word more to say, and it is this,—In the name of the Directors I have to state, that having, as desired, entered upon the investigation of this subject, they have fully and deliberately inquired into it. They have not been content with their own minds upon the subject, but they have taken the opinions of the most eminent professional men they could obtain, and the result of the whole is that, after repeated advice and consideration, they have come to be of a most decided opinion against what has been proposed in all its details; and that that opinion is, so far as they are concerned, final, conclusive, and unalterable. (Applause.) They believe that their decision will be approved of by the whole intelligence of the Society; and they now call upon all the members of the Society to stand by them in extinguishing an agitation which, if it has done no harm hitherto, would, if countenanced and prosecuted further, be both discreditable and injurious. (Hear, hear.) And so, gentlemen, I pass from that subject.

You are all aware that we are now on the very verge of the fifty-first year of our existence as a Society. The Manager has prepared a short and interesting statement of our present position, which he will now read to you. It is idle to wish that some of those wise and farseeing men who founded our Society were present to-day to hear that statement, who certainly never dreamt, in their most enthusiastic moments, of such a magnificent result as we have already achieved. (Applause). They planted the feeble stem, I have no doubt with anxious and trembling hand, which has now struck its roots deep down into the soil, and spread its branches wide over all the land, under the shadow of which thousands, in ways and to an extent none of us can calculate, have received, often in times of deepest distress, consolation, comfort, and happiness. (Applause). Looking at the result in this light, surely it is impossible not to wish that this Society may go on and flourish still more in the future than it has done in the past. (Applause). There are some here who remember the eminent men who adorned the chair of this Society in past days, our noble and most venerable President, James Moncreiff, Henry Cockburn, and others, who spoke not merely eloquent and glowing words, but words of wisdom and prudent counsel, which I trust will never be forgotten in the management of this Society, and will be followed by us in all we hereafter do. If it be the case that the mysteries of Life Assurance are not familiar to ordinary men, one lesson at least, often taught, I trust we are all at last beginning to understand—and this late agitation may have helped us in this respect, and so not been altogether unfortunate—that the very best thing every man individually can make of this Society is, that it should increase in its members; that the greatest profit he can get from it is by bringing people into it; that every new comer will add to the profit of every one who has already come. And so I venture to repeat an advice which ha been given, that every one of us

Continuation of Scottish Widows' Fund Advertisement.

should look around and see if he has any friend who has the misfortune not yet to be insured, and for that man's sake, and for the sake of all of us, try to get hold of him and compel him to come in. (Applause). Before I sit down, I beg to read a letter which has been received from Lord Rosebery, who has been President of this Society since its first institution. It is addressed to the Manager:—

"Piccadilly, December 16, 1864.

"Sir,—Understanding that it is intended to celebrate the Fiftieth Anniversary of the Scottish Widows' Fund and Life Assurance Society, on the 29th inst., of which, by the kindness of its members, I have been throughout the President, I am anxious to convey my great regret at being unable to be present, and to fill the chair on that interesting occasion.

"Independent of other causes, my advanced age, I fear, would have precluded my having that gratification and honour, even if I had been residing at Dalmeny, though, but for these circumstances, it would have been a peculiar pleasure to me to have attempted to point out the progressive and wonderful prosperity of this Society, and the immense benefits it has conferred on a large portion of the public. I am sure there will be many at the meeting much more competent than myself to perform this duty, and on whom it may be safely devolved.—I remain your obedient servant, "Rosebery.

"S. Raleigh, Esq."

No one more than myself regrets the absence of the Noble Lord on this interesting occasion. (Applause.)

The Manager then read the Statistics of the Society for the Fifty Years, appended hereto.

Mr John Sturrock, Jr., Dundee, thereafter rose, and at some length repeated the views and statements which he has so often brought before the members. [A report of what he said will be forwarded to any member who applies for it.]

The Chairman.—Mr Jellicoe, the President of the Institute of Actuaries of London, will make some observations. (Applause.)

Mr Jellicoe rose amidst applause and said—Mr Chairman and Gentlemen, the statements which have emanated from your Society from time to time during the last two or three years have so ably and so repeatedly borne to the ground the views which the last speaker has now mooted that it would seem almost useless, and a waste of time, to trouble the meeting with anything like an argumentative reply to the gentleman that has just been addressing you. Nevertheless, as the opportunity may not occur again, and as any statement is important that can be brought forward to rebut doctrines which I have no hesitation in saying every person acquainted with this subject will consider dangerous and delusive, I will, with the permission of the Chairman and the meeting, make use of one or two arguments which may be novel to those gentlemen who are now here assembled. (Applause.) Associations of this description may be said to form a copartnership. Indeed, I observe in one of the documents which have emanated from a committee of the members in Edinburgh, that it is termed a copartnership; and legally it is to be regarded as a copartnership. But it is a very peculiar copartnership. The members of it come in under very different circumstances; their position is very different; the duration of their term of partnership is almost invariably different. And hence it becomes the business of the Managers of Societies like this so to arrange these differences as that every member shall have perfect justice done to him. It is difficult for a person not very well up in the practice and theory of such matters to see that this is done; but the whole business, the whole endeavour of persons placed in the position of advisers and managers of Societies of this description is to make such arrangements as that no one member shall have any advantage over and above any other member; and complicated as the arrangements appear, and difficult as it sometimes is to make such arrangements, they can perfectly well succeed, and can demonstrate to any one capable of following the demonstration, that in such a great Society as this, for instance, there is no single member who in any degree infringes upon the rights of the others: and that on the occasion of the periodical divisions, such an adjustment is made that the surplus contribution of each is returned to him, or the benefit which he derives is in precisely the same proportion as that derived by all the other members. But there is one very peculiar feature connected with this particular form of association, and that is this: You are ready, as a copartnership, possessing at this present time no less than Four Millions of money; you are ready at any time to admit other partners. You allow any eligible person, subject to certain conditions as to health, to become a partner at any time at a fixed rate of payment. You are the possessors of Four Millions of money, and yet you say, "We are so secure about what we are doing that we are ready to admit any of those now walking in Prince's street. If they chose to present themselves any day before this Board, and prove themselves to be eligible as regards health and so forth, we will admit them to participate in that vast sum of money." Now, sir, a very little reflection must surely convince such an intelligent audience as this that there must be some very peculiar arrangement in the finances of this

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE REDUCTION IN THE BANK RATE OF DISCOUNT.

As we last week prepared our readers to expect, the Bank of England reduced its rate of discount on Thursday last; and though no further fall is to be anticipated for a brief period, yet the present probability is that the great slackness of trade and diminution of business will ere long reduce the value of money still further.

It is very characteristic of the present times that we have to announce a very large failure contemporaneously with the fall in the rate of discount. The year 1864 was like the the years 1857 and 1847, in a sudden fall of prices, and a sudden diminution of business, but it was unlike these years in not being a year of panic. The timely precautions of the Bank of England prevented any catastrophic destruction of credit. In consequence there was no *plague*, no sudden mortality of mercantile firms. But there is a prolonged continuance of heavy failures. Though general credit was not shaken, the fortunes of many houses were wrecked. The vast fall in produce, in cotton, in sugar and tea and other articles, must be borne by some one. If a trader has been carrying on a large import business on a comparatively large borrowed capital, and a comparatively small capital of his own, he is almost certain to be nearly ruined. The great reduction in the price of articles in which he has dealt very largely, will almost necessarily be greater than the small amount of his personal capital.

On this ground, therefore, we see, and must expect even still to see, the unusual conjunction of many failures, and a progressive diminution in the value of money.

THE UNION CHARGEABILITY BILL.

It is, perhaps, scarcely remarkable that Mr Villiers's Union Chargeability Bill should have met with the determined opposition from the country gentlemen which it encountered on Monday night; yet there is some reason to wonder that the opposition should be so much more eager to this Bill than it was to the much greater change inaugurated some years ago, when the parochial contributions to the "common "fund" of the Union were made proportional to the rateable value of the property it contained, instead of, as previously, to the average payments of the parishes for their own settled poor during the previous seven years. *That* was the true date of the inauguration of the new principle of Union Rating, for from that time all the poor called "irremoveable" were charged upon the property of the Union, and for them at least the principle of Union rating was then adopted. All that Mr Villiers now does is to extend the same principle to the poor who have got their "settlement" in any parish of the Union; so that henceforth there will be no distinction between the common fund and the parochial fund, and no distinction between the pecuniary responsibility for settled poor and irremoveable poor. That this development of the principle was quite certain to follow from the Bill which established Union rating for the irremoveable poor, is quite obvious. There is no real distinction between the responsibility for the two classes. If a labourer resides for three years in a parish, and so becomes "irremoveable" from it, there is no reason why the Union rather than the parish should pay for him when sick or past work, which might not equally well be assigned for the Union rather than the parish paying for *all* the poor—settled as well as irremoveable. If it was perfectly clear that if it was a good step to charge the poor who have gained the *status* of irremoveability on the common fund of the Union, the only reason for not going farther at that time was the danger of making too great and violent a change at once. But half the change, or very nearly half, was effected when this step was taken, for the common fund charges (which include, however, the cost of the Union workhouses) are now 51 per cent. of the whole sum spent in the relief of the poor in England and Wales; and it would be simply illogical after going thus far, after affirming the desirability of Union rating for the "irremoveable poor," to refuse *on any ground of principle* to go farther and affirm it also for the settled poor. The parish can in no way be shown to be more naturally responsible for the number of settled poor it contains than for the number of irremoveable poor. No doubt the settled poor may sometimes have a connection with the parish of older date than the irremoveable poor, but that need not always be the case, and if it need, the connection of later date may often really involve more local responsibility than that of older date. If poor have been brought into a parish by the urgent demand for labour there, and have benefited the parish for years with their labour, the parish has certainly more responsibility for them than it has for children born within its cottages, but who have never worked on its soil. No one can doubt for a moment that the principle of the present Bill is the logical corollary of the Bill establishing Union rating for the irremoveable poor; and few can doubt, we

Digitized by Google

think, that the time is fully come when that logical inference ought to be drawn.

The great reason for extending this principle at once is, that the evil from which the poor suffered so much, the evil of insufficient lodging, and lodging quite too far from their work to be consistent with either health or profitable industry, has not been adequately remedied by the first Bill. It has been shown that in 1861, in 821 parishes or townships, a population 5½ *per cent. greater* than in 1851 was crammed into cottage room 4½ *per cent. less.* It will be said that Mr Villiers's first measure, which in a considerable degree *diminished* the motive of the landlords for keeping the poor at a distance from their property, may have remedied this evil, and accordingly the cry of the Tory squires on Monday night was for "more information." Of course, while half or rather more than half the motive for the perpetuation of this evil was left, no one in his senses would expect that the evil would die away, but this is what the Tory landlords chose to hope, or to profess to hope. Sir J. Trollope, for instance, ventured to draw a *couleur de rose* picture of the dwellings of the agricultural poor under the operation of the present law:—"He ventured to say that such were the "habits of cleanliness and decency among the agricultural "poor, that nobody need fear entering their dwellings from "a fear of filth or contamination. Speaking for himself, he "had never pulled down a ruinous cottage without "building two in its stead, and he believed that was "the practice largely." We wish we could think that this good practice, however largely followed, was at all in proportion to the wants of the people. Dr Hunter was sent by the Lords of the Privy Council in 1864 to report upon the House Accommodation of Great Britain, not in any relation to the Poor Law, but only in connection with the health and education of the poor. He visited, in different counties of England, no less than 5,375 occupied houses. His report speaks in the strongest language of the shocking and revolting overcrowding of the cottages of the agricultural labourers, and he bears testimony to the fact, that on the whole, so far from any improvement having taken place, house-room is now far more difficult for the agricultural labourer to find, and when found, far less suitable to his needs, than it has been for centuries back. Of course this is not true of such properties as the Duke of Bedford's or the Duke of Newcastle's, nor of many estates belonging to less wealthy but equally generous landed proprietors. But it is the general impression made on an unbiassed witness; and he found, moreover, that the law of parochial settlement was unquestionably to be credited with a large part of the abuse. Cottages in "close" parishes are allowed to fall gradually into decay, being inhabited up to the very last practicable moment by the poor, but never repaired, till at last they fall to pieces, and another family is driven to seek shelter out of the parish, and the poor rates are thus diminished. On the other hand, in the neighbouring "open" parishes,—perhaps four or five miles from the field of labour in the close parish,—these labourers find shelter, and have to walk this distance to and from their work daily. To this practice Sir R. Knightley, who moved the amendment on Monday night, bore the coolest and most unabashed witness:—"In these dis-"cussions," he said, "you always heard a pitiful description "of the poor labourers, weary and wayworn with having to "walk several miles to and from his daily work. (Cheers.) "He would tell honourable gentlemen who cheered, that this "was simply twaddle. If the labourer had to compete with "other labourers who lived on the estate, no doubt he "would be injured, but this was not the case. The tenant-"farmer, his employer, was no doubt injured, for he only "received three parts of a day's work instead of a whole day's "work; the services of a partially tired man in the place "of the services of a wholly fresh one. In entering into "his farm, however, this loss was taken into consideration, "and the tenant-farmer paid a smaller rate in consequence." And these are the admissions made by a man who thinks it twaddle to call the system a bad and mischievous one. Nor does Sir R. Knightley really explain the worst part of the evil. Where a labourer *does* live in the parish, and the farmer knows that if that labourer gets no employment he will come upon the parish fund for relief, he prefers to employ him, even though he be drunken and idle, rather than to pay the rates for his relief and get no labour of any kind in return. And the labourers in their turn know perfectly well that they will never be selected on account of their character and industry, but on account of their parochial *chargeability* in case they do not otherwise get work. If Mr Villiers's measure should pass, this would be in a great degree cured. The parish being no longer individually charged with the relief of any of its own poor, the farmers would no longer be afraid of throwing idle and drunken men on the Union, and would select the best workmen to employ. On the other hand, the labourers themselves would begin to learn that industry and energy secure a man plenty of employment, and that the mere threat of "coming on the parish" would be fruitless to procure work. For every reason, then, we rejoice heartily that the selfishness of English landowners was insufficient to defeat this Bill, and that it carried so good a majority as 72 in a house of only 334 members in all. We earnestly trust that it will not be spoiled in committee by the same unscrupulous selfishness which on Monday night received so severe a check.

THE IRISH CHURCH.

The Irish have a host of imaginary grievances, of which they complain bitterly and loudly,—and one or two real grievances, of which they do not complain at all. There are some blessings which might be bestowed upon them, which they would resent as injuries and affronts, and some wrongs which might be redressed, without exciting any gratitude or producing much practical effect. They are, what Carlyle calls "inarticulately" conscious of *malaise* and misery, but they cannot distinguish whence it arises, and always lay it at the wrong door. They make a terrible outcry against Emigration, being unable to perceive that the expatriation of thousands to better climates and more hopeful prospects is the one only way to secure prosperity to the millions who remain. They mourn over the decrease in the cultivation of cereals,—unconscious that this is the most promising symptom of a return to a more natural and *paying* kind of agriculture—the first step to a sounder system and to brighter days. They clamour against the injustice of making Ireland pay more than its share towards the taxation of the Kingdom, and receive less than its share of public loans and current jobs; while it is demonstrable and demonstrated that their contribution to the revenue is smaller than, proportionally it ought to be, and that more national money, out of all proportion, has been voted for the aid of Ireland than for England and Scotland put together. Finally, they put forth, as their grand grievance of all, the refusal of what they call "tenant-right;"—but cannot be made to see that, whatever of just and feasible lies at the root of their demands, they have contrived to wrap up in such a confused mass of pretensions that are utterly unreasonable and inadmissible, as to put them and their advocates out of court whenever the subject comes on for grave and practical discussion.

If we were called on to specify the real wrongs and grievances of Ireland at this moment,—those which England might, if she would, redress,—and the rectification of which would probably be of real service, we should name three; but the amendment of two of these the majority of Irishmen would denounce as an outrage and affront, and the third they care little about, except as a topic for anti-Saxon denunciation. The state and organisation of the Constabulary is a real and most grave mischief. As a semi-military corps it is admirable; as a means of suppressing tumult and rebellion it is *potentially* excellent and efficient (although recent occurrences at Belfast might incline us to question even this latent value), but as a body for the prevention and detection of crime—even crimes of violence and outrage—it is notoriously, ludicrously, and almost absolutely useless. Yet this is generally considered to be the first function of a police force, and Ireland surely pays enough for her constabulary to be entitled to look for the protection of life and property at its hands. The institution of trial by jury, as *indiscriminately* applied, is in the present state of Ireland, one of its worst grievances. We have seen from time to time, and within the last week or two have again been most forcibly reminded, that in one whole set of cases it amounts to a practical and total denial of justice, to a practical immunity for crime. Now, justice and the punishment of crime we hold to be the right of every Irishman as of every Englishman; and we consider that Ireland has a right to complain of persistence in a system which practically reduces this right to a nullity. Lastly, there is the Irish Church,—the greatest, most patent, most indefensible abuse, of which that country

Digitized by Google

has to complain;—and yet we venture to say that, since the tithe was commuted to a rent-charge and made payable by the landlord, no one of the grievances of Ireland has been so little felt and so little resented by the great body of the people. It is possible enough that little actual material benefit might accrue to the peasant by the reduction or abolition of the Establishment;—for with the keen demand for land which exists in Ireland, it is more than probable that the whole of the tithe-charge, if remitted by the State, would go into the pockets of the landlord. And it now seems more than doubtful whether the surplus revenues of the Church, if still collected (as of course they would be) *would* be applied in payment of the Catholic clergy, so as to exonerate the peasants from contributing to their support;—for, in the first place, the priesthood have virtually declared that they would not accept subsidies from the State, if accompanied by those restrictions and securities which could not be dispensed with;—and, in the second place, even if they did, it is by no means certain that they would not still demand from their flocks those fees and offerings which now, in some cases, form nearly the whole of their receipts. The priests would, no doubt, be better off; but whether the cultivators of the soil would be so, is by no means so clear. Thus much, however, is certain—that the maintenance as a State Church of a religion which is the religion of a small minority—of 700,000 out of 5,800,000—is an unjustifiable anomaly;—and that the 600,000*l* a year, of which its revenues consist, might in some way or other be applied to the improvement and relief of Ireland.

The debate on Tuesday last on the subject of this Establishment was valuable and will be memorable. It was distinctly avowed by both the Ministerial speakers, Mr Gladstone and Sir George Grey—both earnest adherents of the Church of England, though usually considered to represent different sections of it—that the establishment as a State Church of a Church to which only a small minority of the people adhered, was in the abstract indefensible and unjust. It could not even be argued for, it was admitted, except on the ground of its being a missionary church; and missionary functions, it was allowed, the Church in Ireland had not performed, and did not and could not perform. Mr Gladstone put the question, as he always does when he wishes, in the clearest and strongest light. Mr Dilwyn's resolution consisted of two parts,—*first*, the abstract assertion that the position of the Established Church in Ireland was unsatisfactory and indefensible; and *secondly*, the practical inference that it was the duty of the Government to undertake to deal with it. The Chancellor of the Exchequer frankly accepted the assertion, and as frankly repudiated the inference. He refused to admit that the Government were called upon to deal with what they admitted to be an anomaly; and he did so pretty much on the same plea that Mr Lowe used in arguing that we ought not to defend Canada;—*Nemo tenetur ad impossibile*. And we think he was right as clearly as we think that Mr Lowe was wrong. It is the duty of the Government to grapple with every question which they can master, and on which action can do good. It is not their duty to grapple with any on which they would be powerless, or could be powerful only for mischief. They can, after all, only do what the state of feeling and opinion in the country will permit them to do; and if on any question they are far in advance of the general enlightenment, the best course obviously is to leave action alone, and by argument, by exposition, by the expression of their sounder and loftier views on all fitting occasions, to educate the country by degrees till it will suffer justice to be done and anomalies to be removed. On the subject of the Irish Establishment the Statesmen of England have always been half a century at least ahead of the people of England. Mr Pitt, in 1801, would have paid the Catholic priests, but a bigoted monarch, backed by a bigoted people, proved too strong for Mr Pitt, even in the height of his supremacy. The Whigs in 1834 were in the hey-day of their ascendancy, and had a vast majority for nearly every measure they ventured to bring forward. But no sooner did they propose to touch the surplus revenues of the Church of Ireland, or even to hint that there could be such a thing as a surplus, than they aroused a combination of fanaticism, ignorance, and interest, before which they had to retreat baffled, discomfited, and greatly weakened. Would the result be at all different now? How many English clergymen, whether workers or dignitaries, could now be found who would not oppose, tooth and nail, any scheme for the reduction or abolition of the Establishment in Ireland? And we all know how almost impossible it would be in England to carry any measure against the *united* opposition of the Church Party. What would the Scotch Presbyterians say to paying the Catholic clergy out of revenues wrung in the main from the industry of Catholic cultivators of the soil?—and yet if you do not do this, half the abstract argument and half the practical object for dealing with the Irish Church would be cut away. What would be the feeling of the orthodox dissenters, who form the strength of the middle classes, and who in so many instances determine the elections in the largest borough constituencies, if a Liberal Ministry were to propose to endow or to aid a priesthood whom they have been taught to regard as the servants of the devil or of Antichrist? They would have no objection to destroy an establishment, because they belong to the "Voluntary" school; but to destroy it for the behoof of Catholicism would be an abomination in their eyes. Looking at all these things—at the faint and divided and quarrelsome support which any wise and just plan for dealing with the Irish Establishment would meet with even from Irish members—at the fierce outcry it would raise throughout Scotland—at the obstinate animosity it would encounter from the earnest and determined of the middle-class Dissenters—at the concentrated and organised opposition it would meet with from the English Church—it is quite certain that no Ministry could deal with the question with the faintest hope of achieving success, or of doing good. We must wait till the principles of justice, of toleration, of enlightened sense, have germinated more widely, and grown to robuster stature among the English people. Till then, Ireland will continue to have one real grievance against which she will be entitled to remonstrate, and as to which we shall always be ready to echo her remonstrances. The debate of Tuesday will, however, have done good. It is a great thing to hear Ministers say candidly to the Sister Island: "We admit your grievance; but we are simply powerless to redress it."

THE REPORT OF THE BANKRUPTCY COMMITTEE.

We would direct the particular attention of our readers to this important Report. Next week we hope to lay before our readers a careful criticism of its valuable recommendations.

The Select Committee appointed to inquire into the working of the Bankruptcy Act (1861), and to report thereon, have considered the matters to them referred, and have come to the following resolutions, which they have agreed to report to the House:—

Matters prior to Bankruptcy.

Resolved:—

1. That the imprisonment of debtors at the suit of the subject to compel the payment of money, under any judgment decree or order of any Court, should be abolished.

2. That a creditor under any judgment decree or order should have the same power of arresting the person of his debtor, who may be about to quit the kingdom, as a creditor now has before judgment, under the Act 1 and 2 Vict., c. 110; and the debtor should be detained in custody until he has either given security or paid the demand, or been discharged in due course of law.

3. That the power of an execution creditor to enforce the payment of a debt above 50*l* should be extended to any sum due under any judgment decree or order of a court of justice.

Adjudication of Bankruptcy.

4. That adjudication of bankruptcy should be made by a Court in the metropolis, or by a County Court.

Proceedings on Adjudication.

5. That the office of official assignee should be abolished.

6. That on adjudication, the property of the bankrupt should remain in his charge in trust for his creditors, without power of alienation, until the appointment of a trustee, or other special order.

7. That the Court of Adjudication should be empowered to order such measures to be taken as may be necessary for the safe custody of the property, and the disposal of it between adjudication and the appointment of a trustee.

8. That any creditor should only be entitled to vote on proceedings in bankruptcy in respect to the balance due, after deducting the value of all securities for his claim, including Bills of Exchange, and other obligations, as provided in the Bankruptcy Act of Scotland.

Digitized by Google

Administration of Assets.

9. That the creditors should meet as soon as possible after adjudication, and those who have verified their claims should elect a trustee.

10. That they should, at the same time, elect two or more inspectors from their own body to superintend on their behalf, without remuneration, the proceedings of the trustee.

11. That the estate of the bankrupt should vest in the trustee on his appointment, and he should possess full power to collect and realise the estate and distribute it amongst the creditors.

12. That the trustee should be empowered to admit or reject the claims of any creditor, and any creditor should be at liberty to appeal to the Court of Adjudication against such decision.

13. That when an appeal from the rejection of the trustee shall not be made within a reasonable time, the creditor should be finally excluded from the dividend thereupon made, but without prejudice to a proper adjustment of his claim if afterwards admitted at any future dividend.

14. That the trustee should keep a proper record of the proceedings, and present accounts periodically to the inspectors, and afterwards to the accountant in bankruptcy, showing the administration of the assets.

15. That the trustee should give security for the performance of his duty, and be paid a reasonable remuneration, to be fixed by the creditors.

16. That the Court of Adjudication should have power, on the application of a creditor or of the trustee, to make the orders necessary to compel a due compliance with the provisions of the Bankrupt Laws.

17. That the accountant in bankruptcy should be required to examine all such accounts as the trustee may be required by law to file, and to issue in each case such directions as may be necessary for the due accounting by the trustees. Such directions to be enforced by the Court of Adjudication.

Discharge of Bankrupt.

18. That whenever the bankrupt shall have made a full disclosure of his dealings and affairs, and a surrender of all his property to the satisfaction of the Court of Adjudication, and shall have paid a dividend of six shillings and eight pence in the pound to those creditors who have proved their debts under his bankruptcy, he should be freed from all claims capable of proof in the bankruptcy.

19. That in all other cases in which a bankrupt shall have made a full disclosure of his dealings and affairs, and a surrender of all his property to the satisfaction of the Court, he should be freed from all such claims after the expiration of six years from the date of the adjudication.

20. That the payment by the bankrupt, after the adjudication, to all his creditors who have proved under the bankruptcy, of such an amount as will, together with what is actually paid under the bankruptcy, make up the dividend required by the 17th resolution, should have the same effect as if the whole of such dividend had been paid under the bankruptcy.

Punishment of Bankrupt.

21. That such wilful acts of debtors tending to delay or injure their creditors as shall be declared by law criminal, should be made punishable only in the ordinary criminal courts of justice.

Administration under Deed.

22. That where a deed is to have the effect of binding creditors who have not executed it, the Court in which it is registered should have jurisdiction to determine whether it has been duly executed, or is, in other respects, valid.

23. That the summary jurisdiction should be exercised by the Court which would have exercised the jurisdiction in Bankruptcy, and every creditor should prove his debt, in respect of which the deed is signed, before such deed shall be deemed binding on any creditor who has not executed it.

24. That the amount of the debt to be proved should be ascertained in the manner provided in Resolution number eight.

25. That no deed of assignment should be binding upon any creditor who has not executed it, unless all the estate and affects of the assigner, which in case of bankruptcy would have vested in the trustee, shall have been thereby assigned for equal distribution among the creditors.

26. That no such deed of composition, assignment, or inspection, should discharge the debtor from debts due to creditors who do not execute it, unless all the creditors receive a dividend of at least 6s 8d in the pound, or else until six years shall have expired from the date of such deed.

Courts of Bankruptcy and Officers.

27. That there should be established a Court of Bankruptcy in the metropolis, and the judges of the Superior Courts of Equity and Common Law should sit as judges in that Court.

28. That there should be an appeal to the Court of Bankruptcy from all orders of a County Court, or of a single judge in the metropolis, relating to matters above the value of 20*l*, and from all other orders when the judge shall allow a special case for appeal.

29. That there should be a chief accountant, who should supervise the accounts of trustees, and perform such other duties as are provided for in the Bankruptcy Act of Scotland.

30. That the present Metropolitan and District Courts of Bankruptcy should be abolished as soon as practicable.

Consolidation.

31. That the Bankrupt Laws should be amended in the above particulars, and be consolidated.

THE WONDERFUL FERTILITY OF THE REVENUE.

NOTHING can be more wonderful than the revenue tables, which reach us while we write. Last year, Mr Gladstone estimated that the revenue would be 69,460,000*l*, if no alterations were made in the taxation, and he then made the following estimated reductions of income to take effect within the year:—

	£
Sugar	1,330,000
Income tax	800,000
Fire insurance	192,000
Tea licences, &c.	10,000
	2,332,000

So that the final estimate of income was 67,228,000*l*.

	£
The actual result of the year is	70,313,436
Less estimate	67,228,000
Excess of reality over anticipation	3,085,436
The Customs are above the estimate in round numbers	£ 750,000
Excise	1,500,000
Micellaneous	750,000
Total	3,000,000

And the other changes about counter-balance one another.

The broad result is, that Mr Gladstone took off last year,—

	£
Taxes (the abolition of which was estimated to reduce income)	2,332,000
Taxes to be made up by increased consumption	387,000
Total	2,719,000

And yet after this vast diminution of taxation, in consequence of increased consumption and augmented prolificness of remaining taxes the revenue of the year just ended is 100,000*l* more than the revenue of the year before that.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 30th inst. The return for the previous week is added:—

DEBTOR.	March 30, 1865. f c		March 23, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0

	1,209,279,294	36	.....	1,271,348,099	67

The Bank return presents another increase of 10,735,000f in the stock of coin and bullion, but for the first time for nine weeks it shows also a not inconsiderable augmentation, 33,729,000f, in the amount of bills discounted. In the circulation of notes there is a decline of 9,773,000f. The deposits have augmented by 9,386,000f, and the account current of the Treasury by 36,972,000f.

The Bourse has been somewhat agitated, but towards the close of business to-day it became rather firm. The following are the quotations :—

The Government has presented to the Corps Legislatif a Bill for reforms in the Merchant Navy, and one for modifications in the law relative to companies. The former is on the bases recommended by the Superior Council of Commerce, the substance of which has already been communicated to you: the latter allows companies on the limited liability principle to be formed without the intervention of the Government whatever their capital, lessens the responsibility of Boards of Surveillance in companies *en commandite*, punishes the declaration of fictitious dividends, inflicts a a fine of 500f to 10,000f on persons who figure in meetings as shareholders without really possessing shares, and contains various other enactments.

It is said to-day, but not officially, that the Italian Parliament has adopted the ministerial proposition for the sale of railways and for raising a new loan. The decision is a wise one. A different course of action would probably have alienated from Italy the eminent capitalists who have already rendered her important services, and of whom she has great need.

The new Tunisian loan, undertaken by the Comptoir d'Escompte, has obtained complete success, the 73,568 bonds representing it having been subscribed in a single day. This was to be expected from the influence of the Comptoir, from the high rate of interest offered (nearly 12 per cent.), and from the abundance of unemployed capital. The Comptoir, it is understood, will receive from the Tunisian Government a very high commission, —higher *dit-on* than any that has yet been got out of loans to Egypt, Turkey, Mexico, or other hazardous borrowing countries. Assuredly the directors of the establishment did well in securing this commission for their shareholders, especially as the Comptoir has given no sort of guarantee for the loan, beyond the moral one of acting as agent for the placing of it. Nevertheless they are severely blamed in certain quarters, because it is said, though the Comptoir is authorised by its statutes to "open subscriptions for public loans," it ought to confine its operations in such matters entirely to France; because as France has already suffered severely from undertaking abroad greater enterprises than her resources allow, it is wrong to send another large sum out of the country; because the offer of excessive interest for a foreign loan is calculated to render the petty capitalists, among whom the Comptoir's connection chiefly lies, dissatisfied with the much more moderate investments the *rente*, railways, and other French undertakings present; and lastly, because there is risk in lending to a semi-barbarous country like Tunis, especially as it has just been distracted by a grave insurrection. As, however, these objections emanate from great capitalists, who would gladly have contracted for the loan if it had been offered to them, they are regarded by most persons as of no more value than the fox's opinion about the sourness of the grapes which he could not catch. The Comptoir itself treats them with great indifference, as up to the present moment it has not vouchsafed any public answer to them.

The annual meeting of the shareholders of the Credit Mobilier, which was to have been held on the 27th April, has been postponed to the 15th May. in consequence of the number of shares deposited not being sufficient to enable the meeting to be regularly constituted according to the statutes. This is the first time such a thing has occurred; and as the directors, by taking a little pains, might have prevented it if so minded, the supposition is that some purpose is to be served by the delay.

By its statutes the Credit Mobilier is bound to deposit half-yearly an account of its situation at the Chamber of Commerce and the Tribunal of Commerce. Inquiries having recently been instituted, it turned out that no such deposit had been effected. Some adversaries of the Credit Mobilier having made this neglect the subject of much ill-natured criticism, the directors very wisely resolved to silence them by depositing the account for 1864. It is as follows:—

Assets.	f
Government stock (*rentes*), shares, and bonds	50,545,603
Bills, &c., to receive	4,730,792
Advances to companies and various persons	54,881,993
House and furniture	2,649,993
Dividends to receive	1,126,144
Cash	9,589,084
Balance at the Bank of France	28,672,422
	172,166,031
Liabilities.	
Capital	60,000,000
Deposits and various creditors	95,383,761
Bills, &c., to pay	6,786,057
Rediscount of bills	70,794
Interest and dividends in arrear	57,212
Reserve fund	2,000,000
Balance of account of profit and loss	7,868,207
	172.166,031

Of the 7,868,207f profits, 3,000,000f have already been paid at the rate of 25f per share; of the remainder, the directors take 10 per cent., making 486,220f; and the balance, 4,381,387f, would allow 36f 50c per share to be distributed, provided the directors should consent to be without any reserve beyond that fixed by the statutes (2,000,000f). As this, however, is not at all likely, the supposition is that only 30f or 25f will be given. But up to the present moment, as I am informed on authority, no decision on the point has been come to. Some persons think it would not be prudent to declare any dividend at all. The above balance sheet contrasts unfavourably with that of 1863. The latter showed that the *rentes*, shares, and bonds held were worth 77,800,000f, the advances to companies only 44,000,000f, the deposits 107,000,000f, and the profits about 19,000,000f. In consequence the balance sheet of 1864 has produced a bad impression.

In the annual meeting of the shareholders of the Western Railway, which has also been held this week, the revenue for 1864 was fixed at 39f per share, of which 17f 50c have already been paid on account.

The Compagnie Centrale d'Eclairage par le Gaz, the object of which is to construct and carry on gas works in provincial and foreign towns, will distribute a dividend of 41f per share for 1864. It is equal to 8.20 per cent. This company is entirely distinct from the Parisian Gas Company, and is under the direction of M. Lebon.

The directors of the Credit Foncier have resolved to propose a dividend of 47f 50c for 1864. Of this sum 12f 50c have already been paid on account.

The annual meeting of the shareholders of the French Transatlantic Company is convoked for the 29th April.

The quantity of alcohols manufactured and imported from the beginning of the season on the 1st October to the 28th Feb., was 940,575 hectolitres, and on adding the stock on hand at the preceding date there were 1,145,590 to dispose of. The quantity taken for consumption was 726,263, and there remained a stock of 419,327. The hectolitre is rather more than 22 gallons.

The treaties of commerce and navigation concluded between France and the United Kingdoms of Sweden and Norway on the 15th February last for twelve years, have been promulgated, and are to come into operation on the 15th April. The former provides for the reduction of the import duties in the two kingdoms on French wines and brandies, and on certain other articles, and extends to Norwegian and Swedish productions in France the same duties as are paid by English, Belgian, and Italian articles of the

Digitized by Google

same kind. In tissues and a few other articles Sweden and Norway are to make further reductions in 1866, and again in 1867 and 1868. The treaty of navigation declares that the vessels of each contracting party in the ports of the other shall not pay any other taxes than those imposed on native ships, and shall be treated in exactly the same way in all respects; also that the same stipulation shall extend to the goods imported or exported by them. As, however, Norwegian and Swedish ships in their own country have to pay tonnage and lighthouse dues, and as consequently French ships going there will have to do the same, it is enacted that the former in France shall pay 75c per ton, although such dues are not imposed on French vessels. Each treaty contains a "most favoured nation" clause.

There is great room for improvement in the trade between France and Sweden and Norway, and it is to be hoped the treaty will effect it. In 1863 (the latest year to which official returns extend), the value of Swedish goods imported into France was only 25,002,723f, and of Norwegian 33,609,620; whilst French exports to the former country were not more than 4,761,369f, and to the latter than 4,872,704f.

A decree, dated the 25th, declares the stipulations of the treaty of commerce with Sweden and Norway applicable to England, Belgium, and Italy; and two other decrees declare applicable to Swedish and Norwegian tissues and articles imported into France, various regulations relative to the commerce with the said three countries. Another decree of the 25th enacts that Swedish and Norwegian goods imported into France, otherwise than in French, Swedish, or Norwegian ships, or by land, shall pay 25c per 100 kilogs, when they are free from import duty, or are taxed at less than 3f the 100 kilogs, and to the surcharges heretofore in force under the law of April, 1816, when they are taxed at more than 3f.

An important firm in the trade in cotton tissues, in the Rue du Sentier of Paris, has suspended payment, with it is said liabilities of between 5,000,000f and 6,000,000f, but with assets of 75 per cent.

The Imperial Court of Paris has just decided that the acceptors of a forged bill of exchange are bound to pay it. The decision was given in an action brought by Messrs Baring and Co., of London, against Messrs Fould and Co, of Paris, for payment of a bill of 83,091f, purporting to be drawn by Messrs de la Cruz and Co., of Havana, which they had accepted, but which afterwards turned out to be a forgery made by one of the agents of the Havana firm. Messrs Fould and Co. disputed their liability on the ground that an acceptance given to a fraudulent bill ought to be considered null, the instrument itself being worthless.

A second edition of "*Le Pauperisme et les Associations de Prevoyance*," by M. Emile Laurent, has been issued by Messrs Guillaumin and Co. The Academy of Moral and Political Sciences considered the first edition of the work so meritorious that it awarded it a prize, or, to use the phrase employed here, "crowned" it. M. Laurent rightly holds that the only effective remedy for pauperism is in the prudence and foresight of the working classes themselves; and he accordingly recommends strongly the formation of mutual benefit societies. He at the same time gives a detailed account of such societies that have been formed in England, France, and Belgium; examines their regulations, analyses the laws in force relative to them, presents the results they have attained, &c. He, moreover, describes how their office of utility can be enlarged. The book is the most complete one of the kind that has been issued on the Continent, and it is well worthy the attention of all England who in any way occupy themselves with friendly societies.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended March 31 1865, compared with the corresponding periods of the preceding year.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs Sharp and Co., writing from Hong Kong, on February 15, thus allude to the bullion movements at that port for the fortnight ending with the above date:—Gold—The amount received since last report is $450,000, mostly from San Francisco and Australia. The value exported, including the shipments per Emeu on the 1st instant, and excluding those to leave to-morrow, is $430,000. The price has risen as rupee bills have declined. The quantity for despatch by outgoing mails must be larger than usual. Silver—There has come to hand in bar silver and sycee about $260,000, and there has been sent away some $140,000. The difference may most likely be included in the freight list of this mail steamer, as silver is in demand to-day for Indian remittance. Dollar Currency—Sums imported $470,000; sums exported $160,000. Were money at all in demand, clean coin would now go into circulation, the premium value being very trifling. Discounts and Mortgages—The value of money in Hong Kong is now almost identical with the rate in

Digitized by Google

Lombard street, and it is believed that the terms on which large transactions have been made during the fortnight have not been matched for cheapness since the colony was founded. Exchange—The final conclusion of the tea season, the small supply of silk, and the difficulty of investing funds to any profit have combined to produce a further fall in rates of two per cent. Exchange and Bullion—Closing Quotations:—On London, 6 months' sight, 4s 6¾d; ditto, 3 months' sight, 4s 5¾d; India, 3 days' sight, 215 rs; ditto, 10 days' sight, 215½ rs; ditto, 60 days' sight, 220 rs; Shanghai, 3 days' sight, 72 tls; ditto, 30 days' sight, 72¾ tls; Singapore, 30 days' sight, ½ per cent. prem.; Paris, 60 days' sight, 5.70f. Bar silver, 17 dwts B., 10½ per cent. prem.; Scyee, 9 per cent. prem.; Mexicans, ¼ per cent prem.; gold leaf, $22.95 per tael; gold bar, $22.90 per tael, equivalent 100 touch; sovereigns, $4.50 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 29 per cent. prem.

Annexed are the returns of the Bank of Bengal for the weeks ending Feb. 7 and Feb. 14, 1865:—

Liabilities.	Feb. 7.	Feb. 14.
Proprietors' capital, paid up	£2,200,000	£2,206,000
Reserve fund	176,513	176,513
General treasury balance at head office	602,876	563,034

Transmitted to U. S. mint Philadelphia, for coinage		408,249 65

The annual statement of the hog packing business of the Western States of America has been published. The result shows a large falling off as compared with last year, the entire number packed in Ohio, Indiana, Iowa, Illinois, Wisconsin, Missouri and Kentucky being 906,105 below last year's figures. There is, however, a slight increase in weight, both of hogs and in the yield of lard. The number of hogs slaughtered in each State was as follows:—

	1863-4.	1864-5.
Ohio	621,935	498,852
Iowa	347,431	176,807
Illinois	1,290,490	985,784
Kentucky	126,019	118,267
Indiana	399,197	251,287
Wisconsin	160,076	121,128
Missouri	383,736	270,654
	3,328,884	2,422,779
	2,422,779	
Decrease	906,105	

The general average weight of hogs and yield of lard, for the whole West, this season, are—Of hogs, 195 3-16 lbs, and of lard, 24 1-9 lbs, which compare with the general averages last season as follows:—1863-4, of hogs, 188 26-29 lbs; of lard, 22 1-7 lbs. The increase is equal to about 3¾ per cent., which, being deducted from the decrease in number, makes the net decrease in the crop 23½ per cent. as compared with last season; 56 per cent. less than the large crop of 1862-3; 94½ per cent. less than that of 1861-2; and 4½ per cent. less than that of 1860-1. In the yield of lard the general average for the whole West is 25 1-16 lbs per hog, exclusive of head and gut, which is a slight increase as compared with last year.

The following are the railway calls for some of the American railways for February:—

	Miles open.	1864 dols.	1863. dols.	Increase. dols.	Decr. dols.
Atlantic and Great Western	322	387,648	229,041	158,607	...

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 29th day of March, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,224,100	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,574,100
		Silver Bullion	...
	29,224,100		29,224,100

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,923,637	Other Securities	21,150,843
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	2,839 430	Notes	9,272,780
		Gold and Silver Coin	784,899
Other Deposits	13,478 242		
Seven Day and other Bills	437,424		
	42,231,733		42,231,733

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,388,744	Securities	32,271,054
Public Deposits	9,839.430	Coin and Bullion	15,358,999
Private Deposits	13,478,242		
	43,706,416		47,630,053

Dated the 30th March 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,923,637*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£359,853
A DECREASE of Public Deposits of	359.559
A DECREASE of Other Deposits of	73,552
No change in Government Securities.	
A DECREASE of Other Securities of	113,568
An INCREASE of Bullion of	50,363
An INCREASE of Rest of	10,053
A DECREASE of Reserve of	327,462

The Bank return for the week shows few changes. There is a decline in the amount of the public and of the private deposits. The reserve has been reduced to the extent of 327,462*l*, but there is an addition of 50,363*l* in the stock of coin and bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20,354,622	£ 21,501,595	£ 20,965,228	£ 20,908,644	£ 20,388,744
Public deposits	5 384,834	8,456,468	10,107,041	10,280,458	9,839,430

Digitized by Google

In the corresponding week of 1855, the Vienna Congress was still sitting. The visit of the Emperor and Empress of the French to London had been arranged, on the invitation of Queen Victoria. Great uncertainty prevailed as to the prospect of a speedy conclusion of the Russian war.

In 1862, the Bank of France had reduced the rate of discount from 4 to 3½ per cent. In Berlin, a royal decree had been issued for the conversion of the 4½ per cent. loan of 1850-51 into a 4 per cent. stock. Information had been received in London of the destruction of Federal vessels of war by the Confederate States' armour-plated steamer Merrimac, and of the subsequent fight of the Merrimac with the Monitor, in which the former had been worsted. Proposals had been issued by the Ottoman Bank, and by Messrs Charles Devaux and Co. for a Turkish 6 per cent. loan of 8,000,000*l.* at 68 per cent., redeemable by sinking fund in 23½ years.

In 1863, the Bank of France had reduced its rate of discount to 4 per cent. General Langiewitz had quitted Poland, after an unsuccessful action with the Russians, and had surrendered to the Austrian troops. A fall from 172 to 152 in the premium on gold in New York had taken place on the legislative enactment of the Congress, that no advances should be legal on deposits of gold above par value.

In 1864, the siege of Düppel was being continued, and an attack made by the Prussians had been repulsed after five hours' severe fighting. England's proposal for a Conference without an armistice had been accepted by Austria, Prussia, Denmark, France, and Russia. An important engagement between the Russians and Poles had taken place in the government of Radom. A treaty of commerce between Japan and Switzerland had been prepared. The ministerial measure for the abolition of the tobacco monopoly had been passed by the Cortes at Lisbon. In America, Lieutenant-General Grant had been appointed to the command of the armies of the United States, and had taken up his head-quarters with the army of the Potomac. The Confederates were collecting a large army in North Carolina. Great dulness prevailed in the English stock markets. The demand for discount at the Bank of England was active.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,159,312*l.*; in 1862, a deficiency of 5,283,330*l.*; in 1863, a deficiency of 8,138,401*l.*; and in 1864, a deficiency of 9,540,384*l.* In 1865, the deficiency is 7,672,601*l.*

Discount and Money Market.—The Bank Directors at their meeting yesterday announced the reduction of the rate of discount to 4 per cent. As this measure had been fully anticipated, and as a further decline is looked for, no great increase in the demand at the Bank has taken place. Notwithstanding the close of the quarter, exceptional transactions are noted at 3⅞ per cent. The failure of the large East India house of Nelson, Tretton, and Co., with liabilities of about 1,000,000*l.* was reported in the course of the day; but events of this nature are only calculated to contract trade within still narrower dimensions, and to reduce the market value of money by adding to the amount of unemployed capital. No news has been yet received leading to a conclusion that the lock out will promptly cease; and, meantime, the influx of coin from the Indies and from Egypt, whither we have till lately exported large sums, continues. The exchanges are still firm, little reaction being noted since the reduction of the rate to 4 per cent.

Annexed are the current discount charges on paper of various dates:—

30 to 60 days	4 per cent.
3 months	4 per cent.
4 months	4¼ per cent.
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	5 per cent.

In the Stock Exchange money is plentiful, and the rate for short loans on Government securities is about 3½ to 4 per cent.

The joint stock banks and discount houses have lowered their rates for money on deposit from 3½ to 3 per cent. The London and Westminster Bank only allow 2 per cent. on sums below 500*l.*

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the on and Westminster 2 per cent. only on sums below 500*l.*

The following are the current discount rates quoted on the chief continental exchanges. In Turin, a reduction of 1 per cent. has taken place, but in Paris there is a little better demand at near the Bank rate.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	5
Brussels	3½	3 ½
Madrid	9	...
Hamburg	...	2
St Petersburg	6½	...

Bullion.—The steamer Atrato has brought 455,000*l.* in specie from the West Indies, and 65,000 sovereigns from Egypt have to-day been sent into the Bank.

The following changes result from a comparison between the returns of this and the past week issued by the Bank of France.

Increase.	£
Cash in hand	426,660
Commercial bills	946,666
Treasury balance	1,480,000
Current accounts	376,000
Advances	88,000
Decrease.	
Notes	392,000

English Government Stocks.—A rapid improvement on the earlier prices of the week has followed the announcement of a reduction in the Bank rate. The purchases of the Government broker, which terminated yesterday, have also aided the market by relieving it of a considerable amount of surplus stock. The arrivals of specie and bullion contribute to additional firmness. After advancing to 89⅞, Consols close slightly lower. Investments on the part of the public are few, and exchanges of Government securities for higher dividend-paying stocks are still frequent. The closing quotation this evening is 89¾ to 89⅞ for Consols; New 3 per Cents. and Reduced, 87¾ to 88; and India 5 per Cents. 105¼ to 105½.

The price of Exchequer bills is still quoted without any change, 3s to 6s prem. India bonds 10s to 15s prem.

Foreign Stocks have largely participated in the improved tone communicated to the markets by the anticipation of cheaper money. Securities that have been unheeded during the speculation in shares of the new and financial companies wear a firmer appearance, and are quoted at higher prices than for some time past. Turkish stocks are in constant demand by small as well as larger investors, and all classes of the foreign debt are noted at advanced prices. The Consolidés are also higher. New Granadian securities have improved, owing to the confidence inspired by the arrival of General Mosquera in this country. Mexican stock has been in request at improved quotations, and is attracting the attention of investors now that the Imperial Government appears to be acting firmly and in accord with the necessities of the country. Italian scrip of the last loan has risen about 1 per cent. from the recent depressed quotations. Spanish Certificates, on the other hand, are dull, as there are no signs of any satisfactory results from the negotiations attempted with a view to obtaining an adjustment of the claims of the coupon holders by the Government of Spain. Egyptian stocks are firm, and considerable investments have within the past few days materially reduced the amount in the hands of dealers. The closing prices of stocks dealt in to-day are subjoined:—Brazil 4½ per Cents., 82 to 84. 6 per Cent. Columbia, 82 to 84. Ecuador 1 per Cent. new Consolidated, 12 to 13. 7 per Cent. Egyptian, 95 to 96; ditto 1864, 97 to 98. 5 per Cent. Greek, 21 to 21½. Italian scrip, 2¾ to 2¼ dis. 3 per Cent. Mexican, 26⅞ to 27. 2 per Cent. New Granada, 29 to 30. 4½ per Cent. Peru, 81 to 83. 3 per Cent. Portuguese, 47¼ to 47¾. 4½ per Cent. Russian, 86 to 87; 5 per Cent. ditto, 1862, 89 to 90; ditto 1864, 91 to 92. 3 per cent. Spanish Deferred, 40¾ to 41¼; ditto Passive, 32¼ to 32½; ditto Certificates, 16⅞ to 17⅛. 6 per Cent. Turkish, 1864, 94 to 95; ditto 1862, 74 to 74½. Venezuela 6 per Cent., 1862, 40 to 42. Wallachian, 5 per Cent. 64 to 64½.

French 3 per Cent. rentes continue to advance; the closing price this evening from Paris is 67.45.

Railways and Other Shares.—Home railway stocks have shown great buoyancy during the week. The traffic returns on the Metropolitan, the North-Eastern, and London and North-Western lines have materially contributed to this result by inducing investments on the part of the public. There has also been some disposition to repurchase oversold accounts which had been entered into a few weeks back in consequence of the continuance of the lock out, and when the prospect of cheaper money was less likely to exercise immediate influence on stocks. It is to be anticipated that the low rates allowed on deposits will have the effect of reducing the sums in the hands of the banks and discount houses, as many of the best railway securities offer such higher dividend returns than can be obtained at current terms by depositors.

Indian stocks have also advanced, and a large number of purchases have been made.

American stocks are higher. 5-20's have to-day advanced from 57 to 58, and Illinois are quoted at a further advance.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

Foreign Exchanges.—There was little alteration to-day, but the upward tendency was less marked.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The flow of gold into the Bank continues, and the stock of bullion in that establisment has been augmented during the week by about 102,000*l*. Further amounts will be sent in as the arrivals mentioned below are refined, there not being any demand whatever for export. The Ripon has brought 15,200*l* from Alexandria; the Kosciusko has brought 55,500*l* from Melbourne; the City of Baltimore has brought 8,000*l* from New York; the Atrato has brougnt 154,000*l* from the West Indies. The only export consists of 4,070*l* in soverigns, to Bombay. The Australian mail reports the sailing during the month of January of additional vessels to England, with gold to the value of about 205,000*l*. A sum of 67,000*l*, just arrived from Alexandria, will reach London to-morrow.

Silver.—The demand for the East has almost entirely ceased; this may be inferred, when we mention that the Bombay steamer, sailing from Southampton on the 27th inst., took out only 2,000*l* in bars to Bombay. The price has gradually declined from our last quotations of 61d per oz standard to 60⅝d per oz standard, at which rate a small parcel coming to hand was sold for Holland. Our market is now exceedingly quiet, and the silver, per Atrato, just arrived, about 178,000*l* in value, will, we fear, tend to depress the prices further. The Ripon has brought 11,400*l*, which consists of Doré silver transmitted from Calcutta.

Mexican Dollars.—The dollars, per Louisiane, mentioned in our last circular, coming upon a very flat market, caused a depression in price, and parcels were sold at 59⅜d per oz; and as the Atrato has just arrived with 123,000*l* from the West Indies, a further fall in the rate may be anticipated, should the greater part of the amount consist of Mexican coin.

Exchange.—The drawing prices on India continue very irregular. We quote them, for banks 1s 10½d to 1s 11½d; and for commercial 1s 10d to 1s 11d, 60 days' sight.

India Government Loan Notes.—Our quotations are about the same as those reported in our last circular. Prices are as follows :—108 to 110 for the 5½ per Cents., 100 to 102 for the 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d to per oz std, last price; Spanish doubloons, 73s to 73s 6d per oz, nominal; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 0⅝d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d to 5s 1d per oz std, last price; Mexican dollars, 4s 11⅜d per oz, last price; 5-franc pieces, 4s 11¼d to 4s 11½d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

Failures and Mercantile Embarrassments.—The suspension of the Portsmouth, Portsea, Gosport, and South Hants Banking Company has been announced. The liabilities are estimated at about 170,000*l*. The loss will fall on the shareholders, sixty in number, who are liable for the whole of the debt.

Vice-Chancellor Sir Page Wood has appointed Mr Lowell Price official liquidator of the Rolling Stock Company of Ireland (Limited).

Mr G. A. Cape has been appointed by the shareholders to wind up the affairs of the British and Foreign Gas Generating Apparatus Company.

The failure of Messrs Bremner and Co., in the East Indian and Brazilian trade has been announced, with liabilities estimated at about 150,000*l*. The assets are said to be good.

At a meeting of the creditors of Messrs Attwoods, Spooner, and Co., an offer made by the Birmingham Joint Stock Bank to take the assets and pay the creditors 11s 3d in the pound, was unanimously accepted.

Messrs Nelson, Tritton and Co., East India merchants, have stopped payment. Their liabilities are stated at about 1,000,000*l*.

Public Companies.—The amalgamation of the business of J. L. Moilliet and Sons, private bankers of Birmingham, with that of Lloyd's Banking Company (Limited), has been announced. The nominal capital of Lloyd's Banking Company will be augmented from 1,250,000*l* to 2,000,000*l*.

At the first annual meeting of the Home and Colonial Assurance Company (Limited), held on Wednesday last, a dividend at the rate of 6 per cent. per annum, free of income tax, was declared, and 100,430*l* 5s 1d carried forward.

The first annual meeting of the Thames Iron Works Shipbuilding, Engineering, and Dry Dock Company (Limited) took place on Thursday last, when a dividend of 10 per cent. per annum, free of income tax, was declared, and a balance of 11,692*l* carried to a reserve fund.

At the meeting on Thursday of the India Rubber, Gutta Percha, and Telegraph Works Company (Limited), a dividend of 10 per cent. per annum was declared.

The report of the Bank of British Columbia has been issued, in anticipation of the meeting to be held on the 4th proximo. The undivided profits for the half-year ended December last

Digitized by Google

are stated at 18,680*l*. A dividend at the rate of 10 per cent. per annum is recommended.

The ordinary general meeting of the shareholders of the Australian Mortgage Land and Finance Company was held on the 24th inst., when the report was adopted, and a dividend of 6 per cent. per annum declared.

The Union Steam Ship Company (Limited) have issued their report preparatory to the ordinary meeting. The directors announce that they entered upon the extended postal service to the Mauritius. The payment of the usual dividend of 20s per share is proposed.

A general meeting of the Loan, Trust, and Agency Company of South Africa (Limited) was held on Thursday. A dividend of 7 per cent. per annum was declared, and 400*l* written off preliminary expenses.

At the meeting of the Reliance Mutual Life Assurance Society, held on Thursday last, the increase of income by new premiums was stated at 7,582*l* 14s 11d. A surplus of 24,732*l* 14s was appropriated for bonus, subject to the usual reserve.

At the meeting of the City Assurance Company, held on Thursday, the directors' report was adopted. It was stated that 854 new policies were issued during the year 1864, producing an annual income of 6,597*l* 9s 7d.

The report of the British and Californian Company (Limited), to be presented at the first annual meeting on the 3rd April, has been issued. The available balance is stated at 3,869*l* 10s 3d. A dividend at the rate of 6 per cent. per annum, free of income tax, is recommended, which will leave a balance of 869*l* 10s 3d to be carried forward to new account.

The report of the directors of Smith, Knight, and Company, has been issued to the shareholders. A further payment of 3s 6d per share on account of dividend is recommended, being, with 2s 6d per share already paid, at the rate of 8 per cent. per annum.

At the meeting of the Crystal Palace District Gas Company, held on Thursday, the balance available for dividend was stated at 4,216*l*. A dividend of 6 per cent per annum on the preference capital and 10 per cent. on the ordinary capital of the Company was declared.

The first ordinary general meeting of the shareholders of the Albion Bank (Limited) was held on Tuesday last. The net profit for the half-year was stated at 2,405*l*. A dividend at the rate of 5 per cent per annum was declared, and 1,295*l* carried forward to next account.

At the first ordinary meeting of the shareholders of the Anglo-Egyptian Bank (Limited), held on Wednesday last, the report was adopted, and a dividend of 10 per cent. per annum, free of income tax, declared.

The Moyar Coffee Company—capital 75,000*l* in 15,000 shares of 5*l* each—has been introduced by the East India Financial Association. The object of this company is the cultivation of coffee in the South of India, chiefly on the slopes of the Neilgherry hills. The directors have provisionally purchased seven valuable estates in Malabar, two of which are freehold.

A company, entitled the London and South African Steam Ship Company, has been started for supplying merchants in London trading with the Cape of Good Hope with steam ship accommodation. The directors—most of whose names are well known—have secured a fleet of steamers, possessing considerable sea-going power, which they hope will accomplish the distance between London and Cape Town in the space of thirty days. The capital of the company is 150,000*l*, in 6,000 shares of 25*l* each.

The Saloon Steam Packet Company, the capital of which is 100,000*l*, in 20,000 shares of 5*l* each, has been brought forward with the object of providing iron passenger steamers for the Thames, similar to those now running on some of the American rivers. It is proposed to build them of various dimensions so as to afford accommodation to passengers both above and below bridge.

The directors of the Financial Insurance Company, which establishment was formed last year, with the object of extending the benefits of life, fire, and guarantee business generally throughout Great Britain, France, Europe, India, and the Colonies, and which has already secured a fair amount of business, are now offering the remaining shares to the public. The total capital of the undertaking is 1,000,000*l* in 50,000 shares of 20*l* each.

The Credit Foncier and Mobilier Company of England are prepared to receive subscriptions for the Millwall Freehold Land and Docks Company—capital 510,000*l*, in 25,500 shares of 20*l* each. The directors propose the purchase of upwards of 198 acres of freehold land at Millwall, for the purpose of constructing docks, capable of accommodating the largest vessels which are now built for commercial purposes.

The report of the directors of the Reliance Life Office states that during the year 1864, 790 policies were issued for assuring 233,530*l*, bringing in 7,582*l* 14s 11d new premiums. The total income of the Society for premiums and interest was 50,683*l* 10s 6d. The cash liability is 143,697*l* 4s, and the certified assets 168,429*l* 18s, showing a surplus of 24,732*l* 14s to be appropriated for bonus, subject to the usual reserve.

At the twelfth annual meeting of the Law Reversionary Interest Society, held on Friday, the report of the directors and auditors and the quinquennial account were adopted, and a dividend at an increased rate of 6 per cent. per annum was declared.

At the meeting of the British and South American Steam Ship Company, the directors' report, after some discussion, was adopted.

The meeting of the Royal Sardinian Railway Company, today, was numerously attended, under circumstances of greater than usual interest. Certain of the shareholders who refused to pay up the calls on their shares, have threatened proceedings against the directors, to obtain a return of their deposit and call money paid. After a discussion, in the course of which satisfactory explanations as to the value of the enterprise were given, a vote of confidence in the directors was passed without one dissentient voice.

At the first annual meeting of the Landed Estates Company, the report stated that 31,743*l* had been received in respect of alloted shares, and that a net profit of 11,301*l* 6s 6d had been realised. The directors recommended a dividend at the rate of 15 per cent. per annum, 10,381*l* being carried forward.

LONDON EXCHANGES ON INDIA, &c.

MARCH 27.

	60 days.		30 days.
Calcutta	1s 11¼d		1s 11¼d
Madras	1s 11¼d		1s 11¼d
Bombay	1s 11¼d		1s 11¼d
Mauritius	par		¼ p c pm
Colombo	½ p c pm		1 p c pm
Singapore	4s 8¼d		4s 9d
Hong Kong	4s 8¼d		4s 9d
Sydney	1 p c dis		½ p c dis
Melbourne	1 p c dis		¼ p c dis

Bills with documents attached against indents and consignments for India vary according to amounts, and the security which they offer.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

In consequence of the difficulty which has been experienced in deciding what is and what is not of intrinsic value, it has been thought expedient to rescind the prohibition against the transmission of articles of intrinsic value by the Inland Pattern and Sample Post.

On the 1st April next, and thenceforward, patterns or samples of merchandise may be transmitted by post between England and Amoy, Canton, Foo-Chow-Foo, Ningpo, Shanghai, Swatow, and Whampoa, by British packet, either via Southampton, or via Marseilles. The following will be the rates of postage, which must be prepaid by means of postage stamps, viz:—Via Southampton—For a packet not exceeding 4 ozs, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; above 1 lb and not exceeding 1½ lb, 2s; above 1½ lb and not exceeding 2 lbs, 2s 8d. Via Marseilles—For a packet not exceeding 4 ozs, 6d; above 4 ozs and not exceeding ½ lb, 1s; above ½ lb and not exceeding 1 lb, 2s; above 1 lb and not exceeding 1½ lb, 3s; above 1½ lb and not exceeding 2 lbs, 4s.

On the 1st April next, and thenceforward, patterns or samples of merchandise which can, at present, be sent to Malta, via Southampton only, may be sent, under the usual regulations, via Marseilles also, and either by British or by French packet, and patterns or samples for Alexandria, Cairo, or Suez, the transmission of which is now also limited to the Southampton routes, may be sent by the British packets from Marseilles. The postage chargeable on packets of patterns or samples, sent to Malta, Alexandria, Cairo, or Suez, via Marseilles, will be as follows:—For a packet not exceeding 4 ozs, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; above 1 lb and not exceeding 1½ lb, 2s; every additional ½ lb, 8d. This postage must, in all cases, be paid in advance.

On the 1st April next, and thenceforward, patterns or samples of merchandise may be transmitted by post between England and the undermentioned foreign places on the West Coast of Africa, viz.:—Benin, Bonny, Brass, Cameroons, Fernando-po, Nun, and Old Calabar. The following will be the rates of postage, which must be prepaid by means of postage stamps, chargeable upon such packets of patterns or samples, viz.:—For a packet not exceeding 4 ozs, 3d; above 4 ozs and not exceeding ½ lb, 6d; above ½ lb and not exceeding 1 lb 1s; above 1 lb and not exceeding 1½ lb, 1s 6d; above 1½ lb and not exceeding 2 lbs, 2s; every additional ½ lb 6d.

It having been found that the postage now charged on newspapers and other printed papers addressed to Tunis and Tangier is insufficient to defray the transit and sea rates which are paid to the French Post Office, augmented rates will be charged on the 1st April next and thenceforward.

On the 1st April next, and thenceforward, patterns or samples of merchandise may be transmitted by post, between England and the undermentioned Danish colonies in the West Indies, viz.:—St Thomas, St Croix, and St John's.

On and after 1st of April next, any packet whatever, with the following exceptions, posted for transmission from one part of the United Kingdom to another, which may be found to exceed two feet in length, or one foot in width or depth, will be stopped and sent to the Returned Letter Branch. The exceptions are as follows, viz.:—1. Packets to or from any of the Government offices or departments, or public officers. 2. Petitions or addresses to the Queen, whether directed to Her Majesty, or forwarded to any member of either House of Parliament. 3. Petitions to either House of Parliament, forwarded to any member of either House. 4. Printed Parliamentary proceedings.

On the 1st of April, and thenceforward, money orders will be issued at all money order offices in the United Kingdom on the under-mentioned offices in the colony of New Brunswick:—Bathurst, Bend, Chatham, Dalhousie, Fredericton, Newcastle, Richibucto, Sackville, Shediac, St Andrew's, St John, Sussex Vale, and Woodstock.

The mail steam packets under contract with the Swedish Government will commence their voyages between Hull and Gothenburg on Saturday, the 1st of April.

MAILS ARRIVED.

LATEST DATES.

On the 27th March, AUSTRALIA, per steam ship Kosciusko—Port Philip, December 31.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended March 25, 1865:—

	Quantities Sold. qrs	bush	Average Price. s	d
Wheat	71,992	5	38	4
Barley	52,863	4	28	8
Oats	8,162	1	21	1

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The trade for wheat at Mark lane, to-day, in consequence o the favourable change in the weather, was quieter than on Mon·f day. The demand was chiefly confined to dry samples of English wheat, and to good and fine old foreign produce; but all other descriptions were very inactive. Fine malting barley commanded rather more money, and oats, beans, peas, as well as flour, were firm in price. Inferior barley met a slow sale, at late rates. This week's imports amount to 3,260 quarters of barley, 2,820 oats, and 450 sacks of flour. There is no arrival of foreign wheat or barrel flour.

Both at Liverpool and Wakefield, this morning, the trade for wheat and flour exhibited less animation, but without leading to any material change in prices. Fine malting barley at the latter market realised an improvement of 1s to 2s per quarter as compared with Friday last.

The week opened with a very quiet feeling in the Liverpool cotton market, and prices daily declined until yesterday, when a better demand sprang up, and the sales, under the influence of a rumour that the stock of cotton had been greatly over-estimated, reached 12,000 bales, and prices advanced from ¼d to ⅜d. To-day the demand is well maintained, at about yesterday's rates. To-day the actual stock of cotton in Liverpool has been declared at 580,010 bales. Prices are 1d to 1¼d lower than last week

We have letters from Bombay dated the 28th of February. During the fortnight ending as above, the arrivals of *new* cotton had been tolerably large, and, for the most part, of satisfactory quality. The trade, owing to unfavourable intelligence from England, was dull, and a general fall took place in prices. Annexed are Messrs Nicol and Co.'s tables of prices and exports:—

CURRENT PRICES of COTTON at BOMBAY, Feb. 28.

Grand total	137,748½	100,206

The cotton trade at Calcutta, for the fortnight ending Feb. 20, was dull, and prices declined six to seven rupees per bazaar maund. Bengal produce was quoted at 18 to 22 rupees.

The demand for cotton at Madras from Feb. 11 to Feb. 25 was heavy in the extreme, and all descriptions changed hands at reduced quotations, Western produce having sold at 12⅛d; Salem and Coimbatore ditto, 13¼d to 13½d per lb. The stock was estimated at about 15,000 bales. According to Messrs Dymes & Co.'s circular, the quantity of land under cotton cultivation in the Madras Presidency in January was estimated at 1,594,160 acres, against 1,485,000 acres in the corresponding month last year.

From Tinnevelly to Feb. 25, we learn that the cotton trade was dull, at 240 rupees per candy.

The cotton trade at Rangoon on the 14th ult. was quiet, at 120 rupees per 100 viss. The total export from Jan. 1 to Feb. 14 was 19,745 viss, of which 16,675 viss were to Calcutta and other parts of India.

Advices from Shanghai are to Feb. 8. In reference to the state of the cotton trade, a report says:—There are not many buyers, and a small business has been done, at unsettled prices. Good lots receive more attention. Koongpoot is now coming to hand in very bad condition. There is no Ningpo offering. About 1,000 bales are the settlements. Koongpoot is quoted at 17 to 17 2.5 tls, and No. 1 dry Shangai 16.5 tls per picul.

The sales of cotton at Canton for the fortnight ending Feb. 13 were as follows:—Ningpo, 18 to 20.25 tls per picul; sales, 400 bales: Shanghai 17 to 19.50 tls per picul; sales, 2,600 bales.

At Hong Kong, the transactions during the same period were:—Shanghai, $25 to $26; Ningpo, $26 to $27 per picul; sales, 5,800 bales: Japan, $29 to $30 per picul; no sales.

From Yokohama, to Jan. 31, we learn that the price of cotton was $27 per picul.

Advices from Alexandria are to March 23. At that date the cotton market was firm, at 15¾d to 16d per lb, free on board, for fair open-ginned produce. During the week ending March 16, however, the trade was in a state of almost complete stagnation, and prices ruled next to nominal. The arrivals, from Feb. 28 to March 16, were 24,163 bales. The following table showing the extent of the shipments since the commencement of the season is from the Egyptian Commercial and Trading Company's circular:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 1 to March 2.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.

New York	0 0 0 0 0 0	.....	0 0 0½ 0 0 0½	

The principal alteration to notice in the Mincing lane markets is a fall of 1s to 2s per cwt in the value of *new* plantation Ceylon coffee. Most other articles—tea and sugar especially—have ruled quiet, and, in some instances, prices have slightly favoured the buyer.

The tea trade at the leading Chinese ports at the date of our latest advices was heavy. The value of some descriptions of produce had been sustained by a moderate demand on Australian account; otherwise, prices were lower. The total export to Great Britain had amounted to 109,147,710 lbs, against 103,094,770 lbs last season..

Coffee at Colombo, during the fortnight ending March 3, was dull: the arrivals of plantation qualities had been large, the quotation being 12s 6d per bushel. Native coffee, unpicked, was selling at 42s 6d; picked and dried do., 48s per cwt. The following table is from Messrs Fryer, Schultze, and Co's circular:—

EXPORTS of COFFEE from COLOMBO, from Oct. 1 to March 3.

The arrivals of *new* rice at the leading ports in British Burmah, at the date of our latest advices, had been large. In most qualities a full average business had been transacted, but the very little was done for shipment to Europe, the bulk of the operations having been for the Straits and China. The following table, compiled from Messrs Niebuhr and Co.'s and Messrs Mohr Brothers' circulars, shows the extent of the shipments since Jan. 1:—

The public sales of colonial wool were brought to a close on Monday last. During their progress, 81,407 bales were brought forward, consisting of 33,172 bales from Port Philip; 13,004 Sydney and Queensland; 10,266 Adelaide; 654 Van Diemen's Land; 552 New Zealand; 55 Swan River; and 23,704 bales from the Cape of Good Hope. Nearly all good and fine wools sold readily at an advance in prices of ½d to 1d per lb from last series; but the biddings for inferior qualities ruled inactive at lower prices. About 30,000 bales were taken by continental houses. As regards the quality and condition of the new clip, of which a large proportion of the supply consisted, Messrs Hazard and Caldecott observe:—"Port Philip—The growth is sound and healthy, not so long as last year; the condition generally is light, but very many flocks show a large quantity of burr and grass seed. Sydney was mostly of ordinary and inferior quality. Adelaide—The new clip seems in average condition, sound grown, but some flocks are shorter in staple than last year, and more full of seeds and burrs. Cape of Good Hope—The new clip of Western Province wool

Digitized by Google

from this colony was sound staple, well grown, in ordinary to fair condition."

The English wool trade continues dull, with a downward tendency in prices. A large quantity of colonial wool will be brought forward at the May sales, as much, it is asserted, as 140,000 bales. Hemp, flax, jute, &c., are a heavy sale.

In metals, an advance in Scotch pig iron to 52s 3d cash, mixed numbers, and in oils, a further improvement in the value of cocoanut, are the leading changes to report. Tallow is dull, at 40s 3d for new P.Y.C., on the spot.

Owing to the violent fluctuations in the premium on gold—the quotation having been as high as 180 and as low as 159¼ per cent. —trade in nearly all articles at New York during the week ending March 18, was in a greatly unsettled state, and currency prices generally declined. The amount of business transacted was small in the extreme. Further parcels of cotton had arrived from Savannah, and a heavy fall took place in the value of that staple, middling Upland produce having sold at 58c per lb in currency. Breadstuffs commanded very little attention for export, and the returns showed that the shipments of wheat, flour, and maize, since the commencement of the year, had been unimportant. The last quotation for gold was 165½ per cent. The stock of bullion in the banks on the 11th inst. was 4,147,570*l*, and the balance in Sub-Treasury 6,084,300*l*. The shipments of specie from Jan. 1 to March 11 were 823,000*l*, against 1,841,180*l* last year, 1,413,510*l* in 1862, and 251,980*l* in 1861. At latest date, the money market was steady, at 8 to 8½ per cent. for the best short-dated commercial paper.

THE COTTON TRADE.

LIVERPOOL—March 31.

The cotton market was extremely heavy and drooping throughout the week until yesterday, the trade buying more generally, but only in small quantities to supply immediate wants, while holders showed increased anxiety to sell, and on Wednesday a heavy decline was submitted to in every description. Yesterday the reduction of the Bank rate to 4 per cent., and other causes, appeared to restore confidence, a decided increase of business was done, and some recovery from the extreme point of depression was effected. Sea Island continues neglected, but nominally unchanged in value. American was in very moderate request, and fell 2d per lb, but yesterday was in more active demand, from speculators as well as the trade, and closed about 1½d below last week's quotations. The depression has again been very great in Brazil, and at one time the decline reached fully 2d per lb, but with the greatly increased demand yesterday, prices have recovered ½d to ¾d. Though Egyptian has been in fair demand it was pressed upon the market, and also declined 2d per lb. Yesterday its relatively low value attracted the attention of speculators, and a recovery of ½d to ¾d has ensued. Smyrna has been heavy of sale, and still shows a reduction of ¾d to 1d per lb, though previously irregular sales had been made at about ½d per lb lower than the present quotations. Surat closes ¾d to 1½d below last week's rates, a much greater reduction having been previously conceded. China and Japan show an average decline of ½d to 1d per lb, though the sales daily have been to a fair extent.

No transactions "arrive" have been reported during the week.

The sales of the week amount to 38,330 bales, including 7,420 on speculation, and 5,450 declared for export, leaving 25,460 bales to the trade. The total actual actual stock of cotton in this port (580,010 bales) declared this morning, proves to be about 13,000 bales below the estimate; the average weight of China and Japan is 2 piculs per bale.

The sales to-day amount to about 12,000 bales. Prices of nearly all descriptions have further recovered.

NEW YORK—March 18.

The cotton trade is heavy in the extreme, and all descriptions of produce have suffered a considerable decline in prices since Saturday last. Middling Upland cotton is now quoted at 58 cents per lb. The arrivals have been 7,525 bales, of which 1,152 bales are from Savannah, 1,796 Matamoras, and 3,259 bales by railroad. This additional quantity raises the import since Sept. 1 to 151,310 bales. The export from March 1 to March 14 was 1,368 bales, against 2,281 bales last year. Present quotations:—

MARKETS IN THE MANUFACTURING DISTRICTS

The transactions in most kinds of goods have continued only moderate; nevertheless, the quotations have been well supported. The stocks on hand are very moderate for the time of year. Iron has commanded more attention, at extreme rates; whilst the sale for coals has been very extensive.

MANCHESTER, March 30.—This market has continued its downward course until to-day, when greater steadiness of tone has become observable. Both export and home trade yarns have been reduced this week about 1d per lb, but buyers have been very chary, and only acted for their pressing wants. In cloths, some few purchases for forward delivery are reported to have been made at rather exceptionally low rates, but generally speaking, it has become increasingly difficult to sell. Though the tone has been firmer to-day, and inquiries more frequent, it is not believed that the business has been extensive, but more as a preparation for the Liverpool stock-taking to be declared to-morrow. In printing cloths, domestics, and T'cloths, there are considerable stocks, which sellers are anxious to force off at the first opportunity.

BRADFORD.—Prices of wool are most irregular, especially of sorts which are not in request. Some kinds of wethers still meet a fair inquiry. Business in yarns is of a hand to mouth character. The Americans have been doing business in pieces to some extent.

LEEDS.—There has been a limited attendance of buyers in the cloth halls, and the business done has been considerably below an average. The goods purchased were of a miscellaneous character.

ROCHDALE.—The flannel trade continues to wear a quiet aspect. Manufacturers keep tolerably well employed, but the actual demand is not quite equal to the present rate of production. The Yorkshire goods trade is alike quiet.

BARNSLEY.—The inquiry for house coal for the metropolitan market is still remarkably good, and all descriptions of Silkstone, Wombwell, and Darfield Main are in good request. The provincial inquiry is also good.

CARDIFF.—The iron trade of the district is gradually improving, consequent in a great measure on orders being sent to South Wales from buyers who usually had their supplies from Staffordshire and the North of England. Railway iron is in fair demand for the Continent, and the colonies and India are considerable purchasers of rails. Plates and other descriptions of iron required for shipbuilding purposes command a good sale. Rails are quoted 6*l* 17s 6d to 7*l* 5s per ton at the works, and bars 6*l* 7s 6d to 6*l* 17s 6d.

LEICESTER.—There is still about an average amount of business doing in hosiery goods, both plain and fancy. The wool market is exceedingly flat, and quotations are without much change. There is not much doing in yarns, and prices are unsteady.

NOTTINGHAM.—There is a little more inquiry for goods, but the business done is not much larger than before. There have been a few American buyers in the market. The cold weather and the drooping tendency of the cotton market have again acted unfavourably on the hosiery trade.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 18.—The demand for flour and wheat is still much restricted. Our quotations, which are in currency, exhibit a considerable decline, owing to the heavy fall in the premium on gold. Very little business is doing for export. The following are the prices current:—Flour—State, superfine brands, $9.60 to $9.90; State, extra brands, $10 to $10.20; State, choice brands, $10.25 to $10.40; Ohio, common brands, $10.20 to $11.; Ohio fancy brands, $10.50 to $10.75; Ohio, good and choice extra brands, $10.90 to $11.25; Michigan, Indiana, Wisconsin, &c., $9.70 to $10.35; Genesee, extra brands, $10.50 to $11.50; Missouri, $10.50 to $14.14; Canada, common, $10.15 to $10.40; Canada, good to choice extra, $10.50 to $11.40 per barrel. Wheat—Amber Michigan, $2 to $2.12½; Milwaukee Club, $2 to $2.07; Chicago spring, $2.15. Corn—New Jersey, $1.50 to $1.54 per bushel.

EXPORTS of GRAIN, &c., from NEW YORK from March 1 to March 14.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very little English wheat has been received up to our market this week, coastwise and by land-carriage. For all kinds the demand has ruled steady, at a further advance in the quotations of 1s per quarter, and at which good clearances have been effected. The show of foreign wheat has been wholly confined to granaried samples. Dry qualities have changed hands steadily, at extreme rates. In other descriptions the transactions have been on a moderate scale, at late currencies. Malting and grinding barley has commanded quite as much money as in the previous week, but distilling sorts have been much neglected. Malt, the show of which has been seasonably good, has moved off slowly. In prices, however, no change has taken place. There has been a good consumptive inquiry for oats, and in some instances the currencies have had an upward tendency. Beans have advanced 1s per quarter, with a good demand. The sales for peas has ruled firm at late rates. The flour trade has continued in a healthy state.

Most of the continental markets are firm for wheat, on rather higher terms, although the number of English orders on hand are small. Barley and all other kinds of spring corn have sold freely, at very full prices.

The following statement showing the extent of the crops of cereal and other produce in the United States in 1863 and 1864 has been recently issued by the Minister of Agriculture at Washington:—

AMOUNT OF CROPS.

	1863	1864.	Increase.	Decrease.

In Scotland, wheat has sold steadily, and the quotations have ruled somewhat higher. Other descriptions of produce have continued very firm.

The Irish markets have been steady for wheat, barley, and oats. In other articles, very little has been doing.

The wheat trade at Mark lane to-day, ruled quiet, at quite Monday's currency for good and fine dry samples. Good and fine old foreign wheat was in request, at fully late rates; but inferior produce was dull. Fine malting barley sold at somewhat enhanced rates; otherwise, the barley trade was quiet, on former terms. Oats, beans, and peas were steady, at full currencies. For flour, there was a fair demand, and prices ruled firm.

Mr George Dornbusch reports the arrival off coast of 14 cargoes of grain. There has been an active demand for forward shipment at 1s per quarter more money. Maize has advanced quite 1s per quarter. Cotton seed cakes have sold at 5*l* 17s 6d to 6*l* 5s per ton, being a rise of 5s to 7s. Cotton seed is very firm. In other articles only a limited business is passing.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.— A dull tone still prevails in the market, quotations being rather favourable to buyers, and the trade still make very limited purchases. Up to yesterday only 920 casks West India had sold, including some parcels by auction: grainy Demerara, 32s 6d to 36s per cwt. There has been a general contraction of business in other descriptions, but a limited quantity of fine young Porto Rico sold at the full valuations. The deliveries last week were 5,015 tons, 2,650 tons being landed, and the stock is 95,072 tons, against 61,752 tons in 1863.

Mauritius.—There were 600 bags brought forward on Tuesday, and taken in at 26s per cwt for low soft brown. Nothing of interest has occurred by private contract.

Madras.—About 1,000 bags have sold this week of the lower qualities, and grocery sorts at former rates.

Digitized by Google

Manilla.—4,000 bags clayed sold since last Friday at 28s. 2,000 bags unclayed, offered by auction, were taken in at 24s per cwt.

Other Foreign.—248 casks 116 barrels Porto Rico chiefly met with buyers: grocery, 31s 6d to 34s 6d; very fine, 38s; brown to middling greyish yellow, 28s to 31s. 1,020 boxes Havana partly sold: yellow, 33s to 36s; florettes, 37s 6d; brown, 29s to 32s. Privately, 250 baskets white Java have sold at 37s to 38s 6d per cwt.

Refined has been steady, and dry goods are unchanged in price.

MOLASSES.—Transactions of limited extent have occurred in West India: Trinidad, 14s 6d; Antigua, 15s per cwt.

RUM.—The market is quiet, and quotations remain stationary since last week.

COCOA.—Colonial descriptions keep very firm. Of 771 bags Trinidad a considerable portion sold at full rates, from 60s to 85s 6d. Fine qualities went very high, viz., 105s to 106s 6d. 112 bags Grenada sold at 52s to 60s 6d for low to fine per cwt.

COFFEE.—Further moderate supplies of Ceylon have been offered, which found buyers at 1s to 1s 6d decline upon plantation Ceylon of the new crop, prices of which ranged from 77s 6d to 85s for low middling to good, and 85s 6d to 92s for fine. 177 casks 1,742 bags native chiefly sold at 6d to 1s decline: good ordinary to fine, 67s 6d to 72s. A few lots of Jamaica realised 70s to 72s. 144 bags Costa Rica were taken in at 78s per cwt. Recent heavy landings have increased the stock to 9,755 tons, which is rather above the usual average supply.

TEA.—The market remains dull. At the close of the public sales on Wednesday, common to fair descriptions of black and red leaf congou met with a slightly better demand. Of 39,319 packages in the catalogues, 36,686 packages sold, all printed "without reserve."

RICE.—Of 1,966 bags Bengal by auction, the sound portion was taken in at 12s 6d for middling, while the sea damaged, consisting of cargo sorts, realised 9s 6d to 10s 6d. 850 bags Necrancie Arracan sold: one lot, sound, 8s 6d; sea damaged, 8s to 8s 3d. A few parcels of soft grain have changed hands: Bassein, 9s; Rangoon, 8s 10½d per cwt;

IMPORTS and DELIVERIES of RICE to March 25, with STOCKS on hand.

PEARL TAPIOCA.—276 boxes offered by auction sold at 25s per cwt..

SPICES.—139 cases brown nutmegs brought to auction were partly sold at 10d to 2s 1d for low to fair bold. White pepper is dull, and ¼d lower. 253 bags partly selling at 6d to 6⅜d for common to fine; 59 bags Singapore went at 6½d to 6¾d per lb. Nothing of interest has transpired in black pepper. 4,020 bags Penang were chiefly bought in: West Coast at 3¼d. A few lots of dusty and inferior sold at 3d to 3¼d. 16 cases Penang cloves were taken at 1s 1d. 17 casks Amboyna part sold at 5d to 5¼d. 904 bags pimento were chiefly taken in at 2⅜d to 2½d. 448 bags African ginger were withdrawn.

SALTPETRE.—The market continues depressed, and the only transaction reported this week is 600 bags, refraction 10, 27s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to March 25, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....tons	1760	2930	6150	5550
Deliveries	2820	2890	8470	4420
Stocks	6330	7200	6500	4250

Deliveries last week 237 tons.

COCHINEAL.—There were only 312 bags brought to auction on Wednesday, chiefly Teneriffe, which went as follows: silver, 2s 11d to 3s 1d; black, 3s to 3s 9d per cwt.

OTHER DRYSALTERY GOODS.—Gambier is quiet, but not pressed for sale. Cutch remains flat, and good quality cannot be sold at 25s per cwt.

CAMPHOR.—Several parcels have sold at 100s to 112s 6d per cwt, according to packages.

METALS.—A steady tone pervades the market. Since last Friday a sale of spelter has been made at 19*l* 5s, spring shipment; and 100 tons, on the spot, at 19*l* 5s per ton. Business of fair extent is reported in Straits tin at 56*l* to 87*l*, cash. Scotch pig iron has advanced to 52s 4½d, cash, mixed numbers. Manufactured descriptions are steady at the quotations.

JUTE is dull and unsettled. 3,470 bales, offered by auction, were only partly sold at lower rates, from 10*l* to 25*l* per ton. Some business is reported privately. The stock is 19,050 tons, against 10,200 tons last year, and 6,370 tons in 1863 at the corresponding period.

HEMP.—140 tons Petersburg clean, by auction, sold at 28*l* to 28*l* 15s. Manilla has sold, for arrival, at 27*l* per ton, guaranteed fair current quality.

TALLOW.—The market is dull and unsettled. 1st sort new Petersburg Y.C., 43s 3d; for delivery in the last three months, 41s 9d to 42s per cwt.

PARTICULARS OF TALLOW.—Monday, March 27.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market has shown rather more steadiness to-day, with increased supplies. 752 casks West India have sold to-day, making 1,667 casks for the week. Grainy and crystallised sorts went at 31s to 33s. 1,141 bags Penang sold from 29s to 34s. Privately, 3,000 bags clayed Manilla have sold at 28s. A floating cargo of Havana, No. 8½ to 9, at 21s per cwt for the United Kingdom.

COFFEE.—277 casks 52 barrels 119 bags plantation Ceylon offered by auction, went off steadily. 355 bags native were bought it in at 67s 6d to 68s. 275 bags East India were chiefly disposed of.

RICE.—1,576 bags Bengal offered by auction were partly sold at 13s 6d to 14s for good white. 837 bags soft grain realised 7s to 8s 6d. 12,040 bags Rangoon from New York, were chiefly bought in at 9s 6d to 11s, a few lots fine selling at 10s 9d per cwt.

SAGO.—100 boxes good bold grain were taken in at 22s per cwt.

PEPPER.—152 bags dusty Penang sold by auction at 3⅛d to 3¼d per lb.

GAMBIER.—400 bales good were bought in at 23s per cwt.

METALS.—Scotch pig iron, 52s per ton cash. A sale of spelter reported at 19*l* 5s per ton.

OILS.—230 casks cocoa-nut part sold; Cochin, 40s to 42s 6d. 110 casks palm bought in at 31s to 34s per cwt.

TALLOW.—New Petersburg Y.C., 40s to 40s 3d. Last three months, 41s 6d to 41s 9d. 1,300 casks Australian sold at 6d decline: beef, 36s to 39s; sheep, 39s to 40s 6d. 486 casks South American taken in at 40s 9d to 41s. Town reduced to 43s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week; prices rather in favour of buyers. Several sales have been made in Dutch crushed in B. and H., No. 1; H. R., No. 1; and V. O., all in barrels for forward delivery on easier terms, f.o.b. in Holland. Nothing doing in foreign loaves.

GREEN FRUIT.—Market, owing to bad weather, has depressed prices. Some parcels oranges from St. Michael, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at a reduction in price. Lemons support the value obtained of late. Nuts without alteration. Seville sours in moderate demand, with a diminished stock.

DRY FRUIT.—There is a slight improvement in demand for currants, and in some instances 6d advance has been paid. Fine fruit daily becomes dearer. The raisin trade seems quite at a standstill.

ENGLISH WOOL.—The trade continues very dull, and prices rule lower day by day.

COLONIAL WOOL.—The East India and low wool sales were held 28th and 29th instant; the former sold at previous rates; the latter showed a decline of 4½d to 2½d per lb, part being withdrawn.

FLAX market dull.

HEMP.—Market very quiet. Some fair quality, 1863 crop clean, sold at public sale at 28*l* 5s to 28*l*.

SILK.—There has been a slight improved inquiry for silk during the past week, prices remaining firm, without change.

TOBACCO.—The market has been fairly active for home-trade descriptions, and fine colory leaf and spinning strips have commanded outside quotations. For exportation a slightly improved demand has existed for good and medium classes, at steady prices.

TIMBER.—The prices of wood continue to be very low, and though consumption is large, the losses attendant on importation have checked the enterprise of the merchants in the trade. The greater part of the imports from the Baltic have been sold at lower prices since the close of the supply in December, and these losses react on the shipping prices for the ensuing season. Shipbuilding timber is abundant, while the use is limited pending the issue of the great question of construction in iron or in wood, or of composite ships. The last season's trade in Canadian pine deals must be excepted from the general depression, and that in American spruce deals is at last emerging from the low state of two years past; till now the English markets have been overladen with pine and spruce deals, but so great are the resources of British America that the deficiency will become sufficiency on the opening of the navigation, excess soon following, according to past experience. The consumption of coopers' staves continues to be large. Baltic, North Sea, and Canada freights have opened rather under last year's rates.

LEATHER.—The leather trade continues without alteration. The demand of the past week has been of about the recent average, but at Leadenhall on Tuesday the transactions were limited. There was a fair supply of fresh leather, good crop hides, 45 lbs and under, English shoulders, good calf skins, best East India kips, and heavy Spanish horse hides, being the articles most required. English butts of middle and heavy weights experienced very little demand.

METALS continue steady, but too quiet to be satisfactory. Copper is held all round for more money, and the tone of the market is better. Iron is less affected by the strike and lock-out than may have been expected. There is plenty of iron to supply all ordinary requirements at, or very near to, old rates. Tin maintains its long-continued inanimation. Spelter keeps steady, with small demand. Lead and tin plates are quiet.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	0
Fat by ditto	2	1
Yellow Russia	41	6
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, March 30.—There was a fair average supply of beasts on sale here, to-day, in but middling condition. The demand for most breeds was inactive, and, in some instances, prices were a shade lower. The supply of sheep was moderate. Downs and half-breds were steady, at previous currencies. Otherwise the mutton trade was in a sluggish state, at barely Monday's decline in the quotations. Lambs moved off slowly, at from 6s to 7s per 8 lbs. Calves were dull on former terms, viz., from 4s 6d to 5s 8d per 8 lbs. The pork trade was steady, at previous rates. Milch cows produced from 16*l* to 22*l*.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, March 27.—We have no alteration to report in our market, which remains steady with only a moderate demand.

FRIDAY, March 31.—The supply of hops on sale is still very moderate. Generally speaking, the trade is quiet; nevertheless, all good and fine qualities are firm in price. In the value of foreign and inferior hops there is no change to report. Mid and East Kents, 90s to 110s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 140s; American, 90s to 130s per cwt.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 27.—The arrivals, both coastwise and by rail, have been moderate, and fresh samples make a little more money. The following are this day's quotations:—Yorkshire Flukes, 120s to 140s; ditto Regents, 90s to 100s; ditto Rocks, 75s to 80s; Kent and Essex Regents, 90s to 100s; Perth, Forfar, and Fife Regents, 75s to 80s; ditto Rocks, 65s to 70s; French and Belgian whites, 55s to 60s per ton.

FRIDAY, March 31.—Moderate supplies of potatoes are on sale at this market. For most qualities there is a steady demand at full currencies. Yorkshire Regents, 90s to 110s; ditto Flukes, 130s to 150s; ditto Rocks, 90s to 100s; Scotch Regents, 90s to 100s; ditto Rocks, 70s to 85s; Dunbar Regents, 90s to 110s; foreign, 60s to 70s per ton.

HAY MARKETS.—THURSDAY, March 30.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 7s to 1*l* 14s per load. Trade slow.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 7s 6d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 8s to 1*l* 14s per load. Supply moderate.

WHITECHAPEL—Meadow hay, 4*l* 4s to 5*l* 5s; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 7s to 1*l* 14s per load. Trade inactive.

COAL MARKET.

FRIDAY, March 31.—Wallsend: South Hetton 22s—Hasting's Hartley 15s 9d—Tanfield Moor Butes 13s 6d. Ships at market, 27; sold 8; gas contracts, &c., 17—25; unsold, 2; ships at sea, 135.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 31.—No alteration has taken place this week in the position of our market, as the same quiet tone noticed for some weeks past still prevails; the transactions are of a mere retail character, and prices show symptoms of weakness.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 31.—There was a thin attendance at market to-day. Wheat and flour quiet at about last Tuesday's rates. Oats dearer, owing to scarcity. Beans firm. Oatmeal steady. Indian corn 6d dearer.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

G. Lovelock, Kensington, general dealer—W. Pottage, Wandsworth—F. Bevan, Noble street, general merchant—G. W. A. Milburn, Kensington, attorney—F. W. Mead, Great Waltham, farm bailiff—M. EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 18th of March, on 11,841 miles, to 596,869*l*, and for the corresponding week of last year, on 11,488 miles, to 570,375*l*, showing an increase of 353 miles, and of 26,494*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,334 miles, to 484,532*l*. and for the corresponding week of 1864, on 8,057 miles, to 462,410*l*, showing an increase of 277 miles, and 22,131*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 27.—In the share market to-day there was again a rather general tendency to buoyancy, particularly in English railways and British mines, of the former of which North Staffordshire, South-Eastern, North British (of both descriptions), and North-Eastern (Leeds) all advanced ½, ditto (York) 1, Metropolitan District ¼, Metropolitan (new) ⅛, ditto (stock), Great Eastern, and Great Northern a further ½ each, ditto (A stock) a further 1, and Lancashire and Yorkshire a further ¼; and Blackwall receded ½. In colonial, Great Western of Canada (shares of both descriptions) improved ⅛ each. In foreign, Eastern of France, and Paris, Lyons, and Mediterranean improved ⅛ each. In American, United States (5-20) advanced 3, Erie shares (paid up) and Pennsylvania Railroad (shares) 2½ each, Virginia (6 per cent.) 1, and Illinois Central (shares) further 2½. In British mines, East Bassett advanced 2½, Wheal Bassett 2, Clifford Amalgamated and Herodsfoot 1 each, East Carn Brea, East Wheal Russell, and Marke Valley ¼ each, and East Lovell a further ½. In foreign mines, Cape Copper improved ¼, and Port Phillip ⅛.

TUESDAY, March 28.—In the share market to-day there was little animation, but English and French railways again closed with a firm tendency; but banks showed weakness, and the other descriptions were without material change of tone. Of the English lines, Great Western and North-Western improved ¼ each, Brighton, Midland, and North-Eastern (Berwick) ½ each, ditto (Leeds), ditto (York), and Lancashire and Yorkshire a further ½ each, and Metropolitan further 1¼; Great Eastern relapsed ½, and Manchester, Sheffield, &c., receded ¼. In colonial, Great Western of Canada further improved ⅛ each, and Grand Trunk of Canada (3d preference) and ditto (deferred) declined 1. In foreign, Southern of France, and Western and North-Western of France advanced ½ each, Dutch Rhenish ⅛, and Paris and Mediterranean a further ⅛. In American, Pennsylvania (2d mortgage) improved 1, and Illinois Central (shares) a further ½. In British mines, Clifford Amalgamated further improved 1, and East Carn Brea ¼; and East Lovell relapsed ½. In foreign mines the only movement was a decline of ½ in Linares.

WEDNESDAY, March 29.—This being the day of the preparation for the settlement at the end of the month, the majority of the transactions were for the account, and the final quotations showed a considerable tendency to improvement in English railways, as well as, in a less degree, in colonial and foreign, while the other descriptions were without material average alteration. Of the English lines, Manchester, Sheffield, &c., recovered 1½; Edinburgh and Glasgow and North Staffordshire advanced 1 each, Caledonian, Great Northern, ditto (A stock), South-Western, and North British (Edinburgh, Perth, &c.) ½ each, South-Eastern ¼, North-Eastern (Berwick), ditto (Leeds), and ditto (York) further 1½ each, Midland further 1¼, North-Western a further 1, Lancashire and Yorkshire and Metropolitan further ¾ each, and Great Western a further ¼; and Great Southern and Western (Ireland) declined 1. In foreign, Northern of France improved 1, Great Luxembourg and Antwerp and Rotterdam ⅛ each, and Dutch Rhenish a further ¼; and Lombardo-Venetian receded ¼. In American, Erie shares (paid up) advanced 1½, and Illinois Central (shares) further 2, and Virginia (6 per cent.) declined 1.

THURSDAY, March 30.—In the share market to-day the transactions were very few, except in a few of the English railways, which description again closed with a firm tendency, as did also colonial railways, American securities, and miscellaneous shares, the other descriptions remaining without material change. Of the English lines, South Devon and Midland (Birmingham and Derby) improved 1 each, Caledonian, Great Western (Oxford), Brighton, Chatham, Manchester, Sheffield, &c., and North Staffordshire ½ each. In colonial, Eastern Bengal advanced 1. In British mines, East Lovell recovered ½, Wheal Buller further improved 2½, Tin Croft and West Seton advanced ½ and 5 respectively.

FRIDAY, March 31.—The railway market was decidedly firmer to-day, and prices experienced an important rise. Midland stock is in especial request, and advanced 1⅛ per cent.; London and North-Western, Caledonian, South-Eastern, and Great Northern have also improved ½ per cent., Great Western ⅝, Metropolitan ¼, and Lancashire and Yorkshire ⅛.

CARSONS' ORIGINAL ANTI-CORROSION PAINT.—Walter Carson and Sons beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, (37) Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.
March 1, 1865, 9 Great Winchester street, E.C.

CARSONS' ANTI-CORROSION PAINT, specially manufactured for out-door work, is the best and cheapest. All colours. So simple in application that any person can use it. Full instructions given. No agents. All orders to be sent direct.

CARSONS' ANTI-CORROSION PAINT is twice as durable as genuine white lead. SEE TESTIMONIALS.

CARSONS' ANTI-CORROSION PAINT. 3 cwt carriage free to any station in England and Wales, and most seaports of the United Kingdom. (See list.)

CARSONS' ANTI-CORROSION PAINT. Patterns, prices, and testimonials sent post free.

CARSONS' ANTI-CORROSION PAINT for all OUT-DOOR WORK.

CARSONS' ANTI-CORROSION PAINT for WOOD WORK.

CARSONS' ANTI-CORROSION PAINT for PARK FENCING.

CARSONS' ANTI-CORROSION PAINT for FARM BUILDINGS and IMPLEMENTS.

CARSONS' ANTI-CORROSION PAINT for IRON WORK.

CARSONS' ANTI-CORROSION PAINT for POROUS BRICKS effectually resists weather and excludes damp. 3 cwt carriage free to most parts of the United Kingdom.

CARSONS' ANTI-CORROSION PAINT for FRONTS of HOUSES.

CARSONS' ANTI-CORROSION PAINT for BRICK, STONE, and COMPO.

CARSONS' ANTI-CORROSION PAINT for CONSERVATORIES.

CARSONS' ANTI-CORROSION PAINT for HOTHOUSES.

CARSONS' ANTI-CORROSION PAINT lasts twice as long as any other; established 70 years; is only half the expense in application; is the most effectual in resisting weather; and will keep for years in a dry place. All orders to be sent direct to WALTER CARSON and SONS.

LA BELLE SAUVAGE YARD,
Ludgate hill, E.C.,
Three doors East of Railway Viaduct.

RHEUMATISM, CHILBLAINS, &c, —COLES'S ALGA MARINA has stood the severe test of many years' public experience, and has thereby acquired a celebrity which is unrivalled and daily increasing as a remedy for Rheumatism and Rheumatic Gout, Glandular Affections, and Chilblains, Contractions and Weakness of the Limbs and Joints, Neuralgic and other Pains, Spinal Curvature, &c. The numerous testimonials to its good effects in all that class of diseases for which the sea-side is recommended may be obtained with the Pamphlet for three postage stamps, of Mr KEATING; amongst them will be found the certificate of a Physician in Her Majesty's service, that it is the most efficacious remedy for Chilblains he has ever met with in his experience. The public should guard against spurious imitations by asking for COLES'S ALGA MARINA, and being careful to observe that his signature appears upon the label which encircles each bottle. Every packet also contains the pamphlet, without which none is genuine.—Sold in bottles, 2s 9d, 4s 6d, and 11s each, by T. KEATING, 79 St Paul's Churchyard, London, and by all Chemists.

MORE CURES OF COLDS, ASTHMAS, and COUGHS, by DR. LOCOCK'S PULMONIC WAFERS. — From Mr H. Armstrong, Chemist, Church street, Preston.—"Of elderly people, numbers have obtained the greatest benefit from them; many with the first or second box. To the greatest invalid I can recommend them with confidence, having seen the most magical effects produced by them on coughs, hoarseness, and difficulty of breathing."—They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

HOLLOWAY'S PILLS.—Joy for Invalids.—The greatest and best chemical combination of the very finest balsams dwells in this excellent medicine, which to be praised needs only a single trial. The purifying power of these excellent Pills strongly recommends them to the use of families in which any constitutional weakness or deleterious taint exists. Holloway's medicine has the most renovating effect when the system has become debilitated by dissipation, over-indulgence, or long-continued illness. The Pills acting gently as alteratives, aperients, and tonics, impart strength and energy to the whole body. No mischief can possibly result from the use of this world-esteemed remedy. Innocent in nature, and harmless in action, it is admirably adapted for every delicate constitution.

W. S. LAWTON, WINE Merchant, 35 Trinity square, Tower hill, E.C., begs to offer BRUCE'S best old VIDONIA at 30s per dozen; also best Marsala, 24s; old Canary Sack, (pints) 28s; fine old Bucellas, 36s; Sound Sparkling Champagne, 30s; Clarets, from 14s; Ports and Sherries, 30s to 72s; fine old Cognac Brandy, 54s to 66s per dozen; (bottles included). Detailed Price Lists post free.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co's manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS, by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES, by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.
48 Cheapside.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.
CAUTION—"In Chancery."
CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receip of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.

(See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.
London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.
Where the largest stock of steel, files, tools, &c., &c., may be selected from.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

E. Brooks, Esq., public accountant.

SECRETARY.

Mr Charles Muspratt.

Temporary Offices—29 Threadneedle street, London.

PROSPECTUS.

This Company has been formed to provide a sufficient number of iron passenger steamers, of surpassing elegance, speed, and comfort, to meet the demands of the increasing traffic on the Thames.

The boats, engines, and machinery will be constructed by the most eminent firms, with all the advantages which experience and skill can command.

It is intended that the Company's boats, which will to a great extent resemble the magnificent passenger steamers on the Hudson and St Lawrence rivers in America, and the splendid Iona on the Clyde in Scotland, shall be the fastest and most elegant and desirable on the river.

Some of them will run throughout the year above London Bridge; and others, of larger dimensions, will run daily to and from Gravesend during the summer months, so that the Company will at all times be earning income for dividends.

Each boat will have a handsomely furnished capacious saloon, with plate glass sash windows on the aft deck, and a railed promenade on its roof; and below that saloon, in the boats for traffic below bridge, there will be a spacious and well-ventilated apartment for dinners and refreshments, and also a smoking room; and on the fore deck there will be another saloon and promenade over, and beneath it, in boats for below bridge, a large well furnished apartment for fore-deck passengers.

The Star and Diamond Gravesend Steamboat Companies realised profits during the summer months equal to above 25 per cent.; but, to gratify a spirit of reckless opposition, they ran their boats in competition during the winter months at a loss.

At a meeting of the inhabitants of Gravesend, with reference to this Company, held 16th March, 1865, the Worshipful the Mayor in the chair, it was unanimously resolved:—"That in the opinion of this meeting, a Steam-packet Company to run between London and Gravesend will be highly beneficial to the various interests of the borough, and deserves the best support of the inhabitants."

As compared with the Star and Diamond Companies, this Company will, by the adoption of improved furnaces, boilers, and machinery, effect a saving of 40 per cent. in fuel only; and obtain a further saving of about 70 per cent. in pier dues at Gravesend, and also a considerable reduction at other piers.

The fact that on one day in August the number of passengers who embarked at the piers, for above bridge traffic only, between London and Westminster bridges inclusive, was upwards of 40,000, will show the vastness of the traffic.

The Company will have their boats running early in this summer, and the Directors confidently rely that very large dividends will be paid to the shareholders.

A copy of the memorandum and articles of association may be seen at the office of the solicitor of the Company.

Applications for shares must be accompanied by a payment of 10s per share; if no allotment be made the amount will be returned forthwith; if a less number is allotted than is applied for the surplus amount paid on application will be applied towards the payment of the £1 due on allotment, and the balance, if any, returned.

Prospectuses, and forms of application for shares, may be had of the Bankers, Brokers, Solicitor, or at the offices of the Company.

FORM OF APPLICATION FOR SHARES.
(To be retained by the Bankers.)

No.——

To the Directors of the Saloon Steam-Packet Company (Limited).

TEMPORARY OFFICES.

No. 60 King William street (opposite Eastcheap), London. E.C.; 5 Rue de L'Echelle, Paris.

ABRIDGED PROSPECTUS.

1. This Company was established last year for the purpose of extending the benefits of Life, Fire and Guarantee business generally, throughout Great Britain, France, Europe, India, the colonies, and other parts of the World, and to offer greater facilities for effecting the same at such reasonable rates as experience has found to be safe and practicable; the Company having already done a large amount of business in this country, and established influential Boards in Paris, Florence, and the Mauritius, with a thousand active agents throughout France, they now come before the public for the purpose of still further extending their operations at home and abroad.

2. Life assurance is the most beneficent institution ever established by man, and is making great progress in this country; while on the continent its great advantages are beginning to attract attention; the present is, therefore, a most favourable time for this Company to establish its business throughout Europe, and, as its policies are indisputable except for fraud, there is no doubt it will succeed.

3. The profits will be divided among the shareholders by paying 5 per cent. half-yearly, all the profits of the general business yearly, and 20 per cent. of the life profits as a bonus every five years: this liberal division of profits will, it is believed, make the shares in this Company very valuable.

4. Fire Insurance.—The question of the reduction of duty on fire policies having been settled by the House of Commons, it is expected that Mr Gladstone will reduce the duty to 1s per cent. immediately, which will give such an impetus to this description of business, that the revenue will not suffer, while the benefit to this Company by the introduction of new business will be immense.

5. Guarantee.—A liberal and extended system of guarantee has long been felt as a commercial necessity, which this Company proposes to supply, and by good management it will no doubt secure the support of the commercial world.

6. The influential Councils of Administration already established in Paris, Florence, and the Mauritius, with those now in course of formation in the chief States of Europe, will, it is believed, enable this Company not only to extend the business of life and fire insurance, but also place it in a position to negotiate concessions of works of public utility, and to assist States and individuals in the development of their resources, by introducing sound and beneficial undertakings to capitalists and finance companies in this and other countries.

7. Part of the capital of this Company having been subscribed last year, the Directors commenced business, and thus tested the promises of support made from various quarters. The result was the receipt of 1,272 proposals, amounting to £1,034,431, which they consider most satisfactory; and having established various agencies and councils of administration on the continent, and having also received offers of business from other quarters, they now feel justified in offering the remaining shares to the public, as the present business will pay a fair rate of interest, while the increase, they have a right to expect, will make the shares a safe and valuable investment.

9. In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment due on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of applications for shares may be made to the Solicitors, the Bankers, Brokers, and to the Manager, at the offices of the Company, No. 60 King William street (opposite Eastcheap), London.

FINANCIAL INSURANCE COMPANY (Limited).

Notice is hereby given, that the list of APPLICATIONS for SHARES in this Company will close on Friday, 7th April, for London, and on Saturday, 8th April, for the country. C. C. GREEN, Manager.

March 30, 1865, 60 King William street.

THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited),

in conjunction with the IMPERIAL MERCANTILE CREDIT ASSOCIATION (Limited), are prepared to receive subscriptions for the capital of the MILLWALL FREEHOLD LAND and DOCKS COMPANY. Incorporated by Special Act of Parliament, 27 and 28 Vict., cap. 255, 25th July, 1864, under the title of the Millwall Canal Company. The liability of the shareholders is limited to the amount of their shares. Interest during construction is guaranteed at 7 per cent. per annum upon the fully paid-up shares, and at 6 per cent. upon those paid by instalments. Interest payable half-yearly, on 31st March and 30th September in each year. Capital £510,000, in 25,500 shares of £20 each, with the usual debenture powers. Deposit £1 per share on application, and £4 on allotment. Calls not to exceed £2 10s per share, and not to be made at intervals of less than three months.

DIRECTORS.

Sir James Dalrymple Elphinstone, Bart., M.P., Chairman.
William Lee, Esq., M.P., Director of the London and County Bank, Deputy-Chairman.
James Childs, Esq., Director of the Credit Foncier and Mobilier of England (Limited).

SOLICITORS.

Messrs Hargrove, Fowler, and Blunt, 3 Victoria street, Westminster.

BROKERS.

Messrs Laurence, Son, and Pearce, 7 Angel court, Throgmorton street.

SECRETARY—H. T. Robinson, Esq.

Temporary Offices—17 and 18 Cornhill, E.C.

This Company is incorporated for the purpose of supplying, under circumstances peculiarly advantageous to the shareholders, the great demand for wharves, sites for manufactories, shipbuilding yards, and graving docks within the port of London, which the natural increase of trade, combined with the removal of existing water frontage by the formation of the Thames Embankment and other metropolitan improvements, has created.

This Company is incorporated by a special Act of Parliament, passed last session, by which it obtained power to acquire a large tract of land at Millwall, consisting of upwards of 198 acres of freehold land adjoining the East and West India Docks. This land will be rendered available for the purposes above-mentioned, by the construction within its area of large docks or basins, with access for the largest vessels both from Blackwall and Limehouse reaches; so that the deep water frontage thus created by the works will become immediately valuable in the highest degree for wharves, granaries, manufactories, shipbuilding yards, and similar purposes; and, from the water being always kept at nigh level, the saving of time and cost in all operations of lighterage, loading and unloading, which may be effected without respect to tides, will render this site far more valuable than land abutting on the Thames itself.

The proposed works will also include the construction of public graving docks of the largest dimensions, capable of receiving vessels of even greater size than H.M. iron-clad ship Warrior, and of accommodating H.M. frigate Northumberland, now building on the premises of the Millwall Iron Works, immediately adjoining this Company's property. It is a remarkable fact that, for the immense mercantile fleet of the port of London, there is but one public graving dock on the Thames of sufficient capacity to take in a vessel of even ordinary dimensions. All the other graving docks are in the hands of private builders, who require to execute the works and repairs themselves; and it is therefore not unusual for ships to be sent from the Thames to Southampton, and even to Liverpool, to be docked for repairs.

From the circumstance of the area proposed to be occupied lying, on an average, about 10 ft. below high-water mark, the works will be executed with unusual facility, the material excavated being used to raise the adjoining land to a convenient level above high water.

The main roads which traverse the sight of the proposed works afford good access to them; and application is being made to Parliament in the present Session by the Blackwall Railway Company for an extension of the Blackwall and North London Railway systems, by which direct railway communication will be afforded for the whole of the Company's works, wharves, and docks with the entire railway system of England.

As a Land Company the present undertaking has enormous advantages, from the unusually ample powers granted by its Special Act of Parliament, by means of which it will become possessed, after appropriating about 56 acres for the docks and graving docks, of upwards of 140 acres, with a water frontage of more than 10,000 feet, and from 400 to 800 feet in depth; the whole of which, on completion of the docks, will become immediately available for letting, on building leases, at freehold ground rents. Besides this source of revenue, estimated to produce upwards of £50,000 per annum, the Company will also derive a further large income of about £40,000 per annum the rents of the graving docks and from dues and charges from the docks, basins, wharves, &c., making a total estimated revenue of £90,000 per annum.

In calculating the estimate of dividends, very much will depend upon the mode found most practicable in dealing with the income of the Company; if the ground rents should be capitalised and sold as they accrue, and taking them at 30 years' purchase, it is estimated that within a period of five years the capital, including the additional amount intended to be applied for to complete the works, will have been repaid, with a bonus of upwards of 75 per cent., and the revenue of the docks and royalties and dues still be available for dividend to the shareholders; should, however, the whole rentals and revenues be maintained in hand, a dividend (after providing for expenses, interest on debentures, &c.) may fairly be looked for at the rate of 10 per cent. per annum; and when it is considered that the greater part of this is from freehold ground rents, the valuable description of the property this Company possesses will be at once apparent.

The Directors have much pleasure in being able to announce that the whole of the works will be undertaken by Messrs Kelk and Aird, the eminent contractors, and that a contract for the first portion to be executed has been entered into with them, and arrangements made for the payment by them of interest during construction of the works, at the rate of 6 per cent. per annum on the share capital paid up by instalments, and of 7 per cent. per annum on all shares applied for and allotted as fully paid-up shares. The interest will be payable at Messrs Glyn and Co.'s bank, half-yearly, on 31st March and 30th September in each year. The first payment will be made 30th September, 1865.

It is believed that so sound a scheme, and one which so specially addresses itself to the investor, is seldom brought before the public; the basis of the enterprise being freehold land and ground rents removes from it all character of speculation, so often the leading feature in public companies, and as a British and home security it will doubtless be appreciated by those who, while expecting good profits upon their investments, yet look for solid security.

The plan accompanying the prospectus shows the whole of the works as proposed when complete.

Copies of the Act of Parliament and plans may be seen at the offices of the solicitors. Applications for shares in the accompanying form may be made to the Secretary, at the offices of the Company; or to the Credit Foncier and Mobilier of England (Limited), 17 and 18 Cornhill; also to the Imperial Mercantile Credit Association (Limited), 95 Bishopsgate street within; to the bankers and brokers; but no application will be entertained unless the deposit of £1 per share on the number applied for has been duly paid to the Company's bankers. In the event of no allotment being made to the applicant, the deposit will be promptly returned in full.

March 28th, 1865.

Form of Application for £5 paid shares, bearing 6 per cent. interest during construction (to be retained by the bankers).

SECRETARY (pro tem.)

F. J. Padley, Esq

Temporary Offices—38 Walbrook, City, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purchase of and cultivation of coffee and tea on seven valuable estates, two of which, Strathern and Maryland, are freehold, and situate in Wynaad, on the Government road from Beypore river to the Neilgherries, and five, Moyar, Kuhiad, Pencraig, Coedmore, and Thorapooly, are renewable leaseholds,

The seven estates are estimated to contain altogether 3,490 acres, of which 750 acres are in bearing. The vendor guarantees there are at least 816 acres under coffee cultivation; however, it is estimated there are upwards of 1,000 acres planted.

The price to be paid for the estates is £51,000 (subject to survey of the property, as mentioned in the agreement for purchase), of which the vendor will accept one-fourth in shares of the Company, and the cash by instalments, extending over three years from the 1st April, 1865.

The land in bearing in the years 1862-3 and 1863-4 produced a crop of coffee averaging 190 tons for each season.

The average net profits for the first three years are estimated at 1st per cent. per annum.

The vendor's agreement for sale of the property and the articles of association can be seen at the offices of the Company.

No promotion money will be paid, and the preliminary expenses will be limited to such as are absolutely necessary. If no allotment of shares be made, the deposit money will be returned in full.

Prospectuses and forms of application may be had of the Brokers; and at the temporary offices of the Company.

PRIZE MEDAL AWARDED.

J. OUSELEY, General Manager.

THE BANK OF MADRAS.

At a meeting of the Directors of the Bank of Madras, held on Tuesday, the 31st Jan., 1865, the following resolutions were adopted in terms of the authority vested in them by clause 6 Act V. of 1862.

1. That the capital of the Bank be increased by the creation of one thousand eight hundred and seventy-five new shares, of rupees one thousand each.

2. That such shares be issued or offered to the proprietors at a premium of 10 per cent., say at rupees 1,100 each, and that they be allotted to shareholders in the proportion of one new share to each holder of two shares, and one half and one quarter share to each holder of one share and one half share respectively. Holders of odd quarter shares to receive, on application, certificates entitling them to a half interest in a quarter share. Two such certificates lodged on or before the 30th June next, will entitle the holder to one quarter share. If not so lodged, the right to such quarter share shall be forfeited.

3. That the proprietors entitled to claim the new issue shall be those whose names appear on the Register on the 1st day of March, 1865, and that the Transfer Books be closed from the 2nd to the 13th day of March, both days inclusive.

4. That the amount of the new shares, together with premium thereon, shall be payable in four instalments in the following manner:—

Rs 275 on or before 1st May, 1865.
Rs 275 on or before 1st July, 1865.
Rs 275 on or before 1st Sept., 1865.
Rs 275 on or before 1st Nov., 1865.

5. That any new shares, the amount of which, with premium as above, shall not be paid in full on the 31st December next, shall be absolutely forfeited to the Bank, and shall be disposed of at the discretion of the Directors.

6. That upon all instalments paid up on account of new shares, interest shall be allowed from date of payment to 31st December, 1865, at the rate of 7 per cent. per annum.

7. That any proprietor failing to pay the several instalments on the prescribed dates, shall be charged interest at the rate of 12 per cent. per annum from such dates to the date of payment.

8. That scrip certificates be issued on payment of the first instalment, and that as soon as all the instalments (with any interest that may be due) on each new share shall have been paid up, share certificates be given in exchange.

9. That the premium on shares taken up by the proprietors, and also any profit that may be realised on unclaimed and forfeited shares, be added to the reserve fund.

10. That the new shares shall be entitled to dividend from 1st Jan., 1866.

11. That a copy of the foregoing resolutions be forwarded to each proprietor, and that they be duly advertised.—By order of the Board,

JOHN McIVER, Secretary and Treasurer.

COMMERCIAL BANKING COMPANY of SYDNEY, NEW SOUTH WALES.

Incorporated by Act of the Colonial Legislature.
London Office, No. 33 Cornhill.

LONDON BOARD.

John Gilchrist, Esq. | Frederick Parbury, Esq.
Edwin Brett, Esq.

Letters of Credit and Bills of Exchange are drawn by the London office on Sydney, and the following branches in New South Wales, viz., Albury, Armidale, Bathurst, Burrangong, Carcoar, Cooma, Goulburn, Kiama, Maitland, Morpeth, Muswellbrook, Orange, Peramatta, Queanbeyan, Wollongong, and Yass; and also on Brisbane (Moreton Bay), Dalby, Gayndah, and Maryborough (Wide Bay), in the Colony of Queensland.

Drafts on the Australian Colonies are negotiated or collected, and every description of banking business with Australia transacted on the most favourable terms through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C.

SCINDE RAILWAY (INDUS STEAM FLOTILLA, PUNJAUB and DELHI RAILWAYS) COMPANY.

At the Tenth Annual General Meeting of the above Company, held at the London Tavern, Bishopsgate street, in the City of London, on Wednesday, the 29th March, 1865,

W. P. ANDREW, Esq., Chairman of the Company, presiding,

The following resolutions were carried unanimously:—

1. That this meeting receive and adopt the report and accounts of the Directors.

2. That Sir T. Herbert Maddock be re-elected a Director of this Company.

3. That J. Edmund Anderdon, Esq., be re-elected a Director of this Company.

4. That Edward Thornton, Esq., C.B., be re-elected Auditor of this Company.

5. That William Mackinnon, Esq., be appointed an Auditor of the Company in place of George Gordon Macpherson, Esq., resigned.

6. That the cordial thanks of this meeting are tendered to W. P. Andrew, Esq., for his courteous conduct in the chair this day.

W. P. ANDREW, Chairman.
S. H. R. PARRY, Acting Secretary.

Gresham House, Old Broad street, London, March 29, 1865.

COMPANY OF THE SOUTH OF AUSTRIA, LOMBARDY, and CENTRAL ITALY RAILWAYS.

NOTICE TO SHAREHOLDERS.

The shareholders are informed that they are convoked in Ordinary General Meeting, and if need be an extraordinary one, at Paris, the 22nd April next, at the Salle Herz, Rue de la Victoire 48, at three o'clock in the afternoon, to,—

As an Ordinary Meeting, hear the report of the Board of Directors, approve, if found correct, the accounts of the year 1864, and fix the dividend.

And, as an Extraordinary Meeting, 1, to deliberate on the ways and means to be provided in conformity with § E of article 19 of the statutes; 2, to ratify in so far as is necessary the stipulations relative to the separation of the two networks.

The Ordinary and Extraordinary General Meeting will be composed of all shareholders possessing at least 40 shares, which must be deposited at the latest fourteen days before the meeting, in the offices hereafter mentioned:—

At Paris, of Messrs de Rothschild freres.
At London, of Messrs N. de Rothschild and Son.
At Milan, of M. C. F. Brot.
At Bologna, Messrs Rafaeli, Rizzoli, and Co.
At Geneva, of Messrs Lombard, Odier, and Co.

In exchange for the shares deposited, there will be delivered certificates of deposit, which will give the right of admission to the meeting.

The shareholders called on to take part in the deliberations of the General Ordinary and Extraordinary Meeting, may be represented by delegates holding written powers, but being themselves entitled to attend.

The powers must be drawn up in the form indicated below.* They shall be inscribed on the back of the certificate of deposit, and must be presented to Messrs de Rothschild freres, 21 Rue Laffitte, Paris, at the latest on the 8th April, 1865.

As the resolutions which will be submitted to the General Extraordinary Meeting can only be adopted by a meeting comprising at least the fifth of the capital, that is 150,000 shares, the shareholders are particularly requested to attend or to have themselves represented.

* I authorise Mr ———— to represent me in the General Ordinary and Extraordinary Meeting of the Company of the South of Austria, Lombardy, and Central Italy Railways, to be held at Paris on the 22nd April next.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned. W. E. JOHNSON, Secretary.

Victoria Station, Pimlico, S.W., March 21, 1865.

SIX PER CENT. DEBENTURES.

RECIFE AND SAN FRANCISCO PERNAMBUCO RAILWAY COMPANY (Limited).

The Directors are prepared to receive applications for a limited amount of Debentures, in sums of not less than £100 each, bearing interest at the rate of 6 per cent. per annum, payable half-yearly.

Full particulars may be obtained at the Company's offices.—By order of the Board,

W. H. BELLAMY, Secretary.

15 Old Jewry chambers London, Feb. 28, 1865.

PETERBOROUGH, WISBEACH, and SUTTON RAILWAY.

LOANS ON DEBENTURES.

The Directors of this Company are prepared to receive Loans on Security of Debentures, for 3, 5, or 7 years, bearing interest at the rate of 5 per cent. per annum, payable half-yearly in London.

The interest on the above debentures will be paid by the Midland Railway Company, in terms of the Act of Parliament, which makes the debenture interest the first charge on the gross receipts of the line prior to deduction of working expenses.

H. DUDLEY COOPER, Secretary.

41 Parliament street, London.

EDGWARE, HIGHGATE, AND LONDON RAILWAY COMPANY.

The Directors of the above Company are prepared to receive tenders for Loans on Debentures, repayable in 3, 5, or 7 years. The line will shortly be opened and will be worked by the Great Northern Company, who have subscribed one-third of the capital.—Applications to be made to the undersigned,

EDWARD BELLAMY, Secretary.

19 Duke street, Westminster, S.W.,
March 16, 1865.

THE LIBRARY COMPANY (Limited).

Central Offices, 25 Pall Mall, and 30 St James's square, S.W.—The Directors continue to add every work of general interest as soon as published, and in numbers, sufficient to meet the requirements of subscribers. No book for which there is a demand is excluded on any pretext whatever.

THE LIBRARY COMPANY (Limited).

Subscriptions from 10s 6d to £5 5s, according to the number of volumes required. Remittances may be made by post office order or cheque (crossed Ransom, Bouverie, and Co.), payable in London to Henry Fowler.

THE LIBRARY COMPANY (Limited).

Subscribers to this Library can (under the conditions set forth in the rules and regulations, which will be sent free on application) change their books at any depot most convenient to them. London subscribers can be transferred to any of the provincial depots, and country subscribers to any of the London depots.

THE LIBRARY COMPANY (Limited).

A list of the Company's Depots will be forwarded (free) on application.

THE LIBRARY COMPANY (Limited).

Lists of Books in circulation, with all other information, sent (free) on application.—By order.

THE LONDON AND GENERAL WATER PURIFYING COMPANY (Limited)

are prepared to SUPPLY their PATENT CISTERN-FILTER to residents in and about the metropolis, to be fixed and kept in order by the Company, upon hire, at the following annual rentals, beyond which no other expenses will be incurred:—

			£	s	d
Filter No. 1,	yielding half a gallon	per minute	0	7	6
— 2,	— one gallon	per minute ...	0	12	6
— 3,	— two gallons	per minute	1	0	0
— 4,	— four gallons	per minute	1	10	0

The first two are intended for drinking purposes, the last two to filter all the water which passes through the common supply pipe.

Applications to be made to the Secretary, at the offices of the Company, 15 Strand (W.C.), where all information can be obtained, and testimonials and the filter in operation inspected.

Attention is particularly requested to the following report from Dr Letheby:—

"17 Sussex place, Regent's park, N. W.,
Feb. 18, 1865.

"I have frequently been requested to express my opinion of the filter manufactured according to the patent of Mr Dauchell by the London and General Water Purifying Company, but have hitherto declined to accede to the request, because I have objected to the publication of my opinion; at length, however, I am compelled to admit that the filter is a very useful and effective contrivance. At the very first I perceived that the principles on which it is constructed are scientifically correct, and now, after a long experience of its action, I find that the operation of it is simple and certain. One of the filters was in constant use for many months in a large exposed cistern, where the growth of confervæ and microscopic infusoria was most abundant, but during the whole of the time, and of even when the water was green with vegetation the filter freely delivered the water in a clear, colourless, and wholesome condition. I am bound, therefore, to say that the apparatus is very perfect in its action, and that the simplicity of its application is a great advantage.

"HENRY LETHEBY, M.B., M.A., &c., Professor of Chemistry in the College of the London Hospital, and Medical Officer of Health for the City of London."

An elegant assortment of Drawing-room Clocks of the newest Designs.

Astronomical, Turret, and other Clocks made to order. E. DENT and CO. 61 STRAND W.C. (adjoining Coutt's Bank); and at 34 and 35 ROYAL EXCHANGE, E.C.

THE MANUFACTURER AND SOLE seller of a medicament, introduced in Europe and America since nearly a century, which can be made with ease, and bears a large profit, offers to sell the secret at a fixed price, in consequence of family considerations.—Please apply to E. B. 113, care of Mr Otto Molien, Advertising Agency, Frankfort-on-the-Maine.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. To conclude every evening with the Screaming New Farce THE STEEPLE CHASE; or, In The Pigskin. Messrs J. L. Toole, P. Bedford, Billington, Stephenson, Eburne, and Miss K. Kelly. Commence at 7.

ROYAL POLYTECHNIC.—Patron H.R.H. the Prince of Wales—Last Two Weeks of the interesting Ghost Scene, "The Indian Widow's Sutteeism; or the Hindoo Maiden's Dreams." (J. H. Pepper and Henry Dirck's joint inventors), also of Mr Coote's Musical and Humorous Entertainment of Baron Munchausen.—During Passion Week (by desire) Professor Pepper will repeat his course of Three Lectures on Elementary Astronomy, viz.:—on Wednesday, Thursday, and Saturday, at half-past 2 and half-past 7. N.B.—The collection of Railway Models of Inventions for saving life, will open on Tuesday, the 4th April.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

THE PHOSPHORISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.

LONDON AGENTS:—Cleaver, 63 Oxford street; Hooper, 43 King William street, London bridge; Prout, 229 Strand.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

MR COBDEN.

Twenty-three years ago—and it is very strange that it should be so many years—when Mr Cobden first began to hold Free-trade meetings in the agricultural districts, people there were much confused. They could not believe the Mr Cobden they saw to be the "Mr Cobden that was in the papers." They expected a burly demagogue from the North, ignorant of rural matters, absorbed in manufacturing ideas, appealing to class prejudices—hostile and exciting hostility. They saw "a sensitive and almost slender man, of shrinking "nerve, full of rural ideas, who proclaimed himself the "son of a farmer, who understood and could state the "facts of agricultural life far better than most agricultural-"ists, who was most anxious to convince every one of what "he thought the truth, and who was almost more anxious "not to offend any one." The tradition is dying out, but Mr Cobden acquired, even in those days of Free-trade agitation, a sort of agricultural popularity. He excited a personal interest—he left what may be called a *sense* of himself among his professed enemies. They were surprised at finding that he was not what they thought; they were charmed to find that he was not what they expected; they were fascinated to find what he was. The same feeling has been evident at his sudden death,—death at least what was to the mass of occupied men sudden. Over political Belgravia—the last part of English society Mr Cobden ever cultivated—there was a sadness. Every one felt that England had lost an *individuality* which it could never have again, which was of the highest value, which was in its own kind altogether unequalled.

What used to strike the agricultural mind as different from what they fancied and most opposite to a Northern agitator was a sort of playfulness. They could hardly believe that the lurking smile, the perfectly magical humour which they were so much struck by, could really be that of a "Manchester man." Mr Cobden used to say, "I have as much right as any man "to call myself the representative of the tenant-farmer, for "I am a farmer's son, and the son of a Sussex farmer." But agriculturists keenly felt that was not the explanation of the man they saw. Perhaps they could not have thoroughly explained, but they perfectly knew that they were hearing a man of singular and most peculiar genius, fitted as if by "natural selection" for the work he had to do, and not wasting a word on any other work or anything else, least of all upon himself.

Mr Cobden was very anomalous in two respects. He was a *sensitive* agitator. Generally, an agitator is a rough man of the O'Connell type, who says anything himself, and lets others say anything. You "peg into me and I will peg into "you, and let us see which will win," is his motto. But Mr Cobden's habit and feeling was utterly different. He never spoke ill of any one. He arraigned principles, but not persons. We fearlessly say that after a career of agitation of thirty years, not one single individual has—we do not say a valid charge, but a producible charge—a charge which he would wish to bring forward against Mr Cobden. You can't find the man who says "Mr Cobden said this "of me, and it was not true." This may seem trivial praise, and on paper it looks easy. But to those who know the great temptations of actual life it means very much. How would any other great agitator, O'Connell, or Hunt, or Cobbett, look if tried by such a test? Very rarely, if even ever in history, has a man achieved so much by his words—been victor in what was thought at the time to be a class struggle—and yet spoken so little evil as Mr Cobden. There is hardly a word to be found, perhaps, even now, which the recording angel would wish to blot. We may on other grounds object to an agitator who lacerates no one, but no watchful man of the world will deny that such an agitator has vanquished one of life's most imperious and difficult temptations.

Perhaps some of our readers may remember as vividly as we do a curious instance of Mr Cobden's sensitiveness. He said at Drury Lane Theatre, in tones of feeling, almost of passion, curiously contrasting with the ordinary coolness of his nature: "I *could* not serve with Sir Robert Peel." After more than twenty years, the curiously thrilling tones of that phrase still live in our ears. Mr Cobden alluded to the charge which Sir Robert Peel had made, or half made, that the Anti-Corn Law League and Mr Cobden had, by their action and agitation, conduced to the actual assassination of Mr Drummond, his secretary, and the intended assassination of himself, Sir Robert Peel. No excuse or palliation could be made for such an assertion except the most important one, that Peel's nerves were as susceptible and sensitive as Mr Cobden's. But the profound feeling with which Mr Cobden spoke of it is certain. He felt it as a man feels an unjust calumny, an unfounded stain on his honour.

Mr Disraeli said on Monday night (and he has made many extraordinary assertions, but this is about the queerest) "Mr Cobden had a profound reverence for tradition." If

Digitized by Google

there is any single quality which Mr Cobden had not, it is traditional reverence. But probably Mr Disraeli meant what is most true, that Mr Cobden had a delicate dislike of offending other men's opinions. He dealt with them tenderly. He did not like to have his own creed coarsely attacked, and he did—he could not help doing—as he would be done by; he never attacked any man's creed coarsely, or roughly, or in any way except by what he in his best conscience thought the fairest and justest argument.

This sensitive nature is one marked peculiarity in Mr Cobden's career as an agitator, and another is that he was an agitator *for men of business*. Generally speaking, occupied men charged with the responsibilities and laden with the labour of grave affairs are jealous of agitation. They know how much may be said against any one who is responsible for anything. They know how unanswerable such charges nearly always are, and how false they easily may be. A capitalist can hardly help thinking "Suppose a man was to make a "speech against *my* mode of conducting my own business, how "much he would have to say." Now it is an exact description of Mr Cobden that by the personal magic of a single-minded practicability, he made men of business abandon this objection. He made them rather like the new form of agitation. He made them say, "How business like, how wise, just what it would have been right to do."

Mr Cobden of course was not the discoverer of the Free-trade principle. He did not first find out that the Corn Laws were bad laws. But he was the most effectual of those who discovered how the Corn Laws were to be repealed—how Free-trade was to change from a doctrine into a doctrine of the "Wealth of Nations," into a principle of Tariffs, and a fact of real life. If a thing was right, to Mr Cobden's mind it ought to be done, and as Adam Smith's doctrines were admitted on theory, he could not believe that they ought to lie idle, that they ought to be "bedridden in the dormitory of "the understanding."

Lord Houghton once said, "In my time political economy "books used to begin, Suppose a man upon an island." Mr Cobden's speeches never began so. He was altogether a man of business speaking to men of business. Some of us may remember the almost arch smile with which he said the House of Commons "does not seem quite to understand the "difference between a cotton mill and a print work." It was almost amusing to him to think that the first assembly of the first mercantile nation could be, as they were, and are very dim in their notions of the most material divisions of their largest industry. It was this evident and first hand familiarly with real facts and actual life which enabled Mr Cobden to inspire a curiously diffused confidence through all commercial—we may say through all matter-of-fact men. He diffused a kind of "economical faith." People in these days had only to say "Mr Cobden said so, and other people went and "believed it."

Mr Cobden had nothing in the received sense classical about his oratory, but it is quite certain that Aristotle, the greatest teacher of the classical art of rhetoric, would very keenly have appreciated his oratory. This sort of economical faith is exactly what he would most have valued,—what he most prescribed. He said: "A speaker should convince his "audience that he was a likely person to know." This was exactly what Mr Cobden did. And the matter-of-fact philosopher would have much liked Mr Cobden's habit of "coming to the point." It would have been thoroughly agreeable to his positive mind to see so much of clear, obvious argument. He would not indeeed, have been able to conceive a "League meeting." There has never, perhaps, been another time in the history of the world when excited masses of men and women hung on the words of one talking political economy. The excitement of these meetings were keener than any political excitement of the last twenty years—keener infinitely than any which there is now. It may be said, and truly, that the interest of the subject was Mr Cobden's felicity, not his mind; but it may be said with equal truth, that the excitement was much greater when he was speaking than, when any one else was speaking. By a kind of keenness of nerve, he said the exact word to touch, not the bare abstract understanding, but the quick individual perception of his hearers.

We do not wish to make this article a mere panegyric. Mr Cobden was far too manly to wish such folly. His mind was very peculiar, and, like all peculiar minds, had its sharp limits. He had what we may call a *supplementary* understanding—that is a bold, original intellect, acting on a special experience, and striking out views and principles not known to, or neglected by, ordinary men. He did not possess the traditional education of his country, and did not understand it. The solid heritage of transmitted knowledge had more value, we believe, than he would have accorded to it. There was a defect in business not identical, but perhaps not altogether without analogy. The late Mr Wilson used to say "Cob-"den's administrative powers I do not think much of, but he "is most valuable in counsel, always original, always shrewd, "and not at all extreme." He was not altogether equal to meaner men in some beaten tracks and pathways of life, though he was far their superior in all matters requiring an original stress of speculation, an innate energy of thought.

It may be said, and truly said, that he has been cut off before his time. A youth and manhood so spent as his well deserved a green old age. But so it was not to be. He has left us, quite independently of his positive works, of the repeal of the Corn Laws of the French treaty, a rare gift—the gift of *unique* character. There has been nothing before Richard Cobden like him in English history, and perhaps there will not be anything like it. And his character is of the simple, emphatic, picturesque sort which must easily, when opportunities are given as they were to him, go down to posterity. May posterity learn from him. Only last week we hoped to have learned something more ourselves.

"But what is before us we know not,
And we know not what shall succeed."

THE RECOMMENDATIONS OF THE COMMITTTEE OF THE HOUSE OF COMMONS ON BANKRUPTCY.

We gave last week the resolutions of Mr Moffatt's Bankruptcy Committee in the form in which they have been laid on the table of the House of Commons. But as their form is necessarily concise and formal, some more popular account of their general scope and object may be useful. We must, however, introduce it by a general observation, which we have often made before, but which should be perpetually present to the mind of every one who considers this subject. You can never make a system of Bankruptcy which will be very agreeable or wholly satisfactory. The subject matter forbids it. When commercial men make large bad debts, they will, of necessity, be anxious, captious, and dissatisfied. They used to think the bankrupt "a good man," and they cannot all at once change their belief and admit he is worth nothing. They are, therefore, inclined to think that there is more in the estate than there really is. The bankrupt too always says there is. The first account presented of an estate—the anticipation sketch estimate, as Indian financiers would say,—is always by far too favourable. Whatever administrator is set to realise that result will necessarily *seem* to fail; for it is endeavouring to reduce to solid earth what was in fact a flattering delusion—a sanguine dream. There will always be disappointment; the administrators will always be taunted by the creditors; they will always hear "The estate showed 14s, and you only get "us 8s." Nor must eager speculators expect that the creditors will in all cases be very willing to expose what seems and are the gross frauds of the bankrupt. Very often the creditor wishes to hush the matter up quite as much as the bankrupt; at any rate the bankrupt is ruined and he does not so much care what comes out. But the creditor is *as yet not ruined;* he may be safe; if his credit is not injured he will "pull through;" and therefore, far from wishing to explain that the bankrupt has cheated him of a very large sum and asking to have him punished, he tries to mitigate matters. He says, "I have not lost so much as is thought. "The bankrupt is not so bad a man after all." Where the persons deceived wish to conceal the fraud, where the selected administrators have to realise what is only fancied, what can *never* be real, there must ever be disappointment and dissatisfaction. We must endeavour, in dealing with Bankruptcy, to make the best of a bad business; we must not hope to change it into a good business.

Subject to this grave preliminary difficulty, which must ever be remembered, for its results are everywhere, we congratulate our readers on the excellent series of recommendations which Mr Moffatt's Committee has agreed to. That they form a complete and perfect code for future Bankruptcy proceedings we do not say: the Committee do not put them

Digitized by Google

forward as such, but we maintain that they indicate *in a practical shape* the most important guiding rules and principles by which this subject is to be regulated, and upon which every administration of detail should be throughout based.

We are so accustomed to the Court of Bankruptcy, that we have forgotten its anomalous nature. It performs no less than four functions which have no natural connection, which are opposite in essence and detail, which will never be rightly performed until they are divided—until each function is given to a special instrument fit for that and used for that only. The Court of Bankruptcy performs administrative functions: it collects the assets and divides the assets, which is no more a matter of law than every collection and dividend of a testator's estate by his executors is a matter of law. 2ndly, it has what we may call a *remitting* function. It lets a man off his debts. It says to the bankrupt, "You owe "all this money; but we—the Court—remit you that "debt and absolve you from all further consequences." 3rdly, it exercises, or claims and attempts to exercise, *punitive* functions—functions of criminal law: it punishes, or tries to punish, the fraudulent—at least the *very* fraudulent bankrupt. Lastly, it exercises what is naturally and properly called its judicial function—a function of *civil* law. It decides in all cases who is to be a bankrupt, and in cases of doubt what are the rights of the creditors under the bankruptcy and what are not the rights; which debts are really due from the bankrupt and which are not due. Whoever considers the varied nature of these four operations—whoever considers how much difference there is between them in their very essence and nature,—will easily understand that the same body cannot perform them all, that it is contrary to principle to intrust them all to the sole and uncontrolled management of a single tribunal.

As to the administrative function, as to the collection and division of assets, we not long since showed at length (see ECONOMIST, January 14th) that it was impossible any Court could ever perform it. The duty of a judicial body is to decide on what comes before it. The process of litigation is fit for that and was made for that. Its careful deliberation, its solemn forms, its elaborate consideration are suited for the wise decision of questions which involve serious difficulty, which require discussion, on which there is much to be said on both sides. But the getting in a bankrupt's assets is not an elaborate matter; it is a very simple matter. If the bankrupt had been able to go on with his business there would have been no litigation in getting hold of his property; and after he has ceased to conduct his business there need be none either. Occasional questions may arise, but they will be only occasional; they need not bear a greater proportion to the business *in* bankruptcy than the legal questions arising out of ordinary trade bear to that ordinary trade. *Mutatis mutandis*, as near as can be, the administration of an estate after bankrupcy ought to be as near as possible to the administration of the same estate before bankruptcy; it was only a matter of business *before*; it ought not to be a matter of law *after*.

We are happy to say the Committee of the House of Commons entirely confirm this conclusion. They propose to abolish *in toto* the administrative function of the Court of Bankruptcy. They propose that there should no longer be an official assignee; that no officer of the Court of Bankruptcy shall collect the assets or shall divide the assets; that all the *pecuniary* part of the work shall be done out of Court and by men of business, not in Court and by lawyers.

The Committee carry further what we think the true principle. The best persons to administer a bankrupt's estate, the persons most likely to administer it as if it were their own, are the persons solely interested in it—the creditors. If much is realised, much will be divided among them. If little is realised, little will be divided among them. To all the rest of the nation the result of the winding-up of an insolvent estate is, in a pecuniary sense, quite indifferent; but to the creditors it is always somewhat important, and it may be very important. The Committee, therefore, propose that the creditors should, as in Scotland, be the persons charged with carrying out the administration of *their* estate. They are at a first meeting to choose a working individual as *trustee*, who is to give security for good conduct, to receive "reasonable remu- "neration," in whom the whole bankrupt's property is to rest from the moment of his appointment, who is to collect the assets first, and then divide them. He is to be subject to the superintendence of two inspectors also chosen by the creditors, and also acting for them and for them only. The recommendation is that there should be an efficient agent appointed by the creditors, and a watching subordinate also appointed by them.

Of these resolutions it need hardly be said we entirely approve. We have no doubt that the Court of Bankruptcy—the present administrator—is the worst body for that purpose. We have no doubt that the creditors, if they will act, if they will attend to their own business, are by far the best administrators of that business. These recommendations are in truth identical with those which we ventured to put forth in the article to which we have referred. We did, indeed, in that article also propose an additional and supplementary machinery, in case the creditors did not act, and preferred to intrust the duty to an administrative department of Government. We do not feel sure that hereafter some supplementary machinery of that kind may not be necessary; we cannot feel confident that creditors in this busy country will always do even the slight duty which the proposal of the Committe would require of them. They have only indeed to appoint a good trustee and good inspectors, and the thing is done. Perhaps we are timid, but we do not feel sure that they will *always* do even this, that they would not sometimes prefer a different machinery. But this subordinate suggestion may be considered afterwards; the first thing is, get rid of the existing bad machinery, of the absurd anomaly which sets a judicial court—not to decide, but to execute—not to judge, but to work. The next thing is to try the creditors, and see if they will attend to their own concerns. In important cases they doubtless will, and if cases are to be found in which they will not so attend, it will then, with the aid of facts and by the light of experience, be easier to provide a supplementary form of procedure.

The second duty of the present Court of Bankruptcy, what we have called its remitting duty, the Committee have proposed to take from them. They have imposed it on the Legislature. They have said that if a man pays 6s 8d in the pound, he shall be free, and that until he pays 6s 8d he shall not be free. Unless he pays that dividend,—for six years, the ordinary time fixed in the Statute of Limitations, he shall not be free. At first sight the expediency of the recommendation may be doubted; it may be said that it is hard on a trader who has been unfortunate, who has had losses which no one could count on, who has not received gains on which every one would have counted, to be obliged to pay debts which he contracted in anticipation of those gains and without expecting those misfortunes. There is, put it as you like, it may be said, a *risk* in commerce. There are times of panic against which no one can provide, and which the most intelligent hardly foresee. At such periods firms of the highest standing fail one after another, and it is hard that a well-meaning, honest, but perhaps not clever trader, who is ruined by trusting these firms, should not be at once set free, even though his assets are smaller than the fixed proportion. And possibly cases of peculiar hardship may occur in anomalous and rare cases, but we cannot make common laws for uncommon cases. In those rare cases each creditor can, as far as *his own debts* are concerned, do what the law now does. He need not take his money. He may absolve the bankrupt. But, as every one knows, these extreme cases of sudden innocent ruin are of infinite infrequency in actual commerce. Nine hundred and ninety-nine out of a thousand of those bankrupts who do not pay a decent dividend are not fit for decent commerce. Consider what bankruptcy is. It is an extraordinary intervention of the Legislature in favour of the debtor. It is not reasonable that it should be exercised in all cases whatever, whether the debtor is a speculative gambler or an industrious but unfortunate tradesman. And it is even less reasonable that there should be as now a preliminary investigation costly and yet useless—that the remission of liability should be in fact and practice almost universal, though it is preceded by a pretence of inquiry on which the money of the creditors is spent, but by which no creditor is benefited. In this case, as in so many cases, the evil has lain in the choice of an inappropriate instrument. A court of law is a fit tribunal to decide whether a specific crime has or has not been committed. But it is an utterly unfit tribunal to measure the past prudence or the past imprudence of an unsuccessful trader. No one can very well measure it; and least of all a lawyer, by habit searching for precise definitions, and bound by an analogous precedent. The best test is the dividend; it is a

Digitized by Google

rough one no doubt, and not a perfect one, but no practical machinery is at all near perfection. Nice and fine wheels will not do the coarse, plain work of real life. Generally speaking, those who have paid a decent dividend on their debts cannot deserve a special interposition of the Legislature to free them from those debts, and with this broad, rough, useful maxim, we may rest content and satisfied.

The punitive functions, such as they are, of the Court of Bankruptcy, the Committee transfer to the ordinary tribunals, and this is doubtless wise. There is no reason for a special Court for this sort of special offences. For penal purposes, you might as well have a special Larceny Court as a special Bankruptcy Court. No doubt, in a country like ours, where there is no public and authorised prosecutor, commercial offences, when left to the ordinary tribunals, may go unpunished because unprosecuted. But, then, all other offences are in a similar position: the sufferer by an injury is in England required to take upon himself the additional suffering of setting in motion the heavy machinery of the law. And if this is endurable with other offences, it will be so in commercial offences, for no one can say that the Court of Bankruptcy now punishes commercial offences either effectually or sufficiently. We need not fear leniency in the future, for we are accustomed to it already.

It is to be remarked, however, that one recommendation of the Committee will require considerable care in practice. They suggest the abolition of imprisonment for debt, and no doubt in theory rightly. Nothing can be more contrary to wise criminal jurisprudence than to punish as a crime an act which *may* be innocent, which may be almost accidental. The non-payment of debt, though generally caused by the misconduct of the debtor, is not always so caused; it is sometimes the result of misfortune. No legislation can, therefore, be more utterly unscientific and irregular than to punish unpaid debt as if it were an essential crime, an offence in itself. But in abolishing this old jurisprudence, we must take care to enact new and better jurisprudence. We must take care that we do not let off all insolvent debtors good and bad. Those who have recklessly made away with the money of others and have nothing left of their own, ought to be imprisoned, for they cannot be fined.

The Committee of course recommend that the fourth division of the business of the Court of Bankruptcy should remain in its hands. The civil business of adjudicating who is and who is not to be bankrupt; of deciding what claims on a bankrupt's estate should be proved and what should not be proved, necessarily and legitimately belong to a legal tribunal, and cannot be properly committed to any different body. It is evident, however, that if all the other duties of the existing Courts of Bankruptcy are abolished, and only this one left, much fewer courts will be required, and a much less complex judicial organisation will be necessary. The Committee propose to abolish all the Provincial Courts of Bankruptcy, and to vest jurisdiction in a Court in London and in the country Courts. We will not say we are entirely satisfied with, or that we are sure we comprehend the details of this suggestion, but in its principles we entirely concur. Much fewer Courts, much fewer offices, much less money, will be needed by the judicial elements in bankruptcy under the suggested system than under the existing system.

We think that the thanks of the community are due to the Committee which, after an elaborate investigation, has agreed to resolutions so admirable in their principle and essence, and so capable of being moulded into an effectual code on this important and difficult subject.

THE HITCH IN THE CONFEDERATION OF THE AMERICAN COLONIES.

It was not likely that a scheme so vast and so beneficial as that for the Federation of the American Colonies should be carried out without obstacle. It affected too many interests, stirred up too many prejudices, and was too clearly within the ken of colonial politicians, to be accepted like a Treaty without resistance. Nobody could see where the hitch would occur, but every one secretly expected its occurrence. It has arisen in New Brunswick, that little colony having, after an appeal to the people, rejected the project of Union almost with contempt. A colonist who imagines that this decision will create much irritation at home, writes to explain the conduct of his fellow-colonists, and his letter, though not by any means satisfactory, certainly sheds a new light upon some portions of the project. The New Brunswickers, it appears, have a number of objections to produce, which may, however, be reduced to two. They do not like to be included in a Federation which, while it will not give them a Central Government absolute like that of Great Britain upon every point of policy, will weaken the powers and lower the character of the provincial legislature, and they are not satisfied that the bribe offered to conciliate them will ever be honestly paid. The local legislature, they say, will have a great deal of power left over the wild lands and forests, over local improvements and over education; but all the men who could manage these matters,—the men, as we should say, of Ministerial rank,—will be drafted to Ottawa. They would greatly prefer absolute union like that of England and Ireland, and at any rate are not prepared to accept a scheme which once accepted can never be altered except by a revolution. It was known that they would raise this objection, and, therefore, they were promised an intercolonial railway, which would make all their fortunes; but they have a secret idea that the Upper Canadians, who are all for canals, will somehow continue to evade the fulfilment of this obligation. So they are inclined to wait, or even to promote, as a preliminary step, an absolute union of the three maritime colonies, which might extort better terms from the Canadians. Other reasons are touched on, such as the narrow colonial jealousy for self-government, and the dislike felt for a local Ministry which had held power too long, but these two are the only arguments worthy of grave consideration.

They are both, we think, unsatisfactory, the second especially so. It may be quite true that the Upper Canadians are not quite trustworthy in the matter of the intercolonial railroad, but then it is certain New Brunswick cannot get it alone. She was, she thinks, only offered a chance, but then even a chance was a great deal better than none, and that is all she has now. Moreover, the chance was a good one, for the colony would have had twenty-five representatives in the Acadian Parliament, a fifth of the whole, equal to the Irish representation in the United Kingdom. Such a body taking their stand upon a formal pledge, and determined to enforce it, would have been certain on the first contest to make their influence felt, or to have overthrown the Ministry which declined to keep its engagements. Even in England the Galway subsidy had to be granted, and the friends of that project had no formal promise to plead, no appeal to make to the national faith. The second objection is more serious. The New Brunswickers have hit the great blot in the scheme, the want of complete authority in the Central Legislature. That is undoubtedly an element of weakness both for the future nation and its component provinces, but still in politics wise men take what they can get, and submit to compromise when only compromise will secure their ends. The Lower Canadians would have resisted perfect unity, would probably have rebelled against it, fearing for their church, and their opposition would have been much more fatal than that of New Brunswick. The delegates, therefore, had, like the framers of the American constitution, to do the best they could, and they did secure to the Central power authority which the Legislature, if respected, would soon have made complete.

There is nothing for it now, we suppose, but to wait until the success of the new arrangements induces New Brunswick to postpone her obligations and enter the Federation. The opposition disturbs the symmetry of the plan, and the geographical completeness of the new State, and it is a little vexatious that a policy accepted by three millions of people should be interrupted by the unreasonableness of less than 300,000. But still there are no means of coercion which England or Canada is at all likely to try. This country might if it chose declare New Brunswick free, and Canada might establish a system of non-intercourse; but in the first case, we could not object to the enfranchised colony voting itself a State of the Union, and in the second, New Brunswick can play that game with even greater effect than her wealthier rival. We could buy off opposition, of course, by guaranteeing the intercolonial railroad, but the Minister who begins that system would deserve impeachment, and would certainly have to encounter the opposition of Mr Gladstone and every Liberal in Parliament. Nor is there much harm in waiting if the delay is not pushed too

Digitized by Google

far. New Brunswick says she is not unwilling to pay her share of the military expenditure, and the Governor can provide that all she contributes shall be so expended as indirectly to support the general defensive arrangements. The people of the Canadas, who form three-fourths of the whole population, have accepted the measure by a vote of 91 to 33, which bespeaks hearty approval; and the maritime States, pressed by the necessities of their trade, by the attitude of the United States, and by the British Colonial Office, must sooner or later give way. There is much reason to regret a delay which will embarrass many arrangements, but none for betraying an impatience which would probably be futile and is certainly undignified.

THE PRUSSIAN CRISIS.

The Constitutionalists of Prussia are displaying unexpected sense and spirit. It was expected that the victory over Denmark, the capture of Döppel, the deliverance of the Duchies would, by gratifying the national pride, greatly strengthen the Minister whose policy had produced those results, would incline the liberal members towards compromise, and the constituencies to throw themselves at the feet of the King. The result, however, has been a different one. The victories have indeed elevated the national spirit, but the elevation has only increased the desire for a nobler national life; they have deepened the self-confidence of the people, and therefore their readiness to trust themselves with the responsibility of self-government. The tone of the Opposition, so far from being lowered, is firmer and more incisive than ever, and there is evidence that the long struggle is hardening the minds of their leaders into a more statesmanlike moderation. The new aspect of the House evidently impresses the King, and the first concession made comes from his side. His Majesty offered to allow the strength of the army to be fixed by law, provided that it might be increased in any time of urgency. The provision was nearly illusory, but still it offered the Chamber of Deputies a loophole through which to recede from their position. They, however, declined to accept it, unless their right to control the military budget were formally acknowledged, and with true constitutional tact passed on to the consideration of the general budget. A Committee appointed for that purpose drew up a series of recommendations framed with a skill which has evidently greatly embarrassed the Ministry. They declare that the military budget ought to be reduced, and the saving expended on new roads, agricultural works, schools, and an increase in the allowances of schoolmasters, and of all *subordinate officials*. All of these are objects dear to the country, but it is the last of them which worries the Ministry, for it directly and powerfully interests the army. The officers are usually "noble," and it is vain, therefore, for the liberals to conciliate them, but the non-commissioned officers in Prussia, as in England, are the bones of the military system, and the Chamber has earned their support. Under the military law of Prussia, a non-commissioned officer has a preferential claim to most subordinate civil offices, and if he leaves the army he usually accepts one as the readiest means of livelihood. These officers are wretchedly paid, so wretchedly that their allowances baffle even German thriftiness, they get into debt, and they spread their complaints among their old comrades still in the ranks. The proposed increase in their pay, therefore, not only delights them, but all the sergeants who will succeed them in their posts, and all the men who hope to become sergeants, the pick and flower of the army. No wonder Herr von Roon grew savage in his assertions of the sergeants' loyalty. Then the Committee asks the abolition of the salt monopoly, keenly felt by the peasantry; a reduction of legal fees, greatly disliked by merchants; a revision of postage, very important to an educated race; a definite limit to the income tax, which we understand without explanation; and the application of part of the house tax to the relief of the municipalities. Every class in Prussia understands these reforms, and the remarkably clever speech of Privy Councillor Mölle, in which he shows that the Constitutionalists, while reducing taxes, want to increase expenditure till they will have 750,000*l* of reduction to meet 1,500,000*l* of deficit, falls as dead as Mr Gladstone's argument against premature resolutions to reduce taxation.

The Ministry is, of course, violently irritated. Herr von Bismark for some reason avoids Parliament, and the work of debate is left to Herr von Roon, the War Minister, a soldier in whom great capacity for administration and considerable general power are impaired by the disease of "militarism," now so general upon the Continent. Upon one point—the military organisation—he argues, but upon every other his notion of debate is a violent assertion, followed up by a menace, and succeeded by an apology. He declares that if Prussia is to maintain her rank as a great Power, she must have an army of 340,000 men ready for action, and of them 250,000 must be round the colours, while the time of service must be three years instead of two. France, under her sagacious Emperor, will attack Prussia whenever his interests require it, and France has an army of 400,000 men. To this, General Stavenhagen replies that France has not 400,000 men moveable, while Prussia in time of war would not need any internal garrison, and that 180,000 men will be sufficient if Government is permitted to increase the number in time of public danger. Herr Virchow went much further and declared that Prussia preferred liberty to status, and that the true way to make a small State great was to leave its workmen at their work, and to increase population, not to shut up one-fifth of the young men in barracks, where they neither work nor marry. The debate enraged the Minister of War till, losing all discretion in his excitement, he threatened "that Govern-"ment would look out for means to reconcile the result of the "elections, with the interests of the country." This menace, however, though interpreted to mean a *coup d'etat*, failed to frighten the majority, which through Dr Simson, an old judge of appeal and a moderate, responded that 22,000,000*l* a year could not in these days be got out of a people like the Prussian without consulting the national will, therein hitting the true constitutional point. Finally, the Chamber, adhering to its decision in spite of menaces, has demanded as its right a revision of the military budget.

All these debates and speeches reported everywhere among a people who can all read, are slowly waking up the spirit of the population. Respectable persons suffer distraint for taxes, the towns are constantly petitioning, the Rhine provinces have refused to celebrate the fiftieth anniversary of their annexation to Prussia, and in Cologne the ceremony ordered by the State was attended only by soldiers and officials. The electors, as Herr von Roon admits, are entirely with the Chamber, and the King has therefore only three courses before him, to submit, to abolish the Constitution, or to reign with a Parliament in existence, but indefinitely prorogued. The first course is improbable, as the King is honestly convinced of the necessity for a great army, and belongs to that class of men in whom the will and the conscience are inextricably blended, till they themselves mistake each for each; and the second is full of danger. A *coup d'état* might lead to a refusal of taxes, and there seems to be a secret fear in the mind of Herr von Roon as to the feeling of the army. Not that the army is untrustworthy, but to use it effectually against the people, it must be willing as well as obedient, for the Prussian Constitutionalists, amid the many disadvantages of their position, have one unusual power. The masses behind them are drilled masses, capable of organisation, trained to arms, accustomed to the word of command, and not inclined to run away because a man on a horse threatens to ride them down. To collect taxes by force from such a population is possible, but if the soldiery are reluctant, the process will involve very much friction and expense, so much so as to cripple the Administration altogether. The remaining alternative will, therefore, be the one adopted, and the King will attempt to govern with a Parliament in abeyance, unless, indeed, he should himself cut the knot by the abdication he has so repeatedly threatened. It must be remembered that the King is personally not only honest, at all events for a King, but by no means over attached to the *junker* or feudal party. He has neither desire nor temptation to sacrifice himself for their interests, and should the Treasury, for instance, be empty, or matters threaten a dead lock only to be removed by bloodshed, he would in all probability retire into private life without too many pangs. Upon the whole, the chances of the Constitutionalists may be said to have greatly improved, and if they had only men in their ranks capable of forming a Ministry, they might attain very soon to a very considerable share of power. Unfortunately they have no such men, and are compelled to range themselves behind old Ministers like Count Schwerin, who are willing to govern liberally, but not willing to irritate the King beyond

Digitized by Google

pardon by putting themselves at the head of the liberals. It is this absence of tried statesmen to which Ministers allude in their otherwise inexplicable taunts addressed to the majority on their want of "cleverness" and understanding. The decision must soon be made, for the Chamber having insisted on reductions in the military expenditure, the Court must make up its mind and act upon it.

SIR CHARLES TREVELYAN'S FINAL BUDGET.

We can hardly sufficiently express our surprise at the singular effort of finance with which Sir C. Trevelyan has closed his career in India. According to the telegrams, he has abolished the income tax, which should have been retained, and imposed export duties which should have been omitted. We now impose duties on English imports into India, and duties on articles produced in India by English capital for English use. We tax the raw produce which we buy and the manufactured goods which we sell, and we let the rich natives go untaxed. What can be more absurd?

BOARD OF TRADE RETURNS.

During the first two months of the present and two previous years the value of the exports of British goods and produce, according to the returns issued by the Board of Trade, was :—

	£
1863	17,343,731
1864	23,111,707
1865	21,865,553

The above figures show a decrease in the shipments this year compared with 1864 of 1,246,154*l*; but an increase compared with 1863 of 4,521,822*l*.

In February only the shipments were :—

	£
1863	9,298,576
1864	12,698,121
1865	11,376,214

The following table shows the increase and decrease of the most important articles of export in the first two months of the current year, compared with the corresponding period in 1864 :—

Articles.	1864. £	1865. £	Increase. £	Decrease. £
Alkali	120,414	136,386	15,972	...

Sundries	6,876,109 98	.....	7,445,692 35
	1,299,098,846 51	.....	1,309,279,294 36

The return of the Bank of France is again unfavourable in a commercial point of view :—it shows a diminution of the large sum of 12,900,000f in discounts. As to the metallic return, it has also declined slightly—1,154,000f, but the circulation of notes has increased by 21,651,000f. The private deposits have declined by 8,742,000f, and the Treasury account by 47,262,000f.

The Bourse just now displays greater confidence than it has done for some time past, and business has assumed a certain degree of activity. The following are the quotations :—those of the Orleans and Western Railways, the Societe Generale and the Mexican loan are ex-coupon :—

The last news from Mexico are, I am informed, on the whole, favourable. Agents of the French Ministry of Finance have made a searching examination into the financial situation of the country; and they report, I hear, that if the revenue were duly collected, it would be, within a mere trifle, equal to the expenditure. Unfortunately in Mexico, all public functionaries, and especially tax-gatherers, are, as in Turkey, indolent and careless: bu it is hoped that from the energy displayed by the Emperor Maximilian, and from the guidance of the Europeans who are willing to settle in the empire, they will improve. The new loan, which from the first was foreseen to be necessary, will be very convenient to the Government by enabling it, so to speak, to clear the way for more energetic action than it has yet been able to employ. It is probable, therefore, that it will be raised before

Digitized by Google

long;—probably even in the course of next month. The amount of it, the rate at which it is to be issued, the interest it is to bear, and the period within which it is to be paid up, are not, I hear, decided; those points depending on certain advices which will arrive from Mexico by the next mail. It is hardly necessary to mention that the bankers, to whom the issue of the loan will be confided, have not yet been selected. That however it will, like the last one, be presented in the markets both of London and Paris may be considered certain. *On dit*, that English speculators are beginning to regard the last loan with more favour than they at first did; and that purchases of it on their account have been made in Paris. As to the new Bank of Mexico, projected by English and French capitalists, and, as you were informed some weeks back, sanctioned by the Mexican Government, it will, it is expected, soon take bodily shape.

In the debates on the Address in the Corps Legislatif, the discussion of a paragraph recommending the active execution of works of public utility, afforded M. Rouher, Minister of State, the opportunity of declaring that, though the Government intends to present a bill for encouraging the extension of railways, and to employ 60,000,000f a year during six years in making roads and bridges, improving the navigation of rivers, &c., it will neither raise a loan nor impose new taxes for such works. You will remember that when, some months ago, a project was brought forward for raising a large loan for public works, his Excellency M. Fould, Minister of Finance, refused to sanction it, because it would have occasioned profound financial perturbation, would have cast a heavy burden on tax-payers, and have deprived various branches of industry of the hands they need. The declaration of M. Rouher proves that his Excellency's policy has definitively triumphed. His firmness in this matter is regarded as a great service rendered to the country.

The question of Banks, which, as you are aware, powerfully excites public interest here, has been touched on in the debates on the Address in the Corps Legislatif. In a paragraph on the Address, referring to the commercial crisis, an amendment was proposed, expressing the wish that "the Emperor's Government would hasten to take measures to restrain within just limits sudden oscillations in the rate of commercial interest." M. Arman, an eminent shipbuilder of Bordeaux, affirmed that it is the Bank of France which fixes the rate, and he represented that it is ruinous for shipowners, whose operations require time, to commence a speculation with interest at 3 per cent. and to have to conclude it at 9. He suggested as a remedy for variations of discount that the Bank should augment its capital. M. Calley de Saint Paul, a banker, declared that the Bank of France was founded to discount bills constantly at a moderate rate, and that it was desirable that the Bank should not be under the necessity of raising its interest to protect its metallic reserve. In order to lessen the demand on the Bank, he recommended that measures should be taken for preventing capital being drained from the country for foreign railways, credit companies, and other enterprises. Another deputy, M. Haentjens, a merchant, held that so far from trying to shut out foreign undertakings, France ought to attract them, so as to become, like England and Holland, one of the bankers of Europe; and he said that "the remedy for commercial crises is the liberty of circulation." M. de Forcade la Roquette, in the the name of the Government, declined to enter into a discussion on the matter, on the ground that it will be fully investigated by the Special Commission which has been appointed. He added, that the sittings of the Commission, which had been delayed in consequence of certain traders of Paris who had petitioned for the inquiry not having prepared their evidence, would be resumed after the debates on the Address, and be continued with all the celerity possible. From this outline you will perceive that the discussion in the Legislature was very insignificant, and that the principal opinions expressed in it were unsound in an economic point of view. Some surprise is felt that the Messieurs Pereire, who have taken the lead in the recent agitation against the Bank of France, did not favour the Chamber with their views; but perhaps they are reserving what they have to say for the Commission.

The Paris traders above-mentioned have, after a month's cogitation, decided that what they will propose to the Commission is:—That the Bank of France note shall be made a legal tender; that branches shall be established in all departments in which there are none; that the capital shall be realised; that the Board of Directors shall be formed, half of bankers, half of merchants; that bills bearing only two signatures shall be discounted for persons who have a permanent account with the Bank; and that the rate of interest shall be limited to 5 per cent.

Mr Cobden has obtained the, for an Englishman, very rare, if not unexampled honour of having had an eulogium pronounced on him in the French Chamber. It was delivered by M. de Forcade la Roquette, and was very appropriately placed in a speech in which the honourable gentleman defended the abolition of the sliding scale on grain. What he said was warmly approved by all the Chamber. All the newspapers have likewise spoken laudatorily of the deceased, and the Emperor has directed that his bust shall be placed in the galleries of Versailles, which are set apart to doing honour to the "glories of France."

An extraordinary general meeting of the shareholders of the Societe Generale is called for the 2nd of May, for the purpose of making modifications in, and addition to, the statutes. The dividend of 6f for 1864 is now in course of payment. Although only in operation for a few months, the Society up to the 31st December last made discounts amounting to 123,155,181f, advances on securities to the amount of 39,257,153f, collected 5,538,061f on coupons for customers, received deposits of 138,678,349f, paid on cheques, 34,138,835f; employed in Bourse continuations, 52,593,152f; and did certain other operations: the whole resulting in a clear profit of 1,697,632f. By the statutes a new call on shares ought to be made before the 4th May next; but the Directors have solicited the permission of the Minister of Finance not to make it for the present.

The annual meeting of the shareholders of the Orleans Railway was held a few days back, M. Bartholony, president of the Board of Directors in the chair. The report stated stated that in 1864 the receipts of all kinds, that is the working, the revenue from domains, the interest of investments, and the indemnity of 2,000,000f du Bourbonnais, were 83,174,439f and the expenses, including the charges for the loans, 47,937,829f, leaving a balance of 35,236,610f. This sum, after deducting the reserve fixed by the statutes, and the per centage to the employes, was sufficient to allow 100f per share to be distributed, and 1,837,497f to be added to the special reserve fund (which is distinct from the obligatory one), making the total thereof 5,836,000f. In the receipts the working of old lines produced 72,813,810f, which was 2,264,000f more than in 1863. The expenses of the working were 22,324,556f, and were about 2¼ per cent. more than in the preceding year; but then they include a sum of 6,000,000f employed extraordinarily in the renewal of the line, and of the rolling stock. The receipts of the new lines, after deducting expenses, were 6,992,214f. The report states that in 1864, notwithstanding the depressed state of the money market, the debentures of the company were sold at an average price of 288f and a trifle; and that now they are readily taken at 300f. As to the revenue of the present year, it will, it is expected, be larger than originally calculated on. The meeting gave the directors power to borrow 380,000,000f for completing the new lines it has undertaken. Of the revenue of 100f per share, 30f have already been paid.

The report of the Directors of Western Railway, which as usual is very long and complicated, states that the total receipts of the old lines in 1864 were 54,338,181f; and the expenses, 42,573,821f; leaving a balance of 11,774,360f, which permits 39f to be given to each share. Of this sum, 17f 50c were paid last year, and the rest is now in course of payment. The receipts of the new network, expenses deducted, were only 2,500,000f. The debentures were negotiated at 282f 95½c on an average,—a sum, it will be noticed, inferior to that of the Orleans Company. An arrangement has been entered into with the London and Brighton Company for establishing a line of steamers to ply constantly between Dieppe and Newhaven—the capital required to be furnished by the two companies. The report intimates that the traffic between Paris and London *via* Dieppe and Newhaven may be expected to increase considerably; but the route, under the most favourable circumstances and with tidal trains, takes two hours more than those by Calais and Boulogne, and the sea voyage is much longer, and generally more disagreeable. The future prospects of the Company are somewhat gloomy: the report calculates that when the new network shall be completed the dividend will fall to 30f, which, it says, will not be a sufficient remuneration for the efforts necessary to develop the traffic.

A meeting of the shareholders of the Sous Comptoir du Commerce et de l'Industrie has been held. On account of heavy losses sustained in the latter half of 1864, and for which 550,000f had to be taken, a dividend of only 2f 50c could be declared:—for the first six months of the year 5f were distributed.

The Omnibus Company of Paris has declared a dividend for 1864 of 70f. That of 1863 was 71f. Of the 70f, 25f have been paid, and the rest are to be distributed from the 1st July next. In 1864 the enormous number of 99,000,000 passengers were carried. The company is under the necessity of raising a new loan.

In a meeting of the Company des Entrepots et Magasins Generaux de Paris, a dividend of 30f was declared for 1864. It is equal to 6 per cent. of the nominal value of the shares. M. Emile Pereire presided over the meeting.

The Salines Domaniales de l'Est (salt works) pays a dividend of 60f for 1864.

M. Dautrevaux, a banker and speculator of Paris, who gained a certain notoriety by his advertisements, has closed his doors and quitted France. The law officers are making an investigation into his affairs. The amount of his liabilities has not yet been ascertained.

A banker of Saint Lo, of the name of George, has suspended payment, with liabilities of about 6,000,000 francs; assets not stated. The Discount Bank (Comptoir d'Escompte) of Saint Marie aux Mines, department of the Haut Rhin, has also suspended.

From a report of the Societe de Commerce et d'Industrie at Amsterdam, it appears that in the year, ending 31st December,

Digitized by Google

losses to the amount of 4,492,413 florins were sustained. The director of the Company, M. Mendel, it may be remembered, disappeared a short time ago. A curious action arising out of his flight is now pending before the Tribunal of Commerce of Paris.

The Banque de Credit et de Depot des Pays Bas, which has a branch at Paris, announces that its profits for 1864 were 1,113,381f, which make a dividend of 25f.

An Imperial decree declares that, as circumstances no longer justify the maintenance of premiums on the export of cotton from Algeria, which were given as an encouragement to planters, they shall be abolished, and be replaced by subventions for the construction of barrages in rivers and torrents and the sinking of wells, undertaken for the cultivation of cotton, and also for the importation of improved packing machines.

The Bank of France has resolved on receiving into its vaults parcels coming from abroad containing gold and silver. It will charged 1f 50c each, but will not verify the contents, and will not be responsible for them.

The annual meeting of the Spanish Credit Mobilier is to be held at Madrid on the 30th of May.

Customs returns show that the value of merchandise imported and taken out of bond for consumption in the first two months of the present year was 363,855,000f; and that in the same two months of 1864 it was 356,611,000f; of 1863, 360,864,000f; of 1862, 337,567,000f; and of 1861, 338,192,000f. Thus the progress which for some time past has marked the imports has been fully maintained. But in the exports, which had augmented even more rapidly than the imports, there has been a falling off. In the first two months of 1865, the value of those of French production was 387,148,000f; whilst in the same period of 1864, it was 419,907,000f; of 1863, 375,875,000f; of 1862, 304,994,000f; and of 1861, 295,348,000f. The decline has been chiefly in silk tissues, and there has been also one in wines, ready-made clothes, and linen, tools, and articles in skin and leather.

The imports and exports of the precious metals, which are not included in the preceding figures, were as follow:—

	First two months of 1865. francs		First two months of 1864. francs		First two months of 1863. francs
GOLD IMPORTED.					
Bullion	17,422,719	...	19,293,042	...	33,471,355
Coin	59,407,080	...	77,429,478	...	46,178,580
	76,829,799	...	96,722,520	...	79,649,935
GOLD EXPORTED.					
Bullion	2,935,383	...	3,943,365	...	5,788,713
Coin	33,433,536	...	40,298,352	...	22,715,376
	36,368,919	...	44,241,717	...	28,504,089
SILVER IMPORTED.					
Bullion	11,416,237	...	11,998,907	...	2,506,832
Coin	26,882,151	...	43,029,024	...	23,330,296
	38,298,388	...	55,027,931	...	25,837,128
SILVER EXPORTED.					
Bullion	18,718,929	...	26,862,184	...	19,695,146

SILVER.				
England	2,072,808	1,005,068	938,200	692,200
Belgium	532,400	1,706,600	4,905,989	5,682,100
Russia	...	...	...	...
Zollverein	55,100	4,027,500	1,299,140	191,400
Spain	...	16,895,040	...	59,334
Kingd. of Italy	7,988,840	2,341,000	424,000	695,000
Switzerland	...	...	...	...
Turkey	...	...	...	43,200
Egypt	...	...	...	924,800
British India	...	...	10,452,400	1,860,600
China	...	...	67,400	339,200
United States	...	...	...	...
Other countries	767,089	906,943	631,800	1,901,200
	11,416,237	26,882,151	18,718,929	12,389,034

Turning the totals above into English money, it appears, that in January, 1865,—

	£
The imports of gold were	3,073,192
The exports of gold were	1,454,756
Excess of imports	1,618,436
	£
The imports of silver were	1,531,935
The exports of silver were	1,244,318
Excess of imports	287,617

In adding the excess of imports of gold and silver, it will appear that the stock of precious metals during the first two months of 1865 increased by 1,906,053*l*. As to the amount sent to the East, it was as follows: 441,264*l* of gold and 36,992*l* of silver to Egypt; 492,520*l* of silver to British India; and 16,264*l* of the same metal to China; in the whole 987,040*l*.

The market report is as follows:—

FLOUR.—At *Paris*, prices have a downward tendency, and yesterday choice was 48f the sack of 157 kilogs; first marks, 47f; good, 46f; other sorts, 44f to 45f. Six marks, disposable, 48f; May, 48f; four months of May, 49f 75c. Type Paris, the 101 kilogs, 29f 25c.

WHEAT.—In most of the provincial markets firmness prevails. At *Paris*, however, there has been a decline. Yesterday, choice white was 27f to 27f 50c the sack of 120 kilogs; choice red, 26f 50c to 27f; first qualities, 25f to 25f 50c; and other sorts, 24f to 24f 50c.

COTTON.—At *Havre*, in the week ending Friday, the sales were 3,072 bales, the greater part Indian. The arrivals were 2,874 bales. The stock was estimated at 69,430. The closing quotations were 10f to 15f lower for United States, 15f to 20f. Brazil, 5f to 20f Surat, 15f to 30f Tinnevelly, 25f to 35f Madras, 5f to 10f Bengal, 20f China and Jumel. Low New Orleans was consequently 205f the 50 kilogs; good ordinary qualities in Broach, 120f; in Tinnevelly, 110f; in Madras, 125f; China, 120f; Jumel, 185f. This week, the market has been very dull, and yesterday, Madras was 115f and 100f; Broach, 117f 50c; Dhollerah, 115f; Comptah, 105f; Kurrachee, 75f; Japan, 115f; China, 87f 50c; Jumel, 180f; Pernambuco, 150f.

COFFEE.—At *Havre*, in the week, ending Friday, the sales were 425 sacks Hayti, disposable, 81f 50c to 82f the 50 kilogs in bond; 4,120 Santos, 65f to 80f; 850 Bahia, 70f; 14 chests Neilgherry, 96f; some Guadaloupe bonifieur, 146f duty paid, and some ditto habitant, for delivery, 140f to 141f. The arrivals exceeded 1,100 sacks and 90 casks. This week, Santos, 79f in bond; Hayti, 82f; Guadaloupe, 110f; Bahia, 75f; Cape, 85f to 86f. At *Nantes*, last week, a small lot of Guadaloupe bonifeur went at 160f; some Jacmel was also sold. No sales this week. At *Bordeaux*, last week, the sales were 500 sacks Mysore, 117f 50c and 118f; 200 Rio not washed, 81f; some Guadaloupe bonifieur, 157f 50c; and habitant, 148f. This week, La Guayra, grage and non-grage, disposable and for delivery, 97f 50c and 98f; Guadaloupe bonifieur, 157f 50c. At *Marseilles*, last week, no sales, and none this week.

SUGAR.—The market at *Havre*, in the week ending Friday, was calm, and prices were not firm. The sales were, 168 casks French West India, disposable and for delivery, 48f the 50 kilogs, bonne quatrieme, duty paid; 5 ditto usine, second jet, 50f; 811 casks Havana, 30f 50c to 31f, No. 12 in bond. By auction, some damaged Havana was sold. The arrivals were 200 sacks. This week, French West India, for delivery, 48f and 48f 50c, bonne quatrieme; Reunion, bonne quatrieme, 51f 50c; Java, 29f 50c, No. 12, duty paid. At *Nantes*, last week, sales were large. but owing to the bad situation of other markets, prices were maintained with difficulty. 28,087 sacks Reunion, 52f, bonne quatriene; 134 ditto gros grain, 57f, on sample; 11,811 sacks Mauritius, for delivery, 52f 50c, bonne quatrienne; 350 casks Martinique, 50f, equal to 49f the type. This week, Reunion, bonne quatrieme, 52f. At *Bordeaux*, last week, business not active, and prices were lower. Some French West India, 47f 75c, bonne quatrieme; and usine, 60f and 65f; 1,350 Reunion, 52f, bonne quatrieme. Nothing done this week. At *Marseilles*, last week, refiners abstained from buying, and apart from them the only sale was 180 casks Havana from entrepots, 32f, No. 12. This week, French West India, for delivery, 31f 25c and 31f, bonne quatrieme of Havre; Brazil, by Danish ship, 28f 50c, No. 10.

INDIGO.—The demand at *Havre*, in the week ending Friday, was somewhat more regular: 32 chests Bengal at about established prices; 1 seron Guatemala at prices kept secret; 26 chests Manilla inferior at 2f the half-kilog. The arrivals were 42 chests from England. This week, Bengal, 75c premium. At *Bordeaux*, last week, 9 chests Bengal at established prices; 6 Madras, good quality, 5f 50c the half-kilogramme; 25 Kurpah, the superior sorts at established prices, ordinary at a decline of 15c to 25c. For delivery, 55 Bengal, at about 2f 77½c the roupie. This week. Bengal and Kurpah at prices not stated.

HIDES.—The market was calm at *Havre*, in the week ending Friday: 1,700 Buenos Ayres dry cow, 90f the 50 kilogs; 2,600 Monte Video salted saladeros ox, new, 63f; 700 ditto, cow, 47f 50c to 48f; 1,300 Rio Janeiro salted ox, 52f; cow, 43f to 44f; 250 Pernambuco salted, 47f; 535 Valparaiso drysalted ox, 79f; 300 Monte Video dry, 6f 25c each; 10 bales Calcutta cow, 52f 50c the 50 kilogs. By auction, 600 Trinidad salted, 45f to 45f 25c. The arrivals were inconsiderable. This week, Rio Grande, 87f 50c; Pernambuco salted, 47f.

WOOL.—At *Havre*, in the week ending Friday, 260 bales Buenos Ayres and Monte Video, unwashed, 1f 15c to 2f 40c; 10 Monte Video washed, 2f 40c. The arrivals were 575 bales. This week, Buenos Ayres, unwashed, 1f 17½c to 2f 30c, and per 100 kilogs, 200f and 207f 50c; sheepskin, washed, 3f 10c, and per 100 kilogs, 95f to 172f 50c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were only 100 casks La Plata disposable and for delivery, 51f 50c to 52f the 50 kilogs; 25 New York disposable, 49f. There were no arrivals. No sales this week. At *Paris*, yesterday, the 100 kilogs were 105f 70c, octroi duty included.

In reference to the state of the money market at Bombay, during the fortnight ending March 13, Messrs Clason and Co. write as follows :—"Our market tightens from day to day, and the fear lest difficult times are in store for us is commencing to engender a general restriction of credit. Up to the present moment this new feature has not, indeed, assumed any dimensions of importance; but a rapid extension of it is apprehended, if our prospects do not speedily change for the better. The Bank of Bombay is setting a prudent example by being exceedingly particular in the choice of the paper it discounts, and by having further increased its rates 1 per cent.; they now stand at 13 per cent., and 15 per cent. for loans and first class 3 months discounts respectively. The cash balance of the bank has continued to suffer a marked decrease, chiefly owing to the withdrawal of deposits.

According to a Parliamentary return recently issued, the new railway and other companies brought before Parliament this session number 595, with a proposed capital of 126,441,708*l*.

During the week ending April 5, current year, the imports of the precious metals were :—gold, 300,033*l*; silver, 357,895*l*. The exports were :—gold, 20,321*l*; silver, 173,803*l*.

Mr J. R. Scott, the Registrar of the London Coal Market, has published the following statistics of the imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during March, 1865 :—

Ditto sent beyond limits by railway		13,482	
Ditto by canal and inland navigation		6,031	
			46,465
3. Railway-borne coal exported to British Possessions, or to foreign parts, or the coast		2,497	
Ditto by rail beyond districts		181	
Ditto by canal and inland navigation		269	
			2,947
4. Sea-borne coal brought into port and exported in same ships			2,012
Total quantity of coal conveyed beyond limits of coal duty district during March, 1865			68,148
Ditto, 1864			80,414

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending March 4, 1865, compared with the previous month :—

	Feb. 4, 1865.	March 4, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	20467763	19951941	...	515822
Private Banks	3074159	2954480	...	119679
Joint Stock Banks	2788089	2738606	...	49483
Total in England	26330011	25645027	...	684984
Scotland	4157576	4069154	...	88422
Ireland	5713708	5702589	...	11119
United Kingdom	36201295	35416770	...	784525

And as compared with the month ending the 5th of March, 1864, the above returns show a decrease of 380,402*l* in the circulation of notes in England, and a decrease of 167,961*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation :—The English private banks are below their fixed issue 1,258,306*l*, the English joint stock banks are below their fixed issue 487,751*l*,—total below fixed issue in England 1,746,057*l*: the Scotch banks are above their fixed issue 1,319,883*l*; the Irish banks are below their fixed issue 651,905*l*. The average stock of bullion held by the Bank of England in both departments during the month ending March 1 was 14,618,770*l*, being an increase of 355,756*l* as compared with the previous month, and an increase of 889,385*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month :—Gold and silver held by the Scotch banks, 2,422,738*l*; gold and silver held by the Irish banks, 2,098,935*l*; total 4,521,673*l*; being an increase of 4,064*l* as compared with the previous return, and an increase of 223,504*l* when compared with the corresponding period of last year.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 5th day of April, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,051,650	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,401,650
		Silver Bullion	...
	29,051,650		29,051,650

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,110,838
Rest	3,122,231	Other Securities	21,515,431
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	9,231,615	Notes	8,149,045
		Gold and Silver Coin	853,783
Other Deposits	14,172,353		
Seven Day and other Bills	449,898		
	41,629,097		41,629,097

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,352,503	Securities	32,723,269
Public Deposits	9,331,615	Coin and Bullion	15,255,433
Private Deposits	14,172,353		
	44,856,471		47,978,702

Dated the 7th April 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,122,231*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£963,759
A DECREASE of Public Deposits of	507 815
An INCREASE of Other Deposits of	694,111
An INCREASE of Government Securities of	87,627
An INCREASE of Other Securities of	364 588
A DECREASE of Bullion of	103,566
A DECREASE of Rest of	801,406
A DECREASE of Reserve of	1,054,851

The Bank return of this week exhibits the changes usual at the period of the quarterly payments. The most important feature is the decline of 1,054,851*l* in the reserve. The stock of coin and bullion is less by 103,566*l* than that of the preceding week, notwithstanding the amounts sent into the Bank during the week.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20,717,199	21,822,105	21,279,339	21,528,914	21,352,503
Public deposits	6,008,895	5,625,314	6,714,109	9,818,880	9,331,615
Other deposits	11,396,875	16,336,169	14,829,832	13,348,299	14,172,353
Government securities	13,026,749	11,160,755	11,129,445	11,273,056	11,110,838
Other securities	13,655,995	18,724 038	19,720,339	22,353,453	21,515,431
Reserve of notes & coin	9,266,458	10,383,600	8,912,745	7,263,543	9,002,828
Coin and bullion	15,078,818	16,881,940	14,963,835	13,616,763	15,255,433
Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	6 p. c.	4 p. c.
Price of Consols	91¼	94⅛	92⅝	91⅜	90⅝
Average price of wheat	68s 5d	58s 5d	45s 9d	40s 2d	38s 11d
Exchange on Paris (short)	25 17½ 22½	25 22½ 30	25 17½ 25	25 15 25	25 15 22½
— Amsterdam ditto	11 18½ 18⅝	11 16 16½	11 16 17	11 16 16½	11 16⅞ 17½
— Hamburg (3 months)	13 8½ 8½	13 8 8½	13 7½ 8	13 7½ 7⅝	13 8½ 9

In the corresponding week of 1855, no further progress had been made either in the active operations in the Crimea, or in the negotiations at Vienna.

In 1862, the demand for money was rather active. The prospectus of the Egyptian 7 per cent. loan had been issued

Digitized by Google

for 2,195,200*l* stock, at 82½. The Budget for the year had been presented by Mr. Gladstone.

In 1863, the contract for a new Turkish loan of 8,000,000*l* had been signed. 6,000,000*l* stock was to be issued immediately, and the remainder, at the option of the Government, at a later period. Gold was accumulating at the Bank, and the rates of discount were easy. Some excitement was taking place in the market for Greek bonds, on account of the nomination of Prince William of Denmark to the throne of Greece.

In 1864, the trenches at Duppel had been opened by the Prussians, and the bombardment of the place was being carried on with great vigour. The Prussians had suffered a defeat near Veile. Denmark had officially notified her acceptance of the Conference as proposed by England. The Brazilian Government had accepted the mediation of Portugal in the dispute with England. In America, General Beauregard had been appointed to the command of the army of the South West. Admiral Porter's fleet, and Sherman's forces had left Vicksburg for the Red River. Arrangements had been completed for the issue of the new Mexican loan. The demand for discount was active.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 2,259,120*l*; in 1862, a deficiency of 2,387,869*l*; in 1863, a deficiency of 4,890,507*l*; and in 1864, a deficiency of 9,405,154*l*. In 1865, the deficiency is 7,343,078*l*.

Discount and Money Market.—The demand for money is moderately active, at ¼ to ⅛ per cent. below the Bank rate, and the return issued to-day is not so favourable as we anticipated. Rumours of impending failures of houses in the colonial and produce trade continue to be circulated; and it is probable that any additions to the large stocks now held in this country will tend to a further decline in values, and entail some if not a large number of commercial suspensions. With the close of the lock-out, a termination of the strike is now spoken of; and this is looked to as likely to check the downward tendency and communicate a greater degree of activity to the money market.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	3⅞ 4 per cent.
3 months	3⅞ 4 per cent.
4 months	4⅛ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	4½ 5 per cent.

Money is in fair demand in the Stock Exchange, at from 3½ to 4 per cent. on Government securities for most periods.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*.

The following are the current rates of discount in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½ ½
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4½ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2
St Petersburg	6	...

Bullion.—39,000*l* have been withdrawn from the Bank for export.

The following changes appear in the Bank of France return published this week, as compared with that last issued :—

Increase.	£
Advances	60,000
Notes	866,660
Current accounts	346,660
Decrease.	
Cash in hand	45,680
Commercial bills	512,000
Treasury balance	1,890,000

English Government Stocks.—The advances in prices commented on last week has continued; and Consols yesterday touched 91¼ for the May account. In the first instance the movement was caused by the rapidly declining value of money, which had the effect of inducing many persons to close their oversold accounts. Subsequently a speculation for the rise was entered into on the belief that further amounts of capital would be sent into the market from the North, in consequence of the continuance of the strike and the lock-out in the North. The Bank return of to-day has given results that were not looked for, and has had the effect or checking the operators for a further rise. Consols have receded from 91, to 90⅝ to 90¾, at which price they close dull. New 3 per Cents. and Reduced, 88⅝ to 88⅞; and India 5 per Cents, 106½ to 107. Consols, 90⅜ to 90½ for money, and 90⅝ to 90¾ for May Account.

Exchequer bills and India bonds are rather lower, at 2s to 5s and 6s to 11s prem. respectively.

The biddings for 300,000*l* Government bills on India were received at the Bank of England on Wednesday last. The proportions allotted were 174,200*l* on Calcutta, and 22,000*l* on Madras. The minimum prices were 1s 11¼d on Calcutta and Madras, and 1s 11½d on Bombay. Tenders on Calcutta and Madras at and above the minimum will receive in full. On Bombay no tenders were made above the minimum.

The Crown agents for the Colonies invite tenders, to be sent in by one o'clock on Thursday next, the 13th inst., for British Columbia Government Six per Cent. Debentures, to the amount of 100,000*l*, redeemable in thirty years from the 1st April, 1864. There is a sinking fund of 2¼ per cent. Five per cent. of the purchase money is to be paid on allotment, and the balance by the 24th instant.

Foreign Stocks.—There is less firmness this evening, owing to the decline in most other departments of the Stock Exchange. Spanish Passsive stock and the Committee's Certicates have been prejudicially affected by the publication of the speech of the Finance Minister. New Granada stocks are firm, and Turkish bonds of the foreign debts retain their price. Italian scrip, now quoted ex div., is also rather firmer. The closing prices of stocks dealt in to-day are subjoined :—4½ per Cent. Brazil, 83 to 85. 7 per Cent. Danubian loan, 82½ to 83½. 7 per Cent. Egyptian, 1862, 95½ to 96½; ditto, 1864, 94 to 95 ex div. Italian scrip, 4 to 3¾ dis. 3 per Cent. Mexican, 26⅞ to 27⅛. 5 per Cent. Moorish, 94 to 96. 4½ per Cent. Peruvian, 1862, 83 to 85. 3 per Cent. Portuguese, 48 to 48½. 5 per Cent. Russian, 1862, 90 to 91. 5 per Cent. Sardinian, 78 to 80. 3 per Cent. Spanish, 48 to 48½; ditto deferred, 41½ to 42; ditto Passive, 31⅝ to 31⅞; ditto Certificates, 16¾ to 17. 6 per Cent. Turkish, 1854, 94 to 95; ditto, 1858, 72 to 72½; ditto, 1862, 74½ to 75. 3 per Cent. Venezuela, 17¾ to 18; 6 per Cent. ditto, 1862, 40 to 41; ditto, 1864, 37 to 38 ex div. 5 per Cent. Italian, 1861, 64¼ to 64¾.

French 3 per Cent. rentes are quoted, by telegraph from Paris this evening, 67.70 for money, and 67.80 for the May account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The firmness of the markets has received a slight check to-day, but with this exception the prices are strong, with a decided improved tendency. The capital stock of the London, Chatham, and Dover line has been in better demand, and buyers of the common fund stock, as well as of the "B" and "C" extensions, have been numerous. A considerable advance has been the consequence of the increased demand for these stocks, and the continued rise in the Metropolitan Railway stock has caused attention to be directed to the Metropolitan extensions of the London, Chatham, and Dover line, which are expected to share in the large returns obtainable from the vast passenger traffic through London.

The advance in Caledonian stock is ½ per cent., and in Great Northern 1 per cent. The "A" stock is quoted 3½ per cent. higher than last week. Great Western stock is rather firmer, and Lancashire and Yorkshire notes an improvement of ¾ per cent., London and Brighton stock of 1 per cent., London, Chatham, and Dover is 4 per cent., and London and North-Western 2 per cent. higher. Midland stock notes an improvement of 1¾ per cent., and South-Eastern of 1 per cent.

Indian guaranteed stocks are all higher, as many of the investments induced by the low rates now allowed on deposits have been effected in these securities.

The advance in American stocks continues, and Canadian securities are also firmer.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	96 8	96 8

RAILWAY DIVIDENDS.—The directors of the Great Western Railway of Canada recommends a dividend at the rate of 2 per cent. per annum for the past half-year.

Foreign exchanges are in some cases rather lower, but very few transactions took place.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Since our circular of the 30th instant, gold to the amount of about 293,000*l* has been sent into the Bank; this consists partly of sovereigns returned from abroad, and of bars refined from the late arrivals. There not being the least demand for abroad, all immediate arrivals will also be retained here. The Pera has brought 36,470*l* from Alexandria; the Messageries steamer has brought 65,000*l* from Alexandria; the Parana has brought 16,000*l* from Brazils; the City of Washington has brought 4,500*l* from New York; the Hansa has brought 2,400*l* from New York; the Tasmania has taken 62,000*l* in French and English gold coin to the Brazils.

Silver.—The demand for fine bars for the East not having experienced the least revival, the silver ex Atrato has been sold 5s 0⅜d per oz. standard for Holland, but we do not consider the price firm in this market, We are without any arrivals to report since our last.

India Government Loan Notes.—We have no change to report in prices, which may be quoted—108 to 110 for the 5½ per Cents., 100 to 102 for the 5 per Cents., and 89 to 91 for the 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d per oz, last price. Silver—Bar silver, 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d per oz std, last price; Mexican dollars, 4s 11½d per oz, last price; 5-franc pieces, 4s 11½d to 4s 11½d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

Mexican Dollars.—The price has experienced a further decline, and the coin brought by the Atrato has been sold at 4s 11½d per oz, chiefly for Holland. The Delhi has taken 32,700*l* to China and the Straits.

Exchange on India for banks drafts at 60 days' sight may be quoted 1s 11½d per rupee for Bombay and Calcutta; business is very inactive for this description of remittance. The minimum for the Council drafts on India was fixed yesterday at 1s 11½d for Calcutta and Madras, and 1s 11⅝d for Bombay, being a reduction of 1 per cent. Allotments for for the former were made in full; for the latter, at the minimum, there were no applications.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A meeting of the creditors of Mr David Leopold Lewis, railway contractor and financial agent, was held on Monday last, for the purpose of deciding upon the best mode of liquidating the estate. After some discussion, it was unanimously resolved to wind up under inspection.

Mr Ball has been appointed provisional liquidator of the South Hants Bank. The bank premises have been purchased by the Provincial Banking Corporation (Limited), and business was commenced by the purchasers on Saturday last.

Vice-Chancellor Kindersley has fixed the 10th inst. for the appointment of an official liquidator of the Universal Mercantile Association (Limited).

The business of the London, Hamburg, and Continental Exchange Bank (Limited), has been transferred to the General Exchange Bank (Limited). The affairs of the London, Hamburg, and Continental Exchange Bank are in course of liquidation.

A petition for the winding-up of the Factage Parisien (Limited) is to be heard before the Master of the Rolls on the 22nd inst.

PUBLC COMPANIES.—At the meeting of the Union Steam Ship Company held on Tuesday last, a dividend of 1*l* per share was declared.

At the meeting of the Oriental Bank Corporation, to be held on the 21st instant, the directors propose to declare a dividend of 2*l* per share, making, with 2*l* already paid, a distribution of 16 per cent. for the year 1864.

On Tuesday Mr Henry Lancelot Holland was formally elected by ballot governor of the Bank of England, and Mr Thomas Newman Hunt, deputy governor.

On Wednesday the election of Directors of the Bank of England took place, Mr. H. R. Grenfell being the new member of the court.

The Committee of the Stock Exchange have appointed Thursday next a special settling-day in the shares of the following companies, viz.:—Albert Insurance (Limited), for bargains on and after the 10th May, 1864, not to be marked at present; Val Antigoria Gold Mining (Limited), for bargains on and after the 28th Feb., 1865, to be marked; Bombay Gas (third issue), to be marked.

The Committee have also ordered the shares of the Isle of Wight Railway Company, and of John Brown and Co. (Limited), to be quoted in the twice-a-week list.

The Committee of the Stock Exchange have appointed special settling days in the shares of the following companies: Victoria (London) Mining Company (Limited) for bargains, on and after 15th January, in the shares of 1865—Monday, April 10th; to be marked in twice-a-week list. General Irrigation and Water Supply Company of France (Limited), for bargains on and after 15th February—Monday, April 10th; not to be marked at present. Rio de Janeiro Gas Company (Limited), for bargains on and after 4th March—Monday, April 10th; to be marked. Metropolitan Railway Company, extension shares, February, 1865—Thursday, April 20th; to be marked.

At the meeting of the Bank of British Columbia, held on Tuesday, the report was adopted, and a dividend of 10 per cent. per annum declared.

At the first ordinary meeting of the British and Californian Banking Company held on Monday last, a dividend of 3s per share, free of income tax, was declared.

A meeting of the National Financial Company was held on Monday, when a resolution was passed in favour of an amalgamation with the Oriental Commercial Bank.

The report of the directors of the Chartered Bank of India, Australia, and China, to be submitted to the meeting on the 12th inst., has been issued. A dividend for the half-year ended December 31, 1864, at the rate of 10 per cent. per annum,

Digitized by Google

is recommended, which will amount, with the previous half-year's interim dividend, to 12½ per cent. for the whole year.

The share list of the Financial Insurance Company will close to-morrow (Saturday).

The dividend of the Panama Railroad Company's first mortgage bonds will be paid on and after the 10th inst.

The Ottoman Financial Association have made a call of 5*l* per share.

The Luckimpore Tea Company of Assam (Limited) is formed to purchase some very valuable estates in Assam. The sellers of the estate guarantee a minimum dividend of 10 per cent. during the current and following years. The yield of tea in that part of Assam is very ample, the quality of tea suitable to the English market, and the return of some similar undertakings very encouraging.

The share list of the Moyar Coffee Company (Limited) will be closed on Thursday, the 13th, for London, and Saturday, the 15th inst., for the country.

The New Zealand Loan and Mercantile Agency Company (Limited) has been founded, in direct connection with the Bank of New Zealand, in order to introduce new capital from England into that colony. The business proposed to be embraced by the Company is to make advances in freeholds, on lands, and debentures of Government and public Companies, and on the station and stock of squatters. They also are to advance "on the growing clip of wool secured by a registered "lien," which is a legal security in the colony. The Company estimate their financial prospects as follows:—"With a subscribed capital of 500,000*l*, it is proposed to have a paid-up capital of 100,000*l*; and that, taking advantage of favourable opportunities of borrowing on the debentures of the Company, a further sum be raised of 400,000*l*, making an amount of working capital of 500,000*l*. The rate of interest at which investments can be made in New Zealand may safely be assumed to average 10 per cent., while the borrowing rate in this market on the debentures of the Company would not be expected to exceed 6 per cent. At these rates the following may be taken as an approximation to the probable results:—500,000*l* at 10 per cent., 50,000*l*; commissions on wool sales, profit on exchange, 6,000*l*; procuration fees, &c., say 3,000*l*; total, 59,000*l*. Less cost of management and other incidental expenses, 10,000*l*; and interest on 400,000*l*, borrowed on debentures at 6 per cent., 24,000*l*; leaving a net profit of 25,000*l*, or 25 per cent. on the paid-up capital of the Company.

At the annual meeting of the British Empire Mutual Life Assurance Society, held to-day, the report presented stated that the directors during the past year had received 956 proposals, amounting to 238,085*l*, out of which 800 policies had been issued assuring 195,905*l*, and yielding 6,032*l* 16s 11d in new annual premiums. The total income of the society amounts to 79,046*l* 18s 4d, and the accumulated premium fund now amounts to 312,318*l*.

The City of Moscow Gas Company, Limited, has been formed for lighting the city of Moscow with gas, under an adequate concession granted by the municipality of the city and guaranteed by the Imperial Government. Moscow contains a population of 500,000, is situated at the centre of the commerce of Russia, and has ten railways within its walls. Moscow has hitherto been wholly destitute of fixed gas accommodation.

At the first annual meeting of the Landed Estates Company, it was stated that 32,743*l* had been received in respect of allotted shares, while the gross profit on the year's transactions equalled 12,856*l* 13s 4d. After payment of all outgoings, the net profit amounted to 11,301 6s 6d, which would enable the directors, after declaring a dividend of 15 per cent., to carry forward over 10,000*l*.

The Investment and Finance Agency is established for the purpose of effecting sales and purchases in public securities of all descriptions. A record is kept of the status and prospects of all stocks in the London market. The Company strictly abstains from all speculations on its own account or for its own benefit.

MISCELLANEOUS.—Messrs Baring Brothers and Co. have received by the last mail on account of New Granada dividends —From Custom house of Santa Marta, 2,009*l* 11s 1d; from Custom house of San José de Cucuta, 691*l* 12s 7d.

The mail from Guayaquil has brought a remittance of 832*l* 7s 3d on account of the dividends on the debt of Ecuador.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 1, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	73,924 6	38 11
Barley	57,426 5	28 11
Oats	6,213 7	21 2

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The English wheat trade at Mark lane, to-day, was heavy in the extreme. Factors would have accepted 1s per quarter less money than on Friday last; but as most offers were at a reduction of 2s per quarter, very little business was transacted; indeed, the bulk of the supply brought forward was left unsold at the close of business. The foreign wheat trade was dull, yet prices ended stationary. For Spring corn, there was a fair demand, and oats commanded rather more money than on Monday. The flour trade was steady, on former terms. This week's imports amount to 530 quarters of wheat; 4,410 barley; 8,220 oats; and 600 sacks of flour.

Both at Liverpool and Wakefield, this morning, the corn trade was in a sluggish state, and the tendency of prices was decidedly in favour of buyers. Very few changes of importance, however, took place.

There has again been a quiet cotton market at Liverpool, this week, and with cotton freely offered and pressed for sale, prices have further declined; prices may be quoted ½ to 1d lower than last Friday. The total sales of the week reach 42,480 bales, of which 4,780 have been taken in speculation; 5,940 have declared for export; leaving 31,760 to the trade. The imports reach 63,140, and the export amount to 5,940, the stock is now estimated at 605,450 bales.

From Messrs Ellison and Haywood's Liverpool cotton circular, dated April 1, we extract the following:—As compared with the rates current at the close of December, the present prices show a fall of 45 per cent. in American, 45 per cent. in Brazil, 47 per cent. in Egyptian, 48 per cent. in Smyrna, 45 per cent. in Dhollera, 50 per cent. in Bengal, and 43 per cent. in China. Speaking roughly, the present currency is pretty nearly on a par with that of June, 1862, before the first great advance took place. Thus:—

	Orleans.	Pernam.	Egyptian.	Dhollera.	Bengal.
	d	d	d	d	d
March 31, 1865	15¼	14½	14¼	11	6½
June 27, 1862	14⅞	15	15¼	11⅛	9¼

The present disproportionately large stock of Bengals, as compared with the exceedingly small quantity held here in 1862, accounts for the exceptionally wide difference in the prices ruling at the two periods. A comparison of the current rates with those prevailing at the close of 1860, gives the following result:—

	Orleans.	Pernam.	Egyptian.	Dhollera.	Bengal.
	d	d	d	d	d
March 31, 1865	15¼	14¼	14½	11	6½
December 31, 1860	7⅜	9	8¾	5¼	4

ESTIMATED STOCKS of COTTON in EUROPE.

	31st March—			1st Jan.,
	1865. bales.	1864. bales.	1863. bales.	1865. bales.
Liverpool	580,010	296,710	382,800	466,800

Total	801,970	447,250	520,800	648,000

We have letters from Bombay to March 13. Since the 1st the value of cotton had fluctuated considerably, and although the operations of speculators, which were of a somewhat extensive character, had occasionally given firmness to prices, the quotations current on the 13th ult. exhibited a considerable decline, as compared with those ruling at the commencement of the month. "Stocks," observe Messrs Nicol and Co., "are again beginning to accumulate largely, and so dealers, being anxious to reduce them as much as possible where they cannot find buyers, are shipping on their own account. Dhollera has been arriving more freely, but the selection still consists chiefly of Bhownuggur description. From other quarters we are getting cotton freely, and a few samples of new sawginned Dharwar have come to hand during the fortnight, not in sufficient quantity, however, to allow of any opinion being formed as to the probably quality of the new crop. The old stock of both this and Comptah has fallen off very considerably in quality." The following figures are from the circular of the above-mentioned firm:—

CURRENT PRICES of COTTON at BOMBAY, March 13.

	Market Value. Per candy, 784 lbs.	C.F.I. Exchange 2s 15–16d per R.

1858	62,335	869	3,244	...	15,359	86,407

Trade in Manchester goods at Bombay for the fortnight ending March 13, was very dull, and a general fall took place in prices. The following quotations of grey shirtings are from Messrs Rennie, Scovell, and Co.'s circular:—

No	Inches.		lbs	oz	s	d
13	39	14 by 11	6	0	11	9
18¼	39	14 14	7	0	14	3
24	39	16 15	8	0	19	0
27	38	16 16	8	8	19	7½
32	39	19 19	9	9	22	3
41	45	14 10¼	7	0	14	6
45	44	14 12¼	8	0	17	7½
49	44 to 45	16 16	9	8	20	10½
57	50	16 17	10	6	24	7½

Trade in the Mincing lane markets has continued somewhat heavy. The public sales of China tea have passed off slowly, at the late decline in prices. Coffee has sold at further reduced rates; but for raw sugar, there has been a steady demand, and the quotations have ruled firm. Cocoa, rice, rum, and brandy have steadily supported late prices, although the inquiry for those articles has been far from active.

Advices from Port Louis, Mauritius, dated March 6, state that about 95,000 tons of the season's crop of sugar had been shipped, and that about 25,000 tons remained, making the crop—taking into consideration the losses, which amounted to about 2,000 tons, caused by the inundations—much larger than was anticipated. The following table shows the extent and destination of the exports from August 1 to March 1 in each of the last three seasons:—

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st of August to 1st of March.

Cotton....bales & serons	11,000	2,000	1,150	1,000	...

The English wool trade continues very inactive, at fully the late decline in prices. The arrivals to the next public sales of colonial wool already comprise 60,227 bales, viz.: 8,486 bales from Sydney, 25,378 Port Philip, 1,324 Van Diemen's Land, 10,921 Adelaide, 2,098 New Zealand, and 12,018 bales from the Cape of Good Hope. The public sales of low wool will be commenced at Liverpool on the 20th instant, when about 12,000 bales of East India wool will be brought forward.

The silk trade at Zurich last month was very quiet. Prices, however, ruled firm. The following quantities passed the condition house in January and February, viz., in 1865, 113,860 lbs; in 1864, 139,804 lbs, and in 1863, 150,544 lbs.

In reference to the state of the tobacco trade, last month, Messrs Grant, Hodgson, and Co., write as follows:—The month opened with an improved demand, and holders having shown more disposition to meet the views of buyers as it progressed, sales were effected to some extent, especially of Western leaf and strips; concessions have been submitted to for medium and low qualities, but previous prices fully supported for fine and selected classes, and extreme quotations declined for choice spinning descriptions of old imports. With these exceptions the market has not presented any change in character to that described in our last circular. A slightly improved business has been transacted for exportation in small and limited lots, and a fair inquiry still exists for certain qualities, of which stock is indifferently supplied; sales, since the first instant, may be estimated at 1,320 hhds, viz., 650 hhds Kentucky leaf; 220 hhds strips; and 450 hhds of Maryland and Ohio. Imports—1,537 hhds. Deliveries—941 hhds, against 1,076 hhds in the corresponding month of last year. Stock—20,515 hhds, against 17,525 hhds in 1864, 18,843 hhds in 1863, 24,217 hhds in 1862, 19,709 hhds in 1861, and 17,508 hhds in 1860.

As regards the state of the leather trade, last month, Messrs Powell and Co. observe:—The leather market has not shown much animation during the past month, but the transactions do not fall greatly below the usual average of the season, which is not unfrequently a time of some slackness in the demand. Prices, too, indicate scarcely any further change, although the value of heavy sole leather is barely maintained. Raw Goods—The imports, excepting of Australian hides, have been small, but prices of all kinds of salted hides have shown a declining tendency. The stock of River Plate hides is reduced: of most other goods it is a full average, but of East India kips it is unusually small.

Up to March 6, about 97,530 maunds of the new crop of indigo had been disposed of at Calcutta. The export, from November 1 to March 4, had been 24,016 chests, of which 15,920 chests were to Great Britain; and 5,446 chests to Havre.

The market for Scotch pig iron has ruled firm at 52s 6d to 52s 9d cash, mixed numbers. Straits tin has told at 88l 10s cash. In the value of other metals very little change has taken place. The following statement, from L. Th. Van Houten's circular, shows the position of Banca tin in Holland on March 31:—

	1865 slabs	1864 slabs	1863 slabs
Import in March	18,672	13,565	9,721
Previously this year	52,842	35,494	24,306
Total three months...	71,514	49,059	34,027

Quotation, March 31	57fl	69fl	77fl

The oil trade has ruled heavy, and prices have had a drooping tendency. Linseed oil has sold at 31s 6d per cwt on the spot.

Tallow is very dull, and P.Y.C., for immediate delivery, has fallen to 39s 6d per cwt.

The market both for cotton and woollen goods at New York during the week ending March 24 was very dull, and as regards all other articles of import and export, the trade was in a most inactive state. Prices, owing to the continued violent fluctuations in the premium on gold, were greatly unsettled. The premium on gold fluctuated between 47½ and 59⅝; the latest quotation being 56⅝ for cash. The money market was very firm, commercial paper having being discounted at from 9 to 12, and even as high as 18 per cent. The stock of bullion in the banks on the 18th ult. was 4,451,320l; and the balance in the sub-Treasury, 6,202,600l. The shipments of specie, from January 1 to March 18, were 845,620l, against 1,951,710l in 1864; 2,572,860l in 1863; 1,508,980l in 1862; and 276,660l in 1861. The imports of dry goods for the same period were valued at 5,895,680l, against 10,880,560l in 1864, and 7,997,700l in 1863.

THE COTTON TRADE.

LIVERPOOL—April 7.

The increase of business in the market, last week, was followed by greater activity, accompanied by a marked advance in long stapled descriptions, but on Saturday the demand fell off, and prices have since drooped, and closed yesterday with a further general decline. Sea Island is much neglected, and during the last fortnight has declined 1d to 2d per lb. Though American has been in improved demand the quotations are partially reduced about ½d per lb. Brazil, after a temporary rally of 1d per lb on Friday morning, has again become very heavy, and closed at a reduction of about ½d per lb. Egyptian advanced fully 1d per lb, but has since been much pressed for sale, and is now about ½d to 1d below last week's quotations. Smyrna has further given way ½d to ¾d per lb. In East India prices rule exceedingly irregular; in many instances a reduction of 1d per lb has been submitted to, but the average decline cannot be stated at more than ½d per lb. China and Japan have been in fair daily request, but a decline of ¼d to ½d per lb may be quoted in these descriptions.

The only transactions reported "to arrive" were on the 1st instant, Western Madras, middling fair, March or April shipment 11d, and China fair, December shipment 9d per lb.

The sales of the week amount to 42,480 bales, including 4,780 on speculation, and 5,490 declared for export, leaving 31,760 bales to the trade. The sales to-day amount to about 4,000 bales.

LONDON—April 7.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—We have again to report a dull and drooping market for most descriptions. Surat, being comparatively scarce and not pressed for sale, is unchanged in value; Tinnivelly on the other hand, being freely offered, has declined 1d per lb; Western, Scinde, Bengal, China and Japan are ½d lower, while West India, Brazil, Smyrna and Greek are nominally the same as on Friday last.

NEW YORK—March 25.

A further considerable fall has taken place in the value of cotton. The arrivals during the present week have been large, viz., 12,274 bales. Of this quantity, 6,581 bales have been received from Savannah; 1,602 Matamoros; 657 New Orleans; 662 Porto Rico; 241 Baltimore; 1,557 by railroad; the remainder from the West India Islands, North Carolina, and Liverpool. This additional import raises the receipts since Sept. 1 to 163,584 bales. The export from March 1 to March 21 was 2,434 bales against 2,742 bales last year. Cotton from Savannah, sold by order of Government, has been disposed of at 26½ to 40 cents for sound; and 10½ to 17 cents for damaged. The following are the prices now current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	28	28	28	28
Middling	45	45	45	47

Freight to Liverpool, ¼d to ½d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a fair average business doing in goods in the leading markets, and the quotations have been supported. Most descriptions of iron have changed hands freely at extreme rates. For the time of year, the transactions in coals have been very large, at high rates.

Manchester, April 6.—This market has continued drooping slowly, no disposition for business being manifested anywhere. The losses incurred from the successive declines appear to have quite disheartened buyers, and add to the caution induced by apprehensions of failures; and as the constant imports of cotton prove too heavy to be absorbed by the trade, expectations more and more incline in the direction of yet lower prices. Manufacturers of Eastern cloths are working off their former contracts, and further contracts cannot be found to supply their place. Stocks, however, are seldom found gathering on the market: whenever beginning to do so, they are forced off at a greater or less sacrifice on existing quotations.

BRADFORD.—Sales of wool are both few and small, and at easier prices. A little business has been done in yarns. It has consisted chiefly of some speculative purchases of super 30's for export, and some fair quantities of 40's for Russia. Pieces—A good many buyers have been about looking up fancies suitable to the present season. A few repeat fancy orders for quick delivery for America and the home trade have also been booked. Plain goods have been entirely neglected.

LEEDS.—The export houses, in common with those in the home trade, are far from being busy. Manufacturers are in just about the same state of activity as they have been for the past two months, the most of them running full time, but a few are not in so favourable a position.

ROCHDALE.—Both light and heavy goods have been bought sparingly, and it seems as if small and frequent purchases are going to prevail as a general rule, all parties being cautious in their transactions and unwilling to speculate far. Prices of flannels and wools are generally steady. The Yorkshire goods trade participates in the general quietness.

HUDDERSFIELD.—Parcels of regular market goods and also of black doeskins have been selected in various departments to supply orders in hand, but spring goods are only in dull demand, and there appears to be an almost total absence of speculation just now.

LEICESTER.—There is about an average amount of business doing in most descriptions of hosiery goods, both plain and fancy, and manufacturers are strictly making to order.

NOTTINGHAM.—There is a shade more doing in lace goods. The silk mechlin trade is tolerably active, but there is still very little doing in quillings. Black laces are expected to be in better request shortly. A few buyers have been in the market during the past few days. The hosiery trade is quiet.

CARDIFF.—The steam coal trade is upon the whole in a fairly satisfactory state, although the demand upon export account is not quite so brisk as usual. Rails are quoted 6*l* 15s to 7*l* 5s at the works, and bars 6*l* 5s to 6*l* 15s.

NEWCASTLE-ON-TYNE.—The iron works having resumed full employment, and the spring prospects being tolerably satisfactory, a cheerful tone pervades commercial circles in the North. The chemical trade has been firm. Prices were, best alkali 2⅝d, second, 2d; crystals of soda, 4*l* 10s; bicarbonate of soda, 11*l*; bleaching powder, 10*l* to 10*l* 5s; Epsom salts, 7*l* 10s per ton.

BIRMINGHAM.—The trade of this town continues quiet; in some branches a slight reaction has been experienced, but the orders in hand are moderate, and in goods for the spring trade there has not up to this time been much doing.

SHEFFIELD.—The orders from the home market have increased, but they are still below the average, the dulness being most felt in the London and Lancashire markets. The orders from Birmingham factors are also small.

BELFAST.—The linen trade continues without animation, and great dullness prevails, with weaker prices. There has been little improvement in the demand for yarns. Prices remain pretty stationary for lines, but tows have experienced a further decline.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 25.—Currency prices continue to fluctuate correspondingly with the premium on gold. The export demand for all descriptions of produce is very limited. The small amount of business doing is, therefore, almost entirely for home consumption. Annexed are the quotations:—Flour—State, superfine brands, $9.30 to $9.40; State, extra brands, $9.45 to $9.65; State, choice brands, $9.70 to $9.80; Ohio, common brands, $9.90 to $10; Ohio fancy brands, $10.5 to $10.10; Ohio, good and choice extra brands, $10.15 to $11; Michigan, Indiana, Wisconsin, &c., $9.35 to $10.20; Genesee, extra brands, $10 to $11; Missouri, $10 to $13.50; Canada, common, $9.60 to $9.80; Canada, good to choice extra, $9.90 to $11 per barrel. Wheat—Amber Michigan, $2; winter red Western, $1.95. Corn—White Southern, $1.89; New Jersey yellow, $1.56 per bushel.

EXPORTS of GRAIN, &c., from NEW YORK from March 1 to March 21.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat fresh up this week having been on the increase, and the weather more favourable for agricultural operations, the demand for both red and white qualities has ruled very inactive, and, in some instances, the quotations have had a drooping tendency. The show of foreign wheat has been wholly confined to granaried parcels. Fine dry qualities have been in fair request, at full prices. In other kinds, next to nothing has been doing, and, to have forced sales, lower rates must have been submitted to. Malting barley has been scarce, and in fair demand, at full prices. In grinding and distilling sorts very little has been doing, at late rates. The malt trade has continued heavy, at the late decline in value. The few oats on the stands have been mostly cleared off at full currencies. Beans and peas have sold at extreme rates, although the inquiry for them has been far from active. The flour trade has continued in a healthy state. A few parcels of foreign flour have come to hand.

The continental markets have been steady for wheat. The amount of business doing in that description of produce, however, has been only moderate. Nearly all kinds of Spring corn have sold somewhat firmly. In America, both wheat and flour have commanded very little attention. The shipments to England continue on a limited scale.

In Scotland, wheat, barley, and oats have changed hands steadily, at full quotations. Otherwise, the corn trade has been very inactive.

The Irish markets have been steadily supplied with wheat; nevertheless, sales have progressed slowly, on former terms. Barley, oats, and fine flour have commanded full prices.

The trade for English wheat at Mark lane, to-day, was very dull, and as compared with Friday last, prices exhibited a reduction of 1s to 2s per quarter. Very little business, however, was transacted. For foreign wheat, the demand ruled heavy, at Monday's currency. Good and fine malting barley was firm in price, and oats commanded rather more money. Beans and peas fully supported previous quotations. The flour trade was steady, at full prices.

The following tables shows the extent of the arrivals of cereal produce into London last quarter. As regards home-grown produce, the figures given represent the supply received by water-carriage as well as by the Great Eastern, Great Northern, and South-Eastern railways:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—At the close of last week the market showed greater steadiness, and the demand during the present one being rather good, with diminished supplies offering, quotations have occasionally rather favoured the seller. 2,416 casks West India were disposed of to yesterday, including grainy and crystallised Demerara at 33s to 37s per cwt. The refiners have bought other kinds freely, and four floating cargoes have sold for the United Kingdom. There has been an increase in the home deliveries at this port over last season's amounting to 13,918 tons, and for export to 5,287 tons. The stock is 91,505 tons, against 61,523 tons.

Mauritius.—A floating cargo has sold at 25s, No. 12¼, for the United Kingdom. 5,598 bags by auction chiefly sold: crystallised, 11s 8d duty, 37s 6d to 38s. Other grainy and crystallised, 31s to 36s; soft brown and yellow, 27s to 31s 6d per cwt. A few parcels have sold by private contract.

Bengal.—1,343 bags Gurpatta date offered by auction, sold at and afterwards at 30s 6d to 32s 3d. A parcel of brown privately at 25s 6d per cwt.

Penang.—3,286 bags sold at steady prices: brown to low yellow, 26s 6d to 29s 6d; middling to fine yellow and white, 30s to 34s 6d.

Manilla.—8,000 bags clayed have sold at 28s.

Other Foreign.—By private contract, 2,400 casks Cuba muscovado have sold at 30s 6d to 31s 6d. 170 cases brown Bahia at 28s; and a few parcels of Havana. Two floating cargoes of Cuba for the United Kingdom, at 29s 9d, also one of grainy, at 22s to 22s 6d per cwt.

Refined.—The market continues firm. Common dry goods command 42s to 42s 6d per cwt. Several contracts have been made in Dutch crushed and foreign loaves for forward delivery.

Molasses.—40 puns Trinidad, at 14s 6d per cwt.

COCOA has been steady.

RUM.—The demand for West India continues very limited. Good Demerara in puncheons has sold at 1s 9d. 40 casks good Penang have realised 1s 5d per proof gallon.

COFFEE.—At a further reduction of about 1s large quantities of plantation Ceylon coffee have found buyers. 2,033 casks 1,054 barrels and bags by auction, chiefly sold: pale and low middling to good, 77s to 86s; fine, 87s to 94s 6d. Of 93 casks 5,940 bags native, a considerable portion met with purchasers, at a reduction of 6d to 1s, from 66s to 68s; fine, 70s. 841 bags East India partly sold, including Singapore at 63s 6d to 64s. 632 bags African sold at 66s to 74s 6d per cwt. The Netherland Trading Company's next public sale will be held on the 19th April, to comprise 88,300 bags Java, &c.

TEA.—Further public sales were held on Tuesday and Wednesday, when rather a better tone prevailed. Common to fair qualities of red and black leaf congou sold at fully previous prices. A few breaks of green and common broken leaf Foo Chow scented orange pekoe, alone being a trifle easier. Common to fair quality red and black leaf congou, brought from 11½d to 1s 4½d, two breaks of common broken dusty leaf Foo Chow scented orange pekoe, 8½d and 9¾d, one break of fair quality Canton scented orange pekoe, 1s 6½d per lb. Of 18,174 packages in the catalogues, 12,169 packages sold, including 10,445 packages printed "without reserve." Privately there is rather more inquiry for red and black leaf congou.

RICE.—A moderate business has been transacted in all kinds. A few parcels of white Bengal have, however, sold at extreme rates, from 12s 4½d to 14s 3d; and very fine at 15s.

SPICES.—The market remains in a state of inactivity. White pepper has sold upon further reduced terms by private contract. 1,424 bags Singapore, in public sale, were partly realised at 3⅜d to 3½d. 2,497 bags Penang part sold at 3⅜d, for West Coast. 140 cases brown nutmegs partly sold: small to good, 10d to 1s 11d; fine bold, 3s 5d. 4 cases mace part sold at 1s 4d to 1s 8d. A small parcel of Zanzibar cloves obtained 3¾d to 3½d. 1,020 bags pimento, chiefly of old import, realised 2½d to 2⅝d per lb. 420 cases cassia lignea chiefly sold: pile 2 at 78s to 79s; pile 3, mouldy, 76s to 77s; good pile 1 bought in at 84s. 625 bags African only partly sold upon further reduced terms, viz., 37s per cwt.

SALTPETRE.—765 bags Bengal, offered by auction, were bought in above the value. Privately, small parcels, refraction 3½ to 2¼, sold at 28s 6d per cwt cash, or short prompt.

BARK, &c.—Current prices:— English, per load of 45 cwt delivered in London, 16*l* to 17*l* 10s; ditto Coppice, 16*l* to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 10s to 7*l* 10s; ditto Coppice, 7*l*, to 8*l*; French, 0*l* to 0*l* 0s; Mimosa, chopped, 10*l* to 13*l* 0s; ditto, ground 12*l* to 12*l* 10s; ditto, long, 8*l* to 9*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto Sardinian, 8*l* to 8*l* 10s; Valonia, Smyrna, 17*l* to 19*l* 0s; ditto, Camata, 17*l* to 20*l* 0s; ditto, Morea, 14*l* 10s to 17*l* 10s; Divi Divi, 10*l* to 13*l* 10s; Myrabolams, 11*l* 10s to 13*l* 10s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 21*l* 15s to 22*l* 10s; do. free cubes, 27*l* to 27*l* 10s; do. Cutch, 23*l* 0s to 24*l* 0s per ton.

COCHINEAL is dull.

OTHER DRYSALTERY GOODS.—No business of importance has transpired. Cutch has been sold rather under the late nominal quotation: good new, 25s. 50 tons to arrive at 23s 6d per cwt.

INDIA RUBBER.—144 baskets Penang, offered by auction, were bought in at 1s 2½d per lb.

METALS.—The markets, although steady, are quite devoid of animation. Welsh iron has been contracted for at extreme rates. Scotch pig last sold at 52s 3d per ton mixed Nos. The stock of spelter has fallen to 7,365 tons, or 1,200 tons less than in 1864 at the same period. The market has become firmer, with buyers on the spot at about 19*l* 10s per ton. Tin rather firmer. Straits has sold freely at 88*l* 10s to 89*l* per ton cash, closing with buyers at that price.

JUTE continues quiet. On Wednesday, 9,980 bales offered by auction, went off at irregular prices, some marks being 10s to 20s cheaper: low to fine, 9*l* 10s to 24*l* 10s per ton. The stock is now 18,450 tons against 11,025 tons last year, and 6,115 tons in 1863, at the corresponding date.

TALLOW.—The market for foreign continues in a quiet state, and prices have receded. 1st sort Petersburg Y.C., 39s to 39s 6d; October to December, 40s 9d to 41s per cwt.

PARTICULARS OF TALLOW.—Monday, April 3, 1865.

Price of Town	48s 6d	45s 3d	43s 9d	43s 0d

POSTSCRIPT. FRIDAY EVENING.

SUGAR closes steadily. 717 casks West India sold to-day, making 3,134 casks for the week. 10,186 bags Mauritius partly sold at previous quotations. 2,456 bags Bengal partly sold. Khaur has bought 23s 6d to 23s 9d. Privately, 300 casks Cuba and Porto Rico are reported sold.

COFFEE.—428 casks 230 barrels and bags plantation Ceylon by auction sold steadily at full prices. 142 casks native bought in above the value.

TALLOW.—At auction, 919 casks Australian went 6d to 9d lower: sheep, 36s 9d for good; beef, 37s to 38s. Town reduced to 42s 3d per cwt.

LINSEED.—The market is dull and prices have declined 1s per quarter on the spot. Calcutta, 56s per quarter.

OILS.—Linseed has declined to 31s 6d on the spot. Foreign refined rape quoted 43s 6d to 44s. Brown scarce, and worth 41s 6d to 42s. Palm is now abundant, and fine can be obtained at 36s per cwt. There are sellers of parcels of cocoa-nut in second hands at lower rates. Ceylon quoted 39*l* to 39*l* 10s; Cochin, 42*l* 10s to 43*l* per ton. Sperm is held for much higher prices.

TURPENTINE.—French spirits quoted 67s to 67s 6d per cwt. The stock here is small.

PETROLEUM.—American refined Pennsylvanian quoted 2s 0½d to 2s 1½d; for forward delivery, 2s 2d per gallon. Crude, 18*l* 10s per tun.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been fairly supported this week. No material alteration to note with respect to prices. Dutch crushed for present delivery is rather scarce, owing to previous contracts; for forward delivery steady.

DRY FRUIT.—The lower descriptions of currants are a shade better in demand, and a few sales have been made at asking prices. Fine are eagerly sought after, but are very scarce. The stock of currants is smaller, and prices 2s to 3s lower than last year at this period, but dealers shew want of confidence in the article by refusing to deal in parcels offered at extraordinary low rates. Raisins continue dull, and though stocks are far lower than the requirement for the summer, no business is done.

FLAX market flat.

HEMP market very dull on the spot, but few transactions; but for forward delivery rather more business takes place.

TOBACCO.—The market has presented a steady and firm appearance for all home-trade descriptions, and fine American qualities only obtainable at full quotations. Common and ordinary sorts difficult of sale at lower rates. Middling and fine export classes have experienced a fair demand at previous prices.

METALS.—There has been rather more business doing this week. Copper has had more attention, and buyers have paid advanced prices. Iron is steady. Neither the strike, nor the abandonment, has made much difference in the trade. Tin has rallied, and Straits has been sold at 89*l* to-day. Lead and spelter very quiet, at last week's prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	42	3
Fat by ditto	2	0½
Yellow Russia	40	9
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The diminution of the stock of bacon, and the great demand caused by the sudden change in the weather within the last week, has sent up the price 4s. We quote prime sizeable Waterford bacon 70s, f.o.b.; Hamburg, 64s, landed. The quality of Friesland butter is fine. All cleared off at a rise of 4s. The demand for Jersey not being so good, prices are a little easier; quality fair. Nothing doing in Irish. Ham trade dull.

METROPOLITAN CATTLE MARKET.

THURSDAY, April 6.—There was a fair average supply of beasts on offer in our market to-day, but the general quality of the stock was by no means prime. Sales progressed slowly, and in some instances the quotations had a downward tendency. The show of sheep was moderate. Prime Downs and half-breds were tolerably firm; otherwise the mutton trade was in a sluggish state, at barely late rates. The top figure for Downs in the wool was 6s 6d per 8 lbs. Lambs were in fair request, at from 6s to 7s per 8 lbs. Calves moved off slowly, at barely late rates. Pigs were a dull inquiry. Milch cows sold at from 16*l* to 22*l* each.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	to 3	10	Prime Southdown sheep	6	4	to 6	6
Second quality ditto	4	0	4	4	Large coarse calves	4	4	5	0
Prime large oxen	4	6	4	8	Prime small ditto	5	2	5	6
Prime Scots, &c.	4	10	5	0	Large hogs	3	4	4	0
Coarse and inferior sheep	4	4	5	0	Small porkers	4	2	4	8
Second quality ditto	5	2	5	8	Suckling calves, each	20	0	22	0
Prime coarse-woolled do.	5	10	6	2	Quarter old store pigs	20	0	26	0

Lambs 6s to 7s.

Head of stock on sale.

Total Supply—Beasts, 1,100; cows, 130; sheep, 6,400; calves, 200; pigs, 312.
Foreign Supply—Beasts, 400; cows, —; sheep, 1,600; calves, 195; pigs, —.

HOP MARKET.

BOROUGH, Friday, April 7.—The supply of hops on sale is very moderate. For good and fine English, as well as foreign samples, there is a steady demand, and prices rule firm. Inferior produce, however, moves off slowly, at about previous quotations. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 140s; and American, 80s to 130s per ton.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Friday, April 7.—These markets are fairly supplied with potatoes, the demand for which rules inactive. Good and fine samples, however, are firm in price. Yorkshire Regents, 90s to 120s; Ditto Flukes, 130s to 150s; Scotch Regents, 90s to 100s; ditto Rocks, 70s to 85s; Dunbar Regents, 100s to 120s; foreign, 60s to 70s per ton.

HAY MARKETS.—THURSDAY, April 6.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 8s 0d; clover, 5*l* 5s to 6*l* 8s 0d; and straw, 1*l* 8s to 1*l* 14s per load. Trade quiet.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 8s 0d; clover, 5*l* 5s to 6*l* 8s; and straw, 1*l* 8s to 1*l* 14s per load. A slow trade.

WHITECHAPEL—Meadow hay, 4*l* 4s to 5*l* 5s; clover, 5*l* 5s to 6*l* 8s 0d; and straw, 1*l* 7s to 1*l* 14s per load. Trade slow.

COAL MARKET.

FRIDAY, April 7.—Wallsend: Haswell 20s—Hetton 20s—South Hetton 20s—Hartlepool 19s 9d—Braddyll's Hetton 18s 9d—Hetton Lyon's 17s 9d—Heugh Hall 19s—Russell's Hetton 18s 6d—South Kelloe 19s—Tunstall 17s 9d—Buddle's West Hartley 16s—Cowpen Hartley 16s 3d. Ships at market, 50; sold, 19; gas contracts, &c., 14—33; unsold, 17; ships at sea, 85.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 7.—We have had rather more inquiry this week, but as to actual business we cannot yet report any material improvement, as buyers continue to purchase with great caution, and in many cases only where they can obtain a concession in price, which holders are very reluctant to make; hence the transactions are but of very limited extent.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 7.—Wheat slow sale, and the turn in favour of buyers. Flour is nominally unchanged. Indian corn steady at late rates. Galatz, 27s 6d; mixed, 27s 6d; beans firm; oats and oatmeal fair request, at full prices.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

W. T. Buckland, Clapham rise, auctioneer—C. Rosenberg, Camberwell New road, engraver—G. Ballard, Wilderness row, cabinet maker—H. Gill, Newington—J. Rootham, Rushden, baker—G. EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 25th of March, on 11,841 miles, to 590,725*l*, and for the corresponding week of last year, on 11,490 miles, to 609,927*l*, showing an increase of 351 miles, and of 19,202*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,374 miles, to 482,873*l*, and for the corresponding week of 1864, on 8,097 miles, to 482,873*l*, showing an increase of 277 miles, and a decrease of 19,070*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 3.—In the share market to-day English railways alone showed animation, and closed with a considerable disposition for improved prices. Colonial also were slightly firmer, but British mines were rather flat, and the other descriptions were without material change of tone. Of the English lines, Chatham advanced 2½, Brighton, North-Western, Great Northern, and ditto (B stock) 1 each, ditto (A stock) 1½, Edinburgh and Glasgow and Midland (Birmingham and Derby) 2 each, ditto (original) 1¼. In colonial, Demerara improved 1½, Grand Trunk of Canada (3d preference) 1, and Great Indian Peninsula ½. In foreign, Southern of France improved ½, and Lombardo-Venetian ⅛; Turin and Savona (paid up) declined 1, and Imperial Mexican a further ½; and Paris and Orleans are now quoted ex dividend. In American, United States (5-20) improved ¼, and Illinois Central (shares) a further ½; and ditto (6 per cent. bonds) are now quoted ex coupons. In British mines, Wheal Bassett declined 2, Great Wheal Vor ½, and East Carn Brea ¼. In foreign mines, no movement is recorded.

TUESDAY, April 4.—In the share market to-day there was again an upward tendency in English railways as well as in foreign; the banks were rather inclined to weakness, and in the other descriptions there was scarcely any average alteration. Of the English lines, Metropolitan District recovered ½; Shropshire Union advanced 1, Chatham further 2, North-Western further 1¼, Lancashire and Yorkshire a further 1, North British and South-Western a further ½ each, and Midland, North-Eastern (Berwick), and ditto (York) a further ¼ each. In colonial, Grand Trunk of Canada and Madras (5 per cent.) improved ½ each. In foreign, Central Argentine, Northern of France, Paris and Mediteranean, and Pernambuco ½ each, Namur and Liege (preference) ¼, Dutch-Rhenish and Great Luxembourg ⅛ each, and Lombardo-Venetian a further ¼; and Imperial Mexican further receded ½. In American, Atlantic and Great Western (Pennsylvania 1st mortgage) and Illinois Central (sterling bonds) advanced 1 each; ditto (shares) relapsed 1; and Erie shares (paid up) declined 2. In British mines, West Caradon improved 1, and Great Wheal Vor further declined ½. In foreign mines, there was again no alteration.

WEDNESDAY, April 5.—In the share market to-day dulness was the prevailing feature, and American securities, British mines, and banks were inclined to flatness, but English, colonial, and foreign railways closed rather firm. Of the English lines, Great Western improved ¼, Midland (Birmingham and Derby) 1, ditto (original) further ¾, Metropolitan District a further ½, South-Eastern further ⅜, and North-Eastern (Berwick) a further ½; and Lancashire and Yorkshire and North-Western relapsed ¼ each. In colonial, Melbourne and Hobson's Bay improved 1, East Indian, Great Southern of India, Great Western of Canada (5½ per cent.), Scinde, Delhi (stock), Punjaub, and Great Indian Peninsula ½ each, and ditto (shares of both descriptions) ⅛ each; and Demerara receded ½. In foreign, Northern of France further advanced ½, and Dutch-Rhenish and Great Luxembourg ⅛ each.

THURSDAY, April 6.—In the share market to-day the transactions were not numerous, and the descriptions generally closed without average alteration, but the Canadian railways, by way of exception, showed a general and considerable tendency downwards. Of the English railways, Lancashire and Yorkshire and North-Western recovered ¼ each, Edinburgh and Glasgow improved 1, Caledonian and Metropolitan ½ each, and Metropolitan District a further ½; and Manchester, Sheffield, &c., and South Devon declined 1 each, and Blackwall ½. In colonial, Eastern Bengal advanced 1, Bombay and Central India, Great Southern of India and Madras (5 per cent.), ½ each, and East Indian, Great Indian Peninsula, Scinde, Delhi (stock), and Punjaub a further ½ each. In foreign, Bahia, Eastern of France, and Southern of France improved ¼ each. In American, Atlantic and Great Western (Pennsylvania 1st mortgage), and Erie shares (paid up) declined 1 each.

FRIDAY, April 7.—The railway market was rather flat to-day, and several of the principal lines declined. Midland stock receded ⅛ per cent., Caledonian ½, and London and North-Western, Great Western, and Lancashire and Yorkshire ⅜. Indian, Canadian, and foreign railway securities were quiet.

THE CITY OF MOSCOW GAS COMPANY (Limited).

Incorporated under the Companies Act, 1862, with limited liability. Concession obtained with exclusive privilege. Interest at the rate of 7 per cent. per annum during construction. Capital, £375,000, in 35,000 shares of £25 each. Deposit, £1 on application, and £4 on allotment.

DIRECTORS.

H. Wollaston Blake, Esq., F.R.S. (Director of the Continental Union Gas Company).
James Frederick Gregory, Esq. (President of the Council of Control of the Hague Gas Company).
Neville D. Goldsmid, Esq. (Managing Director of the Hague Gasworks).
Edward Hawkins, jun., Esq. (Chairman of the London Gas Company).
Frederic Mildred, Esq. (Deputy-Governer Agra and Masterman's Bank, Limited).
James Oughterson, Esq., 21 Bentinck street, W.
Monsr. P. S. Schilofski, Moscow.
Sir J. Emerson Tennent, F.R.S., 66 Warwick square.

BANKERS.

The Agra and Masterman's Bank (Limited), 35 Nicholas lane, Lombard street.

SOLICITORS.

Messrs Young, Maples, Teesdale, and Young, 6 Frederick's place, Old Jewry.

BROKERS.

Messrs Hill, Fawcitt, and Hill, 29 Threadneedle street, E.C.

This Company has been formed for lighting the city of Moscow with gas, under the powers of a concession, granted with exclusive privileges by the Municipality, on the 26th October, 1864, and ratified in the month of December last by the Imperial Government.

Moscow contains a population of about 500,000 persons. It is situate at the centre of the commerce of the country, with six railways within its walls. It is the winter residence of a large portion of the Russian aristocracy, and the nature of its climate is such as to render the introduction of gas, both for lighting and warming purposes, an object of primary importance to the inhabitants.

The Kremlin (which covers 250 acres, and includes the Emperor's Palace, the Senate, the Arsenal, and Government offices), the Great Universities, and the Public Schools, will all have to be lighted by gas.

From official statistics it appears that there are at present in Moscow about 200 hotels, most of them very spacious, 4,841 inns, restaurants, cafes, cabarets, and wine houses, where people pass the greater part of the night in winter, upwards of 100 police posts and stations, 102 printing offices, exclusive of those belonging to the Government and the Municipality, 27 public baths, 15 civil and military hospitals, and 26 Government asylums. The German, English, and Merchants' Clubs, and the Club de la Noblesse, each spend about £250 per month for lighting, and the Government pays annually £31,600 for the lighting of the Opera House and the Russian Theatre, and £12,000 for the barracks.

In addition to the above-mentioned buildings, and altogether irrespective of private houses, there are 17,032 shops, 700 factories and workshops of various descriptions, many of them of great magnitude, and one alone requiring 800 lights.

Moscow has hitherto been dependent for artificial light upon portable gas, stearine candles, and petroleum oil. The costliness of these articles, and other disadvantages connected with the imperfect lighting thus obtained, are such as to render any competition with ordinary gas impossible.

The concession which has been secured to this Company confers an exclusive privilege for 30 years. At the end of that period the works will either remain the property of the Company in perpetuity without special monopoly, or the Municipality may elect to purchase them at a sum equivalent to the entire net profits of the previous 10 years, or to extend the concession, with exclusive privileges, for a further period of 10 years. In this latter case the works would revert to the city at the end of 40 years, unless fresh arrangements shall have been made for continuing the business in the hands of the Company. A sinking fund will be provided to meet these contingencies.

The Cahier des Charges allows the Company to charge five silver roubles (equivalent at the present exceptionally low rate of exchange to 13s, and to 15s 10d at the par of exchange) per 1,000 cubic feet of gas for all private lights. The street lights will be paid for at the price of 14 50 silver roubles per light, burning 10,000 cubic feet during the year, and at the same rate for any further quantity which may be required, with an illuminating power which need not exceed 12 candles. All the lamps of the Government and municipal buildings are to pay the same price as the private lights, viz., five silver roubles per 1,000 cubic feet of gas.

A provisional contract has been entered into with Smith, Knight, and Co. (Limited), for works capable of supplying 120,000 lights, together with the whole of the mains of the city (upwards of 140 miles in length), adapted to the entire prospective consumption. The net profits upon the capital required for this purpose are calculated to exceed 20 per cent. per annum, and in this estimate no profit whatever is assumed on the public lights.

The works will be laid out with a view to the supply of 10,000 street lights and upwards of 200,000 private lights, and as soon as the Company can meet the demand to this extent the net profits are calculated to exceed the above rate. To show that this estimate is by no means exaggerated, reference may be made to the profits of other gas companies possessing exclusive privileges on the continent, among others, the gasworks at the Hague have paid for many years 25 per cent. per annum, and the Paris Gas Company is at the present time paying dividends above 20 per cent. per annum.

Sufficient plant will be erected for the supply of 50,000 lights by the end of August in next year, from which date a large net revenue will be received.

Power will be taken to borrow a portion of the capital on debentures, by which means the profits divisible among the shareholders may probably rise to a higher figure than that already indicated.

Offers have been received for the purchase of all the coke and tar produced, at prices which will bring down the net cost of the coal carbonized to a point which contrasts favourably with the gasworks of most of the large cities on the continent.

Interest at the rate of 7 per cent. per annum will be paid half-yearly on the capital, during construction.

The outlay for plans, estimates, engineering, travelling expenses, and other preliminary charges, will be borne by this Company. The proprietors of the concession have such confidence in the success of the undertaking that they have agreed to transfer all their rights and advantages to this Company in consideration of receiving, in lieu of any present payment, one-half of the net profits of each year after 10 per cent. shall have been earned on the total paid-up capital of the Company.

A large portion of the capital is already subscribed. Applications for the remaining shares will be received by the Agra and Masterman's Bank, by the solicitors, and by Messrs Hill, Fawcett, and Hill, the brokers of the Company, from whom prospectuses and forms of application may be obtained.

The amount of £1 upon each share applied for must be paid to the Company's bankers previously to the application being sent in. This sum will be returned if no allotment is made to the applicant.

An option will be given to each subscriber of taking one-fifth part of the shares allotted to him in fully paid-up shares.

Temporary offices, 29 Threadneedle street, E.C.,
April, 1865.

THE INVESTMENT AND FINANCE AGENCY.

Established for the purpose of effecting purchases and sales on commission in every description of public securities, and for affording the necessary precautionary information for the safe investment of capital, &c., &c.

A record is kept of the status and prospects of the various public companies and foreign stocks; and as this Agency scrupulously declines speculative transactions upon its own account, the public have, first, the security of being protected by unbiassed information, based upon twenty-seven years' experience in the stock and share markets; and, secondly, the guarantee that any business which this Agency undertakes will be completed with the strictest fidelity.

During the past year 1864, no less than ten new foreign loans, constituting an aggregate capital of £22,271,000, and 282 new joint stock companies with an authorised capital of £155,887,500, were introduced upon the London market,

Never were there times which inculcated more forcibly than the present the necessity of experience and caution prior to the investment of capital, or when reliable services, such as this Agency specially renders, were more requisite.

The Finance Department includes the Agency of public companies, loans, deposits, &c., and advances are negotiated on public securities having a market value.

An important feature of this Agency is, that the same uniform system of strict attention is paid to transactions of small, as well as large amounts,—the object being, to increase its facilities for carrying out its operations to the greatest possible advantage by embracing the business of every description of investors.

Cheques to be drawn to the order of Mr Charles Peters, Secretary, and crossed The Agra and Masterman's Bank.

No 12 Clement's lane, Lombard street, London, E.C.

MERSEY DOCK ESTATE.
LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD

hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Five Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock Office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.

Dock office, Liverpool, April 6, 1865.

SIX PER CENT. DEBENTURES.—

The Directors of the LONDON, ITALIAN, and ADRIATIC STEAM NAVIGATION COMPANY (Limited) are now prepared to receive Application for Mortgage Debenture Bonds to the amount of £40,000, secured on the six new steamers belonging to the Company, the value of which is £160,000, and the uncalled capital, amounting to £180,000, together £340,000.

The bonds will be issued in sums of £50 and upwards; be redeemable in three, five, or seven years, and bear interest (for which Coupons will be attached) at the rate of £6 per cent. per annum, payable half-yearly, at the bankers of the Comoany.

Forms of application, copies of the bond, and every information as to the Company may be had on application at the Company's offices.—By order of the Board,

GEO. GRANT, Secretary.

Company's offices, 123 Fenchurch street, E.C,
London, April, 1865.

V. R.

BRITISH COLUMBIA GOVERNMENT 6 PER CENT. DEBENTURES.

Created under the Authority of the "British Columbia Loan Act, 1864," for raising a further sum of £100,000, to be applied to the Construction and Maintenance of Roads and other reproductive Public Works in the Colony.

Her Majesty's Principal Secretary of State for the Colonies having directed the undersigned to dispose of the Debentures above referred to by public tendor, they hereby give notice, that they will be prepared to receive written applications for the whole or any portion thereof, not being a fraction of £100, until One p.m. on Thursday, the 13th April next.

The Debentures with interest coupons attached are for sums of £500, £200, and £100 respectively, redeemable in thirty years from the 1st April, 1864.

Interest at the rate of 6 per cent. per annum, commencing on the 1st April, 1865, will be paid half-yearly, in April and October of each year.

Both principal and interest are made payable at the Offices of the Crown Agents for the Colonies in London, or at the Treasury in New Westminster, as the lenders may elect.

The loan is secured on the general revenues of British Columbia, which have gone on steadily increasing during the last six years at the rate of about 20 per cent. per annum, and the only charges now existing thereon amount altogether to but £102,000, or considerably less than one year's revenue.

For the final extinction of the debt, the Act provides that a sum equal to 2½ per cent. per annum on the total amount of the loan, shall be paid into a sinking fund, to be formed in this country, under the control of trustees, appointed by the Secretary of State for the Colonies, the money to be invested in Consols or other Government Securities.

Tenders, in accordance with the annexed form, enclosed in sealed envelopes, should be addressed to "The Crown Agents for the Colonies, Spring Gardens, London," and delivered at their offices not later than One o'clock on Thursday, the 13th instant, at which hour all Tenders received will be opened in the presence of such persons interested therein as may be pleased to attend, and the Debentures will be then allotted to the highest bidders, provided that the prices offered are not below par.

In the event of an equality of tenders beyond the amount to be issued, a pro rata distribution on such tenders will be made.

Tenders at a price including a fraction of a shilling other than sixpence will not be admitted.

Five per cent. of the purchase money must be paid into the Bank of England on allotment and the balance on the 24th April following.

The Debentures will be delivered at the Offices of the undersigned in exchange for the Bank receipts.

Further information respecting the financial and general condition of the Colony will be furnished on application to the undersigned, from whom form of tenders may be obtained.

PENROSE G. JULYAN,} Crown Agents
W. C. SARGEAUNT, } for the Colonies.

Offices of the Crown Agents for the Colonies,
Spring gardens, London, S.W.
April 3rd, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies,
Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the British Columbia Government 6 per Cent. Loan, authorised by the Loan Act of 1864, subject to the conditions contained in your advertisement of the 3rd of April, 1865, viz.:—

Debentures to the extent of £ for which I undertake to pay at the rate £ in money for every £ in Debentures.

J. OUSELEY, General Manager.

THE BANK OF MADRAS.

At a meeting of the Directors of the Bank of Madras, held on Tuesday, the 31st Jan., 1865, the following resolutions were adopted in terms of the authority vested in them by clause 6 Act V. of 1862.

1. That the capital of the Bank be increased by the creation of one thousand eight hundred and seventy-five new shares, of rupees one thousand each.

2. That such shares be issued or offered to the proprietors at a premium of 10 per cent., say at rupees 1,100 each, and that they be allotted to shareholders in the proportion of one new share to each holder of two shares, and one half and one quarter share to each holder of one share and one half share respectively. Holders of odd quarter shares to receive, on application, certificates entitling them to a half interest in a quarter share. Two such certificates lodged on or before the 30th June next, will entitle the holder to one quarter share. If not so lodged, the right to such quarter share shall be forfeited.

3. That the proprietors entitled to claim the new issue shall be those whose names appear on the Register on the 1st day of March, 1865, and that the Transfer Books be closed from the 2nd to the 13th day of March, both days inclusive.

4. That the amount of the new shares, together with premium thereon, shall be payable in four instalments in the following manner:—

Rs 275 on or before 1st May, 1865.
Rs 275 on or before 1st July, 1865.
Rs 275 on or before 1st Sept., 1865.
Rs 275 on or before 1st Nov., 1865.

5. That any new shares, the amount of which, with premium as above, shall not be paid in full on the 31st December next, shall be absolutely forfeited to the Bank, and shall be disposed of at the discretion of the Directors.

6. That upon all instalments paid up on account of new shares, interest shall be allowed from date of payment to 31st December, 1865, at the rate of 7 per cent. per annum.

7. That any proprietor failing to pay the several instalments on the prescribed dates, shall be charged interest at the rate of 12 per cent. per annum from such dates to the date of payment.

8. That scrip certificates be issued on payment of the first instalment, and that as soon as all the instalments (with any interest that may be due) on each new share shall have been paid up, share certificates be given in exchange.

9. That the premium on shares taken up by the proprietors, and also any profit that may be realised on unclaimed and forfeited shares, be added to the reserve fund.

10. That the new shares shall be entitled to dividend from 1st Jan., 1866.

11. That a copy of the foregoing resolutions be forwarded to each proprietor, and that they be duly advertised.—By order of the Board,

JOHN McIVER, Secretary and Treasurer.

THE NEW ZEALAND LOAN AND MERCANTILE AGENCY COMPANY (Limited).

Incorporated under the Companies Act, 1862, and to be incorporated by Act of the General Assembly of New Zealand. Capital, £500,000, in 20,000 shares of £25 each. £1 per share payable on application, and £1 10s on allotment. Amount of capital proposed to be called up £5 per share, or £100,000. Calls not to exceed £1 per share, at intervals of not less than three months. The Directors deem it right to state that the gentleman constituting the Board of Directors of the Bank of New Zealand at Auckland have agreed to take 5,750 shares, which are to be allotted to them.

DIRECTORS.

Jameson Alers Hankey (Messrs Gellatly, Hankey, and Sewell).
Emanuel Boutcher (Messrs Boutcher, Mortimer, and Co).
Robert Porter, Director of the Bank of London.
Philip Vanderbyl, Director of the National Bank.
William Smellie Grahame, Director of the Bank of New Zealand.
Falconer Larkworth, Managing Director of the Bank of New Zealand.

BANKERS.

The National Bank and its Branches; the National Bank of Liverpool (Limited); the Bank of New Zealand.

SOLICITORS.

Messrs Paine and Layton, Gresham house.

BROKERS.

Messrs Steer, Cuerton, and Lawford.

SECRETARY (pro tem.)—W. J. Steele.

The following gentlemen have expressed their willingness to become members of Local Boards in New Zealand:—

Auckland.

The Hon. Thomas Russell, M.G.A.
James Williamson, Esq., M.G.A.
Thomas Henderson, Esq., M.G.A. (Messrs Henderson and Macfarlane),
William T. Buckland, Esq.
Robert Waterson, Esq. (Messrs Brown, Campbell, and Co).
(Directors of Bank of New Zealand, Auckland).

Christchurch.

J. Cracroft Wilson, Esq., C.B.

PROSPECTUS.

The great and increasing demand for capital throughout New Zealand, owing to the rapid increase of population and consequent development of trade, points to that colony as a most inviting field for the establishment of an institution such as is proposed in the New Zealand Loan and Mercantile Agency Company.

The business proposed to be embraced by it is wholly apart from, and will in no way interfere with, legitimate banking operations; and to those acquainted with the colony, it is a well-known fact, although the banking capital in New Zealand has, during the past three years, increased tenfold, the demand for advances for such objects as this prospectus points to exceeds the capabilities of the present banking institutions in the colony.

It is, consequently, proposed to establish this Company in direct connection with the Bank of New Zealand, the progress and success of which afford a marked illustration of the safety and remunerative character of monetary operations in the colony.

The connection thus obtained will enable the Company at once to attain a position and an amount of business which could not otherwise be secured for years; and as it intends to avail itself of the officers of that Bank, so far as the Directors may deem advisable, for the superintendence of the Company's interests, an amount of intelligence and experience will thus be brought to bear upon its operations which will be a safeguard to the shareholders, and will enable the Company to carry on its business at a moderate cost.

The business proposed to be embraced by the Company is to make advances by mortgage on freeholds, on bonds and debentures of Governments and public companies, and on the stations and stock of squatters. The special field in view for the last-named description of advances is the province of Canterbury, by far the most favoured portion of New Zealand for pastoral pursuits. The present leases of squatters expire in 1880, and it will be the interest of the leaseholders, before these mature, to secure by purchase the water frontage and more important portions of their runs. There will be great facility in profitably investing that portion of the Company's capital to be apportioned to province.

In addition to the above business, it is intended that advances be made on the growing clip of wool, secured by registered lien, which is a legal security in the colony; and that the wool be transmitted to London, for sale by the Company.

	£
With a subscribed capital of £500,000, it is proposed to have a paid-up capital of	100,000
And that, taking advantage of favourable opportunities of borrowing on the debentures of the Company, a further sum be raised of..	400,000
Making an amount of working capital of.....	500,000

The rate of interest at which investments can be made in New Zealand may safely be assumed to average 10 per cent., while the borrowing rate in this market on the debentures of the Company would not be expected to exceed six per cent.

At these rates the following may be taken as an approximation to the probable results:—

	£	£
£500,000 at 10 per cent		50,000
Commissions on wool sales, profit on exchange..		6,000
Procuration fees, &c., say		3,000
		59,000
Less cost of management and other incidental expenses	£10,000	
Interest on £400,000 borrowed on debentures at 6 per cent.....	24,000	
		34,000
Leaving a net profit of		25,000

Or 25 per cent. on the paid-up capital of the Company.

The Directors feel that the above results may fairly be expected.

No promotion money will be paid, and the Directors guarantee that the preliminary expenses shall not exceed £350.

The Board of Directors of the Bank of New Zealand at Auckland have intimated their willingness to act as a local board of the Company; and, as an assurance of their belief in the success of the undertaking, have as individuals agreed to take 5,750 scares.

Prospectuses and forms of application for shares may be had at the National Bank, 13 Old Broad street, and the Bank of New Zealand, No. 50 Old Broad street, City, to whom applications may be addressed.

ABRIDGED PROSPECTUS.

1. This Company was established last year for the purpose of extending the benefits of Life, Fire and Guarantee business generally, throughout Great Britain, France, Europe, India, the colonies, and other parts of the World, and to offer greater facilities for effecting the same at such reasonable rates as experience has found to be safe and practicable; the Company having already done a large amount of business in this country, and established influential Boards in Paris, Florence, and the Mauritius, with a thousand active agents throughout France, they now come before the public for the purpose of still further extending their operations at home and abroad.

2. Life assurance is the most beneficent institution ever established by man, and is making great progress in this country; while on the continent its great advantages are beginning to attract attention; the present is, therefore, a most favourable time for this Company to establish its business throughout Europe, and, as its policies are indisputable except for fraud, there is no doubt it will succeed.

3. The profits will be divided among the shareholders by paying 5 per cent. half-yearly, all the profits of the general business yearly, and 20 per cent. of the life profits as a bonus every five years: this liberal division of profits will, it is believed, make the shares in this Company very valuable.

4. Fire Insurance.—The question of the reduction of duty on fire policies having been settled by the House of Commons, it is expected that Mr Gladstone will reduce the duty to 1s per cent. immediately, which will give such an impetus to this description of business, that the revenue will not suffer, while the benefit to this Company by the introduction of new business will be immense.

5. Guarantee.—A liberal and extended system of guarantee has long been felt as a commercial necessity, which this Company proposes to supply, and by good management it will no doubt secure the support of the commercial world.

6. The influential Councils of Administration already established in Paris, Florence, and the Mauritius, with those now in course of formation in the chief States of Europe, will, it is believed, enable this Company not only to extend the business of life and fire insurance, but also place it in a position to negotiate concessions of works of public utility, and to assist States and individuals in the development of their resources, by introducing sound and beneficial undertakings to capitalists and finance companies in this and other countries.

7. Part of the capital of this Company having been subscribed last year, the Directors commenced business, and thus tested the promises of support made from various quarters. The result was the receipt of 1,272 proposals, amounting to £1,034,431, which they consider most satisfactory; and having established various agencies and councils of administration on the continent, and having also received offers of business from other quarters, they now feel justified in offering the remaining shares to the public, as the present business will pay a fair rate of interest, while the increase, they have a right to expect, will make the shares a safe and valuable investment.

8. In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment due on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of applications for shares may be made to the Solicitors, the Bankers, Brokers, and to the Manager, at the offices of the Company, No. 60 King William street (opposite Eastcheap), London.

FINANCIAL INSURANCE COMPANY (Limited).

Notice is hereby given, that the list of APPLICATIONS for SHARES in this Company will close THIS DAY, Saturday, April 8.

C. C. GREEN, Manager.

60 King William street, April 8, 1865.

SALOM'S NEW OPERA AND FIELD GLASS.

—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an inexpensive companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

THE FIRST ANNUAL MEETING

of the LANDED ESTATES COMPANY was held at the Offices, 37 Cursitor street, Chancery lane, FRANCIS WEBB, Esq., in the Chair.

By the report it appeared that £31,743 had been received in respect of allotted shares, while the gross profit on the year's transactions equalled £12,856 13s 4d. After payment of all outgoings, the net profit amounted to £11,301 6s 6d, which would enable the Directors, after declaring a dividend of 15 per cent., to carry forward over £10,000.

The Chairman, in moving the adoption of the Report, said that it was very rarely a Company could report such results at their first meeting. The Company had been formed by gentlemen cognisant of the great profits to be derived by buying land adapted for building purposes wholesale and selling it retail, and the difficulty that an individual had in purchasing small plots of from one to four acres except at enormous prices. The first Estate the Company had purchased was the Worcester Park Estate, near Kingston and Ewell. He stated that the Company had nothing to do with bricks and mortar, further than assisting builders in the erection of first-class houses upon the estate. The estate comprised about 300 shares, and from the sale of 61 acres only a profit of more than £11,000 had been realised, after deducting the expenses of road, sewers, &c. By the increased railway accommodation which would shortly be afforded the neighbourhood, and the improved condition of the estate, it might confidently be expected that large profits would be realised on future sales.

Mr Chifferiel seconded the Report, which was adopted amidst acclamation.

Some discussion ensued as to whether the unallotted shares should be issued at a premium, but it was ultimately resolved that the matter should be left in the hands of the Board.

The retiring Auditors, Messrs Harding, Pullein, Whinney, and Gibbons, and P. Le Neve Foster, Esq., were re-elected, and after the usual vote of thanks had been passed the meeting separated.

THE MOYAR COFFEE COMPANY (Limited).

THE EAST INDIA FINANCIAL ASSOCIATION (Limited) invite subscriptions for the capital of THE MOYAR COFFEE COMPNAY, Limited.

Incorporated under the Companies Act, 1862.

Capital £75,000, in 15,000 shares of £5 each, with power to increase. Deposit on application 10s, and 10s on allotment. Calls not to exceed 10s per share, at intervals of not less than three months.

A minimum dividend of £10 per cent. (payable half-yearly) is guaranteed by the vendor for three years. The vendor agrees to a proportionate diminution of purchase money if the net profits do not average £14 per cent. during the first three years.

DIRECTORS.

Henry Danby Seymour, Esq., M.P., Director East India Financial Association (Limited), Chairman.
William Maitland, Esq. (Messrs Mackillop, Stewart, and Co., Calcutta), Director Asiatic Banking Corporation.
J. Carrington Palmer, Esq., Director Agra and Masterman's Bank (Limited).
Henry H. Potts, Esq., Director Ouvah Coffee Company (Limited).
Joseph Jefferson, Esq. (late of Bombay), Oak hill park, Hampstead.
*Arthur R. W. Lascelles, Esq., of Ootacamund, East India.
George Frederick Rimington, Esq. (late of Bombay), The Elms, Ashford, Middlesex.
*The vendor will join the Board after the completion of the purchase.

SECRETARY (pro tem.)
F. J. Padley, Esq
Temporary Offices—38 Walbrook, City, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purchase of and cultivation of coffee and tea on seven valuable estates.

The price to be paid for the estates is £51,000 (subject to survey of the property, as mentioned in the agreement for purchase), of which the vendor will accept one fourth in shares of the Company, and the cash by instalments, extending over three years from the 1st April, 1865.

The average net profits for the first three years are estimated at 19¼ per cent. per annum.

If no allotment of shares be made, the deposit money will be returned in full.

Prospectuses and forms of application may be had of the Broker; and at the temporary offices of the Company.

THE MOYAR COFFEE COMPANY, Limited.

—Notice is hereby given that the Share List will be closed on Thursday, the 13th, for London, and Saturday, the 15th inst., for the Country.—By order of the Board,

FRED. J. PADLEY, Secretary (pro tem.)

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

THE ECONOMY OF CAPITAL;

OR,

GOLD AND TRADE.

BY R. H. PATTERSON,

Author of "The New Revolution," &c.

CONTENTS:—I. Thoughts on Gold.—II. What is Money?—III. The Golden Age. Effects of the Gold Discoveries on the World.—IV. The Economy of Capital. Banking. Financial Co-operation. Monetary Crises, 1793-1857.—V. The City of Gold.—VI. The Bank of England. Our Monetary System: Defects and Remedies.—VII. Our Trade. What is Over-Trading?—*Appendix*. Position of the London Joint Stock Banks. Comparison of English and Scotch Banking, &c., &c.

MORNING POST.

"A volume which will be hailed with pleasure by the entire commercial community. It displays throughout a thorough acquaintance with our Monetary System, and is written in the lucid and graceful style which distinguishes Mr Patterson's works.....A work replete with interest and information,—and which, apart from this consideration, would repay perusal on the ground of its literary merits and the graphic pen pictures with which the author as illustrated his subject."

THE BRITISH QUARTERLY REVIEW.

"A very brilliant chapter of Mr Patterson's volume is devoted to the City, and to the business carried on therein.....It is like the effect of the pictures of London recently painted by the lamented David Roberts. We feel almost as if we heard the roar of the ceaseless traffic, and joined in the restless activity, as we read Mr Patterson's descriptions.

WESTMINSTER REVIEW.

"In all that really has reference to the Economy of Capital, Mr Patterson's book is most excellent. His information is complete; his style is clear, forcible, and even picturesque; and his account of the modes by which capital is economised in the banking system is the very best extant,—but his theory of what that system should be is open to the gravest objections. But utopian or not, there are few books on the subject better worth reading than his."

LIVERPOOL ALBION.

"A work whose arguments cannot fail to arrest, as its facts cannot fail to instruct.....Mr Patterson has evidently an inheritance of the 'faculty of money' and logical acumen which were combined and exemplified in such a remarkable degree in Adam Smith.....There is poetry in the author's portrayal of the good and glory of Commerce,—and of the toil in the lands of the sun and snow, of Australia and Siberia, for gold, the magician of trade. But the book has an entirely practical bearing: and in the 'Golden Age' is delineated the flow of emigration—the financial relieving of Europe—and the extension of operations produced by the influx of new golden store."

BELL'S WEEKLY MESSENGER.

"This is not only a well-timed book, but it is one which completely exhausts the long-debated subject of Currency. No writer has grappled with the whole subject with a more firm and resolute determination."

MONEY MARKET REVIEW.

"A full and complete exposition of our whole monetary system. But it is more than that; for, although it contains very lucid and very able and philosophical expositions of trade and commerce, of banks and banking, and of money and capital, the book is really a very readable and most interesting book. It is just such a work as all men engaged in trade, or interested in commerce, ought to read."

MORNING ADVERTISER.

"A volume of rare merit.....The chapter on the Bank of England contains a full exposition of our monetary system, and of the reforms that are considered requisite. The chapter is masterly; it is a complete history of itself, and well deserves the study of every one engaged in mercantile affairs.

THE PRESS.

"A very able work at a very opportune moment. Mr Patterson is a clear and deep thinker, who sees through and through his subject."

LEEDS INTELLIGENCER.

"A wonderful work. A book that will in a few years be not only in every English library, but will have a world-wide reputation."

POSTHUMOUS WORK BY MR SENIOR.

Now ready, in 2 vols. post 8vo, price 16s cloth,

HISTORICAL AND PHILOSOPHICAL ESSAYS. By NASSAU W. SENIOR, Esq.

"Everything from the pen of Mr Nassau Senior deserves attention. Each sentence should be carefully studied, for there is food for reflection in all he says. His clear, intelligent view of politics, both social and political, and his forcible language, bring conviction to his readers that the mind which could have originated such thoughts must have been far above the general stamp. The two volumes now published under the supervision of Mr Senior's daughter, herself an Authoress of some note, contain various articles published in the 'Edinburgh Review' between the years 1842 and 1850, to which considerable additions have been made by the Author, in order to bring down the different subjects to a recent period."—OBSERVER.

London: Longman, Green, and Co., Paternoster row.

On March 18, was published,
THE
INVESTORS' MONTHLY MANUAL.

The Proprietors of the INVESTOR'S MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly REPORTS of the Companies mentioned in the MANUAL, commencing with this number, and to be continued in the succeeding ones.

They have also decided upon receiving for it a few pages of Advertisements; and, at the same time, beg to observe that it now commands a very extensive sale, and is a peculiarly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being A WORK OF CONSTANT REFERENCE FOR A WHOLE MONTH, and is used exclusively by all MONIED CLASSES.

Sold as a Supplement to the ECONOMIST, price 6d; separately, 8d and 9d.

Advertisements for the next number must be sent on or before the 12th of April.

OFFICE, 340 STRAND.

WEALE'S SERIES.

Fourteenth Edition, price 1s,

Office—12 George yard, Lombard street, City.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

LEVEES AND DRAWING ROOMS.—DEPUTY-LIEUTENANTS' OUTFITS and COURT DRESSES completed on the shortest notice: the embroidery and appointments kept ready, and may be inspected. Dresses may also be had for a levee, &c.

SERVANTS' LIVERIES, &c.—Current list of prices, with particulars for self-measurement, sent on application. The prices are for cash payments. In each department garments are kept ready for immediate use.

H. J. AND D. NICOLL'S GUINEA TWEED WATERPROOF COATS, for gentlemen, and Guinea Cloaks, for ladies, are patronised by travellers all over the world.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

BORWICK'S BAKING POWDER, recommended by the Analyst to the LANCET and Author of "Adulterations Detected," for making DIGESTIVE BREAD without yeast, and for rendering Puddings and Pastry light and wholesome. Sold everywhere.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

DR GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO. 2 Dowgate Hill, London and at 2 Goree Piazzas, Liverpool.

Just published, 1s. Illustrated, Second Edition.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

OPINIONS OF THE PRESS.

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

RHEUMATISM, CHILBLAINS, &c.

—COLES'S ALGA MARINA has stood the severe test of many years' public experience, and has thereby acquired a celebrity which is unrivalled and daily increasing as a remedy for Rheumatism and Rheumatic Gout, Glandular Affections, and Chilblains, Contractions and Weakness of the Limbs and Joints, Neuralgic and other Pains, Spinal Curvature, &c. The numerous testimonials to its good effects in all that class of diseases for which the sea-side is recommended may be obtained with the Pamphlet for three postage stamps, of Mr KEATING; amongst them will be found the certificate of a Physician in Her Majesty's service, that it is the most efficacious remedy for Chilblains he has ever met with in his experience. The public should guard against spurious imitations by asking for COLES'S ALGA MARINA, and being careful to observe that his signature appears upon the label which encircles each bottle. Every packet also contains the pamphlet, without which none is genuine.—Sold in bottles, 2s 9d, 4s 6d, and 11s each, by T. KEATING, 79 St Paul's Churchyard, London, and by all Chemists.

COUGHS, ASTHMA, AND Incipient Consumption are effectually cured by KEATING'S COUGH LOZENGES, which are daily recommended by the Faculty—testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy, and convenient remedy for Cough and all Disorders of the Lungs, Chest, and Throat.—Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 11s each, by T. KEATING, Chemist, 79 St Paul's Churchyard, London. Sold retail by all Druggists, &c.

COUGHS, COLDS, ASTHMA, AND CONSUMPTION are immediately relieved by DR. LOCOCK'S PULMONIC WAFERS. Another Testimonial This Week from Mr R. W. Cooper, Surgeon, 22 Slaney street, Enniscorthy:—28th March, 1865.—I have used them myself, and ordered them with marked benefit." They give instant relief, and a rapid cure of asthma, consumption, coughs, colds, and all disorders of the breath, throat, and lungs. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all Druggists.

HOLLOWAY'S OINTMENT AND PILLS.—Effectual Aid.—In the sad time of sickness it is cheering to know that a remedy does exist, and that it can be procured at a little cost. Holloway's Ointment and Pills are always useful in relieving pain, in reducing inflammations, and regulating disordered actions They never can be misplaced nor can they, under any circumstances, cause mischief. They are a blessing to the rich, when tormented by indigestion, gout, skin diseases, &c., and a precious boon to the poor, when struck down by illness. Holloway's medicines should be in posession of all soldiers, sailors, and emigrants, who will then be in a position to ease suffering, and cure disease, when assistance cannot be obtained.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

PROSPECTS OF FUTURE COTTON SUPPLY.

EARLY in the year we presented our readers with an estimate of the probable amount of cotton that might be expected to arrive, and to be available for home consumption, during the course of 1865; and at present we see no reason to mistrust our calculations. As far as the *immediate* supply is concerned, we may feel tolerably at ease; arrivals have been heavy, large shipments are known to be on their way or in preparation, and the stock is larger than it has been for some years. It was on

1 January,	1861	700,000	bales
—	1862	434,000	—
—	1863	328,000	—
—	1864	575,000	—
1 April,	1865	700,000	—

This, at the actual rate of export and consumption, will last for nearly 20 weeks; so that there is no need for any anxiety at present.

But it is not to be denied that considerable uncertainty does hang over our future supply, and that our prospects are already creating much uneasiness in all who look far ahead. It is by no means improbable, unless great caution is exercised, that we may fall very short of cotton in 1866 and 1867, and that the fluctuations in price may be as great and mischievous as any we have hitherto experienced. The fall that has already taken place has been such as, if not materially to check production, at least greatly to alarm producers and discourage the vast efforts recently made to grow cotton wherever it can be grown; while the expectation of a still further drop tends to prevent consumption keeping pace with supply.

The state of the case is simply this:—the continued successes of the Federal armies, and the supposed, and probably actual, exhaustion of the South, have impressed even on the most cautious a conviction that the civil war in America must be drawing near its close. Some persons believe that very soon after peace is proclaimed—all persons believe that, sooner or later after that event,—cultivation will resume its old channels, and that large quantities of cotton will again reach us from the States, of a quality and at a price with which, as formerly, no other country, or at least few other countries can compete. Of course, if this anticipation be correct, those countries which have only been enabled to send cotton hither during the anomalous prices that have prevailed of late, will cease to send it; and those which have been induced to send us extraordinary quantities, will fall back to their old moderate amounts. To descend to particulars: fair Surat, which last spring was selling at 22d, is now purchasable at 11d per lb; ordinary East India, which in former days used to sell for 3d and 4d per lb, and which last year reached 16d, may now be had for 6d; while (such is the idea of future probabilities in Bombay) we are informed by telegraph that fair Surat has been sold there, to be laid down in Liverpool, at 8d. The reduction in other qualities has been nearly, if not quite, proportionate.

Now if these prices are to obtain, or if it is expected that they will obtain, the following results will follow:—*First*—China and Japan, which last year sent us 52,000,000 lbs, will cease to send us any at all. *Secondly*—Bengal, and to a certain extent Madras, which last year sent us between them 350,000 bales, will ship to China (as they used to do) instead of to England; and will at once stop any unusual growth into which our high prices may have tempted them. *Thirdly*—The Turkish supply, which has only recently become at all important or reliable, will again become precarious. *Fourthly*—Egypt and Brazil will have a *tendency* to fall back to their old moderate supply—say 200,000 bales as in 1860, instead of 460,000 as in 1864—just in proportion as prices tend back to their old level. *Fifthly*—The Western and North-Western Provinces of India (which, like Egypt, have greatly increased the average breadth of land under cotton, and have suffered inconvenience from the diminished production of food which was consequent upon the change,) will gradually fall back upon their old habits, and be more likely to send us three-quarters of a million of bales than a million and a quarter—on which some persons calculated for 1865. Certain it is that 8d for Surat will not secure us nearly the same supply as 22d would have done.

Thus it would appear as if the actual and expected drop in the price of cotton consequent on the imminent—or believed to be imminent—supply from America after the return of peace, is likely to reduce our supplies from miscellaneous quarters next year to something like one-half their present amounts. But suppose this imminent and anticipated supply from the States *does not come*—is not there now and cannot speedily be grown—what will be our position then? Is there not a possibility of a cotton famine as severe as that of 1862, and of prices as disorganisingly and ruinously high? Now, what are the reasonable and unexaggerated probabilities of

Digitized by Google

the American supply? and are not speculators and manufacturers frightening themselves with a vain shadow? Are they not at all events premature by nearly a year and a half in their anticipations, and are they not discounting their dangers at a most needless and fatal cost? In a word, is there any real reason why cotton, even in the prospect of immediate peace, should have fallen so low, and must we not ere long have to look for a very serious reaction?

Let us look at facts. According to the most trustworthy information we have been able to collect, no wise man will base his calculations on a larger estimate of the available *stock* of cotton now in the States than one million of bales. Of late little has been grown, while much has been destroyed, much has been spoiled, and a good deal has been used. Even after peace is restored, and making every allowance for American energy and promptitude, it will take a considerable time to re-collect the scattered population, to re-organise labour, to repair and recreate the means of transport. We will assume —what however many persons would refuse to admit—that nearly all the residual negro population in the Cotton States will again be set to that special cultivation, either under compulsion or inducement of some kind. We will admit all the suppositions most favourable to a large and prompt supply. Still, in any case, no *fresh* cotton worth mentioning can reach this country in less than *eight months after the next seed-time subsequent to the restoration of peace and order*. The seed-time of this year is past. Granting that the war is over in July, that plantations are restored to their owners, that the healing and re-organising processes are at once entered upon with the marvellous enterprise and vigour which characterise our transatlantic brethren,—still it will be February, 1866, before the new crop can be sown, and October or November before it can reach England in any quantities. And when it is ready to come, we may safely calculate upon three things—all of which ought to moderate our expectations. *First*, that the crop of the first year, and perhaps even of the second, will not be like the former ones three, or three and a half millions of bales, but not more than two millions at the outside,—considering how many of the plantations have been ruined, and how large a proportion of the negro population has been dispersed or died. *Secondly*, that of this moderate crop the Americans themselves will want probably one-third at least. And *thirdly*, that the cotton will cost more to grow than it did before the great convulsion, and before it reaches us will be burdened by an export duty of 3d or 4d in the lb,—so that, instead of being laid down in Liverpool at 6d a lb, and yielding a good profit at that price, it will probably cost from 10d to a shilling. If this be so, then there is no reason why Surat at 8d and 9d should not hold its ground; and the present panic is at once excessive and premature. It will be a great evil if new and distant countries are discouraged from growing and forwarding cotton earlier or more decidedly than is necessary. Sooner or later, no doubt, as we have always said, the United States will beat all other cotton-growing countries out of the market, with the exception of *moderate* supplies of special qualities from Bombay, Egypt, and Brazil—but it will be later and not sooner, and we need not augment the catastrophe by anticipating it.

THE WESTMINSTER REVIEW ON THE REPRESENTATION OF MINORITIES.

A CLEVER article on Reform in the new number of the *Westminster Review* deserves some attention, if only for the curious combination of moderation in the substance, with indignation in the *tone* of its criticism on the slowness of the middle class to aid the working class in achieving that representation which the former would never have achieved even for themselves, but for the eager and powerful aid of the latter. Whether the writer wishes or does not wish to swamp the middle in the working class, is not apparent. He argues for a representation of the minority in opinion, but not, as far as we can see, from any desire to secure with greater certainty an expression of the cultivated thought of the nation, only from the principle of *fairness* which requires that even on such a question as the Alliance Bill for suppressing the public sale of intoxicating liquors at the instance of two-thirds of the ratepayers of any district, the minority should be permitted to argue their side of the question. Whether the minority happened to be of cultivated persons or of uncultivated would apparently make no difference. The writer distinctly argues that we do not want a Legislature *better* than the nation, but one, strictly speaking, representing the nation—that it is better we should do our own work clumsily, than get it done by men whose thoughts are clearer and aims higher than those of the people at large. A popular Government is the true end in view; but a poor Government, or rather a blundering popular Government, will prove better in the end than a Government less completely on a level with the average mind of the nation, even though it blunders less. But in advocating this, and in inveighing against the middle classes for not recognising it in the case of their working class brothers, as the working class recognised it in their own case, the writer, we think, omits to notice that the *reason* why there was enthusiasm then, and why there is apathy now, proves most distinctly that the English people do not share his abstract passion for a Government at the precise level of its own mediocrity. They were indignant against the legislation which preceded the Reform Bill, because it paid little or no regard in its measures to the welfare and happiness of the people. Its code of laws was at once oppressive and bloodthirsty. They kept down industry very close to the level of misery, and when the poor man passed the boundary from misery into crime, they punished him with merciless severity. It was the bad *fruits* of our representative or unrepresentative system that really maddened both middle and working class into savage agitation,—not the abstract desire for a Government which should precisely represent the average man's wishes and capacity. No doubt there was and is a very strong feeling that no Legislature which is not *sensitive*, highly sensitive, to the breath of public opinion in all large sections of the nation will ever do the nation's work as well as it might be done,—but we deny entirely that the English people is so wedded to a mere doctrine as to be willing to sacrifice intelligence and culture in its Legislature only for the sake of having a perfect image of the average knowledge and ability, and the average ignorance and incapacity, of the nation. Had our reformed Parliament been deaf to the wants of any large class, no doubt it would have been long ago assailed with the old fury. But though it might clearly be improved by introducing into it a more thorough representation of the working class, we do not believe there are twenty men in the nation except the reviewer (even if he be deliberately of that mind) who would honestly wish to see the intellect and culture of Parliament actually lowered to bring it nearer to the average level of the nation. It is because the fruits of the reformed Parliament have been on the whole so good, because it has shown intelligence and ability in its work, as well as a strong disposition to study the wants of the whole people, that there is no combination against it,—not because the middle class are selfish, or the working class need a stimulus from above before they are prepared to rise. The reviewer, in his somewhat doctrinaire zeal for representative perfection, forgets that Englishmen always prefer to attain two good results by the same method, to attaining one in even higher theoretic perfection. For the purpose of attaining a perfect image on a small scale of the nation as it is, no one would wish to sacrifice the far more desirable object of getting a sensible and educated deliberative body, able to discuss new measures with a full knowledge of all their bearings. If the reviewer thinks that Englishmen will count this of little value in comparison with the representative perfection of the assembly, we think he is utterly mistaken. A true representation of the average knowledge and culture of the nation in Parliament would give us a Parliament really ignorant of many common and important matters; and is this what the reviewer seriously contends for?

Then as to his advocacy of the representation of minorities, we regard this scheme as useful chiefly because it will secure a greater proportionate influence to educated men as the tendency to democracy in the views of the majorities becomes more marked than it now is. As the suffrage is lowered, unless we have some compensating principle of this kind, there will be great danger that the thinking classes will lose their influence in the Legislature. Were it not on this account—that the plan will tend to increase the variety of intellectual *type* represented in the House, and to secure a voice for the higher class of intelligence,—we do not know that the scheme would be wanted at all. The objection made to it always is, that the minority of one constituency is the majority of another, and that in this way the minorities do virtually get represented,

Digitized by Google

though not *where they are the minority*. And this would be quite a sufficient objection, if the tendency of a lowered suffrage were not to assimilate the class of voters who will constitute the majority in all the larger boroughs, and to leave the *same class* in every great borough out of the representation. It is on this account,—in order to keep a defined influence in Parliament for the thought and culture of the country, that we attach so much importance to the representation of minorities,—and we should cease to do so if we held with the *Westminster Reviewer*, or at least with what seems to be his view, that it does not matter how inadequate a Legislature we get, so long as we get one which fairly represents the average mind of the British people. And here is the true answer to an acute critic who has written in reply to the minority representation favoured by the *Westminster Review* in the pages of a daily contemporary. He assumes that the minority would be in the future, as it has generally been in the past, the *obstructive* party, and exclaims against the great danger of adding to the obstructive power which has already proved so strong to delay all great reforms for generations after they were needed. "I wish," says Professor Newman, "every minority to be heard; but I think it "would be a fatal error in England to give any organic "advantage whatever to the weaker of the two great parties, "for the plain reason that our chief disease consists in the "extravagant power of obstructing elements. We are an old, "stiff country in our organism, while in our mechanical, com- "mercial, and vital developments we undergo every ten years "enormous change. A hundred years ago we were as different "from our present state as Spain from Germany. Our poli- "tical diseases rise out of the slowness of our self-adjustment. "Our changes of law come thirty or fifty years too late. We "have arrears like a Court of Chancery. The causes are "plain. The resisting forces are too great. Accumulation of "business on Parliament is too great. Centralisation is exces- "sive. The destruction of the Scotch and Irish Parliaments "were steps in the wrong direction. Most of our reforms are "reversals of old error. To strengthen a minority to resist "would be, in my belief, nearly the worst mistake we can "make. There is no danger whatever that the cause of a "minority will not be well pleaded and attentively heard." But this seems to us to be obvious *petitio principii*. Because the smallest but richest and most powerful class have usually been obstructive when the constituencies have been small, Mr Newman argues that when the minority contains the whole of the more educated part of the nation it will be equally obstructive. Look at the Trades Unions—bodies to which our great constituencies are more and more likely to be assimilated. Is not the minority there usually the least of what Professor Newman means by obstructive—usually the most enlightened and most thoughtful class in the Union? As our political system approaches democracy, we should expect to see the really progressive part of it, the real friends of liberty and real opponents of any democratic interference with individual thought and freedom, belonging rather to the minority than to the majority, and that their influence in Parliament would be not of the obstructive but of the enlightened kind. Mr Newman, in judging by the past, forgets that great democratic majorities are apt to legislate far more ignorantly—witness the protective legislation of the United States and Canada—than the educated class, as a whole, would ever legislate. No, the reason why we want the principle of the representation of minorities to be fairly acknowledged in our next Reform Bill is, that we believe it, and it alone, will temper the tendency in all democratic constitutions to impose on the country laws *intended* no doubt in the *interests* of the majority, but blindly and erroneously so intended, for want of a deliberative assembly up to the highest culture of the time, as well as representing fairly the dumb wants of the community.

THE FINANCES OF ITALY.

NOTHING is more difficult than to form an adequate idea of the financial situation of a country which, like Italy, is only just beginning to estimate correctly her true responsibilities and resources. We know in a general way that Signor Sella wishes to raise over and above the taxation of the country 25,000,000*l* sterling within the year,—8,000,000*l* by the sale of State railways, and 17,000,000*l* by loan. As the whole revenue for 1865 is certainly not likely to be so much as 25,000,000*l*,—it looks at first sight as if now, in a year of peace, and after the lapse of four years from the death of Cavour, and the inauguration of the new era, the Italian Government were still spending more than twice as much as they could raise by taxation,—a hopeless state of things indeed, if it were so. This, however, is very far from the truth. A letter of Count Arrivabene's to Lord Stratford de Redcliffe on the Italian finances, taken together with a return recently presented to Parliament of the comparative taxation of foreign countries, enables us to form —certainly a very meagre and imperfect estimate, but still an estimate, of the true financial position of Italy. No doubt, as we shall see, that position is still very bad; but it is far from hopeless.

The 25,000,000*l* which Signor Sella wishes to raise otherwise than by taxation in the present year, covers the deficits, not of one but three years, and the deficit for the present year is only 8,280,000*l*, a sufficiently alarming sum no doubt, but still only about a third of the annual revenue, instead of equal to it. Then, what is of still more importance than their amounts, is the *tendency* of these deficits. Any State in which the revenues *tend* to overtake the expenditure, although still far behind it, is in a position comparatively hopeful, especially if the State have large undeveloped resources which the public expenditure is in a great degree serving to promote. The analogy then is to the case of the sinking of a borrowed capital in a concern which bids fair not only to pay, but to pay a great interest. Now, in 1864, the Italian deficit was 12,640,000*l*. This year it is 8,280,000*l*, and Signor Sella says that if peace continues without any other exceptional calamity, the deficit of 1866 will be only 4,000,000*l*. At this rate the deficit of 1867 would be nil. Of course it is idle as yet to count on the expenditure even of the current year. A war might break out at any moment for Venetia, due either to the rashness of the Garibaldian and Mazzinian party, or to the jealousy of Austria, and thus, of course, all financial estimates would come to nothing. It is, besides, just possible that Signor Sella's sanguine hopes may be defeated from financial or commercial causes even without war. But special causes, if really special, do not last, and the question of a delay of a year or two in effecting the equilibrium between expenditure and revenue is not of the same importance as the question of the *power* to produce that equilibrium in ordinary years. We do not mean to recommend implicit confidence in Signor Sella. On the contrary, the chances seem to us very large indeed, that Signor Sella has hoped for the best. But still the fact that the ordinary deficit has in one year certainly diminished by more than 4,000,000*l* is a solid certainty, and it gives some colour to the hope that an equal diminution may take place next year if peace be not disturbed.

There is fair ground for hope, also, in the very light taxation of Italy as yet, and the rapid development of its resources which the railways and public works are giving. At present, as Count Arrivabene shows, except Austria and Russia, Italy is more lightly taxed *per head* than any of the great countries of Europe. While Italy at present pays only a trifle above 1*l* per head, slightly less than Prussia, Spain pays 1*l* 10s per head, France 2*l*, Holland and Great Britain about 2*l* 5s each. Yet no country in Europe promises more results from the increase of railway communication and the stimulus to traffic with foreign countries than Italy. With a larger sea coast in proportion to her territory than any other State in Europe, and great internal resources, the facilities for trade which every year are opening up, are certain, in time of peace, to add largely to her wealth and her power to bear a heavier taxation with more ease than she now bears the very light one of 1*l* a head. If we compare the weight of the public debt which presses upon each country, the result is less favourable but not unfavourable. Italy in 1864 had a nominal debt of about 150 millions sterling, or about six years revenue. Count Arrivabene assumes, probably without exaggeration, that before the difficulties of Italy are overcome, and she has again a long period of probable peace before her—in other words before she has recovered Venetia and settled the Roman question to the satisfaction of Europe,—she *will* have a debt of 250 millions sterling, which (as the revenue is rising) may be estimated at about eight years' revenue. Well, the debt of England, as every one knows, is about twelve years' ordinary revenue; the debt of France is about eight years' ordinary revenue; that of Spain is seven years and a quarter of ordinary revenue; that of Holland ten years of ordinary revenue; that of Austria eight years of ordi-

Digitized by Google

nary revenue; that of Russia from five to six years ordinary revenue. From this it will be seen that even after making a liberal allowance for the future accumulations of Italian debt, there will be no burden on Italy greater than most of the States of Europe already bear. And there is this in her favour, that while many at least of the States mentioned have been developing their resources for a long period of years, Italy is only just beginning to experience the advantages of civilisation in its Southern provinces, and of easy intercourse between her several provinces.

There is also some reason for hopefulness in the nature of the elements of which Italian taxation is composed. In 1865 Italy raised no less than 2,400,000*l* as income tax out of a total revenue of about 25,000,000*l*,—that is, she raises about ten per cent. of her revenue by the most annoying and most conspicuous form of State impost. In fact, she raises as much from this source as from her whole Customs duties. Now, it is obvious that this speaks very well for the willingness and ability of Italians to support the Government. Even during the last ten years of heavy income tax, the average amount raised by our own rich country has not been more than about one-seventh of our whole revenue, and the proportion of income tax to total taxation is a very fair test of the docility of a country in these disagreeable lessons in finance. It is certain that, with judicious management, and a more Free-trade tariff. Italy might raise her Customs revenue—the branch of taxation which is least severely felt—to a very much higher level indeed than the paltry sum of 2,400,000*l*. In England Customs yield us one-third of our total revenue instead of one-tenth; but, then, England is in many respects very fortunately situated for raising Customs duties without injury to trade, because a great number of things which are now with us necessaries of life are raw products not grown in England and not needing manufacture. Italy, of course, is not so fortunate. Her Customs duties are received in small driblets from many articles. Her highest *single* Customs revenue is for sugar, and for that she receives only half a million sterling instead of, as we do, something like six millions. On tea the Customs get nothing; on coffee a mere trifle, perhaps 150,000*l*, and yet coffee is about the fifth on the list of Customs duties when arranged in the order of the magnitude of the receipts. There is, therefore, no similarity between the probable Customs duties of Italy and England. Still, if her statesmen are wise enough to take off all the protective duties, and tax instead more heavily those things which Italy consumes in large quantities but does not herself produce, there can be no doubt that, instead of raising only ten per cent. of her revenue in Customs duties, she might easily get a sixth or a fifth. There is, therefore, obviously one department of the revenue likely under wise management to expand.

Altogether, considering that the deficit has certainly been reduced from nearly 13,000,000*l* in the last year to 8,000,000*l* this year, with a probability of only 4,000,000*l* next year—that this result has been attained not merely by reducing expenditure, but by increasing taxation, and that not slowly (for in 1862 the revenue was calculated at 18,300,000*l*, in 1863, at 20,000,000*l*, in 1864, at 20,400,000*l*, in 1865, at about 24,000,000*l*)—considering, also, that so large a proportion as one-tenth of the revenue is raised in the way which most impresses the imagination as odious, and that so little as one-tenth is raised from the least disagreeable and most expansive of all sorts of revenue, Customs duties—considering that the taxation of the country is still lighter reckoned per head than that of any great country in Europe except Russia and Austria, and that the debt is now comparatively light, and will bear a very considerable increase before bringing it up to the relative magnitude (reckoned in number of years revenue) of most other European States, we cannot think the financial situation of Italy desperate. It is bad, no doubt, but then we expect a bad state of finance after a great revolution, a great war, and a great amalgamation of very different political elements. It is not so bad as the financial state of many countries has been, which have now completely emerged from their difficulties into prosperity and wealth.

THE LIBERTY OF BEQUEST IN FRANCE.

Seldom has the radical difference between English and French thought, and consequently between English and French society, come out so strongly as in the recent debate on the motion of Baron de Veauce. That gentleman, backed by fifty-six other members, ventured to propose in the Corps Legislatif an inquiry as to whether the laws of succession might not be modified in a sense favourable to the liberty of bequest. His speech was an excessively poor one, feeble, tedious, and full of anxiety lest his audience should suspect the speaker of an aristocratic drift, but it elicited very striking replies. The main argument employed by M. de Veauce was the patent and not very forcible one that the legal equality of inheritance established among children by the Code Civile tended to subdivide estates till sound farming became almost impossible, and the inheritance was very often swallowed up in the cost of obtaining it. That is not very forcible, as it is open to the co-heirs to work their property in common, to farm their estate without division as easily as any other association of partners, but it would in England have elicited a similar reply. The Ministry, if they wished to defend such a principle, would have argued in favour of the *petite cultivation*, would have quoted illustrations from Mr Laing, and have shown that spade-labour produced under certain circumstances more than the use of the plough. The suggestion would have been treated as one of economics, or at most of political organisation. Not so in France. M. Guéroult and M. Barieu, on behalf of the Government, and M. Marie, as a jurist, answered the Baron de Veauce by an appeal to two ideas—the French desire for equality, and the French theory of the form which family life ought to preserve. The argument from equality we may leave untouched, as the French feeling on the point is sufficiently understood. It is clear that if the steady aggregation of property continued for generations is permitted by law, equality, as France understands it, will in the end disappear, the tendency of any family which has once become great being to keep itself so by every device in its power. The desire for equality, too, not being quite universal, the few who do not entertain it will set themselves to resist its operation, and in a generation or two great estates will be visible, breaking that uniformity of social life which seems to Frenchmen so admirable. All this is understood; but the theory of family life laid down by those who defended the law is much less familiar to Englishmen.

The whole drift of the argument went to show that in France men maintain the family life as a protection against a conscious sense of weakness, as a needful buckler against the harshness of the external world. The independence so much prized in England is denounced by M. Barieu as something cold and hard, a feeling opposed to true morality, the result of coldness of temperament, absence of consideration for the weak, and want of the power of family affection. The Frenchman keeps his children with him throughout his life, the Englishman turns them out young, it may be to India, and the law of course in each case has been brought into harmony with the national habits. It would be a strange thing, said M. Barieu, to deprive a man who had been bred up in ease in the bosom of his family of his well-being by a disinheritance, and the audience applauded considerably, feeling as Englishmen feel when they hear that a man is starving his wife. Property in France does not belong to the individual, but to the family, and to release its head from his legal obligations would be to disorganise all society. How, exclaimed M. Gueroult, are the children of a family to live in concord if the father may exhibit favouritism? Why, the sailor in distant seas might see himself plundered by influence exercised on the father at home, "the soldier who serves his country abroad would be exposed "—horrible thought—to the risk of disinheritance." The feebleness of the father, the coaxings of favourites, the influence of the priest, must all be guarded against by law if the family is to be preserved, and the family, said one speaker, protected by the perpetual entail on all its members, which is the first principle of French law, is the very core of society. The power of absolute bequest, said M. Barieu, with an accent of disgust audible even here, "is brutal, subjected to no right. "It is the law of a people of great energy, of a people a little "hard, who do not care for the protection which the weak-"ness of the individual may require, who abandon every one "to his own resources." The motto Englishmen all repeat with such pride, "Every man for himself and God for us all," would strike M. Barieu as an expression of pitiless brutality, while we regard it as that of a people who think individual independence more valuable than a collective security only to be purchased by its surrender.

There it seems to us is the fact, too much forgotten in England, which will in France protect for ages, perhaps for ever, the equal division of property, which makes all English argu-

Digitized by Google

ments against the system fall so dead on French ears. It is not to them an economical question, or even mainly a question of social equality. It is conceivable that a desire for large farms might spring up in France—indeed it is springing up—or even that equality should be denounced by a generation trained under despotism; but it is not conceivable that the Frenchman should wish, like the Englishman, to stand alone. He is a Celt, not an Anglo-Saxon,—an Asiatic, so to speak, not a European. Independence seems to him isolation; he wants something to cling to, to lean on, to love without the trouble of winning, and he finds it in the family. In England the relation between mother and children would almost always, and between father and children would sometimes, satisfy a Frenchman, if he could possibly be so illogical as to imagine an authority not backed by the law, but the affection rarely extends beyond those degrees. Brothers, if they like one another, are unusually intimate friends, but if not, not. Cousins are very often not even intimates, and as for mere connections, an Englishman will call his brother-in-law by his surname for forty years. The Frenchman makes of his kinsmen a clan, a family like an Asiatic one, a circle which can live under one roof, yet never quarrel, and never lose its personal independence. The system seems to Englishmen a weak one, and it certainly ties families grievously to the soil, but then it gives in return to each man a body of born friends, who have no adverse or separate interests, whose interest indeed it is to support each other against all the world, to pardon to every extent the member of whom it is impossible to be rid. The Frenchman who dreads solitude more than death, thinks such a body a necessity of pleasant existence, and will do nothing, whatever the economic consequences, to endanger it. A man penetrated by a feeling like this, if he chances also to have a passion for equality, is certain to demand the equal division of property as essential to the realisation of both his desires. If he has only one, the necessity for reliance, he will, as in Bengal, let the whole family inherit without dividing, the eldest exercising all rights of ownership; if he has only the other, the love of equality, he will, as in America, leave the testator free, save that opinion will compel him to be "just;" but if, as in France, he has both, he will create a perfect and immutable system of family entail.

EARL RUSSELL'S VIEWS ON THINGS IN GENERAL.

In the form of an introduction to a new edition of his early work on the British Constitution, Lord Russell has recently given to the world an interesting summary of the curious political changes which have taken place in England during the forty years of his public life, and of the several measures of progress and improvement to many of which he himself contributed so largely. In addition, he explains his views on most topics of general policy, and comments at some length on the position and prospects of the country.

We can well understand the interest and gratification with which a Statesman of Lord Russell's stamp must have drawn up this sketch of the contrast between the present and the past—of what his country was when he entered Parliament, and what—thanks to the exertions of himself and his fellow-labourers—it has now become. It is a fair cause for honest pride to be able at the close of life to say that he has seen "Parliament reformed, Slavery abolished, Dissenting, Roman "Catholic, and Jewish disabilities repealed, Municipal Corporations purified, the Poor Law reformed in England and enacted "in Ireland and in Scotland, Education promoted, Ecclesiastical "deficiencies and abuses *begun* at least to be rectified, the Corn "Laws repealed, taxation enormously reduced, and a free commercial policy inaugurated, while the independence of Greece "and Belgium has been established, and the unity of Italy "recognised." In most of the struggles which issued in these successive victories, Earl Russell took a leading part; and though there may be many incidents in his career which we blamed severely at the time, and cannot do other than regret now,—though he has been occasionally tardy, often wilful, and sometimes perverse, yet on the whole he will retire from the field, when he does retire, with the reputation and the gratitude due to long, conscientious, and efficient service.

The portion of this introduction which will be read with the greatest eagerness is that where the veteran Parliamentary Reformer puts forth his views on that, his special, topic. Everything on this subject coming from Lord Russell is doubly sure and deserving of attention, partly as explaining what he thinks ought to be done, partly as foreshadowing the line which he is likely to take. On the whole, however, the pages devoted to this matter are very disappointing. We gather clearly enough his general *feelings*, but we can argue little of his plans. He tells us plainly enough where he stands, but he does not succeed at all in showing us where we ought to go. He cannot be said to throw the faintest light on a very difficult and obscure question. It is obvious that he wishes to advance and that he wishes to be moderate; but he appears not to have attained to any other conception of moderation or of progress, than to take a step or two further in the old direction, but to be careful that such steps shall be neither too far nor too fast;—he would go lower, but not too low. In short he is still running in the old rut; he has not got one inch out of or beyond the ideas of 1832;—what he did then succeeded well, so he is for doing a little more of the same kind and in the same direction; a 10*l* franchise answered then, so he does not see why an 8*l* or a 7*l* should not answer now; in his eyes the multiplication of electors by a simple lowering of the electoral qualification is indisputably "progress," and the lowering that qualification by only 2*l* or 3*l* is as indisputably "moderation." He apparently has not the least notion that a seven or a six pound franchise *could* only be a stepping stone to household suffrage,—and that household suffrage would be virtually a reversal and not a continuance of the great Reform of 1832.

Anything more disappointing or more feeble than all his remarks on this subject we never remember to have read. He is evidently and avowedly still aristocratic to the backbone in his temperament, in his views, in his intentions—this substratum of his nature appears in nearly every page. He worships our mixed and intrinsically aristocratic Constitution; and if he overthrows it, it will be unintentionally and with his eyes shut. He is alive to the dangers, or at least he is adverse to the reign "of Universal Suffrage and Democracy; "but he would be sorry to see them averted by such invidious "schemes," or such counteracting securities, as those suggested by Mr Hare, Mr J. S. Mill, or Earl Grey. He deprecates the evils much; but he deprecates any endeavour to prevent them still more. Above all, he would "stand in "the old way;" he would act, if he acts at all, in the old habit of the Constitution;—in a new state of affairs and in the presence of new dangers, he would on no account depart from the old bulwarks and the old prescriptions. "For my part, "I should be glad to see the sound morals and the clear "intelligence of the best of the working-classes more fully "represented. They are kept out of the franchise which "Ministers of the Crown have repeatedly asked for them, "partly by the jealousy of the present holders of the suffrage, "and partly by the *vague fear* that by their greater numbers "they will swallow up all other classes. Both these obstacles "may be removed by a judicious modification of the proposed "suffrage, and by a *happy sense on the part of the public* that "an addition of the votes of the most intelligent of the "working-classes to the constituent body will form a security "and not a danger."

Words like these, coming from one whose political influence is still great, and who ought to understand this subject better than any other man,—words so weak and so indefinite, betraying so dim and inadequate a conception of the problem to be solved and the struggle to be met—fill us with despair. The "jealousy," and the "vague fear"—it is an imminent and a very distinct danger in the eyes of most of us—that the working-classes, when once fully admitted to the franchise, will inevitably by their numbers be able to outvote all other classes, is to be removed by admitting only a few of the more select of them at present, and shutting our eyes to the prospect of being called upon to admit the rest hereafter;—and by "a "happy sense on the part of the public," that the danger in question is purely imaginary,—*i.e.*, by the English nation, to make things pleasant, hiding its head in the sand, to avoid seeing the symptoms of the coming change.

Lord Russell's views of the principles which should guide the foreign policy of Great Britain are somewhat curious, perhaps, in reference to recent history, but candid and in the main sound, though not always very categorical or distinct. At least it would be difficult to gather from them what he thinks ought to be done, or what it is probable will be done, in any given conjuncture. He declares against intervention in the *internal affairs* of foreign countries;—it is true, he says, both England and France have thus interfered, the one in China and the other in Mexico, but in both these cases we

Digitized by Google

declared such intervention to be *exceptional* and temporary. He declares for the right always, and the duty sometimes, of intervention *between States*. He considers that great evils would arise "if, when a great Power attacks a small independent "State with a view to conquest, other Powers were as a rule to "remain quiescent. In that case we might be sure "that two consequences would follow,—first, that there "would soon remain none but Great Powers, and "secondly, that all those Great Powers would have a despotic "form of Government;—no other being endurable in the eyes "of mighty Sovereigns in command of numerous and for-"midable armies." "Against such dangers all free and "independent States," Lord Russell thinks, "are bound to "make provision, though not bound in all cases of unjust "invasion to resist the invader." He then quietly instances the recent cases of Poland and Denmark, when the cruelty, the robbery, the violation of treaties, the conquest of a small State by a mighty one, being all indisputable and indefensible, England might have interfered, yet did not.

Lord Russell must be a happy man. Through every page of the *resumé* on which we have been commenting there breathe those two characteristics which Sydney Smith years ago specified as distinctive of the noble Earl's temperament—singular complacency in success, and an utter unconsciousness of failure.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending March 25, 1865:—

	Total Amount received by the Commissioners.			Total Amount paid by the Commissioners.		
SAVINGS' BANKS:—	£	s	d	£	s	d
In money and interest credited	31,101	7	5	155,500	18	11
To transfer certificates from Post Office Savings' Banks to Savings' Banks	570	0	2	...		
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...			5,005	5	0
Total	31,671	7	7	160,506	3	11
POST OFFICE SAVINGS' BANKS:—						
In money and interest credited	86,431	0	3	...		
To transfer certificates from Savings' Banks to Post Office Savings' Banks	5,005	5	0	...		
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...			570	0	2

Total	44,157,846	16	9
Ditto—by last monthly account	44,195,814	18	9

THE PRESENT STATE OF CANADA.

[COMMUNICATED.]

NOTWITHSTANDING the numerous discussions we have had of late about Canada, there are few people who venture to ask themselves what advantage England derives from the possession of that colony, and fewer still who can answer the question otherwise than by vague appeals to sentiment. We know that we cannot at present get rid of the burden, if such it is, and we shrink from discussing a disagreeable subject; but it is best to look our difficulties fairly in the face, even at the risk of wounding the susceptibilities of the Canadians. The danger of a war with America has been very much magnified, and has been dwelt upon until the bugbear has assumed exaggerated and mischievous proportions; but there can be no doubt that, in a military point of view, Canada is a great source of weakness to us. The Americans have plenty to do at present without involving themselves in another war, and for years to come they will have little inclination unnecessarily to add to an enormous national debt; but the consciousness that our North American colonies are really at the mercy of a foreign Power, places us in an undignified position, and tends to embitter our feelings towards the people and Government of the United States. Canada is like the heel of Achilles; it is the one vulnerable point of the British Empire, and no fortifications, no schemes of political union for the colonies, can ever render it otherwise. We are going to spend 50,000*l* per annum on the fortifications of Quebec; but, in the event of a war, the Yankees will not be so imprudent as to knock their heads against its stone walls while they can overrun the whole country with impunity. It is generally assumed that military operations could not be carried on in winter, and that the impossibility of sending reinforcements direct to Quebec when the river is frozen, would really not place us at a disadvantage; but sportsmen who have bivouacked in the snow on moose-hunting expeditions know that every part of Canada would be accessible to corps of light infantry on snow shoes, and it is certain that a raid would be most destructive when the crops are stored in the barns, and the cattle collected in the farm-yards. The backwoods farmers rejoice in a good fall of snow which may enable them to transport their surplus produce to market upon sleighs more easily than they could upon wheels even in the most favourable season, and there is nothing to hinder the movements of artillery in the depth of winter, the guns, of course, being placed upon runners, and the wheels carried with them in case of a sudden thaw. It is a great mistake to suppose that the frontier to be defended does not extend beyond Lake Superior; it stretches from the Atlantic to the Pacific, a distance of 3,000 miles; and though the line traverses vast tracts of uninhabited country, there are, at irregular intervals, numerous posts of the Hudson's Bay Company, especially the Red River settlement, which would be exposed to the attacks of guerillas. Mr Chichester Fortescue holds up Belgium as an example of a "small "country surrounded by powerful neighbours, and carefully "prepared to play a gallant part in its own defence;" but he forgets that Canada is a large country, that its extent is its weakness, and that while Belgium has two inhabitants to the acre, Canada, reckoning only the country which is settled, or partially settled, has but one inhabitant to six acres.

Even if the population of the British North American provinces were without exception loyal, it would be impossible to prevent destructive incursions, but this is far from being the case; there are a great many Yankees, and Canadians with Yankee sympathies, located on the British side of the line, especially on the North shore of Lake Erie, and these, with their knowledge of the country, would be able to give invaluable assistance and information to the enemy. It has been said that the best way to defend Canada would be to bombard New York or Boston, but it is probable that with the aid of Monitors and Torpedoes our fleets might be kept at a respectful distance, and it is certain that we should submit to almost any terms before abandoning Canada to the ravages of the enemy, and avenging ourselves by the destruction of property principally intended for our own markets. In discussing the contingency of a war with the United States, it is useless to refer to former American wars. All the circumstances are changed, and it may be said that even the geography of the country is altered by such works as the bridge across the St Lawrence at Montreal. It cannot be too strongly insisted on that the Americans have no wish to pick a quarrel with England, but it is not the less clear that as long as we possess Canada, we must be dependent on their forbearance, and that though we may fritter away some thousands of pounds at Quebec, and may send a few additional troops to keep up appearances in Canada, our position as a North American Power must always be humiliating and embarrassing to ourselves, and annoying to the Americans, who would otherwise be our staunchest allies. The question, then, remains whether we derive any compensating advantage from the British possessions in North America. The principal arguments relied on by those who advocate colonisation are that our colonies afford an outlet for our surplus population and a field for the extension of our commerce. These arguments are unanswerable, as regards colonisation in general, but we think that these are particular colonies, and amongst them Canada, to which they do not apply. "Emigration," says a distinguished writer,* "has been the regular provision for one "child in six born in this part of the United Kingdom, but "in Ireland more nearly for one child in three," and we could not contemplate without alarm any interruption of that provision; but Canada has no monopoly of emigration, for out of 5,482,809 emigrants that left our shores in the 49 years from 1815 to 1863, 3,303,489 went to the United States and only 1,242,833 to British North America. In 1862, out of 121,214, 58,706 went to the United States, and 15,522 to British North America. In 1863, out of 223,758, 146,813 went to the United States, and 18,083 to British North America, or 61.61 per cent. to the former, and only 8.08 to the latter. Out of the 146,813 emigrants to the United States in 1863, 94,477 were Irish,

32,570 English, 3,481 Scotch, and 16,285 foreigners, or of uncertain nationality; while of 18,083 emigrants to British North America, 3,947 were Irish, 3,168 Scotch, 2,550 English and 8,418 foreigners, or of uncertain nationality,—the majority of emigrants from each division of the United Kingdom going to the United States. No doubt emigration has been somewhat stimulated by the American war, but the British Emigration Commissioners give it as their opinion that of the emigrants in 1863, "there were not "more than from 20,000 to 25,000 single men out of whom "the Federal army would have a chance of obtaining recruits, "and it is not to be assumed that even the majority of these "took service." The emigrants, who are presumably the best judges of their own affairs, prefer the United States to Canada, and of those who go to Canada it is not fair to conclude that any but an infinitesimal proportion are attracted by a preference for the political institutions of the colony, and consequently emigration would continue as before were Canada, Nova Scotia, and New Brunswick annexed to the States. Those who have enjoyed no political privileges at home are not likely to attach much importance to monarchical institutions elsewhere. "I prefer the country where I can "have three meat meals a day," replied the captain of a copper mine on Lake Superior, a native of Cornwall, when asked if he liked England or America best, and the primary motive which actuates our emigrants when they leave home is, in most cases, nothing nobler than a longing for greater material prosperity.

The cession of the North American provinces to the States could not fail to conduce to the security of all the parties concerned, and thus give a great stimulus to commerce, though it must be acknowledged that the tariff of the United States—a tariff imposed for war purposes—is much higher than that of Canada, and that the British North American colonies take a larger amount of British produce in proportion to the population than the United States; but this is a poor set-off against the enormous and increasing expenditure which we incur for the sake of these dependencies.

We cannot, perhaps, divorce the North American colonies without their consent, and we cannot hope for that consent as long as the present American war lasts, but the cry of annexation is again to be heard in Canada, and will become louder in proportion as the colonists are called upon to pay a larger share of their own expenses. It has been argued that we have no right to call on the North American colonies to defend themselves, because all their quarrels are the quarrels of the mother country, and originate with the Imperial Government; but it would be nearer the truth to say that but for the North American colonies, and the false position they place us in, there would not be the slightest chance of our being involved in a dispute with the United States. Even if it is assumed that we are under an obligation to defend the Canadians and New Brunswickers, we are not bound to assume the responsibility as regards all the offshoots they may make, and it would be well were the Imperial Government to discourage any extension of the existing settlements. It is true that such a policy would cause great dissatisfaction amongst the colonists, but this would but pave the way for an ultimate separation. With the exception of the French seigneurs the upper classes of the North American colonies consist exclusively of merchants and professional men, who from their intercourse with the States have no strong prejudice against republican institutions. There is no class answering to the squatocracy of Australia, and all the farmers may be styled small farmers. The country is unfit for pastoral purposes, and the high price of labour renders agriculture on a large scale unprofitable. The result is that British American colonists are thoroughly, though perhaps unconsciously, democratic in habits, and would easily reconcile themselves to the slight changes necessary to incorporate their provinces with the Union. Amongst the French Canadians there is more aristocratic feeling; but if England is eventually to part with her North American possessions, they need not go all at once. The process, however, once commenced the neighbouring colonies would soon follow suit. Of course there would be some preliminary difficulties, such as the apportionment of the public debt of the old and new States, but these matters of detail would easily be settled. It may be said that the prestige of Great Britian would be lowered by the surrender of any portion of her territories, but we have already given up the Ionian Isles and risen much in public esteem by so doing, and the time may possibly be far off when we may be able to part with Canada and gain, both materially and morally, by the transaction.

Agriculture.

SPECIFIC AGRICULTURAL EDUCATION.

CIRENCESTER COLLEGE.

Confessedly the progress of agriculture in England is obstructed by the comparatively low social status of the body of English farmers, and the absence of that intelligent mercantile activity by which English traders and manufacturers are distinguished. To correct this, a higher standard of education for farmers has long been demanded by the leading advocates of agricultural improvement. It is not by mere attempts to afford the sons of the smaller and less advanced farmers opportunities for obtaining better education than they have hitherto had, useful though such efforts will probably prove, that the elevation of the farming classes will be effected. It is rather by creating in those classes a body of really educated men, who applying their knowledge and their business efforts to the pursuits of husbandry, will demonstrate its capacity for improvement, and for affording an opening for men of intellectual as well as trading activity.

The Council of the Royal Agricultural Society, stimulated by some external pressure, have recently appointed a committee to consider how the Society can best "take measures for the improvement of the education of those who depend on the cultivation of the soil for their support," and we may hope for some useful results from the deliberations of that committee. But what above all things is required, is that there shall be men in England competent to apply to agriculture the higher branches of knowledge bearing on land and its uses.

Now the school for training such men exists in the Royal Agricultural College at Cirencester, and one of the useful results of the present attention to the subject of education will, we believe, be that more young men will avail themselves of the advantages the Agricultural College offers than have hitherto done so. Like most valuable institutions, the College has had to encounter storms and difficulties in its establishment, and its preservation at one time was due to the vigorous efforts of some of our most intelligent landowners, but now the storms have been weathered and the difficulties surmounted, an institution worthy of the age offers its aid to furnish the community with a body of educated agriculturists.

A paper in the recently published number of the "Royal Agricultural Society's Journal," by Mr C. Lawrence, a steady friend of the College, gives the history of the Agricultural College from its commencement in 1842. It originated in an address made by the late Mr Robert Jeffries Brown to the Cirencester and Fairford Farmers' Club in November, 1842, and at a subsequent meeting of the Club, presided over by Mr Edward Bowley, an address to the public for the means of establishing the College was agreed to. Earl Bathurst, the late Earl Ducie, Mr Edward Holland, Mr Pusey, Earl Spencer, Dr Buckland, Mr Sotheron Estcourt, Dr Lyon Playfair, and others, distinguished for their scientific and practical knowledge of agriculture, as well as several tenant-farmers, gave their active assistance. A subscription of £12,000 was raised in 1844, a charter was obtained incorporating the governors, proprietors, and donors of the "Agricultural College for teaching the science of agriculture and the various sciences connected therewith, and the practical application thereof to the cultivation of the soil, and the rearing and management of stock." Lord Bathurst had granted a farm of 400 acres on a long lease and also the site for the college with some pasture land for 99 years, and here a complete set of farm buildings and a college with its adjuncts were erected at a cost far exceeding the amount of the above subscription. The capital was therefore increased to £24,000, but of that sum only £20,320 could be then raised. An over sanguine view had led to a somewhat premature extension of the college buildings, originally intended to have been postponed until time should show what amount of accommodation was necessary.

The sum of £30 per annum at first charged for the board and instruction of each student was found to be insufficient, so that in 1848 the committee found a debt of £10,000 due to the bankers of the college. There seemed to be no alternative but to close the institution, when Mr Holland, feeling the importance of the College and entertaining strong hope of its ultimate success, offered to take upon himself the responsibility of the then existing debt. Eventually Mr Holland, the late Earl Ducie, the late Mr Langston, with Mr Sotheron Estcourt and Earl Bathurst, undertook all the liabilities, present and prospective, and the college was kept open. No less a sum than £30,000 was thus added to the original subscriptions and donations, so that the existing College has been established at a cost exceeding £50,000.

Nor do we consider that cost excessive when the advantages afforded are considered. There is accommodation for 85 students within the walls, a museum illustrative of veterinary surgery, geology, mineralogy, and botany,—a theatre for lectures, and

Digitized by Google

every needful appliance for such an establishment. The farm buildings too are very good, but until recently the farm was carried on too much upon the amateur system of making experiments, without reference to *profitable* results. Example farming ought to be profitable farming, and such we believe to be at present the object of the managers. Besides the lectures of the able resident professors, other lecturers are engaged to deliver courses on their specialties.

Mr Lawrence recommends that "any youth, resolving on agriculture as his occupation in life, to place himself with a tenant-farmer for a year to acquire what may be called the grammar of agriculture; with this preparation he would be in a position to derive greater advantage from a two-years' course of instruction at the College; after this, two years' residence with a skilful farmer, with careful daily observation, and study of the most approved agricultural literature, would form a reasonably safe foundation to work upon." As evidence of the value of the training received at the College, a passage from a lecture by Mr Russell, an examiner for the diploma of the Highland Society, is quoted, where he says, "I, along with some of my coadjutors (as such examiners), have been struck with the rare proficiency of some of our diploma holders who were educated at Cirencester." And Mr Baldwin, Professor of Agriculture at Glasnevin Institution, in Dublin, says, "A student, who is bent on acquiring a thorough knowledge of his profession, who is determined to use his best efforts to gain a good position among his brother farmers, who has an amount of ambition to excel, who, in short, is anxious to use such ability as the Almighty has endowed him with for his own advantage, could spend a couple of years at this College more profitably than at any place of which I have knowledge." And again he said, "Some of the students at the College struck me as possessing a better knowledge of the theory and practice of modern farming than any men of their age I ever met with."

All this is high, and we believe from our own observation, just praise.

Literature.

MEXICO ANCIENT AND MODERN. By M. MICHEL CHEVALIER. Translated under the Author's Superintendence by THOMAS ALPASS. John Maxwell and Co., 122 Fleet street.

M. CHEVALIER'S Mexico is in form a history but in fact a political pamphlet on a large scale, in which the past is only important in as far as it throws light upon present difficulties, and in which Mexico is made herself to furnish the justification of her conquerors.

It is not, however, as an apology for foreign interference in Mexican affairs,—skilfully as this is drawn out from a review of her distracted career of independence,—so much as because it places before us the motives,—or what we are to receive as such,—for the undertaking of a distant and unpopular war, in which defeat would be little less than ruinous, and success, to all appearance, unprofitable, that these volumes are valuable. Conquest for the sake of aggrandisement apart (and this motive has from the first been disclaimed by France as it is now again by M. Chevalier), we should seem to have more interest in the regeneration of a country of such possibilities as Mexico than she has. Our honour has been as much touched as hers by the behaviour of the Mexican Government, and "the redress of certain definite grievances for the interest of a small number of Frenchmen," though it might have served as a starting point for some preconceived scheme of operations, was no more fitted to justify a long and costly war of subjugation on her part than the injured interest of an equal number of Englishmen on ours. Love of glory and sensitiveness to national honour are perhaps more marked features in the French than in the English character; but it is notorious, and is readily admitted by M. Chevalier, that no national impulse urged on the Imperial arms to the conquest of Mexico. Finance has been deranged, soldiers sacrificed, popularity risked, for what? This question has often been debated. It is now once for all answered,—not, we think, without a breath of that inspiration which sometimes descends from Imperial heights on impartial and candid writers,—by M. Chevalier. Let us hear what he has to tell us.

"The expedition," he explains (vol II., page 179) has an avowed purpose: it claims to be the point of departure for the political regeneration of Mexico." Good is to be returned for evil. "Acts of spoliation have been committed on Frenchmen: outrages perpetrated by military chiefs have remained unpunished, if not rewarded as deeds of renown. Frenchmen have been assassinated without the murderers having been prosecuted even for form's sake, though they were known." "The Government of the Emperor might even consider itself insulted by the rude reply tendered in answer to its complaints." In return, France, "in lieu of thinking to weaken and dismember Mexico,—as did the United States in each of its wars,—has but one object,—to snatch those fine regions from imminent ruin, to pluck up civilisation from complete decay, and, with the free co-operation of the Mexicans themselves, to found there a flourishing State, that shall govern itself in complete independence." The rôle of an earthly providence is finely sketched out in these sentences; does nothing but pure benevolence lurk behind? M. Chevalier empathically proclaims the Government of France "has no design of aggrandisement or conquest in her interference with the internal affairs of Mexico." Two motives alone animate it.

One is a European universal interest; and that is to oppose a barrier to the imminent invasion of the entire total of the American continent by the United States. The other, arising out of French policy, is to guarantee and to save from irreparable ruin not only Mexico, but also the whole Spanish branch of Latin civilisation in the New World.

On the first point he justly concludes that we have a nearer interest than France; our colonies in the North would not be safe for long if the modern version of the Monroe doctrine were cordially accepted by a reunited Republic, or by either of the two powerful nations into which it might be divided. Still we do not see that the establishment of an effectual barrier to the fulfilment of the "manifest destiny" of the Republic on her Southern borders would render our own position more secure. M. Chevalier touches a more vital point (and one on which we will not believe that a passing current of public sympathy with Southern slaveholders casts any serious doubt) when he refers to the "ardour and religious zeal" of England in the repression of slavery. The annexation of Texas and the restoration of a previously abolished slavery was but the first step towards a wider project,—a project to which Mexico in her disordered condition could oppose no effectual resistance. "Black slavery would have been also re-established in other portions of Mexico immediately after they had been appropriated. *A fortiori*, this retrograde system would have been imposed on the States of Central America. At a little later period it would have been seen what it was convenient to do with South America. Provisionally, they were willing to leave it in peace."....."It is now a fundamental rule of English politics to oppose the enlargement of the domain of slavery. English opinion is very firm in that point. What can the English Cabinet have to fear in following the current of that opinion?" The Government of Washington too, M. Chevalier conceived, when he wrote the words quoted above, would be equally well pleased at the establishment of a firm boundary wall to Southern aggrandisement. France, in thus interposing to prevent the future absorption of Mexico, must be working in harmony with the wishes both of England and of the North. On the latter point M. Chevalier himself records his mistake. The Northern States are not friendly to the new *regime* in Mexico. On the former point, a Slave Empire extending over all Central America and reaching, as it would soon do, over the islands also, has been looked upon with less displeasure here than the attempts of the Central Government to maintain its authority, and to restore the union of free states in a free republic. The fact may be hard to account for, but so it is, and France must not look for much sympathy with her Mexican policy on this head from either country.

The second motive for intervention in the internal affairs of Mexico has about it the ring of a true Idée Napolienne, and one which doubtless has been long elaborated in the mind, at once dreamy and tenacious, of its author. France is the head of the Latin races, the exponent of Latin civilisation, the champion of the Catholic faith,—all three are "threatened with submergence under a sea that is ever rising." The Saxon races multiply rapidly, and spread their colonies over the face of the earth. "Two hundred years ago, Russia was a barbarous country not taken into calculations on the political balance of the world. Now it is an empire peopled by seventy-four millions of inhabitants, among whom the spirit of civilisation circulates and diffuses its benefits..... There is not a country in Europe where the population increases more rapidly; and the other elements of the prosperity of States progress there at an accelerated pace."

The Turkish Empire is on the point of falling to pieces. It disappoints the efforts of diplomacy which is anxious to perpetuate it. It is like a lamp in which there is no more oil; the Ottoman population is dying out. Several Christian States will replace the empire of the Crescent; but Catholics are but in a minority in those countries; the Christian States that will be there constituted are devoted beforehand to the Greek religion.

On the other hand, Spain has sunk into the rank of a third-rate power; Italy is yet in her infancy—an infancy watched over by France "from a policy full of greatness and from a lofty foresight." The Latin nations have lost ground in Europe within the last two hundred years, and have not been able to counter balance that loss by any increase in their colonial offshoots. "This comparative exhibit," writes M. Chevalier at the close of his summing up, "of the progress of Catholic States and those of the Christian peoples that profess other tenets, is of a nature to inspire gloomy reflections in those statesmen who, not without reason, consider that the destinies of France, and the greatness of her authority, are dependent on the chances of the future of the Catholic States in general and of the Latin races in particular. It is the most powerful argument that can possibly be put forward in support of the expedition to Mexico."

Such is the main outline of M. Chevalier's defence of one of the least intelligible parts of his Imperial master's recent policy. There is no need here to enter upon the consideration of the reasons he gives for his belief in a prosperous issue to the undertaking. Events speak for themselves; and the rule of the Emperor Maximilian seems in a fair way to be established over the turbulent population of Mexico; but a few words may be said as to the

Digitized by Google

selection of a German to preside over the destinies of a nation whose mission is to restore, as far as can be, the lost equilibrium between the Latin and Saxon races. This inconsistency would seem to have arisen more from necessity than choice. A monarchical form of government having been selected as the best suited for the necessities of the case, and the most in conformity with the genius of the people,—on this point M. Chevalier is positive, supporting his view with arguments drawn from the history he has been tracing out which are, we think, unanswerable;—where was a ruler to be found? The hatred engendered in the minds of Mexicans by the war of independence, made the choice of a Spanish Prince impossible; the appointment of a Frenchman would be looked upon with suspicion by other nations, already not too much disposed to give Napoleon credit for disinterested solicitude as to the welfare of the Mexican people in particular, or the Latin races in general. Before the establishment of a Republic, supposing the offer of the independent throne of Mexico were refused by Spain, it was to have been offered to an Austrian Prince. In choosing Maximilian, therefore, the Emperor was only fulfilling a long past aspiration of the people, realising their own best ideal while providing for their enduring welfare. It is in this light that M. Chevalier sees Napoleon's policy in Mexico, and it would be impossible to find for it anywhere a more lucid or more able exponent. His concluding chapter on "How France may encounter the Roman question anew in Mexico if she attempts to regenerate that country," if it may be considered at all as representing Imperial sentiments and taken in connection with the new phase that question has assumed in Europe, is full of significance.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 13th inst. The return for the previous week is added:—

DEBTOR.

	April 13, 1865. f	c		April 6, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,042,904	27	.....	7,042,671	62
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	806,557,975	0	.....	786,434,775	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	6,236,498	76	.....	6,951,784	46
Treasury account	94,550,231	57	.....	94,986,311	78
Accounts current at Paris	106,107,185	29	.....	138,726,379	38
Ditto in the provinces	24,727,502	0	.....	28,302,521	0
Dividends payable	1,034,967	75	.....	1,291,402	75
Various discounts	9,017,213	23	.....	8,622,006	18
Re-discounts	2,789,444	5	.....	2,789,444	5
Sundries	12,445,370	36	.....	15,345,800	15

Government stock reserve	12,980,750	14	.....	12,980,750	14
Ditto other securities	36,557,487	91	.....	36,555,787	91
Securities held	100,000,000	0	.....	100,000,000	0
Hotel and property of the bank and branches	8,471,320	0	.....	8,471,280	0
Expenses of management	1,045,572	21	.....	1,031,897	86
Sundries	6,276,885	6	.....	6,876,149	98
	1,279,175,042	42	.....	1,299,098,846	51

The return of the Bank of France is the most satisfactory that has appeared for some time past, as it shows a decline of 22,169,000f in the stock of coin and bullion, an increase of 2,402,000f in the discount, and an increase of 20,123,000f in the circulation of notes, from which it follows that trade has at last become more active. In the private deposits there is a decline of 36,194,000f.

The principal event in the operations of the Bourse has been a marked augmentation in the Comptoir d'Escompte and the Mexican loan. The fluctuations in other securities have not been important. Great satisfaction has been manifested to-day at news from Turin that the Italian Chamber of Deputies has at length passed the bill for the sale of the railways. The following are the week's quotations:—

	April 6. f	c		April 13 f	c
Four-and-a-Half	95	40	.....	96	0

The affair of the Mexican loan has been brought to a more prompt conclusion than was expected when I last wrote. The Mexican financial commission in this city, represented by Count de Germiny, its president, signed the day before yesterday a contract by which the issue of a new loan of 250,000,000f (10,000,000*l*) is confided to the Comptoir d'Escompte, represented by M. Pinard, the managing director, an eminent capitalist. Grouped with the Comptoir are the General Credit Company of London, and some other houses of the same city, amongst them, it is said, that of Mr Finlay Hodson and the others concerned with it in the Bank of Mexico; also, the Societe Generale of Paris, and a long string of bankers—Messrs Hottinguer and Co., Messrs Fould and Co., Messrs Blount and Co., Messrs Marcuard, Andre, and Co., Messrs Stern and Co., Messrs Hentsch and Co., Baron Selliere, M. Cahen of Antwerp, the Association of Bankers of Frankfort, &c. The loan is to be issued at Paris by the Comptoir d'Escompte in 500,000 bonds of 340f (13*l* 12s), but of the nominal value of 500f (20*l*), to be paid off at that value by half-yearly drawings in fifty years, and to bear 6 per cent. interest. The rate of interest and the difference between the sum subscribed and that on which the interest is to be paid, will make the revenue of the investment about 10 per cent. In addition to that, a lottery is to be attached to each half-yearly drawing, as with the loans of the City of Paris and the Credit Foncier; and bondholders will have the chance of gaining 1,500,000f (60,000*l*) each half-year, in a prize of 500,000f (20,000*l*), two prizes of 100,000f, four of 50,000f, and sixty of 10,000f. As these prizes at the end of fifty years will make 150,000,000f (6,000,000*l*), they will amount to the whole sum effectively paid, less 20,000,000f (800,000*l*). If the matter stopped here, it would be seen that the new loan promises advantages scarcely, if ever, before offered to the lending public. But a most extraordinary stipulation remains to be recorded: it is that the Mexican Government shall, out of the proceeds of the loan, make over to the Caisse des Depots et Consignations of France, a sum sufficient to produce at compound interest at the end of fifty years, a capital equal to the total nominal amount of the loan,—the said sum to be invested in French rente: and that capital to be divided among the bondholders. Thus subscribers to the loan will for the sum of 13*l* 12s once paid, receive in fifty years two sums of 20*l* each, and until reimbursed the first 20*l*, will get 10 per cent. on 20*l*, and will have the chance of winning every six months with each bond 20,000*l*, or 4,000*l*, or 2,000*l*, or 400*l*. These conditions are so singular that they will, I fear, hardly appear serious to many of your readers; but they have really been adopted, and they will be formally announced to the public in a very few days. They have, I understand, been concocted by the *fortes tetes* of the Ministry of Finance. The manner in which they will be appreciated by the financial world of Europe, and especial England, excites much curiosity. Here in France

Digitized by Google

the first impression appears to be that the securing of the capital by means of an investment at compound interest is a new and valuable idea, capable of application not only to loans, but to other enterprises.

The reasons for issuing the loan more quickly than originally intended are, it appears, that the moment is particularly favourable, owing to the abundance of money, and that it is desirable to precede the Italian loan and the projected conversion of Turkish stock. Nearly the whole of it has been subscribed for already by the bankers concerned, so that the opening of the public subscription which, is expected to take place on the 24th or 25th, will be little more than a *pro forma* affair. The Frankfort part of the subscription alone exceeds 70,000 bonds.

That the Comptoir d'Escompte should have obtained the contract has caused some soreness among certain bankers and companies who have hitherto looked on foreign loans as their own exclusive domain. In taking it so shortly after that of Tunis, it would appear that the Comptoir intends henceforth to make lending to foreign States an integral and important part of its business. It may be remembered that the Comptoir was anxious to get the Mexican loan of last year, but was put aside by the Credit Mobilier. Under the auspices of the Mobilier, the loan only obtained very indifferent success. If this new affair should be taken permanently into public favour, as I hear the promoters confidently anticipate, the *prestige* of the Comptoir will be greatly exalted, and that of the Mobilier will be to some extent lowered.

It was reported a few days back that the 1864 loan would, on conditions favourable to the holders, be amalgamated with the new one; but I have not learned that any such measure is contemplated.

In the Corps Legislatif there has been a brilliant discussion on Mexico. In answer to members of the Opposition who presented a somewhat discouraging picture of the military and political situation of the country, and of the dangers that appear to await the new Empire from the United States, M. Rouher, Minister of State, in a speech of remarkable power, maintained that the prospect of affairs is, on the whole, as satisfactory as could be expected, and that there is no likelihood of an intervention of the United States. He concluded by the important declaration that France will not abandon the monarchy she has founded. M. Corta, who was sent by the Minister of Finance on a mission to Mexico, gave some details of great interest respecting the financial situation and prospects of the country. He said that the budget of Mexico, which under Spanish domination was equal to 4,000,000*l* sterling, was under the Republic at least the triple, taking into account the sums levied by the governors of states, and the exactions and forced levies of the military chiefs. Yet the budget proposed under the Emperor Maximilian, is only 6,000,000*l*, and is, in proportion to the increased population and resources, much lighter than was that of the Spaniards. He calculated that the Customs might under proper management easily be made to yield 4,000,000*l*, and he based that figure on the facts that the Customs revenue of Vera Cruz had increased rapidly, that in the course of a single month Juarez had got as much as 700,000 piastres from the Custom-house of Matamoras, and that the average importation for each inhabitant is yet only about 12 shillings, whereas in Chili it is nearly 2*l* 12s. From the land tax properly organised, he thought that 2,000,000*l* sterling a year might be hoped. A tax on tobacco, which under the Spaniards produced 1,800,000*l*, but is now abolished, might be made to yield a considerable sum, the custom of the country being for women as well as men to smoke. From the mines an important revenue is also to be expected, the exportation of the precious metals being already 4,000,000*l* to 4,800,000*l* a year, and the tax thereon 20 per cent. The honourable gentleman afterwards gave details respecting the foreign debt, and in the course of them stated that Mexico has paid 1,000,000*l* of what she owes France, and that the interest of all the debt is provided for in the budget of 6,000,000*l*. As to the Interior debt, it is nominally of large amount, say 40,000,000*l*; but a quantity of the bonds representing it are forged, and others were put fraudulently into circulation after being paid it can, therefore, be largely reduced. It has been negotiated for some time past at from 2 to 3 per cent. of its nominal value; and though under the new Government it has increased in value, it can be bought up for, suppose, 10 per cent, constituting an annual charge of 200,000*l*.

The Government has this week given the final *coup* to the Bank of Savoy, which at one time seemed determined to be the instrument for making a great financial reduction. An imperial decree, countersigned by His Excellency M. Fould, declares that "the resolution of the general meeting of shareholders of the Bank of Savoy on the 31st July, 1864, authorising the cession of the privilege of issue to the Bank of France is approved of; and, in consequence, the privilege of issuing notes payable at sight and to bearer which the Bank of Savoy enjoyed is, and remains, suppressed." Two other decrees authorise the Bank of France to establish branches at Annecy and Chambery in Savoy. The sum which the Bank of France is to pay for the privilege of the Savoy Bank is, it is known, 4,000,000f.

M. Rouher, Minister of State, in a recent sitting of the Corps Legislstif, said that the Government has now under consideration a demand made by the city of Paris for authorisation to raise a new loan, and that it will probably be accorded. The amount his Excellency did not mention, but it will be, the belief is, 300,000,000f. As the finances of Paris are one of the many curious things of the Imperial *regime*, and as they puzzle foreigners exceedingly, it may be well to mention that M. Leon Say has just issued *chez* Guillaumin and Co, a pamphlet entitled "Observations sur le Systeme Financiere de Monsieur Le Prefet de la Seine," in which they are criticised with some severity, and which in certain peculiar features in them are placed in relief. The basis of the financial system of Paris is, to create in some way or other a surplus revenue, and then to borrow all the capital of which that surplus is capable of paying the interest. M. Say, for various reasons, holds this system to be unsound and his opinion will no doubt be indorsed by most economists. Among the peculiarities of Parisian finances, he mentions the Caisse des Travaux Publics, the motion of which is, by some ingenious mechanism, to provide for "the anticipated liquidation of works, and the anticipated expenditure of revenue." M. Say also mentions the creation of a curious instrument bearing the acceptance, or what is equivalent thereto of the prefect, which is discounted by bankers to raise money for works, but is not payable for six years. He likewise states among other noteworthy facts, that whereas in 1840 the City owed only 40,000,000f, its funded and floating debt amounts to 360,000,000f. M. Say's pamphlet is a reprint of articles which appeared in one of the leading newspapers, and which excited great sensation at the time, owing to his authority as an economist, and to his having for some years made the municipal finances a subject of special study.

The Chamber of Commerce of Marseilles has prepared the reply it intends to give to the questions of the Superior Council of Commerce in the inquiry on banks, currency, commercial crises, &c. The Chamber, it appears, pronounces strongly against plurality of banks of issue, and it appears that commerce finds greater facilities and advantages in one such bank than in several. It declares also that the Bank of France does all that can be expected for a national establishment; that it discounts largely all good bills, and that it takes all proper measures for creating confidence in its notes. In a pamphlet published by Messrs Guillaumin, are the answers which the Chamber of Commerce of Caen proposes to present to the forty-two questions of the Superior Council. They have been drawn up at the request of that Chamber by M. Jules Le Cesne, an economic writer of repute:—and are followed by considerations on the employment of the capital of a bank, on the conservation of its metallic reserve, on deposits, cheques, clearing houses, &c. M. Le Cesne is on the whole favourable to the system represented by the Bank of France, and he is a strong partisan of the English practice of defending the till by raising the rate of discount. The title of his publication is unreasonably long: "Etude Preparatoire à l'Enquête sur les principes et les Faits Generaux qui regissent la Circulation Monetaire et Fiduciaire."

The annual meeting of the Credit Foncier is to be held on the 29th of the month. That of the Credit Agricole is fixed for the 27th. This company intends to propose that 12f per share shall be paid for 1864, in addition to the 5f already distributed.

The market report is as follows:—

FLOUR.—At *Paris*, calm prevails. Yesterday, the quotations were 43f to 47f 50c the sack of 150 kilogs; six marks, current month, 47f 50c; May, 47f 75c; June, 48f 75c. July and August, 50f 25c; Type Paris, the 101 kilogs, current month, 29f; four months of May, 30f.

WHEAT.—At *Paris*, yesterday, offers were not numerous. Choice white, 27f the sack of 120 kilogs; choice red, 26f to 26f 50c; first quality, 25f to 25f 50c; current sorts, 24f to 24f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 4,128 bales, and the arrivals 1,703. The stock was estimated at 65,985. The closing quotations were 5f lower for United States, Egypt, Coconada, and China; 10f lower for Brazil; other sorts unchanged. Low New Orleans was consequently 200f the 50 kilogs; good ordinary qualities in Broach, 120f; Tinnevelly, 110f; Madras, 125f; China, 115f; Jumel, 180f. This week, the demand has not been very active. Yesterday, different sorts of Surat varied from 75f to 137f 50c; Tinnevelly, 105f to 110f: Madras, 97f 50c to 117f 50c; Kurrachee, 70f; Japan, 110f; China, 105f.

COFFEE.—At *Havre*, in the week ending Friday, 1,040 sacks Hayti, disposable, 82f the 50 kilogs in bond; 1,000 Cape, 85f; 50 St Marc, 90f; 1,600 Jacmel for delivery, 79f, Hamburg conditions; 680 Bahia, 75f to 76f in bond; a small lot of Guadaloupe habitant for delivery, 141f duty paid. By auction some damaged was sold, also some Rio washed, sound but not of good quality, 86f. The arrivals exceeded 14,000 sacks. This week, Rio, for delivery, 75f to 76f and 78f in bond; Hayti, 82f; Cuzengo, 84f; Gonaives, 87f and 87f 50c; Cape, 84f; Jacmel, 80f; Port au Prince, 81f. At *Nantes*, last week, about 700 sacks Hayti, 81f; some Guadaloupe bonifieur, 160f. This week, Port au Prince, 82f. At *Bordeaux*, last week, 548 sacks La Guayra, grage and nongrage, 97f 50c to 105f; 359 ditto, 18f to 105f; and for delivery at various prices; some Guadaloupe bonfieur, 157f 50c and 161f; 359 sacks Mysore disposable, 118f; 800 Malabar, 118f. This week, La Guayra, 108f 50c. At *Marseilles*, last week, nothing done, and no sales this week.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 512 casks French West India, disposable, 48f 50c to 48f bonne quatrieme the 50 kilogs. duty paid; 163 ditto, for delivery, 48f; 2,325 bales Reunion, 51f 50c bonne quatrieme; 500 cacks Havana, 30f 50c, No. 12 in bond; some Manilla, 30f ditto; 250 casks Java, 29f 50c ditto. The arrivals were 800 casks and 600 sacks. This week, French West

Digitized by Google

India, 48f bonne quatrieme; Havana, 30f 25c to 30f 50c, No. 12. At *Nantes*, last week, 20,666 sacks Reunion, 52f bonne quatrieme; 14,811 Mauritius, for delivery, 52f 50c ditto; and a small lot of Martinique, 50f on sample, equal to 49f the type; 100 sacks Reunion, indifferent quality, 41f. This week, Reunion, low, 44f. At *Bordeaux*, last week, some small quantities of French West India, at 48f and 47f 75c bonne quatrieme; 3,103 sacks Reunion, and 2,200 casks Havana, at prices not stated. No sales this week. At *Marseilles*, last week, 2,000 casks Brazil by Danish port, 28f 50c, No. 10; 1,000 casks Havana, by Spanish ship, 30f 25c, No. 12; 600 French West India for delivery, 31f 25c, bonne quatrieme of Havre; and 700, 31f ditto. Nothing don this week.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 15 chests Bengal, part at 75c above the estimates, part at prices kept secret; 4 Manilla, 4f 50c the half-kilog, and 2 serons Guatemala at prices not stated. The arrivals were 25 serons and 15 chests. This week, some Bengal at prices not stated. At *Bordeaux*, last week, no sales. This week, some Kurpah, quotations not given.

HIDES.—Business at *Havre*, in the week ending Friday, was not very animated: 398 Monte Video dry, 110f the 50 kilogs; 4,710 secondary or light, 70f to 85f; 250 Rio Grande dry, 87f 50c; 200 ditto, salted ox, 52f; 350 Pernambuco salted, 47f; 470 Lima drysalted, 55f; 300 New York salted ox, 43f. At a pubic auction of sound and damaged, Arica salted ox went at 46f to 46f 25c; cow, 43f 75c; Valparaiso salted ox and cow, 74f to 74f 50c; 300 horse La Plata dry, 5f 75c to 6f 25f. The arrivals exceeded 16,500. This week, Valparaiso drysalted, 77f 50c; cow, 68f; Buenos Ayres dry light, 71f 50c; salted, 53f; Pernambuco drysalted, inferior, 63f; Monte Video dry, 74f and 75f Rio Grande dry, 87f 50c; ditto, salted horse, 63f.

WOOL.—The demand was active at *Havre* in the week ending Friday. 213 bales La Plata unwashed, 1f 5c to 2f 40c the kilog; 10 bales washed also at 2f 40c; 107 bales La Plata sheepskin, unwashed, 95c to 1f 72½c, and 38 ditto, washed, 3f 10c. By auction, 74 bales damaged Buenos Ayres, unwashed, 1f 47½c to 2f 15c. The arrivals were 1,523 bales. This week, Buenos Ayres, unwashed, 1f 15c to 2f 60c, and per 100 kilogs, 205f to 235f; by auction, 192f 53c to 212f 50c. Chili, unwashed black, 1f 5c, and per 100 kilogs, 105f.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 52f 50c the hectolitre. At *Bordeaux*, the day bay before yesterday, 3-6 beetroot, first quality, 90 deg., 64f; 3-6 Languedoc, 86 deg., 73f 50c.

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Lisbon announce that the entry of foreign cereals into Portugal has been authorised at a duty of 600 reis per quintal.

The shipments of gold from Melbourne from Jan. 1 to Feb. 22 amounted to 184,561 ounces.

Annexed is Messrs Sharp and Co.'s statement of bullion movements at Hong Kong for the fortnight ending March 1:—Gold—The receipts have amounted only to about $280,000: the exported amount, inclusive of the Orissa on the 15th, and exclusive of the Behar to-morrow, is $780,000. The market has been very steady all the time, and the value is almost unchanged. Silver—We have received but $70,000, and including an amount sent forward per last mail, the total export is $160,000. There is none on hand. Dollar Currency—The receipts, principally from the coast, are $290,000, the last mail from Europe bringing almost nothing. The amounts despatched are $620,000 in all, the larger portion of which has gone down to Singapore. But very few transactions have taken place in clean coin. Exchange and Bullion—Closing Quotations—On London, 6 months' sight, 4s 6¾d; on ditto, 60 days' sight, 4s 5½d; on Calcutta, 3 days' sight, 215½ rs: on ditto, 15 days' sight, 216½ rs; on Bombay, 3 days' sight, 216 rs; on Shanghai, 15 days' sight, 72¼ tls; on ditto, 30 days' sight, 72½ tls. Bar silver, 17 dwts *B*., 10½ per cent. prem.; Sycee, 9 per cent. prem.; Mexicans, ¼ per cent. prem.; gold leaf, $23 per tael; gold bar, $22.95 per tael, equivalent 100 touch; sovereigns, Sydney, $4.50 each; English ditto. $4.60 each; discount, 6 per cent.; Hong Hong and Shanghai Banking Company shares, 26 per cent. prem.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,750,643	Securities	31,226,403
Public Deposits	5,826,354	Coin and Bullion	14,937,379
Private Deposits	15,414,509		
	42,991,506		46,163,782

Dated the 13th April 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,172,276*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£398,140
A DECREASE of Public Deposits of	5,505,261
An INCREASE of Other Deposits of	1,242,156
A DECREASE of Government Securities of	126,397
A DECREASE of Other Securities of	1,370,469
A DECREASE of Bullion of	318,053
An INCREASE of Rest of	50,045
A DECREASE of Reserve of	694,029

The alterations in the Bank return of this week are mainly consequent upon the payment of the dividends, which commenced on the 8th inst. The decrease in the public deposits has led to the increase noted in the private deposits, and to the decrease in private securities. On balance there is a decline of 318,053*l* in the amount of coin and bullion held by the Bank, and a decrease of 694,029*l* in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

Digitized by Google

a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

In the corresponding week of 1855, the publication of an elaborate article on the Russian war in the *Moniteur* had created great sensation in Paris. The attitude of Prussia continued to cause uneasiness. The protracted negotiations at Vienna were ceasing to attract notice in any important degree. The Chancellor of the Exchequer had announced that a loan would be required by the English Government.

In 1862, the money market was easy and capital abundant, but the payments on account of foreign loans, and rumours of further issues, had somewhat depressed the funds.

In 1863, the rate of discount was only 3¾ per cent. Speculation in foreign stocks continued very active, especially in Greek bonds. The Confederate loan, after falling to a discount, had rallied to 1½ premium.

In 1864, the bombardment of Sonderborg had been commenced by the Prussians. An assault made on the entrenchments of Düppel had been repulsed by the Danes. The Archduke Maximilian had received the Mexican deputation at Vienna. Several indecisive engagements had taken place between the Russians and Poles, in the palatinate of Sandomir. The French budget, after the modifications of the Committee of the Corps Legislatif, had shown an increase in the revenue of 1½ million of francs. In America, General Grant had arrived at the head-quarters of the army of the Potomac. General Forrest had burned and sacked Paducah and Union City, Kentucky. A new Venezuela loan had been announced by the General Credit Company of a nominal capital of 1,500,000*l*, secured on the export duties of the Republic. The demand for money continued active.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 967,728*l*; in 1862, a deficiency of 2,307,873*l*; in 1863, a deficiency of 3,734,841*l*; and in 1864, a deficiency of 680,009*l*. In 1865, the deficiency is 4,730,453*l*.

Discount and Money Market.—With the increasing abundance of money, there is a sensible slackening in the current terms for discount. For the past two or three days the demand has been moderately active, but chiefly in connection with the maturing of a certain number of Indian bills and preparations for the Easter holidays, which, occurring immediately after the Stock Exchange settlement of the 13th inst., have combined to cause additional inquiry. There has been, nevertheless, no corresponding increase in the requisitions of discounters, who, on the contrary, seem disposed to take all the paper of good quality that is offered. The general impression is that the Bank rate will again shortly be reduced. There was at one period some slight demand for gold for export, but it has not attained any degree of development; and, as there is no further decline in the foreign exchanges, it has probably ceased. On the other hand, an opinion is expressed in some quarters, though probably without ground, that a return of silver may be looked for from India, on account of the alteration in the value of cotton that has lately taken place.

Abroad, the money markets are mostly as well supplied as is that of London, and the tendency of rates appears to be downwards.

30 to 60 days	3¾ per cent.
3 months	3½ per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	5 per cent.

In the Stock Exchange, money has been inquired for in connection with the foreign settlement, but on Government securities there was a plentiful supply at 3 per cent. for short periods.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

The following are the rates of discount in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3¼ ½
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4⅝ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2
St Petersburg	6	5¾

Bullion.—There are no operations reported at the Bank.

On the opening of the tenders for 100,000*l* British Columbia 6 per cent. debentures, at the offices of the Crown agents for the colonies, the reserve price declared was par. As a portion only of the whole amount had been taken between that price and 103, applications for the remainder are invited until Thursday next.

It is stated that negotiations have been completed for the issue of a new Mexican loan in Paris. The bonds are to be in amounts of 500f (equal to 20*l*), issued at a discount, and to be redeemed by drawings to which a certain number of prizes are to be attached.

The return of the Bank of France gives the following results as compared with that published last week :—

	£
Increase.	
Bank notes	805,000
Commercial bills	96,000
Decrease.	
Cash in hand	886,640
Advances	18,000
Treasury balance	20,000
Current accounts	1,448,000

English Government Stocks.—There has been little further movement in the market during the week. An advance to 91½ in Consols was noted but hardly maintained, as some speculators took advantage of the price to realise before the Easter holidays, which are almost always attended by dull markets. The tone has, however, remained good; and, although a temporary decline to 91⅛ occurred, the market closed firm at 91¼ to 91⅜. At the present time the amount of money in the open market is still increasing; and as there is comparatively little paper afloat, and as bankers rarely employ their surplus funds in the purchase of foreign or other than English Government securities, it is presumed that large investments in the 3 per Cents must be made. Lately, considerable sums have been taken for insurances offices who have rarely had the opportunity of obtaining stocks at such favourable quotations, and with the purchases to be shortly made for the consolidated fund a further rise, notwithstanding the changes of investment that continue on the part of the public, is to be expected. Consols closed at 91⅛ to 91¼ for money, and 91¼ to 91⅜ for the May account. New 3 per Cents. and Reduced, 89⅜ to 89½. India 5 per Cents, 107 to 107½.

Exchequer bills are little altered, but India bonds are rather higher. The prices quoted are 3s to 6s, and 14s to 18s prem. respectively.

Foreign Stocks.—The settlement of the foreign account has interfered to some extent with the transaction of business, and there are few alterations in price. The principal feature was the inquiry for Turkish Consolidés, caused by news that the drawing had taken place on the 10th. A backwardation which reached ½ per cent. was in some instances paid by "bears" of the stock. The Confederate loan improved slightly at the close of the day, on news that General Grant had been repulsed by the Confederate forces under General Lee, and that Sherman was overmatched by General Johnston. The following are the closing prices of stocks dealt in to-day :—4½ per Cent. Brazil, 83 to 85; ditto, 1863, 81 to 83 ex div. 7 per Cent. Danubian loan, 85½ to 86½. 7 per Cent. Egyptian, 96½ to 97½; ditto, 1864, 94½ to 95½ ex div. 5 per Cent. Greek, 20¾ to 21¼; ditto coupons, 8½ to 9½. Italian scrip, 3½ to 3¼ dis. 3 per Cent. Mexican, 27⅜ to 27⅝; ditto, 1864, 26⅜ to 26⅝. 3 per Cent. Portuguese, 48 to 48½. 5 per Cent. Russian, 1822, 89 to 90; 5 per Cent. ditto, 1862,

Digitized by Google

91½ to 92½. 3 per Cent. Spanish, 48¼ to 48¾; ditto Passive, 32 to 32¼; ditto Certificates, 17 to 17¼. 6 per Cent. Turkish, 1854, 90½ to 91½ ex div.; ditto, 1858, 72½ to 73; ditto, 1862, 74½ to 75. 6 per Cent. Venezuela, 1864, 38½ to 39½ ex div. 5 per Cent. Italian, 65 to 65¼.

The closing price of French 3 per Cent. rentes, telegraphed this evening from Paris, is 67.65 money, and 67.90 for the account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and Thursday:—

RAILWAYS AND OTHER SHARES.—There is only a moderate amount of business to report in the railway stock markets, but there is a strong upward tendency in prices. As last week, the London, Chatham, and Dover stocks and extensions are in demand with a further advance in prices. The traffic returns, notwithstanding the partial continuance of strikes in the manufacturing districts, are good; and, as there is a steady improvement in the demand for goods, every reason leads to the expectation of a gradual and sound development of our trade, by which the traffic returns of the different railways must largely benefit. There has been for a long time back a growing disposition to invest in English railway stocks; and with the expected increase in our trade it is likely that a further advance in their value will take place. Great Eastern and Great Northern stocks are higher; Lancashire and Yorkshire, London and North Western, Midland, and Metropolitan stocks are all quoted at improved prices, as compared with last week.

Indian guaranteed securities continue firm.

Colonial stocks are good with steady markets. United States 5.20 bonds have risen to 60¼ to 63¾.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and Thursday:—

FOREIGN EXCHANGES.—The decline noticed last week has been arrested and a trifling inprovement was in some instances effected.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—A little more demand has arisen for gold for export, sufficient to absorb the arrivals mentioned below, with the exception of about 8,000*l*, which has been sent into the Bank. A sum of 39,000*l* was withdrawn from that establishment at the close of last week, but the operation was an exceptional one. The Anglesea has brought 34,000*l* from Melbourne; the Great Victoria has brought 58,000*l* from Melbourne; the City of London 8,000*l* from New York; and about 43,000*l* from Alexandria, in sovereigns, came to hand here yesterday. The Parana has taken out 11,200*l* to Brazil, and the Ripon 2,400*l* to Bombay. The following vessels are now on the way from Australia to England:—The Scottish Chief with 19,000*l*; the Asiatic with 35,000*l*; the Mediator with 8,000*l*; the Yorkshire with 33,500*l*; the Wave of Life with 12,800*l*; the Queen of the Colonies with 12,200*l*; the London (s.s.), with 122,500*l*; and the Red Rover with 12,000*l*; making a total of 255,000*l*.

Silver.—Our market remains without any improvement in price, and such small amounts of bars as have come to hand have been sold for Holland at 60⅝d per oz. standard. There is not the least demand for India, and the steamer sailing this day from Southampton to Bombay, does not take any silver whatever for that port. The Parana has taken 8,700*l* to the Brazils.

Mexican dollars remain without change; the market is very quiet, and the price may be quoted as about 4s 11½d per oz nearest.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 10¾d to 1s 11¼d, and for commercial paper 1s 10d to 1s 11d per rupee.

India Government loan notes are without change, and may be quoted 108 to 110 for 5½ per Cents., 100 to 102 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 75s 6d to 76s per oz,; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d per oz, last price. Silver—Bar silver, 5s 0⅝d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d per oz std, last price; Mexican dollars, 4s 11½d per oz, nearest; 5-franc pieces, 4s 11¼d to 4s 11½d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, is 300,000*l*.

The Great Indian Peninsula Railway Company have given notice that they are prepared to borrow money upon debentures for seven years, bearing 4½ per cent interest. Both interest and principal are guaranteed by the Secretary of State for India.

FAILURES AND MERCANTILE EMBARRASSMENTS. — Messrs Charles Joyce and Co, general merchants, stopped payment on Saturday last. The total liabilities are estimated at about 1,100,000*l*.

A meeting of the creditors of Mr G. W. Bremner (trading under the name of Bremner and Co.), merchant and shipowner, of Great St Helen's, who failed on the 28th ult., took place on Wednesday. The liabilities were estimated at 48,917*l*, and the assets at 52,183*l*. It was decided to wind up the estate under inspection.

Formal notice has been given that a petition for the winding-up of the London, Hamburg, and Continental Exchange Bank (Limited), is to be heard before the Master of the Rolls on the 22nd inst.

PUBLIC COMPANIES.—At the meeting of the Discount Corporation, held on Tuesday last, a dividend of 10s per share was declared, being at the rate of rather more than 5½ per cent. per annum.

The report of the Fairbairn Engineering Company (Limited) has been issued. The net profits, after making allowance for all bad or doubtful debts, are stated at 17,396*l* 2s 11d. The directors propose a dividend of 10 per cent. per annum, which, after payment of preliminary and other expenses, will leave a balance of 3,360*l* 0s 6d to be carried forward to new profit and loss account.

At the meeting of the Chartered Bank of India, Australia, and China, held on Wednesday last, a dividend was declared for the half-year at the rate of 10 per cent. per annum, free

Digitized by Google

of income tax, making a total distribution for the twelve months of 12½ per cent. per annum.

At the meeting of the St Nazaire Company, held on Monday last, it was decided to amalgamate this undertaking on equal terms, with an analagous project, entitled the "Société Générale de St Nazaire." The capital of the united company will amount to 50,000*l*.

The directors of the Royal Mail Steam Packet Company have resolved to recommend to the proprietors at the meeting on the 28th instant, the payment of a dividend of 8*l* 10s per share out of the ordinary profits of the company, and a bonus of 1*l* per share from the insurance fund, both free of income tax.

At the special meeting of the Financial Corporation, held on Wednesday, the terms of amalgamation with the Oriental Commercial Bank were, after some discussion, finally agreed to.

The directors of the Land Mortgage Bank of India have issued their report, in anticipation of the meeting to be held on the 19th instant. The net profit is stated at 12,288*l* 7s 8d, to which is added interest earned in India to 31st March 10,651*l*, making an available total of 22,939*l* 7s 8d. A dividend at the rate of 5 per cent. is recommended.

The report of the Standard Bank of British South Africa (Limited) has been issued. A dividend at the rate of 8 per cent. per annum, free of income tax, is recommended, which will leave 36,000*l* to be carried to reserve fund, and 2009*l* 6s 8d to new profit and loss account.

The report of the directors of the Commercial Banking Company of Sydney has been issued. Out of the profits for the half-year ended the 31st December, a dividend was declared at the rate of 15 per cent. per annum, together with a bonus of five shillings per share, making with a similar dividend and bonus paid in June, a total distribution of 17 per cent. for the year.

The Bank of Victoria held its half-yearly meeting at Melbourne on the 7th February last. A dividend of 12½ per cent. per annum was declared, and 8,154*l* 2s 10d carried to new profit and loss account.

The provisional prospectus has been issued of the British India and Colonial Trust and Agency Corporation (Limited). The company will act as agents for British residents in and travellers to Asia, Australasia, Africa, and America, and will perform for them three functions:—1st. They will receive and transmit from or to India and the colonies, the "valuables" which there is constantly a desire to send. 2ndly. They will afford a safe depository for property and bills, for the security of which the company will be responsible. 3rdly. They will transmit every sort of information respecting India and the colonies. The company will likewise act as executors, agents, and trustees, so as to be able fully to transact the most difficult and confidential affairs.

The Anglo-Egyptian Navigation Company (Limited), for which subscriptions will be received by the International Financial Society, will work a line of steamers between Liverpool, Egypt, and Syria, which at present is owned and managed by Messrs Chapple, Dupple, and Co. of Liverpool, and Messrs F. Chapple and Co. of London. A dividend of 10 per cent. is guaranteed for five years. A dispute has arisen between Messrs Chapple and some other shipowners, but care has been taken that it shall not affect or damage the operations of the new Company.

The Russian (Vyksounsky) Iron Works Company (Limited) is formed to purchase, work, and extend the well-known iron mines at Vuicksa in Russia, situated on the river Oka, and only 66 miles from the railway which connects Nijni Novgorod with Moscow. The yield of the mines is large, and they have been acquired acquired on favourable terms. An estimate is given showing an anticipated dividend of 20 per cent. per annum.

MISCELLANEOUS.—Messrs Thomson, Bonar, and Co. have published the numbers of 190 bonds, representing 43,300*l* of Peruvian 4½ per Cent. Uribarren debt, which have been cancelled by the half-yearly sinking fund.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 8*l* 17s 10½d per ounce for standard gold, it appears that gold is about the same price in London and Paris.

INLAND PATTERN AND SAMPLE POST.—With reference to the revised rules of the Inland Pattern and Sample Post, which were published on the 27th ultimo, it has now been decided to modify the rule No. 6, and to permit the transmission of samples of seeds, &c., intended for delivery within the United Kingdom, in bags entirely closed, provided that such bags be transparent, so that the officers of the department may be able to satisfy themselves as to the nature of the contents. It is to be distinctly understood, that this modification relates only to the *Inland* Pattern and Sample Post.

MAILS ARRIVED.

LATEST DATES.

On the 9th April, AMERICA, per steam ship Africa, via Queenstown—New York, March 31.
On the 10th April, AMERICA, per steam ship City of Cork, via Liverpool—New York, March 29.
On the 10th April, AMERICA, per steam ship City of London, via Queenstown—New York, April 1.
On the 11th April, BOMBAY AND MAURITIUS, by overland, from Alexandria, per steam ship Delta, via Southampton—Gibraltar, April 6.
On the 12th April, AMERICA, per steam ship Borussia, via Southampton—New York, April 1.

CORN IMPORTED AND EXPORTED.

Account showing the Quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the Quantities of British and Foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended April 8, 1865.

	Quantities Imported into				Quantities Exported from the United Kingdom.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 8, 1865:—

	Quantities Sold.		Average Price.	
	qrs	bush	s	d
Wheat	75,137	4	39	8
Barley	31,291	7	29	5
Oats	4,483	6	21	8

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold.						Average Prices.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Including the samples left over from last week, moderate supplies of English wheat have been exhibited for sale at Mark lane since we last wrote. For all qualities the trade has ruled heavy at last Friday's reduction in prices, viz., of from 1s to 2s per quarter. For foreign wheat the trade has been in a most inactive state, and a fall of about 1s per quarter has taken place in the quotations. Barley has ruled firm, and prices have somewhat improved. Oats—the arrivals of which are small—have sold freely at an advance of 6d per quarter. Beans and peas, owing to the small supplies on offer, have changed hands at extreme rates. The flour trade has ruled steady, at full prices. This week's imports of all kinds of grain are small.

The trade for wheat, flour, and maize at Liverpool, on Tuesday, was very inactive, and prices had a drooping tendency. At Wakefield, the trade was dull as regards wheat, on rather easier terms.

The Liverpool cotton market has again been very quiet, and only a moderate amount of business transacted. The chief demand has again been from the trade, whose necessities compel them to buy, but their operations have been on the narrowest scale, and only small lots have changed hands at daily declining rates. The sales of the week amount to 29,870 bales, of which 22,510 have been taken by the trade, and 7,360 bales on speculation and export.

The state of the cotton trade at Amsterdam at latest date was very inactive, and the business doing was much restricted. Middling fair Tinnevelly sold at 45c; good middling to fair Scinde, 32½c to 35c. The Dutch Trading Company held about 5,000 bales, and a cargo of 2,309 bales was expected from Tinnevelly.

Very little business was transacted in cotton at Madras during the fortnight ending March 11. The quotation for Western, Salem, and Coimbatore produce was 10¼d to 10½d per lb. The stock was estimated at about 10,000 bales. According to an official return, the quantity of land under cotton cultivation in the Madras Presidency in January was 1,320,447 acres, against 1,318,722 acres in 1864. The subjoined table of exports is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from MADRAS in January and February.

	Great Britain.	France.	Elsewhere.	Total.
	cwts.	cwts.	cwts.	cwts.

Tuticorin	4,257	4,384
Total	5,774	4,714

Postal advices from Shanghai are to Feb. 22. As regards the state of the cotton trade, a report says:—Good qualities are very scarce; there are many complaints of the wet and dirty condition of the cotton arriving to fill contracts. Trade is not active, the uncertainty of the home markets causing great caution, but prices may be considered, on the whole, a slight degree firmer. Shanghai No. 1 dry is quoted at 17 taels, and best Kongpoh at 17.5 taels per picul. The following table shows the exports since the commencement of the season:—

To—	Export. piculs.	Re-export. piculs.	Transhipped. piculs.
Great Britain	34,042	6,347	629
Hong Kong	8,475	55	...
Coast ports	17,388	...	69
India	434	168	...
Total	60,339	6,560	698

The following were the sales and prices of cotton at Hong Kong, for the fortnight ending Feb. 28:—Shanghai, $24 to $25; Ningpo, $25 50c to $26; Japan, $29 to $30 per picul; sales 4,600 bales.

Very small supplies of cotton were on sale at Yokohama during the fortnight ending Feb. 15. The nominal quotation was $29 per picul.

Holders of cotton at Alexandria during the week ending March 29 were firm. Buyers, however, were unwilling to operate to any extent, consequently, the amount of business transacted was small. The arrivals of cotton since the 16th had been 10,140 bales, and the sales 3,123 bales. Fair open-ginned produce was quoted at 16d per lb. The stock was estimated at 600,000 cantars, equal to about 160,000 bales of 480 lbs each. The annexed statement of exports is from the Egyptian Commercial and Trading Company's circular:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 1 to March 16.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1859—1860	15,145	13,658	5,189	73,992

New York	0 0 0	0 0 0	.....	0 0 0	0 0 0			

With the exception of an improved demand for coffee, at slightly enhanced rates, trade in Mincing lane—more especially as regards tea—has ruled inactive. Very few changes of importance, however, have taken place. Advices from China state that the export of tea to Great Britain from all ports since June 1, had amounted to 110,136,510 lbs, against 103,650,070 lbs in the previous season.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to March 31, 1864 and 1865, with STOCK on hand on April 1, 1864 and 1865.

From Colombo, to March 17, we learn, that there had been an improved demand both for plantation and native coffee, at fully late rates. The former was quoted at 12s 6d per bushel; the latter at 42s 6d to 44s 6d for unpicked, and 49s to 52s for picked and dried. The following table of exports is from Messrs Fryer, Schultze, and Co.'s circular :—

EXPORTS of PLANTATION COFFEE from COLOMBO from Oct. 1 to March 17.

Akyab	271	8,396
Java	3,920	7,955
Total	7,865	33,079

The English wool trade has continued very dull, and prices have further declined. The arrivals of colonial wool since the close of the recent public sales amount to about 70,000 bales.

We learn from the Australian colonies, that there was much less firmness in the wool trade, and that the quotations had considerably declined. The shipments from Melbourne of the new clip had been 118,847 bales. The following were the prices current :—At SYDNEY : First scoured, 1s 9d to 2s; second scoured, 1s 5d to 1s 8d; third seedy and skin, 1s 1d to 1s 4d; first fleece, 1s 7d to 1s 9d; second fleece, 1s 2d to 1s 5d; third and seedy, 11d to 1s; first greasy, 9d to 10d; second greasy, 6d to 8d; third and seedy, 4d to 6d. At MELBOURNE : Greasy, inferior to ordinary, 7d to 9d; ordinary to average, 9d to 10d; good to superior, 11d to 1s 1d; ditto (cross-bred), 1s 1d to 1s 2d. Fleece—Inferior to ordinary, 1s 3d to 1s 5d; ordinary to average, 1s 5d to 1s 7d; good to superior, 1s 9d to 2s 1d; scoured, ordinary 1s 4d to 1s 7d; good, 1s 8d to 1s 10d; superior, 2s to 2s 2d.

The silk trade is steady, at the advance in prices realised at the close of last month. The following table, from Messrs Durant and Co.'s circular, shows the present state of the London silk warehouses on the 1st inst. :—

STATE of the SILK WAREHOUSES.

	Sold Stock.		Unsold Stock.	
	April 1, 1865. bales.	April 1, 1864. bales.	April 1, 1865. bales.	April 1, 1864. bales.

Canton	10	249	338	779
Chinese thrown	30	118	68	319

A report from Shanghai, dated Feb. 22, thus alludes to the state of the silk trade :—At the close of last mail an active demand commenced, which has continued throughout the fortnight, and the settlements are estimated at 1,000 bales. The purchases have chiefly comprised medium and inferior Yuenfas, Hainings, Taysaams and Szechuens, and have been influenced by the decline in the rate of exchanges, the certainty of a short supply for the season, and improved advices from Europe. Prices have been very firm, and an advance of 10 to 20 tls per picul, has been established. The supply from the interior has been limited. The arrivals from Japan have been 342 bales. Prices at Yokohama had declined $15 to $20 per picul. Stock was estimated at about 900 piculs. Their export shows a deficiency of 3,580 bales as compared with last season. The total shipments from July 1 to date amount to 33,669 bales against 31,514 bales in 1863-4. The unsold stock is estimated at 500 bales against 5,000 bales last year, and 3,000 bales in 1863.

In metals, oils, and tallow, a very moderate business has been transacted. Scotch pig iron has sold at 52s 6d per ton cash, mixed numbers; linseed oil at 31s; and P.Y.C. tallow at 39s 6d per cwt, on the spot.

The following statistics are in reference to the production and movements of gold in New South Wales and New Zealand for the past and two previous years :—

GOLD EXPORTS.

	1862 oz	1863 oz	1864 oz
Total quantity of gold shipped from Victoria	1,970,909	1,911,184	1,857,217
Quantity of the above the produce of the New Zealand gold fields	312,624	284,118	311,767
	1,658,285	1,627,066	1,545,450

GOLD DEPOSITED IN THE TREASURY.

	oz
Quantity of gold in the Treasury on the 1st January, 1864	8,372
Ditto on the 31st December, 1864	942
Decrease on the year, and balance against 1864	7,430

From this return it will be seen that, comparing the year 1863 with 1862, there is a decrease in the amount of Victorian gold exported from the colony of 31,219 ounces, and comparing 1864 with 1863, there is a decrease of 81,616 ounces, whilst comparing 1864 with 1862, the decrease amounts to 112,835 ounces. These results, however, are materially affected by the quantities held by the banks and deposited at the Treasury.

GOLD HELD BY THE BANKS—1864.

	Jan. 1.	Dec. 31.	Increase.	Decrease.
Bank of Victoria	16,573	19,632	3,059	...
Union Bank	7,000	17,473	10,473	...

Digitized by Google

The following statement shows the net yield of gold from the Victorian mines for the years 1862, 1863, and 1864:—

NET YIELD OF GOLD.

		oz.
1862.		
Victorian gold exported		1,658,285
Balance in favour of the year at the banks		30,445
Ditto at the Treasury		13,736
Total net yield for 1862		1,702,460
1863.		
Victorian gold exported		1,627,066
Balance against the year at the banks	42,311	
Ditto at the Treasury	6,676	
		48,987
Total net yield for 1863		1,578,079
1864.		
Victorian gold exported		1,545,450
Balance in favour of the year at the banks	19,377	
Ditto against the year at the Treasury	7,430	
		11,947
Total net yield for 1864		1,557,397

It will be thus seen that, as compared with 1862, the yield of gold for 1864 shows a falling off 145,063 ounces, but as compared with 1863, a decrease of only 20,682 ounces.

The leading feature in the commercial news at hand from New York, this week, is a somewhat active inquiry for cotton, at enhanced quotations. In other departments of trade, very little was done in the week ending April 1 The latest quotation for gold was 152¾. The stock of bullion held by the banks on March 25, amounted to 4,413,300*l*. The shipments of specie from Jan. 1 to March 25, were 897,930*l*, against 1,829,500*l* last year.

THE COTTON TRADE.

LIVERPOOL—APRIL 13.

The cotton market continues quiet. The trade buy very generally, but still chiefly in small quantities, and though the large supply offering causes the week to close with some further decline in most descriptions, several low offers for large lots have been refused. Sea Island is still neglected, though the few transactions exhibit little or no change. American has been in fair request, but is quoted ¼d to ½d per lb below last week. In Brazil a decline has also been submitted to of ¼d to ½d per lb, but large offers below current rates have been refused. Though Egyptian continues in demand, it is very freely offered, and quotations are slightly reduced. Smyrna has declined ¼d to ½d per lb. For East India the inquiry has been general, but of an extremely retail character, and prices have further declined ¼d to ½d per lb. China and Japan have been pressed for sale, and a depreciation to the extent of ½d per lb has taken place.

No transactions to arrive have been reported during the week.

The sales of the week amount to 29,870 bales, including 2,000 on speculation and 5,360 declared for export, leaving 22,510 bales to the trade.

The sales to-day will probably amount to about 4,000 bales, including 1,000 for export and speculation; market dull, and largely supplied.

It was this day resolved unanimously, by the Association, that the stocks of cotton in this port shall, in future, be taken at the expiration of every three months.

LONDON—APRIL 13.

Subjoined is a portion of the circular issued this week, by the London Cotton Brokers' Association:—The market has been exceedingly quiet this week and only a moderate amount of business transacted; Tinnivelly being most in request, shows a slight improvement on last week's prices. Other descriptions are unchanged, except Surats, which have declined ½d per lb.

NEW YORK—APRIL 1.

Under more favourable advices from Europe and rather more activity on the part of spinners, we have to report more firmness and higher prices. About 4,000 bales changed hands during the week. As high as 50c per lb has been paid for middling Uplands, but the closing figures were 46c to 48c, at which the market was quite steady. The export from Jan. 1 to date is 11,685 bales, against 3,601 bales last year.

MARKETS IN THE MANUFACTURING DISTRICTS

The stocks of goods in the leading markets continue only moderate. The business transacted this week has been by no means extensive; nevertheless, the quotations have ruled steady. The demand for iron has fallen off, but coals have changed hands freely, at full prices.

MANCHESTER, April 13.—This market has continued uninterruptedly depressed, owing to the failures of Messrs Joyce and Co., London, in the cotton trade, and Messrs Cogent and Co., Glas-

Digitized by Google

gow, in the manufacturing trade, both failures affecting Manchester severely. There have also been rumours of considerable difficulties nearer home, and altogether the want of confidence has been deep and wide-spread. India goods, which are scarce in stock, have not been without offers to deliver onwards, but rates have in general been too low for acceptance. Other goods have been languid and increasingly difficult of sale, both sellers and buyers being disheartened by repeated losses. The Easter holidays are accordingly likely to be marked by a more than usual cessation of business.

BRADFORD.—Stagnation and depression in wool continue without signs of abatement. In fact there is almost a total cessation of business, and prices are too irregular to be quotable. The same absence of demand prevails in the yarn market. Pieces—Notwithstanding the continuous reduction of prices, manufacturers fail to secure orders.

LEEDS.—There is more animation in both the home and the export trade, and it is not improbable that though the spring trade has commenced late it will be of an average extent. A few samples of winter goods have been inquired for, and manufacturers are giving their attention to the production of such fabrics as will suit the fall trade generally. Prices of both clothing wools and goods are steady and firm.

ROCHDALE.—The flannel trade continues in the same dull state we have had to report for several weeks. The manufacturers are not so well employed as they were a month ago, and even at the present rate of production stocks are slightly accumulating. Yorkshire goods—low woollen and mixed fabrics—are also dull of sale in this market.

DONCASTER.—The state of the coal trade in South Yorkshire is exceedingly good. The inquiry for the metropolitan markets is brisk.

NOTTINGHAM.—There is an improvement in the demand for silk mechlins. All kinds of cotton goods are, however, a slow sale. In hosiery there is not much change. A little is doing for the home market and for shipment, and manufacturers are working almost entirely to order. Yarns are without much alteration.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 1.—The market for Western and State flour is very dull, and prices are 20 to 25c per barrel lower. The sales are 5,400 barrels at $8.50 to $8,80 for superfine State; $8.85 to $9.10 for extra State; $9.15 to $9.40 for fancy State; $9.25 to $9.50 for the low grades of Western extra; $9.25 to $9.60 for shipping Ohio; $9.70 to $10.40 for trade ditto; and $9.80 to $12.50 for St. Louis extras. Canadian flour is 10 to 15c lower, and the market is dull. Sales of 500 barrels at $9.15 to $9.45 for the low grades of extra, and $9.50 to $11 for trade and family extras. Southern flour is in moderate demand, and 10c lower. Sales of 450 barrels at $9.80 to $10.60 for mixed to good superfine country Baltimore, &c., and $10.65 to $12.75 for trade and family brands. The wheat market is inactive and nominal. Buyers hold off. The inquiry is only for milling, but prices are much below the views of buyers. We hear of a sale of amber Michigan at $1.95. The sales are 50,000 bushels Canadian at 85 to 86c; Western at 90 to 95c, closing at the inside price in store; State at 86 to 88c. Corn is freely offered, and is lower. The sales are 8,500 bushels Western mixed, nominal, and new yellow at $1.45 to $1.48 on pier.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, have been on the increase, and in fair average condition. For all kinds, the demand has ruled heavy, at a decline in the quotations of from 1s to 2s per quarter. The show of foreign wheat has been moderately extensive. Really fine samples have been held at full currencies. The business doing in them, however, has been limited. Low and damp parcels have ruled heavy, and somewhat lower in price. There has been a fair inquiry for malting barley, at previous quotations; but grinding and distilling sorts have commanded very little attention, at late rates. No change has taken place in the value of malt. The trade has continued heavy. There has been a good demand for oats, and prices have had an upward tendency. Both beans and peas have been in short supply and steady request, at full quotations. The demand for flour has fallen off. All kinds, however, have sold at previous currencies.

The various country markets have been somewhat heavy for wheat, on lower terms. Nearly all kinds of spring corn have moved off steadily, at full currencies.

The demand for wheat on the continent has fallen off, nevertheless very little change has taken place in prices compared with the previous week. Some large quantities of barley, oats, beans and peas have found buyers on English account. Advices from New York state that both wheat and flour were declining in value, with very little doing for export purposes. The supplies on offer were only moderate even for the time of year.

In Scotland wheat had sold slowly at slightly depressed rates; but there has been a fair inquiry for fine barley and oats at extreme quotations. In other produce very little has been doing.

The Irish markets have been scantily supplied with wheat, in which very little has been passing, at barely stationary prices. The transactions in other articles have been only to a moderate extent.

The exports of grain, &c., from London during the first quarter of the present and past two years were as follows:—

EXPORTS of GRAIN, &c.

	First Quarter. 1863.	First Quarter. 1894.	First Quarter. 1865.
Wheat .....qrs	8,117	...	145
Barley	4	...	...
Oats	80	1,819	1,014

Maize	...	...	700
Sundry	63	32	...
Flour .....owts	1,163	781	3,405

Mr George Dornbusch reports that business in floating cargoes of wheat has been in a most inactive state, at a decline in prices of 6d to 1s per quarter. Maize, barley, and most other articles, however, have changed hands at fully late rates. There have been no arrivals off coast during the week, a cargo of linseed, with orders to proceed to Antwerp, excepted.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this day's Markets see "Postscript."

Mincing Lane, Thursday Night.

Sugar.—The market has been less animated than last week, with occasional sales making at slightly easier rates, and the demand is still moderate. Up to this day, only 560 casks West India had found buyers. The various public sales have gone off without spirit, and a limited business is reported by private contract. The deliveries here continue large, being 5,405 tons last week, including 906 tons for exportation. This makes the total increase in the deliveries since the 1st Jan., 22,000 tons.

Mauritius.—Of 10,121 bags by auction a small proportion only sold, including crystallised white, 11s 8d duty, at 38s. Other grainy and crystallised, 32s to 36s; soft qualities, brown and yellow, 24s to 31s 6d per cwt.

Bengal.—2,515 bags chiefly found buyers: Gurpatta date, brown and yellow, 27s 6d to 32s; soft brown, 23s 6d to 25s 6d; and washed Benares, 31s to 33s; grainy white Cossipore, 41s. Privately white Benares has sold at 35s to 35s 3d per cwt.

Penang.—2,982 bags chiefly sold at barely last week's rates; brown to fine yellow, 28s to 33s per cwt.

Foreign.—240 casks 60 barrels Porto Rico, offered by auction, sold at 30s to 33s 6d for low to very good yellow. Two floating cargoes of Havana has sold for the United Kingdom, No. 12, at 24s 9d per cwt. To-day 21,571 bags clayed Manilla, advertised for sale, were withdrawn.

Refined is unaltered, and the transactions of moderate extent.

Molasses.—65 puncheons Demerara have sold at 14s per cwt.

Rum.—A few sales have been made at previous rates. Demerara, 1s 7d to 1s 8d; Penang, 1s 4½d per proof gallon. The stock of West India is 6,340 puncheons loss than last year, and the total stock shows a diminution of 8,010 puncheons.

Coffee.—There has been rather an improved demand for plantation Ceylon, 757 casks 336 barrels and bags in the sales chiefly finding buyers: pale and small berry good to middling, 78s 6d to 83s; good to fine, 83s 6d to 89s. 150 casks 1,909 barrels and bags native were partly sold: ordinary to good, 66s to 67s 6d, being about the former value; but the inquiry is not at all active. 1,100 bags good Singapore Cuba kind, realised 71s 6d to 73s 6d. The sound portion of 2,520 bags Rio was taken in at 60s to 66s. 140 bags washed Rio, at 70s per cwt. 417 casks 183 barrels plantation Ceylon, by auction to-day, went rather dearer, making a recovery of 1s per cwt for the week. 284 bales Mocha withdrawn.

Tea.—There is more firmness amongst the importers this week, but not any improvement in the demand. The sales of Indian growth on Tuesday and Wednesday went off at irregular prices. The Jorehaut Company's sold at an advance, but many of the Namunna kinds show a fall of fully 2d per lb. Other descriptions, including a parcel of Cachar, brought about previous prices. Pekoe sold from 3s 5d to 3s 9d; flowery pekoe 4s and 5s 3½d; pekoe souchong 2s 5d to 3s 1½d per lb.

Rice.—A steady inquiry still prevails for soft grain descriptions, and several parcels have sold at 9s to 10s, being rather dearer. 5,312 bags of Bengal by auction were chiefly taken in above the value. A portion sold at 12s to 12s 6d for middling white. The remainder bought in at 12s 6d to 13s 6d per cwt.

Imports and Deliveries of Rice to April 8, with Stocks on hand.

	1865.	1864.	1863.	1862.
Imports ...tons	21000	18400	10370	14650
Deliveries	17000	15850	19300	15820
Stock	45200	48500	55150	28750

Delivered last week 1070 tons.

Saltpetre.—There has been very little business done in Bengal this week, and the market remains flat. Fine has sold at 28s per cwt.

Imports and Deliveries of Saltpetre to April 8, with Stocks on hand.

	1865	1864	1863	1862
Imports ...tons	1750	3180	6710	6100
Deliveries	3250	3310	3910	5270
Stocks	5900	7030	6610	3960

Delivered last week 228 tons.

Camphor.—Sales have been effected at 110s to 115s per cwt.

Cochineal.—570 bags by auction about one-third part sold, Teneriffe grain being rather cheaper: silver, 2s 10s to 3s; blacks, 2s 11d to 3s 6d per cwt. Honduras chiefly bought in.

Imports and Deliveries of Cochineal to April 8, with Stocks on hand.

	1865	1864	1863	1862
Imports ...tons	3650	3950	5600	4276
Deliveries	3810	4040	5460	4070
Stocks	6930	7390	8960	11760

Metals.—The market is steady, but quiet. Scotch pig iron last sold at 52s 4½d per ton, mixed numbers, cash. Business has been done in spelter at 20*l* to 20*l* 5s, on the spot. Straits tin has advanced, having sold at 89*l* 10s to 90*l* per ton for cash. It is now, however, quiet.

Hemp.—713 bales Manilla, offered by auction, were taken in at 27*l* to 27*l* 10s per ton for middling to fair roping quality.

Oil.—Few changes have occurred this week. Linseed closed at 30s 9d to 31s per cwt on the spot. 219 casks palm by auction sold at 35s to 36s 3d per cwt. Sperm oil is held for a much higher price, viz., 90*l* per ton.

Tallow.—There was more firmness pervading the market in the early part of the week, but it is now dull again. 1st sort Petersburg Y.C., 39s 6d to 39s 9d. For delivery in the last three months, 41s 3d. Town tallow, 42s 3d per cwt.

Particulars of Tallow.—Monday, April 10, 1865.

	1862. casks.	1863. casks.	1864. casks.	1865. casks.

ADDITIONAL NOTICES.

Refined Sugar.—There is nothing new to report with respect either to the home or foreign markets in refined sugar.

Dry Fruit.—The market during the week has been quiet. Quotations unchanged.

Seeds.—The clover seed trade is getting over for the season, with very little stock left; prices close very firm. In other seeds, quotations are supported, and the arrivals are very insignificant.

English Wool.—Downward tendency still continues.

Colonial Wool.—The market is without change.

Flax market is very quiet.

Hemp.—During the week scarcely any business has taken place. Market remains very dull.

Silk.—Market remains unaltered.

Tobacco.—The market has presented a quiet appearance, and sales of home-trade descriptions have been almost restricted to immediate requirements. A few small purchases were made of selected qualities, good to fine, for exportation.

Leather.—Since last week there is no change to report in the leather trade. The transactions are still confined chiefly to the articles lately described as being the most wanted. At Leadenhall, on Tuesday, the supply was considerable, but without any corresponding increase in the demand. Prices, generally, were unaltered, but to make large sales of sole leather, lower rates have to be accepted.

Metals.—The course of business has been quiet all the week, and the commencement of holidays will prevent any change for a week to come. Copper has become again in less demand. Iron steady, but quiet. Tin rallied on Monday and Tuesday, but has since been less in demand. Spelter firm, and a little doing. Lead very flat. Tin plates steady.

Tallow.—Official market letter issued this evening:—

	s	d
Town tallow	42	3
Fat by ditto	2	0½
Yellow Russia	41	3
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

Thursday, April 13.—Only a moderate supply of beasts was on offer in our market to-day, and most breeds changed hands steadily at full prices. A few very superior Scots sold at 5s per 8 lbs. We were rather scantily supplied with sheep, which ruled firm at full quotations. The best Downs and half-breds, in the wool, realised 6s 6d; out of the wool, 5s 2d to 5s 4d per 8 lbs. There was a fair number of lambs in the pens, and sales progressed freely at from 6s 4d to 8s per 8 lbs. The receipts from the Isle of Wight amounted to 700 head. We had a slow inquiry for calves at late rates. In pigs very little was doing. Milch cows ranged from 16*l* to 22*l* each.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

Veal	3	4	4	4	Small pork	4	6	4	10

HOP MARKET.

Borough, Thursday, April 13.—The supply of English hops on sale is very moderate. With continental produce the market is somewhat scantily supplied, but there is a large show of American hops on offer. Good and fine qualities of English and foreign produce move off steadily at full prices; otherwise, the trade is quiet. Mid and East Kent, 110s to 200s; Weald of Kent, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 140s; American, 80s to 130s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Thursday, April 13.—Only moderate supplies of potatoes are on sale, yet the trade is dull at about previous quotations. Yorkshire Regents, 90s to 120s; ditto Flukes, 130s to 150s; Scotch Regents, 90s to 100s; ditto Rocks, 70s to 85s; Dunbar Regents, 100s to 120s; foreign, 60s to 70s per ton.

HAY MARKETS.—Thursday, April 13.

Smithfield.—Meadow hay, 4*l* 10s to 5*l* 10s 0d; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. A moderate demand.

Digitized by Google

CUMBERLAND—Meadow hay, 4*l* 10s to 5*l* 10s 0d; clover, 5*l* 8s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

WHITECHAPEL—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 7s to 1*l* 14s per load. Supply rather limited.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

THURSDAY, April 12.—Our market continues quiet, and prices are therefore in most instances quite nominal at present. The second series of East India wool sales this yesr will begin next Thurs day, the 20th inst., and the quantity announced to be offered is 10,850 bales, which is below average.

The Gazette.

TUESDAY, April 11.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 1st of April, on 11,841 miles, to 607,094*l*, and for the corresponding week of last year, on 11,490 miles, to 599,787*l*, showing an increase of 351 miles, and of 7,307*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,374 miles, to 494,249*l*, and for the corresponding week of 1864, on 8,097 miles, to 488,944*l*, showing an increase of 277 miles, and a decrease of 5,305*l*.

RAILYAW AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 10.—In the share market to-day there was very little activity, but English railways closed with a firm tendency. The banks showed no average alteration, and the other descriptions were slightly disposed to weakness. Of the English lines, Metropolitan recovered 1; ditto (Extension) improved ¼, North-Western 1¼, Great Western and South-Western ½ each, North-Eastern (Berwick) ¼, and Lancashire and Yorkshire further ¾; and Bristol and Exeter declined 1, and Chatham ½, and South Devon further 1½. In colonial, Grand Trunk of Canada (2d preference) improved ½, and ditto (4th preference) declined 1, and Great Western of Canada (shares of both descriptions) ¼ each. In British mines, East Lovell recovered ¼, East Grenville improved ¼, and Stray Park and Grambler declined 1 each, and Chiverton and East Wheal Russell ¼ each. In foreign mines, Cape Copper and Washoe Gold (of both descriptions) declined ¼ each, Kapunda ⅛, and St John Del Rey further 1½.

TUESDAY, April 11.—In the share market to-day there was a firm appearance in English railways and mines and American securities, but in the other descriptions the variations from yesterday's final quotations were nearly equal in both directions. Of the English lines, South Devon recovered 2, Manchester, Sheffield, &c. advanced 2, Great Northern ½, ditto (A stock) and North-Eastern (Berwick) a further ½ each, ditto (Leeds) ½, ditto (York) ¾, Metropolitan (new) ⅛, and ditto (stock) a further 1; and Lancashire and Yorkshire and Midland relapsed ¼ each. In colonial, Indian Branch improved ½; Atlantic and St Lawrence declined ½, and Great Western of Canada (shares of both descriptions) a further ⅛ each. In foreign, Dutch-Rhenish, Great Luxembourg, and Namur and Liege improved ¼ each; ditto (preference) and Imperial Mexican declined ¼ each, and Paris and Orleans and Pernambuco ½ each. In American, Illinois Central (shares) recovered 1, and Erie (paid up) 1½, Pennsylvanian Railroad (second mortgage) advanced 1, and United States (5-20) a further ½. In British mines, Vigra and Clogau improved 1½, and East Grenville a further ¼. In foreign mines, Cape Copper further receded ¼.

WEDNESDAY, April 12.—This being the day for the preparation of the settlement at the end of the month, a majority of the few transactions were for the account, and the final quotations tended higher in English and foreign railways and American securities, but in other descriptions there was no material alteration in tone. Of the English lines, Midland recovered ½, Great Western (Oxford) improved 1½, South-Eastern ¾, and Brighton ¾; Manchester, Sheffield, &c. relapsed ½, and Caledonian declined ½. In colonial, Buffalo and Lake Huron receded ½. In foreign, Lombardo-Venetian advanced ½, and Great Luxembourg a further ⅛. In American, Erie shares (paid up) and Illinois Central (shares) further improved 1 each, and United States (5.20) ½. In British mines, East Bassett advanced 3½; East Grenville relapsed ¼, and South Caradon declined 5, East Gunnislake ¾, and Chiverton ¼. In foreign mines, St John del Rey declined 2.

THURSDAY, April 13.—In the share market to-day the amount of business was very small, but English railways, banks, and American securities closed with an average buoyant tendency, and the other descriptions were nearly unaltered. Of the English lines, Caledonian recovered ½; Metropolitan, Shropshire Union, and Great Northern improved 1 each, and ditto (A stock), Great Eastern, South-Western, and North-Eastern (Berwick) ½ each, North-Western ¾, Lancashire and Yorkshire ¼, and Midland a further ¼; and Glasgow and South-Western declined 2. In colonial, Grand Trunk of Canada, and ditto (4th preference) improved ½ each, and Great Western of Canada (shares of both descriptions) are now quoted ex dividend. In foreign, no movement occurred in any of the closing prices. In American, United States (5-20) further advanced ¾, Illinois Central shares ½, and Erie shares (paid up) 1½.

FRIDAY, April 14.—The Stock Exchange having been closed to-day, no business was transacted in the railway share market.

R. Ford and Co., 38 Poultry, E.C.

FORD'S ILLUSTRATED PRICE LIST, Post Free.

Intending purchasers who cannot favour us with a call, will find it of great assistance; it contains over forty drawings of shirts, shirt collars, &c., All the new fashions are to be found in it.

R. Ford and Co., 38 Poultry, E.C.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

FLUTES.—THE NEW MODEL

FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas, Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—

At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS,

by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.

48 Cheapside.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

CARSONS' ORIGINAL ANTI-CORROSION PAINT.—

Walter Carson and Sons beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, (37) Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.

March 1, 1865, 9 Great Winchester street, E.C.

CARSONS' ANTI-CORROSION PAINT,

specially manufactured for out-door work, is the best and cheapest. All colours. So simple in application that any person can use it. Full instructions are given. No agents. All orders to be sent direct.

CARSONS' ANTI-CORROSION PAINT

is twice as durable as genuine white lead. SEE TESTIMONIALS.

CARSONS' ANTI-CORROSION PAINT.

3 cwt carriage free to any station in England and Wales, and most seaports in the United Kingdom. (See list.

CARSONS' ANTI-CORROSION PAINT.

Patterns, prices, and testimonials sent post free.

CARSONS' ANTI-CORROSION PAINT for all OUT-DOOR WORK.

CARSONS' ANTI-CORROSION PAINT for WOOD WORK.

CARSONS' ANTI-CORROSION PAINT for PARK FENCING.

CARSONS' ANTI-CORROSION PAINT for FARM BUILDINGS and IMPLEMENTS.

CARSONS' ANTI-CORROSION PAINT for IRON WORK.

CARSONS' ANTI-CORROSION PAINT for POROUS BRICKS

effectually resists weather and excludes damp. 3 cwt carriage free to most parts of the United Kingdom.

CARSONS' ANTI-CORROSION PAINT for FRONTS of HOUSES.

CARSONS' ANTI-CORROSION PAINT for BRICK, STONE, and COMPO.

CARSONS' ANTI-CORROSION PAINT for CONSERVATORIES.

CARSONS' ANTI-CORROSION PAINT for HOTHOUSES.

CARSONS' ANTI-CORROSION PAINT

lasts twice as long as any other; established 70 years; is only half the expense in application; is the most effectual in resisting weather; and will keep for years in a dry place. All orders to be sent direct to WALTER CARSON and SONS.

LA BELLE SAUVAGE YARD, Ludgate hill, E.C.,

Three doors East of Railway Viaduct.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILCE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, Lohdon, W.C.

CAUTION.—Beware of Proposed Substitutions.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

RHEUMATISM, CHILBLAINS, &c.—COLES'S ALGA MARINA has stood the severest test of many years' public experience, and has thereby acquired a celebrity which is unrivalled and daily increasing as a remedy for Rheumatism and Rheumatic Gout, Glandular Affections, and Chilblains, Contractions and Weakness of the Limbs and Joints, Neuralgic and other Pains, Spinal Curvature, &c. The numerous testimonials to its good effects in all that class of diseases for which the sea-side is recommended may be obtained with the Pamphlet for three postage stamps, of Mr KEATING; amongst them will be found the certificate of a Physician in Her Majesty's service, that it is the most efficacious remedy for Chilblains he has ever met with in his experience. The public should guard against spurious imitations by asking for COLES'S ALGA MARINA, and being careful to observe that his signature appears upon the label which encircles each bottle. Every packet also contains the pamphlet, without which none is genuine.—Sold in bottles, 2s 9d, 4s 6d, and 11s each, by T. KEATING, 79 St Paul's Churchyard, London, and by all Chemists.

CURE OF ASTHMATIC COUGH AT THE AGE OF 85, BY DR LOCOCK'S PULMONIC WAFERS.—"Wm. Taylor, The Cape, Smethwick, aged 85, says he for many years suffered from a husky, asthmatical cough. To get rest at night was almost out of the question, although he tried many things; but for the last four years, since he commenced taking the Wafers, he can ensure a good night's rest, &c.—Witness, R. BROWN, Chemist, 55 Spring Hill, Birmingham." Dr Locock's Wafers give instant relief of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

HOLLOWAY'S OINTMENT AND PILLS.—Ulcerous sores and scrofulous eruptions of the worst kind, for which all sorts of "established" remedies have been tried in vain, have been thoroughly cured in an almost incredibly short time by Holloway's Ointment. The common topical applications are mere palliatives; but this unrivalled unguent penetrates the source of the evil, destroys the secret virus, and gets rid of the disease for ever. In ordinary cases the Ointment should be briskly rubbed into the parts affected; but if they are too tender or irritable for this process, they should be gently smeared with it at least twice a day. The most inveterate external diseases will yield, sooner or later, to this Ointment.

INDIAN TRAMWAY COMPANY (Limited).

(See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.
London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.
Where the largest stock of steel, files, tools, &c., &c., may be selected from.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.
*** No connection with any one of the same name.

THE PHOSPHORISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great physiological and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."
Prices: 11s per bottle, or four 11s bottles in one, 33s and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.
LONDON AGENTS: — Cleaver, 63 Oxford street; Hooper, 43 King William street, London bridge; Frost, 229 Strand.

This Company is formed for the purpose of acquiring and extending the well-known iron works, which have been established and in successful operation for a long period at Vuicksa, in Russia.

The estate, which covers an area of 405,000 English acres and containing 35,000 inhabitants, is most advantageously situated on the navigable river Oka (which flows into the Volga at Nijni Novgorod), and is within 66 miles of the railroad which connects Nijni Novgorod with Moscow.

The estate possesses an inexhaustible supply of iron ore of superior quality, yielding an average of 45 per cent., and the works, which are now in operation and in good order, consist of

5 Blast furnaces.
23 Refining furnaces.
17 Puddling furnaces.
15 Rolling mill, for all kinds of merchant iron, sheet iron, and iron wire.
8 Large hammers for sheet iron.
125 Wire mills.
1 Factory for making all kinds of steam engines.
3 Smaller factories for repairing engines.
1 Large boiler factory for making steam boilers and steam boats.
5 Foundries.
3 Factories for making scythes, nails, &c.
6 Brick kilns.

The above are worked by 72 water wheels, of 1,050 horse power, besides 15 steam engines, of 478 horse power.

270,000 acres of the estate are covered with valuable timber; and this supply of fuel, coupled with the abundance and cheapness of labour, has enabled the proprietors to produce iron at a much less cost than in England, whilst the selling price in Russia is more than double what it is in this country, as the production within the empire is not equal to the demand, and foreign iron (except of a particular class) is kept out of competition by the high import duty and cost of transport.

The price at which the Company's interest in the property, as defined below, has been conditionally acquired is the sum of £60,000, in addition to which an estimated sum of £35,000 will be required to pay off existing charges on the property, and it is calculated that the sum of £70,000 will be required for working capital, making together £165,000, which is the whole amount proposed to be called up.

The profits at the present time amount to about 537,000 silver roubles (about £70,000 sterling) per annum, subject, however, to a deduction of 72,000 roubles, being interest at 5 per cent., and sinking fund on a debt of 1,260,000 roubles due to the Russian Government, thus leaving a net annual profit of 465,000 roubles (£60,000). By arrangement with the proprietors, and hypothecation or mortgage to the Company of their reserved interest in the estate, 87,000 roubles (£11,000), being about 7 per cent. per annum upon the whole capital proposed to be called up, is guaranteed to be first paid to the shareholders of the Company; of the surplus profits (378,000 roubles or £49,000), three-fifths will belong to the present proprietors, and two-fifths to the shareholders, for a period of 37 years. Thus, on an estimate of the profits at the present time, and without considering the improvements likely to result from an increase of capital, a dividend of about 20 per cent. per annum is shown upon the capital (£165,000) required to be called up. In the above estimate no account has been taken of the profits upon the manufacture of steam engines, boilers, &c., and it is anticipated that by the introduction of further capital and the development of the works, the returns will be more than doubled.

It is intended to create a sinking fund for the purpose of returning to the shareholders, at the expiration of the thirty-seven years, when the interest of the Company will cease, the whole amount of the capital called up. On the determination of the lease, the proprietors bind themselves to have a valuation made of all the property above ground, and after deducting the present value, to pay to the Company one-half of the difference in cash. Thus, in addition to receiving a highly remunerative dividend during the thirty-seven years, at the end of that time the whole of their capital will be returned to the shareholders with a considerable bonus.

It is believed that the Russian Government will grant a concession for the construction of a railroad, to pass through the estate, and connect the Nijni-Novgorod and Moscow line with Riazan and Toula, which, as will be seen from the map accompanying the prospectus, is the centre of a group of Russian railways now in course of construction, and is situated in the midst of the most flourishing manufacturing districts of the empire.

Plans of the estate and works, the engineer's report, and other documents on which the above statements are founded, may be inspected at the offices of the Company.

Applications for shares to be made in the accompanying form. In the event of no allotment being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the bankers, brokers, and solicitors.

FORM OF APPLICATION FOR SHARES.
(To be retained by the bankers.)

No.——

To the Directors of the Russian (Vyksounsky) Iron Works Company (Limited).

Gentlemen,—Having paid to your bankers, the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares or any less number you may allot me; and I agree to pay the sum of £4 per share on allotment, and I authorise you to insert my name on the register of members for the number of shares allotted to me.

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sandey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receip of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

Messrs Frederick Chapple and Co., 26 Great St Helen's, London. | Messrs Chapple, Dutton, and Co., Liverpool.

SECRETARY (PRO TEM.)—Mr W. A. Michael.

TEMPORARY OFFICES—60 Threadneedle street, London.

The object of the proposed Company is to work a line of steamers between Liverpool, Egypt, and Syria, taking over for that purpose the steamers at present owned and managed by Messrs Chapple, Dutton, and Co., of Liverpool, and Messrs F. Chapple and Co., of London, and making such additions and improvements in the line as the requirements of the trade may render advisable.

The line, as at present constituted, consists of five principal and two auxiliary steamers, the property of the present managers, besides several chartered steamers. It has been some time in active operation, and is yielding a large return on the capital embarked in it.

As, however, this return has been derived from the profits made by the steamers actually belonging to the present managers, exclusive of the chartered vessels, it is proposed to substitute for the latter steamers belonging to the Company, by which the expenses will be diminished, and the profits proportionately increased. It is believed that, by extending the Company's operations to London and Marseilles, and by the employment of more branch steamers to bring the various trading ports of the Levant into communication with the main line—all of which are wants long recognised by the trade—a further valuable source of profit will be opened, in addition to the trade with Egypt and Syria generally, which is steadily increasing. Moreover, a new and important traffic is opening up between Egypt and India, the former country being now made largely available as a channel for the transit of Indian produce destined for this country.

Preliminary arrangements have been made for the purchase, on favourable terms, of the ships and goodwill of the present owners in the line, the vendors taking a moiety of the purchase-money in fully paid-up shares. Messrs Chapple and Co. engage to act as agents and managers of the line for a term of seven years, for a fixed commission, which includes the whole expense of management and all other office expenses, excepting the remuneration of the Directors.

The International Financial Society (Limited) have received a formal notice from the solicitors to certain other shipowners in the same trade of certain proceedings which had been taken by them with a view to restrain the Messrs Chapple and Co. from competing with them in the Egyptian and Levant trade, and it appears that a bill to that effect was filed in November, 1863; that in December, 1863, the Lords Justices refused to grant an injunction according to the prayer of the bill; and that, on the 8th December, 1864, the said bill was dismissed by the Master of the Rolls with costs. The present notice, which is dated Saturday, 8th April, says:—"An appeal against that decree is now pending, and an application will be made as soon as possible to the Lord Chancellor or Lord Justices in Chancery for an injunction according to the prayer of the bill." Up to the 10th inst. no appeal had been made, and the International Financial Society are advised that there are no grounds whatever for supposing that such an appeal would produce the slightest practical effect. They nevertheless think it right to point out that there is a remote possibility that Mr Chapple might be compelled to withdraw from the board of direction, though, in all eventualities, Mr Dutton would remain, as he was not a party to the proceedings referred to.

As such a contingency, no matter how improbable, is still possible, the Messrs Chapple have agreed to leave in the hands of the International Financial Society, in the form of paid-up shares, the entire sum to be paid to them for their goodwill, until the question has been finally disposed of; and if, contrary to every probability, the final decision is against them, then they agree that those shares should be cancelled.

The present owners, feeling satisfied from their past experience of the trade, that under the new arrangements the profits of the Company will be of a large and increasing character, have agreed, as an earnest of their confidence in the undertaking, to guarantee to the shareholders a minimum dividend of ten per cent. per annum on the amount called up from time to time during the first five years of the Company's operations, subject only to the eventuality of a forced cessation of the Egyptian trade through political causes, an event which cannot but be regarded as in the highest degree improbable.

Applications on the annexed form should be left with the bankers of the Company, who will not, however, receive any application unless accompanied by the deposit of £1 per share on the number of shares applied for. If no allotment be made, the deposit will be returned in full; and should a smaller number than is applied for be allotted, the balance returnable to the applicant will be applied towards payment of the amount due on allotment. In case of an allotment being made, the deposit paid on application will be forfeited if the balance due on allotment be not paid within the term fixed in the letter of allotment.

Prospectuses and forms of application may be obtained from the International Financial Society, Limited, No. 60 Threadneedle street; from the Egyptian Commercial and Trading Company, Limited, No. 6 East India Avenue, Leadenhall street, and from the Brokers. The Articles of Association of the Company, and the agreement with Messrs Chapple and Dutton, can be inspected at the Offices of the Solicitors, No. 46 Parliament street, S.W.

FORM OF APPLICATION FOR SHARES.

No.—— (To be left with the Bankers.)

To the Directors of the International Financial Society (Limited).

Gentlemen,—Having paid to the sum of £ , being £1 per share on shares, I request you to allot me shares of £20 each in the Anglo-Egyptian Navigation Company (Limited), in conformity with the amended prospectus issued by you; and I hereby agree to become a member of that Company, subject to its rules and regulations, and to accept such shares, or any less number, that may be allotted to me, and to pay the further sum due on allotment thereof; and I request that my name be placed on the register of members in respect of the shares allotted to me.—I am, Gentlemen, your obedient servant,

THE DISCOUNT CORPORATION

(Limited).
34 Abchurch lane, London, E.C.
Capital, £2,000,000.
First issue, 10,000 shares, of £100 each.
Paid up, £200,000.

DIRECTORS.

James Bruce, Esq. | George Lyall, Esq.
Horatio S. Coulson, Esq. | Charles E. Mangles, Esq.
Charles B. Colchester, Esq. | Thomas Stenhouse, Esq.
Robert Peter Laurie, Esq. | John Torrance, Esq.
Edward Weston, Esq.

BANKERS.

The Bank of England.
Alliance Bank (Limited).
Messrs Barnett, Hoares, and Co.
The Union Bank of London.

At the Second Ordinary General Meeting of the proprietors, held at the London Tavern, Bishopsgate street, on Tuesday, the 11th day of April, 1865, the following report was presented:—

The Directors have the pleasure to submit to the shareholders a statement of the affairs of the Corporation for the half-year ending March 31st, 1865, showing a gross profit, including £648 1s 1d brought forward from last account, of £31,224 1s 10d, from which, after deducting rebate of bills not due, and current expenses, there remains a net profit of £16,111 7s 6d.

The Directors recommend the sum of £5,000 to be appropriated to payment of a dividend of 10s a share, being at the rate of rather more than 5½ per cent. per annum on the paid-up capital; and they have set aside the sum of £9,000 to meet bad and doubtful debts, leaving a balance of £2,111 7s 6d to be carried to next half-year's account.

Since the last meeting of shareholders, the Company has passed through a very severe and prolonged monetary crisis; and the Directors are satisfied that, considering the large number of commercial failures that have taken place, the amount, £9,000, which they have reserved from the half-year's profits, as the maximum amount of loss by bad debts, will be considered by the shareholders as moderate, and less than many have been led to anticipate. They have, further, much satisfaction in stating that none of the assets of the Corporation are locked up in inconvertible securities.

The Directors can report most favourably of the nature and position of the Company's business; but, as its prosperity depends greatly upon the amount of deposits, they would urge upon the shareholders that by bringing and influencing these, they will materially add to its success. THOMAS STENHOUSE, Chairman.

THE DISCOUNT CORPORATION (Limited).

Examined and found correct,
JAMES COOPER, } Auditors.
JAMES DUKE HILL, }
London, 6th April, 1865.

The notice dated the 24th March, 1865, convening the meeting, was read by the Secretary.

The report of the Directors, dated the 6th April, 1865, having been taken as read, the following resolutions were put and adopted:—

1. That the report and statement of accounts now received be adopted.

2. That a dividend be declared of 10s per share, free of income tax, being at the rate of rather more than 5½ per cent. per annum.

A vote of thanks to the Chairman and Directors having been proposed and carried, the meeting separated. THOMAS STENHOUSE, Chairman.
FRED. G. BONE, Secretary.
34 Abchurch lane, London, E.C., April 11, 1865.

THE TRUST AND LOAN

COMPANY of UPPER CANADA.
Incorporated by Royal Charter.
ESTABLISHED 1851.
Capital £1,000,000.
Paid up, £250,000. Uncalled, £750,000.
Reserve fund, £58,000.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.
William Chapman, Esq., Deputy Chairman.
James Hutchinson, Esq. | William G. Thomson, Esq.
Charles Morrison, Esq. | T. M. Weguelin, Esq., M.P.
BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 5, 7, or 10 years, at 5 per cent. per annum.

Any information required can be obtained on application to the Secretary. F. FEARON, Secretary.
65 Moorgate street, London.

SIX PER CENT. DEBENTURES.—

The Directors of the LONDON, ITALIAN, and ADRIATIC STEAM NAVIGATION COMPANY (Limited) are now prepared to receive Application for Mortgage Debenture Bonds to the amount of £40,000, secured on the six new steamers belonging to the Company, the value of which is £160,000, and the uncalled capital, amounting to £180,000, together £340,000.

The bonds will be issued in sums of £50 and upwards; be redeemable in three, five, or seven years, and bear interest (for which Coupons will be attached) at the rate of £6 per cent. per annum, payable half-yearly, at the bankers of the Company.

Forms of application, copies of the bond, and every information as to the Company may be had on application at the Company's offices—By order of the Board,
GEO. GRANT, Secretary.
Company's offices, 123 Fenchurch street, E.C,
London, April, 1865.

THE NEW ZEALAND LOAN AND MERCANTILE AGENCY COMPANY (Limited).

Incorporated under "the Companies Act, 1862," and to be incorporated by Act of the General Assembly of New Zealand.

Capital, £500,000, in 20,000 shares of £25 each. £1 per share payable on application, and £1 10s on allotment. Amount of capital proposed to be called up, £5 per share, or £100,000.

Calls not to exceed £1 per share, at intervals of not less than three months. The Directors deem it right to state that the Gentlemen constituting the Board of Directors of the Bank of New Zealand at Auckland have agreed to take 5,750 shares, which are to be allotted to them.

DIRECTORS.

Jameson Alers Hankey (Messrs Gellatly, Hankey, and Sewell).
Emanuel Boutcher (Messrs Boutcher, Mortimore, and Co.).

Detailed prospectuses and forms of application for shares may be had at the National Bank, 13 Old Broad street, and the Bank of New Zealand, 50 Old Broad street, City, to whom applications may be addressed.

The Share List will be closed on Tuesday, 25th instant.

THE INVESTMENT AND FINANCE AGENCY.

Established for the purpose of effecting purchases and sales on commission in every description of public securities, and for affording the necessary precautionary information for the safe investment of capital, &c., &c.

A record is kept of the status and prospects of the various public companies and foreign stocks; and as this Agency scrupulously declines speculative transactions upon its own account, the public have, first, the security of being protected by unbiassed information, based upon twenty-seven years' experience in the stock and share markets; and, secondly, the guarantee that any business which this Agency undertakes will be completed with the strictest fidelity.

During the past year 1864, no less than ten new foreign loans, constituting an aggregate capital of £22,271,000, and 232 new joint stock companies with an authorised capital of £155,887,500, were introduced upon the London market.

Never were there times which inculcated more forcibly than the present the necessity of experience and caution prior to the investment of capital, or when reliable services, such as this Agency specially renders, were more requisite.

The Finance Department includes the Agency of public companies, loans, deposits, &c., and advances are negotiated on public securities having a market value.

An important feature of this Agency is, that the same uniform system of strict attention is paid to transactions of small, as well as large amounts,—the object being, to increase its facilities for carrying out its operations to the greatest possible advantage by embracing the business of every description of investors.

Cheques to be drawn to the order of Mr Charles Peters, Secretary, and crossed The Agra and Masterman's Bank.
No 12 Clement's lane, Lombard street, London, E.C.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned. W. E. JOHNSON, Secretary.
Victoria Station, Pimlico, S.W., March 21, 1865.

EDGWARE, HIGHGATE, AND LONDON RAILWAY COMPANY.

The Directors of the above Company are prepared to receive tenders for Loans on Debentures, bearing Interest at 5 per cent. per annum, repayable in 3, 5, or 7 years. The line will shortly be opened and will be worked by the Great Northern Company, who have subscribed one-third of the capital.—Applications to be made to the undersigned,
EDWARD BELLAMY, Secretary.
19 Duke street, Westminster, S.W.,
March 16, 1865.

SIX PER CENT. DEBENTURES.

RECIFE AND SAN FRANCISCO PERNAMBUCO RAILWAY COMPANY (Limited).

—The Directors are prepared to receive applications for a limited amount of Debentures, in sums of not less than £100 each, bearing interest at the rate of 6 per cent. per annum, payable half-yearly.

Full particulars may be obtained at the Company's offices.—By order of the Board,
W. H. BELLAMY, Secretary.
15 Old Jewry chambers, London, Feb. 28, 1865.

EAST INDIAN RAILWAY COMPANY.

The East Indian Railway Company is prepared to receive Tenders for the supply and delivery of
PUMPING ENGINES,
as per specification and drawings to be seen at the Company's offices.

Tenders endorsed "Tender for Pumping Engines" must be delivered to the undersigned, on or before Twelve o'clock at noon, on Thursday, the 27th day of April instant (instead of the 20th as previously advertised).

The Company is not bound to accept the lowest or any tender.—By order of the Board,
D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk,
New Broad street, London, April 6, 1865.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE FALL OF RICHMOND AND ITS ETFECT UPON ENGLISH COMMERCE.

THE fall of Richmond is one of the most striking events of modern history. On the one side the great hopes of the Confederates, their equally great efforts, the sympathy they have gained in Europe: on the other side, the undaunted courage of the Federals, their refusal to admit, even to their imagination, the possibility of real failure,—their accumulating power, which for many weeks past has seemed to concentrate like a gathering cloud about the capital of their enemies, give to the real event the intense but melancholy interest that belongs to the catastrophe of a tragedy. It is impossible not to feel a sympathy with the Confederates. There is an attraction in vanquished gallantry which appeals to the good side of human nature. But every Englishman at least will feel a kind of personal sympathy with the victory of the Federals. They have won, as an Englishman would have won, by obstinacy. They would not admit the possibility of real defeat; they did not know that they were beaten; or, to speak more accurately, they knew that though they seemed to be beaten they were not: they felt that they had in them latent elements of conclusive vigour which, in the end, they should bring out, though they were awkward and slow in so doing. We may alter, perhaps, to suit this event, the terms which, in one of the greatest specimens of English narrative, the great English historian describes on a memorable occasion the conduct of Rome. "But there are moments when rashness is wisdom, "and it may be that this was one of them; panic did not "for a moment unnerve the iron courage of the American "democracy, and their resolute will striving beyond its "present power created, as is the law of our nature, the power "which it required."

But leaving history to deal in a becoming manner with the imaginative aspect of this great event, let us look at its present aspect in a business-like manner. The details of it are yet uncertain, and any conclusive judgment on minute results would be absurd. But, as far as we know, what does it amount to, and what will be its result?

It used to be said that Richmond was not essential to the Confederacy; that it was a nominal and accidental capital; that it was not even the original capital; that Virginia was but an outside State in a Confederacy with a vast interior; that even if this superficial outwork was lost, the war could be indefinitely protracted; that the fall of this exterior fortification would have scarcely affected the resistance of the provinces, upon which everything depended. And at the outset of the war when these words were used, they were doubtless substantially true. Subsequent events have in many respects confirmed them, and have in few tended to contradict them.

But now the case is altered. The loss of an outer fortification does not impair the resisting faculty, when it is lost early in the day—when its defenders have not spent upon it the resources which are needful to defend the citadel. It still appears to be true, that if sometime since when the Confederacy had three armies unbroken—when no hostile army had penetrated their interior—when their organisation was as yet intact, its Government had retired from Richmond, the war would not have ceased on the evacuation. The task of pursuing three armies retiring in a vast and friendly country by converging lines would certainly have been difficult, and might not have been successful. Loose bodies of insurgents, if such there were, would then have had large armies upon which to support their accessory operations. But now the Confederacy have no such armies. What Lee may have saved, what Johnston may still command, we do not know; but we may say without fear that they are incalculably less than the armies of the Confederacy a year ago, that they cannot maintain as compact bodies even a defensive and retiring conflict with the eager armies of the North.

But without organised armies, can the Confederates be defended by loose insurgents and guerilla warfare, acting alone and without support? We believe that history affords no countenance to such an idea. A guerilla warfare requires the aid either of disciplined forces or of inaccessible territory. The history of the Spanish war shows conclusively that the guerilla resistance of the nation would have been useless without the regular resistance of the English army under the Duke of Wellington; the Spaniards enabled him to effect more with fewer troops, but they did little themselves. A territory like Arabia, a mountain chain like the Caucasus, can be defended by a few bodies of men with little discipline as well as by many more with discipline. Nature does so much that *any* sort of human force is sufficient to complete it. But the territory of the Confederacy though vast is penetrable: it is not a fortress, it is only a battle-field: it is a country in

Digitized by Google

which a martial population, aided by effective armies, may well resist an invading enemy; but it is also a country from which even the most martial population may be brushed off with ease by diffused and disciplined forces.

Even under the most favourable circumstances a guerilla warfare by a nation of slaveowners must have unusual difficulties. The slaves cannot be relied on as a native peasantry can be relied on. It is said that Sherman on his march through Georgia always had good information regularly brought by negroes. We do not vouch for this as a fact, but it illustrates our meaning as an example. It is impossible that the existence of a slave class, which is not a part of the nation, which requires to be kept down by the nation, should not always be an impediment to the rising of the nation; and especially so in this case, when the invading army proclaims liberty to those slaves. We cannot expect a protracted guerilla resistance from a nation which has neither an inaccessible territory, nor a regular army, nor an attached peasant population.

But if the Confederacy cannot long defend itself, if the civil war must soon come to an end, what will be its effect on us? The war itself disturbed us much in its origin and much by its continuance, will it also disturb us much by its cessation?

It is undeniable that the fall of Richmond, such as we have ascertained it to be, would have been of disastrous consequences to several branches of English commerce if it had happened six months ago. When cotton and its substitutes were weakly held at extravagant prices, the sudden occurrence of so great a catastrophe must have caused of itself many failures. So many slow and steady agencies all tending to produce a fall of price were then operating, that the addition of a single one of a striking nature might have produced lamentable results. A great panic in one class of articles would in a sensitive state of the commercial world have produced a semi-panic in other articles. But *now* the case is different. Prices have greatly fallen. Whether they may have reached their lowest point exactly may be argued, but they have fallen so low that no great further drop is possible or likely. Many weak holders have been cleared away, and the nominal price in consequence is firmer and more real than the nominal price of six months since. The peculiar circumstances affecting cotton, we explained in an elaborate article last week. We showed that even on the assumption that "the civil war in America "must be near its close," there was no ground for thinking that cotton would experience a further fall, but rather a probability that the present fall had been too great and too sudden to be permanent. In fact, as so often happens, the effect of the defeat of the South has been *discounted;* the result of the expectation has been as great, if not greater, than the result of the event.

There is another circumstance of great importance. The world is getting "short of clothes," and especially of good clothes. When the war broke out great stores of cotton goods were found to be lying in warehouses at Manchester and elsewhere, and many persons were eager to raise the common cry of over-production; they fancied there was something anomalous and out of place in so vast an accumulation. But Mr Cobden, with that *real* perception of the facts of commerce which characterised his mind, immediately said, "No, there is no unnecessary accumulation, except in one "or two particular markets, as India and China, and in other "exceptional cases; we have not more goods on hand than we "ought to have." In reality, a very considerable accumulation of stored manufactures is an attendant condition, an inevitable consequence, of the present vast and delicate division of labour. When everybody is working for everybody, everybody is injured by the mischances of everybody. An English middle class consumer is fed and clothed by an immense multiplicity of labourers; their numbers are considerable, and they are of several kinds. If any one important species of these labourers is impeded, we risk the loss of some article of prime necessity. But we *insure* against it. We keep a stock of each durable article so considerable that we have much to last for a long time, even if the means of producing it have by some casualty suddenly stopped. Some people say the world ought always to have "two years' stock" of clothes on hand, and now we have nothing like it.

The effect of this will be very remarkable. When the American war broke out we *had* two years' stock on hand, and we lived on that till other sources of supply were opened and made effectual. The existence of that supply *insured* us then; its *non*-existence will insure us now. As we return to a usual and normal state of things, we shall tend to recur to our regular and habitual accumulation. We have not only now to clothe the world—we have to clothe it and something more. We have to make up our stock; to again create the guarantee fund, which shall insure us against any new calamities—against some deprivation of supply as sudden and as unlikely as an American civil war would have seemed five years ago. At that time any one who had prophesied the actual history of those five years would have been deemed a lunatic: our stored resources saved us then, and we must store them up again now to use them in like manner.

And this additional demand will gradually carry off an additional supply—especially if, as is likely, the clothes made with cheap material be better than the clothes made with dear material. There will be a capital demand for cotton and other goods, if once it is understood that the end is attained, that the bottom is reached, that the trader nearest the consumer—the a small shopkeeper—had better supply himself at once. The small shops of the world are now only half supplied; if they once take to supplying themselves, the demand will be great.

As far, therefore, as the producing power of America is concerned, we do not think its revival, even if it should occur very rapidly, would derange our market, or affect us except beneficially. Nor, as far as its consuming power is concerned, can we cannot expect much from the conclusion of the war. Some sanguine persons fancy that we shall at once have a vast trade with the United States the moment they are reunited—the moment the war stops. But there is no ground for so thinking either as respects the South or the North. *Some* additional trade with both, of course, there will be, but not enough to affect Lombard street—to alter the demand for the *capital* of England. First, as to the North, its tariff cripples to an incredible extent all commerce with it. It has been spending largely and recklessly. It has been borrowing largely and recklessly. It has been misusing its currency. The repentance after these errors will be a time of *strait* and difficulty, and though under good management its splendid national resources are quite sufficient to cope with this difficulty, yet the difficulty is real and considerable. The *additional* immediate trade which we shall have with the North will not be of the first magnitude—will not affect the money market.

Nor will the trade with the South. The South is disorganised, and must long be disorganised. What the fate of its peculiar civilisation may be we cannot yet say, for there are no data, and any conclusion is only "one guess among many,' one notion a little better perhaps than others, but without any solid ground of evidence. But so much is evident that great changes are in store for the South,—that it must pass through a social revolution,—that during the revolution it will not buy *as* it used to buy,—that after the revolution tastes will have changed, and it will not buy *what* it used to buy.

On the whole, therefore, the conclusion is, that though the catastrophe of the American war seems likely to happen more suddenly and more strikingly than could have been expected, yet its principal effect will have been already anticipated, and it will have less influence on prices and transactions than many events of less considerable magnitude.

THE SURPLUSES AND DEFICITS OF THE PRESENT ADMINISTRATION.

THERE can be no doubt that the present Financial Administion has been a remarkable one. Certainly it has taken off a great number of taxes, and certainly we have still a very flourishing revenue. Frenchmen, accustomed to a chronic deficit, cannot comprehend that the taking off taxes should be compatible with, nay should produce an augmenting revenue. But we do not wish on the present occasion to go into the general, social, or economical results of recent financ al legislation. We only wish to show by a very few figures what has been their effect in a purely financial point of view,—how have they succeeded in providing for the wants of the year, or how have they not succeeded.

The following table shows at a glance all which has occurred. The present Administration came into office in the spring of 1859—six years ago, and we have therefore the

Digitized by Google

following *completed* years of actual financial results to consider :—

	Surplus. £	Deficit. £	
1859-1860	1,299,000	—	Omitting the
1860-1861	... .	2,250,000	expenditure on
1861-1862	... .	1,442,000	fortifications.
1862-1863	1,301,000	...	—
1863-1864	3,152,000	...	—
1864 1865 ..... (Estimated)	3,423,000	...	—

We no not know the precise expenditure of last year, but assuming that the authorised expenditure has not been illegally exceeded, as doubtless it has not been, the figures we have set down represent the surplus :—

The revenue has been.....	£70,313,000
The estimated expenditure was.....	66,890,000
Surplus.....	3,423,000

We omit the expenditure on fortifications, because there is what the French would call an extraordinary Budget for them. We agreed, rightly or wrongly, to borrow that money by terminable annuities, not to find it out of the annual taxation.

The result of these figures is very plain. We contended at the time that the Budget of 1860 concentrated too many reforms into a single year, which, unhappily, was also one of largely augmented expenditure. Part of the estimated provision for the year was avowedly taken from temporary resources. Unhappily, also, both in 1860 and 1861 the English harvest was very defective, and the result was immediately apparent in our revenue. We thus had in those two years an augmented expenditure, a revenue affected by too many simultaneous changes, a paralysed production, and consequently a scanty revenue in the country. The consequences of this error are apparent in the account. But the merits of everything else are equally apparent. All the other Budgets of Mr Gladstone, except that of 1860 and its appendage 1861, have not only been successful, but eminently successful. There is no answering the figures. Finance *ought* to prove itself, and the late Budgets do prove themselves.

We have now been dealing with past Budgets—with a retrospect of realities. It would appear that on Thursday next Mr Gladstone will have an *anticipated* surplus of from 3,500,000*l* to 4,000,000*l* to deal with. Let us hope he will be as successful in dealing with it, as he has been in dealing with the surplus of recent years.

CANADA AND ENGLAND: THE CONNECTION AND THE VALUE.

THE issue of the present discussions in reference to our North American Colonies is one of such vast importance to the future position of England and the future destinies of Canada, that we are glad to hear all that can be said on any side of the question by persons competent to give an opinion, and to welcome any addition to our knowledge or any suggestions for our consideration, even though antagonistic to our own previous ideas. The difficulties of the whole subject are so great, and the consequences of a wrong decision may be so momentous, that no statesman or writer, adequately alive to the responsibility which weighs upon all who in either capacity undertake to advise the nation, will be disposed either to hurry or to dogmatise. In our last number we printed a thoughtful and very suggestive paper on our relation to Canada, because its arguments merit full attention, although we cannot indorse all its statements and assumptions, and although it by no means presented a complete or an exhaustive view of the entire question.

For example, we are by no means prepared to adopt the extreme opinion stated there and elsewhere as to the inherent indefensibility of Canada. It is true that, reckoning from the Atlantic to the Pacific, our territory has a frontier of 3,000 miles, but it is equally true that not 1,000 miles of this frontier is inhabited or would need to be defended, or would be in danger of being attacked. It must be remembered, too, that two-thirds of this frontier may be defended by water, and that on the water we are not yet prepared to acknowledge our inferiority to any antagonist. It must be remembered, also,—for it is most essential to avoid exaggeration on all sides,—that the vulnerable and assailable frontier of Canada is by no means so extensive as the vulnerable and assailable frontier of Great Britain. It is true, again, that our North American Provinces are so situated as to be very difficult of access to re-inforcements for one-half the year ;—but, on the other hand, it must not be forgotten that railways are year by year diminishing this difficulty, and, if we are not mistaken, that four years ago we *did* send large re-inforcements thither even in the winter, on the first suspicion of danger. Lastly, it must be admitted at once that the population of Canada is very scanty and very scattered ; but this fact, which lessens the defensibility of the country, lessens its vulnerability in nearly the same proportion. It is not easy to protect a province consisting of clearings and homesteads lying scores of miles apart ; but then, on the other hand, it is not worth while for the foe to devastate or occupy such a province. Where Canada is most vulnerable there the population is most condensed and most organisable for defence. And again, though Canada is comparatively a weak and thinly-peopled country, and the United States a powerful and populous one, and the entire resources of the one would be wholly unable to cope with the entire resources of the other ; yet the really practical question is what would be the relation between the entire resources of Canada backed by such energetic assistance as Great Britain could and would render her, and such a force as the United States would be able to bring against her, and such money as they would be willing to spend, in an unjust and aggressive war,—a war which would be condemned by the thoughtful, sober, and right-minded freeholders of America as unwarrantable, and dreaded and disliked by the merchants of America as disastrous to their commerce and menacing to their seaports. And another, and a very important question is this :—Granting (what no one will deny) that the conflict,—if it came now or soon, when our North American Provinces have not four millions of inhabitants, and those not as homogeneous or united as might be wished—would be a most perilous and unequal one, what will it be at a future time, after a Federation has been formed and consolidated, when twenty years of peace and progress have made Acadia rich and self-supporting, and when eight millions of people, with the alliance of Great Britain in the background, may be well able to stand alone and to hold their ground ? Canada is now increasing in population and, we believe, in wealth quite as fast as the States ; and when she numbers eight millions, who will then argue that she is indefensible, because she has a long frontier and a neighbour mightier and larger than herself ? We admit at once—no one would dream of denying—that the defence of Canada *at present* would be very difficult and very costly ; but we wish to point out that both pleas have been exaggerated ; that difficulty ought not to be magnified into hopeless impossibility, nor costliness into absolute ruin ; and that mischief has been done in more than one quarter by those who have declared that Canada must be abandoned whenever and as soon as she is attacked.

Again : the writer to whom we opened our columns last week is mistaken in his estimate of the value of Canada to Great Britain as a field for her surplus population, on two points, neither of which is unimportant. In the first place, the number of emigrants who have gone to our North American Provinces is not to be reckoned merely by the statistical tables of those who have sailed thither direct :—for many years considerable numbers went thither *viâ the States* as a cheaper and sometimes readier route, and we believe many do so still.* In the second place, though a far larger number of those who leave our shores go to the United States than to Australia and Canada together, yet it is by no means correct to assume therefrom that our people have no preference for colonies where they can live under British institutions and under their old allegiance, and would go to Canada as willingly as heretofore were Canada to become annexed to the neighbouring Republic. The very reverse we apprehend to be the truth. The vast majority of those who go to the

* Mr Cairnes states that there has of late arisen a considerable emigration *from* Canada to the States. But we have no doubt this has arisen from purely temporary causes—the enormous bounties offered having attracted soldiers and the enormous wages obtainable having attracted labourers from among the Irish and Americans resident in Canada.

Digitized by Google

States are Irishmen, who are attracted thither, among other inducements, by the very circumstance that the Government is *not* British;—the vast majority, on the other hand, of those who emigrate to Australia and our North American possessions are Englishmen and Scotchmen, attracted thither, among other inducements, by the circumstance that while changing their country they retain their Imperial nationality. An examination of statistical tables, if it were worth while to analyse them, would confirm this statement; and it is curious that for many years back the number of emigrants who have gone to the Australian and American colonies has tallied very closely with the number of Scotch and English who have left our shores. The truth is—it may be mere sentiment or prejudice, it may be sound reason and calculation, or it may be simply instinctive good sense, but so it is—Englishmen and Scotchmen have never been known, and we believe never will be known, to settle in numbers and for good in any countries where British institutions and British sway do not prevail. They go to India because they rule there in the name of the Sovereign at home; they go to Australia because its many attractions are not counterbalanced by the thought that they are going to live under the government of an alien race; they go to Canada because their friends are there and they can join them without renouncing their allegiance or subjecting themselves to new forms of administration, new masters, or new tribunals. Therefore we regard it as a great mistake on the part of some purely speculative and *doctrinaire* economists to argue as if all half-peopled countries would be equally attractive and available for British emigrants, if they were French, or American, or independent, as while owning allegiance to the English Queen—an allegiance always felt as a pride and a protection, scarcely ever as a yoke or a restraint.

Having now cleared the ground at somewhat greater length than we intended, we can proceed to the consideration of the main question.—We concede at once that neither Canada nor any other colony (properly so called—leaving out of view, as irrelevant to the matter now in hand, all naval and military stations) is of any material or pecuniary value to the Mother Country. Our commerce with her, under the new commercial doctrines, is not more favoured, nor more extensive, nor probably in any way more profitable, than it would be were she independent, or were she annexed. Her trade is free: she could scarcely impose heavier import duties on our manufactures than she does now and than we allow her to do; and *differentially* injurious duties are hardly to be feared, and would be precluded by the "favoured nation's clause" in any Treaty of Separation. But she is not merely no pecuniary gain to us: she involves us in a considerable pecuniary loss. She costs us something in civil government and much in military expenditure. She is a cause of much diplomatic trouble; the possession of her involves frequent disputes and a chronic latent danger—which from time to time assumes a very apparent and acute form. We can, therefore, have no *selfish* motive for wishing to retain her, and we have some selfish reasons for being willing to let her go. There are, however, three considerations which would weigh with most Englishmen in favour of maintaining the connection, unless the colony should wish it severed—in which case they would by common consent be held to be at once and indisputably *outweighed*. *First.* Imperial vanity would sustain a slight wound by the severance or surrender of a portion of that vast territory "on "which the sun never sets," and Imperial *prestige* and reputation for power might be supposed in the eyes of foreign nations to undergo some diminution. But English pride in her character, her generosity, and her residual Empire would soon reconcile us to the profitable loss,—and English good sense would never fret over a change which would prove a substantial augmentation of our available strength, because unknowing strangers fancied it to be a reduction. No Statesman now entertains the faintest doubt that the surrender of Canada, either to independence or annexation, would at once exonerate Great Britain from her greatest danger, and her most perplexing and difficult obligation. *Secondly.* The attractiveness and value of Canada as a near refuge for our surplus population would, as we have just shown, be somewhat diminished were Canada independent, and greatly diminished were she to join the United States. *Thirdly.* Those who believe that British rule and British institutions are better for a nation, more conducive to its welfare, its freedom, and its highest progress and development, than any other yet invented,—who hold that the English type of civilisation, even under the inevitable modifications which a rough colonial life must bring, is the one which in the best interests of humanity at large it is desirable should prevail and spread,—and who believe that the ultimate influence, the safety, and the well-being of the aggregate Anglo-Saxon race will be most effectually promoted by the extension of English forms and types of character and institutions over as wide a portion of the globe as possible—would regret the severance of a tie which, however silken and voluntary,—and in a measure *because* so silken and voluntary—does conduce to these beneficent results.

As a question, therefore, of pure national interests of the *material* sort, as a question of mere selfish policy, England would have every reason to rejoice were Canada deliberately and preponderatingly to desire to separate. As a question of natural sentiment and of lofty and philosophical estimate of what would be best for humanity at large and for the Anglo-Saxon race in the long run, we should incline to deprecate such severance. Practically, the issue of the whole case is this. We could not for an instant dream of permitting Canada to be wrested from us against her will, whatever efforts and sacrifices it might cost us to retain her. We could not surrender her voluntarily or cut her adrift unless she desired it, because our motives for doing so, especially at the present conjuncture, would be so obviously, or at least so apparently and so probably, unworthy and discreditable, that our national character for might and courage would suffer incomparably more from such a step than from the most decisive overthrow in war. (The voluntarily surrender of the Ionian Islands to Greece,—most irrelevantly quoted by our correspondent last week,—is not a case in point—but just the contrary. We gained in reputation and prestige by that surrender, simply and solely because it was so obviously spontaneous and unselfish, that even our worst detractors could imagine no motive for the unprecedented deed that was not magnanimous and disinterested.) But if Canada herself desired to sever her connection with the Mother Country, either because she shrank from the complicated perils in which it may involve her,—or because she wished to assert and believed she was able to maintain an independent existence,—or because she desired to join her powerful and formidable neighbour,—then we should give her God-speed, and a cordial farewell,—with, perhaps, a sigh, in which there might be something of affectionate regret, but much more assuredly of undisguised relief.

But does Canada wish for separation,—is she likely to do so—would she be wise to do so? This is the real point to ascertain; and on this it is for her to speak:—we can only reason and conjecture. We must put aside expressions and manifestations which belong to periods and causes of temporary irritation, such as has existed more than once before and as we are assured exists just now. We may put aside also such indications as the indiscreet and indiscreetly-worded decisions of Judge Coursol and Judge Smith, on the trials of the St Alban's Raiders, as well as the indecorous delight with which they were hailed by the Canadian populace. At the present conjuncture, it would appear that the recent debates on the fortifications of Quebec and Montreal, the expectation expressed by the whole Parliament that Canada would take her full share of the cost and the trouble that would have to be incurred in defending her, the cool tone of many of the speakers in reference to the maintenance of the colonial connection, and the broad and mischievous assertions of Mr Lowe and others that Canada could not be defended and, in case of war would have to be abandoned to the ravages of the invading army,—all these things have not unnaturally caused a considerable reaction in that loyalty to the Mother Country which shone forth so distinctly in the late proposals for a Confederation. But we believe that these feelings of vexation and anger will only be temporary. The Canadians might have reflected, and will soon remember, that niggardliness or want of generosity in any shape has never been the vice of Old England; that, as soon as she is satisfied her children love her and wish to remain with her, she will not defend them by driblets or by halves; that whenever she begins to spend for any object she spends freely and even lavishly, and although she may talk of 200,000*l* at first, and may mean no more, yet that 2,000,000*l* would assuredly be forthcoming if necessary and if deserved; and that, if the Canadians did their share with cordiality and without haggling, she in the end would do hers with overflowing liberality.

The population of Canada is a peculiarly mixed one. It may be classified as follows :—

Natives of Canada and the other North American provinces of British origin	1,050,000
French Canadians	880,000
Natives of England and Scotland	250,000
— Ireland	240,000
— other parts of Europe	30,000
— United States	60,000
	2,510,000

It may appear at first sight that that the loyalty of such a *colluvies gentium* to the British connection is not likely to be very ardent or very firm, or of a sort to stand against distinct danger, material interests, and demanded sacrifice and effort. The natives of the United States must undoubtedly be reckoned as, to a certain degree, an alien and a disturbing element ; yet their settlement in Canada must have been voluntary ; and their objection to British rule can scarcely, therefore, be very vehement. It would be a great mistake, too, we apprehend, to assume that the Irish in Canada have the same hostile feeling to Great Britain that is felt by their brethren in the States. Their having gone to Canada rather than to the United States is an indication to the contrary, and assuredly since their settlement in the colony they have had no reason for discontent. The French Canadians were at one time, as we know, so dissatisfied as to have broken out into downright rebellion ; but since the establishment of Responsible Government there, we believe this feeling has not only died out, as most certainly it ought to have done (for our conduct towards them has been every thing that is most considerate and forbearing), but has been exchanged for an active attachment to the British Crown. One thing is certain : they have no love for the Yankees ; they do not sympathise with them and are despised by them ; and less harmonious elements could scarcely be imagined than the rough, reckless, pushing, trampling, wandering American, and the social, unambitious, semi-patriarchal, contented, stay-at-home Frenchman of Lower Canada,—who, we must bear in mind, is not the restless, democratic, utterly transmuted Gaul of to-day, demoralised by half a score of violent revolutions, but the comparatively tranquil, gay, cheerful, pleasure-seeking Gaul of the reign of Louis Quinze. The quarter of a million native Scotch and English, who have transferred themselves and their capitals to Canada and identified their future with that of their new country, are and are pretty sure to remain actively attached to Great Britain ; and these form not only one-fifth of the entire population, but (along with the million of native British Canadians, who share their sentiments as a rule) the most educated, influential, and governing section of the people. One-half the population may, therefore, be classed as *actively*, and the other half, with few exceptions and passing breezes, *passively*, loyal to the Metropolitan connection. That is to say, as a matter of pride and affection, they prefer to form a portion of the mighty Empire of Queen Victoria, either to a feeble and precarious independence, or to absorption into the neighbouring Republic.

This, however, it will be said, and truly said, is a merely *sentimental* view of the question :—is it the wisest one, the one which statesmen and practical men, looking to the permanent and solid interest of the colony, ought to take, or will be likely to adhere to ? The *pros* and *cons* of the question are these. If Canada remain a dependency of Great Britain, she will, on the one hand, be the certain and constant battle-field in all wars between England and America,—wars which will be decided upon by English Ministries, according to their wisdom, or their passion, or their folly, and in the incurrence or avoidance of which the Canadians will have no voice, but of which they will have to bear the brunt. It will always be upon the cards that Canada may be overrun by hostile armies in consequence of a quarrel between England and America, originating in China, in Japan, on the coast of Guinea, or in the ports of Brazil or Peru. No doubt this is a most anxious and unpleasant possibility—so unpleasant and so far from improbable that the Mother Country would not be *justified* in retaining the colony if the colonists so dreaded the contingency as to wish to avert it by a separation. On the other hand, this is the sum total of all the arguments that can be brought against the maintenance of the Imperial connection—though a most formidable total beyond doubt. To set against it, there is the certainty of support with the whole strength of the Empire in case Canada were assailed by any covetous or vicious power ; and the prospect that, thus backed and thus protected, she may proceed in her magnificent career of increase and extension till she becomes in time almost an Empire by herself—the Russia of the New World—stretching from the St Lawrence to Vancouvers' Island, with boundless forests at one end and rich gold fields at the other ;—the control and interference of the Mother Country meanwhile being a mere shadow, and her protection and assistance a very substantial reality.

If Canada, in the face of the indisputable and ever present peril we have specified and wish in no wise to extenuate,—weighing the dangers against the benefits of British rule —should resolve on independence, she would still have a grandly possible career before her, with the possibility also of that career being rudely and suddenly cut short. Her Government would be far more costly than at present ; for she would have no subsidies or aids from the Mother Country, and must provide an army and a navy for her own protection. She would be independent—just as long as she was strong enough to maintain her independence. She would no longer risk being involved in British quarrels, but she would have, unassisted, to fight her own battle in those which she brought upon herself, or which might be fastened on her by the ambition, the greed, or the litigiousness of others. The United States would not attack her because she belonged to England,—but neither would they ever be deterred from attacking her because England was at hand to guard her. And if they did attack her, either because they longed for her river and her land, or because they were jealous of her greatness, or because local irritations had been fostered or mismanaged into angry quarrels and a plausible *casus belli*, especially if this attack came within a few years—she could make no effectual resistance, but must succumb at once and be annexed to the Union as a conquest and on conquered terms. Our own opinion is that Canada independent would be just as liable to invasion by the United States, as Canada a dependency of Great Britain. One strong inducement to invade her—one great set of occasions and provocations to invade her—would be removed ; but so also would one strong restraining consideration. The Americans *now* may often be tempted to seize Canada because she belongs to England ; but they are withheld from yielding to the temptation because she would be defended by all England's forces, and the struggle would they know be so desperate and costly a one as scarcely to be worth the danger and expense. The Americans *then*, if they ever *were* tempted to seize Canada (and at times we know they would be), would find the temptation become irresistible, because the conquest would be so easy and the cost so slight.

If, again, the Canadians, weighing on the one side the danger of the English connection, and the possible inefficacy of English protection, and on the other hand, the precariousness of avowed independence, should determine to annex themselves to the Great Republic of the West, they will unquestionably guard themselves at once and for ever—so far as human vision can foresee—against all the evils and dangers of war. They may thenceforward sleep in peace. They will (that is, the sum of the North American Provinces will) have about as many votes in the House of Representation in Congress as the State of New York, and, perhaps, as many votes in the Senate as Maine, Vermont, and Connecticut. They will have a share, though a feeble one, in determining the policy of their new country,—whereas now, in determining the policy of Great Britain, they have no positive voice at all, and only an indirect influence. To set against these weighty though material considerations, they will in our view, and probably in their own, have exchanged a nobler for a less noble allegiance, and committed their future to a somewhat lower type of civilisation, and a somewhat unworthier estimate of what development and progress mean.

To sum up the whole. If we retain Canada we shall do our duty by her in no lukewarm or grudging spirit, and shall defend her *cum toto corpore regni*. If she wish to remain loyal to her old allegiance, we shall expect that she, on her side, will be neither cold, nor half-hearted, nor niggard in her zeal. But it is useless and would be wrong and injurious to disguise the truth :—if the Imperial connection is by mutual desire to be preserved, it will be so on both sides as a matter of sentiment and affection purely ; for we cannot pretend that, as a matter of mere selfish and material gain, it is the *interest* either of England to retain Canada, or of Canada to remain faithful to Great Britain.

THE CONDITION OF ENGLISH VILLAGES.

THE Medical Department of the Privy Council is doing very good work indeed. It is carefully collecting, sifting, and collating the statistics for the discussion of that "condition-of-England question"—as Mr Disraeli used to call it—which will at no distant day be the first subject of debate. The year before last its officers organised an inquiry into the food of the labouring classes, demonstrating the melancholy fact that one-fifth of the population of Great Britain obtain too little food to keep them in perfect health. Last year they despatched Dr H. J. Hunter, a gentleman possessed of sharp eyes and some philanthropic feeling, to examine sample parishes throughout England and Wales, and report upon the cottage accommodation of the labourers. Dr Hunter has performed his task, and his report, which greatly influenced Mr Villiers in drawing up his Union Chargeability Bill, has at last been published. The picture is, we regret to say, even darker than had been anticipated. Mr Villiers' statistics as to the destruction of cottages are of course fully justified, but the Report contains much disagreeable information as to the condition of those which remain. Dr Hunter's plan of inquiry embraced a few parishes, selected apparently without design, in each county in England and Wales; he examined personally 5,375 houses, and seems to have questioned men of every class, more especially relieving officers and subordinates of the Board of Health, and the general result of his travels is thus summed up by Dr Simon, the experienced medical officer of the department:—"The household circumstances of the labourer are "now in the highest degree deplorable. Except in so far as they "whom his labour enriches see fit to treat him with a kind "of pitiful indulgence, he is quite peculiarly helpless in the "matter. Whether he shall find house-room on the land "which he contributes to till, whether the house-room which "he gets shall be human or swinish, whether he shall have "the little space of garden that so vastly lessens the pressure "of his poverty,—all this does not depend on his willingness "and ability to pay reasonable rent for the decent accommo-"dation he requires, but depends on the use which others "may see fit to make of their 'right to do as they will with "'their own.' However large may be a farm, there is no law "that a certain proportion of labourers' dwellings (much less "of decent dwellings) shall be upon it; nor does any law re-"serve for the labourer ever so little right in that soil to which "his industry is as needful as sun and rain." In almost every county he visited, Dr Hunter found villages and parts of villages in which the cottage accommodation was grievously insufficient, labouring families being compelled either to live like Asiatics in buildings best described as huts, or to eke out the heavy rent of larger cottages by cramming them with lodgers. The crowding is carried to a point at which there is actual danger to human life, the cubical space allowed to sleepers being sometimes less than half the amount secured by law to convicts, while the first principles of civilised life are of necesisty set aside. The sexes are, in fact, huddled together at night indiscriminately in rooms too small to allow even of space between the sleepers, a practice attended with consequences of which illegitimate children are, perhaps, the least terrible. It is quite necessary to speak with some plainness upon this point. All over the world the mass of mankind have but one sleeping room per family, and the practice has in some places, as in Bengal, Russia, and Ireland, not produced any visible ill effects. In this country, however, owing partly to the universal practice of sleeping in beds instead of about the floor, partly to our mode dress, and partly, we fear, to the low state of feeling upon all the relations between the sexes, overcrowding produces extreme moral mischief. The evil, unfortunately, is always not confined to cottages filled with lodgers, but extends into families, and Dr Hunter, though, as he avows, avoiding the subject, still gives hints of a state of affairs which, if fully made known, would force very vigorous action upon the Legislature. He advises proprietors to partition off the upper rooms of cottages into closets, however small, for although "something, perhaps, is lost to health "when the bedroom, originally measuring its 12 feet by 10, "is divided into sleeping cells by a plaster partition; but at "the same time much is gained to decency. To a Leicester-"shire lad who brings his bride to a home such as was seen "at Lubenham, already filled with adult brothers and sisters, "privacy is the first necessity. New married couples are no "edifying study for grown up brothers and sisters; and, "though instances must not be recorded, sufficient data are "remembered to warrant the remark, that great depression "and sometimes death are the lot of the female participator "in the offence of incest. There is such crowding in private "houses at Lubenham as would be prohibited by the police "in a common lodging house."

Occasionally the overcrowding is carried to a point which animals would resist. At Sutton, in Bedfordshire, Dr Hunter counted the residents in 14 houses taken without selection, and gives a dry little table of the result:—

"BEDFORDSHIRE—SUTTON.

	Bedrooms	Adults	Children		Bedrooms	Adults	Children
1	1	2	3	8	1	5	0
2	2	2	1	9	1	5	3
3	1	3	1	10	1	7	6
4	1	2	6	11	1	6	5
5	1	2	0	12	1	2	7
6	1	2	8	13	1	7	4
7	1	2	0	14	1	2	6"

In Hallingbury, Essex, he found that "Bedlers Green is a "poor quarter of the parish. Some of the cots although of "red brick were miserably dark and damp, being overgrown "with trees. I visited 18 houses, of which 6 had two bed-"rooms and 12 only one. In these last I found families of 4 "adults and 3 children, 4 adults and 3 children again, 3 "adults and 6 children, 2 adults and 4 children, 3 adults and "2 children, in all 30 adults and 29 children, in the 12 bed-"rooms." In Hartford, Huntingdonshire, "where 19 cot-"tages had been improved off the face of the earth, 14 single "bedroomed cots were visited. In one lived a married pair, "3 adult sons, 1 adult girl, and 4 children. In another 3 "3 adults and 6 children, the mother confessing to some "degree of inconvenience when all or any of her 3 additional "adult girls are home from service! One of these rooms in "which 8 persons slept measured 12 feet 10 inches by 12 feet "2 inches, by 6 feet 9 high; gross measurement, without de-"duction from projections, yield about 130 cubical feet to "to each. In the 14 bedrooms slept 34 adults and 33 chil-"dren." It is, however, useless to multiply quotations. The simple fact is that everywhere over England there are places, villages, and bits of villages in which the population live like litters of pigs in a stye. In very many more the sanitary arrangements are of the very worst kind, sewage, as we call it, being even a greater difficulty in villages than in towns. The trouble is greatly aggravated by the fact, put very plainly by Dr Hunter, that while the villagers have given up the natural and healthy habits of the savage, they have not secured the conveniences of civilised life. The result is a compromise which we do not care to describe, but which ensures at once, as if of deliberate design, the maximum at once of immodesty and of sanitary mischief.

It is not contended, that instances such as we have quoted form the rule in Great Britain; but, unfortunately, they are not the exception. There are of course hundreds of beautiful villages scattered all over England. The very great proprietors, such as the Dukes of Bedford, Rutland, and Newcastle, and the Marquis of Exeter, have rebuilt or are rebuilding their cottages on a grand scale, and lesser proprietors are very much tempted to build model villages as pleasant improvements in the landscape; but, says Dr. Hunter:—"In the "close village the scene is beautiful but unreal; without its "open neighbour it could not exist. Turning to this latter, "one sees miserable hovels, neglected cabbage gardens, the "inhabitants seeking work many miles from home; abandoned "by persons of competent means; the penal settlement for "people of bad character from all the country round. The "labourers' houses are usually in rows, built with their backs "against the extreme edge of the plot of land which the "builder could call his, and on this account are not allowed "light or air, except from the front. In various instances "the measurement of the rooms and the number of the family "will be found in this report, and the reason why the "labourer lives there can only be found in the reply to the "question, where else can he live? the owner will never ad-"mit him to the 'close' parishes of the estate." There is too much reason to fear that the majority of villages are either in this condition or contain poor quarters which, as the houses fill, fall into it helplessly. It does not pay to build good cottages for the sake of dividend, and as the owner of the soil is deterred from building them by the fear of rates, the task is left to men who screw out interest for their money

Digitized by Google

in rents which compel the tenants to divide the burden by recklessly overcrowding.

What is the remedy for this state of affairs? We fear that the only permanent one is the considerable rise in the rate of wages which emigration will probably produce in the end, but which will hardly come soon enough to change the habits of this generation. The cause of the overcrowding is poverty first of all. Labourers with large families take single room cottages in order to save the rent for bread, or, taking larger tenements, they make up for the expense by admitting numerous lodgers. The rate of wages is not subject to legislative interference, and almost all the remaining schemes suggested are mere palliatives of greater or less merit. Much will be accomplished by Mr Villiers' Bill, which will take away the pecuniary temptation to the destruction of cottages, and it may be possible to entrust the guardians or the vestries, or better still, the rural police, with the powers vested in the police of great cities by the Lodging House Act and the magistrates, with authority in certain cases to carry out suggestions from the Union surgeon. More may be accomplished by a State loan for cottages granted to proprietors on the principle of the drainage loan; but for real and great improvement we must, we fear, wait for the time now coming near when the farmers' competition for labour will be sharp, and good cottages will be supplied without rent as part of wages. Dr Simon, indeed, hints at another and quicker remedy—a legislative Act compelling every proprietor to keep up a certain number of good cottages to every hundred acres, but the suggestion is impracticable. No such law could be got through Parliament as at present constituted, and if it could be it would not work. The demand for labour shifts too rapidly for such a scheme to produce anything but a profitless outlay of capital already returning less interest than if invested in any other form; and to build cottages without necessity would be only to encourage the poor to seek work in places where it is least required, and therefore least remunerative. Free trade in cottages is, of course, impossible while land is held in few hands and valued for reasons other than the interest it returns; but the monopoly is not yet so complete that the Legislature is bound to pass a law imposing a maximum for third-class rents as it does for third-class fares. Yet, without such a maximum, no obligation to erect cottages would interfere with the landlord's right to do as he will with his own.

MR MILL AND MR COBDEN ON REFORM.

Mr Thomas Potter, the new member for Rochdale, has given to the world, through the columns of the *Daily News*, a letter from Mr J. S. Mill, containing his latest views on the question of Parliamentary Reform, and a short reply of Mr Cobden's, commenting on Mr Mill's communication. Both will be read with especial interest.

Mr Mill is, indeed, a thorough-going thinker and reformer. He will gild no pill to make it go down. He will emasculate no principle in order to give it a chance of ripening prematurely, and being carried out before the country is fitly educated for its adoption. The extent to which he is prepared to go is very startling, and almost takes away one's breath; but still, admidst the general confusion of ideas and unfairness of purpose which prevail among the Radical party, and to a great degree among Whigs and Conservatives also, it is refreshing and encouraging to hear the doctrines of a public man so eminent as Mr Mill, so thoughtful, so candid, so clear, so courageous, and who means to be so just.

As far as relates to the extension of the franchise Mr Mill takes up a position far in advance of every other publicist. Household suffrage is not enough for him. Manhood suffrage even would not satisfy him, and he cannot join in the agitation for it. He insists on "Adult" suffrage,—as any narrower formula would exclude women, whom he regards as just as much entitled as men to the franchise, and just as fit to exercise it. His only limitation would be an educational one: no one should be allowed to vote who is not able to read, write, and cypher. He is prepared to give the working classes their fair share, but no more than their fair share, in the representation;—but his idea of their fair share is that they should be enabled to return *one-half* the House of Commons. He will have nothing to say to the ballot, nor to equal electoral districts;—to the latter because it would be distinctly unjust in its practical working;—and any system of representation which does not provide for the clear *proportionate* rights of minorities, he very philosophically and consistently holds to be no *representation* at all, but simply an inequitable means of securing the legal tyranny of majorities.

It is perhaps scarcely fair to comment on Mr Mill's notions as to the extension of the suffrage to all adults of both sexes who can read, write, and say the multiplication table,—inasmuch as he merely states them, and does not give his reasons for them. But we may observe in passing that they seem to us open to the objection which lies against all doctrines based on the assumption that the franchise is a *right* of all whose disqualification cannot be proved, and against all *dogmatic* lines of inclusion and exclusion. No doubt many women could exercise the privilege of voting without inconvenience. No doubt, too, many women are far better fitted to exercise it than many men. But, then, it is equally certain that many young men of 19 or 20 years of age are much better qualified to vote than many men of 22, or 32, or 42. It is certain, also, that many persons of both sexes who can neither read nor write, and who could not do a sum to save their lives, are far fitter for the franchise in every way—far more honest, more suitable, and more reverent—than many others who could easily pass even the dreaded ordeal at Dean's yard. Even Mr Mill's wide formula would, however, be incomplete, without the addition of Parliaments elected annually, or (according to Charles James Fox's old phrase) "oftener if need be;"—since every adult would be practically disfranchised from the period he reached the age of twenty-one till the next general election. Under the present system, thousands of adults might be six years without a vote. All these lines of distinction, if professing to be based on abstract principle and right, appear to us alike untenable and unsound. We do not admit the claim of any citizen to a political privilege which it is not for the advantage of the State that he should possess.

Mr Mill's views as to the absolute justice and imperative wisdom of securing the due rights of minorities, are admirable, and put with wonderful simplicity and clearness. We agree with him, and would have nothing to do with any Reform Bill which did not effectually provide for this great end. He says: "But adult suffrage is not complete unless minorities have "their fair share of representation. If 50,000 electors "have to elect five members, it is not fair and equal represen- "tation that 30,000 of them should be able, by outvoting "the others, to elect all five. The 30,000 are only entitled "to three members, and the remaining 20,000 to two. This "is not, as is sometimes pretended, a proposal made for the "purpose of defeating democracy. On the contrary, it is "positively acquired by democratic principles. Democracy is "not the exclusive rule of the greater number and the virtual "disfranchisement of the rest, but the equal representation of "all; majorities returning a majority, and minorities a "minority. Mr Hare's admirable plan is the best that has "been proposed for securing the equal representation of "minorities, and would incidentally attain many other impor- "tant objects. It is, as I hear, making important way "among the intelligent leaders of the working classes at "Manchester. I should not, however, make that particular "plan a *sine qua non*; but the acknowledgment of the prin- "ciple, that minorities ought to be represented in proportion "to their numbers, seems to me indispensable, to show that "the working classes are willing to allow the same justice to "others which they claim for themselves. In the present "state of the constituencies, the working classes would them- "selves benefit by it. And it it hardly possible to exaggerate "the moral effect that would be produced in favour of them "and their cause, by such a proof that they do not aim at "merely substituting one class ascendancy for another, but "demand for every class a hearing, and such influence as it is "entitled to."

Mr Cobden's answer to this appears to us scarcely worthy of him. He does not actually deny the propriety of minorities being represented, but he declares himself unable to see the merits of the plan, and would prefer giving them "*a chance* of fair representation," to actually securing it to them;—and even intimates an opinion that the minority ought to have no political influence till they become the majority. At least so we understand the following:— "Thus, if the metropolis, for example, were entitled, with a "fair distribution of electoral power, to 40 votes, I would "divide it into 40 districts, or wards, each to return one "member; and in this way every class and every variety of

Digitized by Google

"opinion would have a chance of a fair representation. Bel-
"gravia, Marylebone, St James, St Giles, Whitechapel, Spital-
"fields, &c., would each and all have their members. I don't
"know any better plan for giving all opinions a better chance
"of being heard; and, after all, it is opinions that are to be
"represented. If the minority have a faith that their
"opinions, and not those of the majority, are the true ones,
"then let them agitate and discuss until their principles are
"in the ascendant."

Mr Mill's opinion that the working classes ought to command *half* the representation, will startle most readers even more than his demand for the admission of women to the suffrage. "Neither would I support equal electoral districts, because "I do not think that any one class, even though the most "numerous, should be able to return a decided majority of "the whole Legislature. But I should support any readjust-"ment of the constituencies that would enable the working "classes to command half the votes in Parliament. The "most important questions in practical politics are coming "to be those in which the working classes as a body are "arrayed on the one side and the employers as a body on the "other; as in all questions of wages, hours of labour, and so "on. If those whose partialities are on the side of the "operatives had half the representation, and those who lean "to the side of the employers had the other half, the side "which was in the right would be almost sure to prevail, by "the aid of an enlightened and disinterested minority of the "other. But there would not be the same assurance of this "if either the working classes or a combination of all other "classes could command a decided majority in Parliament."

We cannot enter upon even a cursory discussion of the question here; but surely there are several considerations which such a thinker as Mr Mill must have overlooked when he made this vast demand for a now unrepresented class; or at least he must have had one set of considerations and sympathies too exclusively in his mind. He writes as if the division between labourers and the employers of labour were the only, or at least the chief and only very important, class distinction in the nation. He omits, or appears to omit, too, the consideration of property, which lies in the preponderance probably of four-fifths in the hands of those classes to whom he would allot only half the representation. His proposal, finally, appears practically to place upon a level, in point of political weight and value, the wishes and opinions of the educated and the uneducated classes—to assume, at least, that the views prompted by such superficial and imperfect instruction as alone the mass of operatives and peasants can acquire, are as likely to be right, *or as much entitled to prevail whether right or wrong*, as the views adopted by those who have had the advantage of the most thorough intellectual training that England can bestow upon her leisure sons. Radical reformers habitually ignore, but Mr Mill can only momentarily forget, the grave consideration, that admission to the franchise gives a man a share *in governing others* as well as in deciding on his own affairs; and that thousands may be fairly competent for the latter function who have no pretension to the higher mental and moral discipline which alone can qualify them for the former, or entitle them to claim it.

MALT TAX.

(COMMUNICATED.)

We wish to draw particular attention to the following paper from the pen of one of our soundest and most experienced economists:—

1. It is a general law in economical science that a tax on any commodity, unmonopolised, falls on the consumer.

2. This I believe to be the case with the malt tax; and if so, it follows that after an adjustment, which could only occupy a short time, had been effected, the farmers would gain nothing by a repeal of the tax, unless in the capacity of consumers. Even if barley partook of the character of a monopolised commodity this would be true, because the increased quantity of barley demanded after the fall of price, consequent on the repeal of the tax, could not be produced at the previous cost as soon as an adjustment was complete, and, therefore, farmers would gain nothing by the change.

3. The only difference between this and the case in paragraph 2, which is probably what would occur in practice, would be, that in the first the consumers would gain the whole amount of the tax, while in the latter they would divide the gain with the landowner.

4. The inexorable law of competition must lead to this result in both cases. Neither faamers nor any other class of capitalists can in the long run obtain a highter rate of profit than that assigned to them by the struggle of the market.

5. But to descend from the general laws of science, let us look at the facts which would guide the process of adjustment after the abolition of the tax.

A. That the tax produces six millions per annum.

B. That the quantity of malt annually produced and consumed in England alone is about 40 millions of bushels.

C. That the tax, according to the best authorities, increases the the price of beer about 12 per cent., or from ½d to ¾d a pot—costing, say 4½d.

D. That a full allowance for the costs of collection and the inconvenience of interference with industry, &c., connected with the imposition of the tax, could hardly add more than a million to the national sacrifice imposed by the tax,—and that consequently a repeal of the tax would leave 7 millions in the pockets of the public which are now abstracted from them.

6. It is here assumed, in order to simplify matters, that the Exchequer could spare the 6 millions without the necessity of imposing other taxes. This, however, could not actually happen.

7. It is fair to suppose the quantity of beer consumed would increase in something like the same rate as the fall in price, viz., 12 per cent., and that instead of using 40, we should use 45 millions of bushels of malt.

8. The classes who could gain during the process of adjustments by the abolition of the tax are—consumers, landowners, farmers, maltsters, brewers, and publicans, in England, and abroad the growers and exporters of barley.

9. Consumers would doubtless gain something. More barley would be malted, more beer brewed, more of both commodities imported from abroad. Should the increase of beer amount to the quantity producible from 2½ millions of bushels of malt, the share of consumers in the first year would probably be equal to 3½ millions of money, or half the whole gain.

9A. That of landlords would be small. They could not at once increase existing rents—but when farms were to be re-let, somewhat higher rents would be offered for them, especially if suitable for barley growing.

10. Of the 3½ millions left to be divided between producers and distributors, a certain sum would fall to the foreigner for the increased quantity or increased price of barley imported after the removal of the tax. How much this would be, can only be guessed at. We may safely assume, however, that it would not be less than a third of the 3½ millions, or say 1,200,000*l*; this would leave about 2½ millions for England.

11. It is impossible to assign to farmers, maltsters, and publicans, their several portions of the gain arising from the inequality between the price of beer and the cost of production, but we may fairly divide it by assigning one-half, say 1,250,000*l* to farmers, the remaining 1,250,000*l* to be divided between brewers and publicans. In both cases it would be necessary to deduct from this gain the taxes paid by these classes to replace the loss to the revenue.

12. It need hardly be pointed out, that to impose or remove taxes, with a special view to the benefit of particular persons or classes, is in a high degree unjust and inexpedient.

13. The state of things in the second year of the adjustment would be so far altered that more barley would be malted, more beer brewed, that the price would again fall, the gain to consumers increase, and that of landlords, farmers, brewers, maltsters, and publicans diminish.

14. It may fairly be assumed that in the third year a normal state of things would have been attained. That is to say, that, under the law of competition, the share of the former tax previously falling to producers and distributors would have vanished, and that the whole gain would belong to consumers, and show itself in an equivalent reduction in the price of beer.

15. It has been shown above, that the increased demand for barley consequent upon a total abolition of the malt tax would probably amount to about 5 millions of bushels, an equivalent to 6 or 7 hundred thousand quarters of barley. It is idle to suppose that such a demand could so press upon the quantity of barley land as to increase sensibly the costs of production, especially as both barley and malt could be

Digitized by Google

imported from any part of the world free from duty. This would probably be true if the additional quantity of barley required were to be 7 millions instead of 700,000 quarters.

16. From what precedes, it may be considered as quite certain, that in all reasoning upon the malt tax, malt should be reckoned among the commodities unmonopolised, because producible in almost any quantity without any sensible increase of price.

17. In order to simplify matters, it has been hitherto assumed that the whole tax is to be abolished. The reasoning will of course be applicable, *mutatis mutandis*, to the case of a reduction in the amount of the tax.

In that case, however, the fall in the price of beer would be so small as to be almost inappreciable to the consumer; nevertheless, it would be such, under the effect of competition between producers and distributors, as to leave to the latter no more than the ordinary rate of profit.

18. A series of careful experiments have shown, as was to be expected, that barley is a superior feeding article to malt, but were it otherwise, the loss arising from the tax would not fall on the farmers but on meat eaters.

19. Some of the arguments of county members are of such a character as to make it superfluous to attempt their confutation. As, for instance, that there is some vast advantage in home brewing, especially among labourers. It is difficult to perceive why, if it would answer to them to brew in their cottages after the abolition of the tax, it would not answer now. The truth is, it would not answer in either case. The public brewer has such an advantage in capital, machinery, and knowledge, that even when his profit has been added to the cost of materials, beer can be sold by him at a price and a quality which must make it on the whole much cheaper than the beer of the private brewer.

20. It is almost as irrational to suppose that private brewing can hereafter exist to any marked extent as to imagine that the spinning and weaving of wool or cotton should become an object of domestic industry.

21. As no rational person can suppose that the Exchequer can bear a loss of six millions without the imposition of fresh taxes, which must be of a general nature, falling upon farmers as well as others, and as it has been proved that the gain to farmers from the abolition of the malt tax, insignificant even in the first year, would speedily vanish—it follows that if their petitions against the malt tax were to meet with complete success, the only gain to them would consist in a very slight fall in the price of beer, purchased by the imposition of some other tax, which, under the circumstances, could hardly be other than augmented Property Tax.

The object of the writer in what precedes has been to exhibit an exact picture of the action of those general principles of political economy, which would be called into play were the malt tax either abolished or diminished. The estimates of gain to each class being in their nature hypothetical, can only be considered as approximating the truth.

Agriculture.

GAME PRESERVING.

If any one doubts the mischief and the losses occasioned in this country by the preservation of game, let him go amongst farmers. North, south, east, or west he will find the same tales of ill blood between landlords and tenants, frequent bickering and mutual suspicions between them, the destruction of crops, the prevention of agricultural progress, and the demoralisation of the rural population as the direct results of game preserving. And these evils have undoubtedly increased of late years, for game preservation has year by year assumed a more noxious character. Once game was an object of sport. The landlord beating his tenants' stubbles and turnips for partridges, or assembling his friends and his tenants for a day's coursing, was regaled by his tenants and his neighbours with sympathy and goodwill. Farmers were the best if not the only game watchers required by a sportsman landowner. Now all that is altered. Game preservation is conducted on an entirely different system. It is not preserved for sportsmen, but for game butchers and poulterers. The tenant farmers are suspected and watched by a body of ill-conditioned gamekeepers, while the produce of their farms is destroyed, and their independence and self-respect greatly interfered with. The farm labourers are still more watched and suspected by the gamekeepers than their masters, and, as the last screw of this game law instrument of torture, the rural police have been rendered by recent legislation a body of game watchers. The discontent these things are calculated to produce in the rural districts is beginning to take outward form and expression, and under the influence of low prices and indifferent seasons, farmers are in many places expressing themselves openly and strongly against the existing system of game preserving.

We have now before us two expressions of rural views in widely distant districts, first, in the speech of a candidate for the representation of the agricultural (Scotch) county, Kincardineshire, and secondly, at the Dorchester Farmers' Club in the aristocratic county of Dorset.

It is a most pregnant sign of the feeling of the Scotch farmers on the game question, that a candidate for their votes makes that question so prominent a part of his address at a meeting of electors, where Mr Dyce Nicol, the Liberal candidate, thus referred to the subject. He said: "But there is another question, that of the Game Laws, which is attracting a great deal of attention, and which is every year the cause of increasing disagreement between landlord and tenant, from the large increase of four-footed game and the injury which is done to the crops. It is, indeed, a cause of great regret that this should be so. I am told that it is on many estates causing a state of bitter feeling on account of there being so little sympathy, and no readiness to alleviate what is found to be the cause of great complaint.....There is no doubt that if this cause of disagreement continues, some means must be devised for the purpose of correcting it—and whether there cannot be some measures taken for ascertaining and facilitating the recovery of damages by game.....If you send me to Parliament, you will send one who is not a strict preserver, but one who will show readiness to do something to alleviate the cause of which so great complaint is made. I have never found a tenant yet who grudged me a reasonable amount of sport..... I am glad to say that I never incurred the responsibility of raising an action for the infringement of the Game Laws." These sentiments thus expressed by a candidate for a county, and which were received with loud applause, show that the game question is taking a political position which will soon render it necessary for the Legislature to deal with it in a very different spirit to that which has hitherto been exhibited in Parliament in regard to game.

At the Dorchester Farmers' Club, Mr Wood read a paper on "The Excessive Preservation of Game," wherein he stated that "the preservation of game is one of the most fruitful sources of dissension and heart-burning between landlord and tenant; and in regard to game, there is amongst landlords "much wilful or unwitting ignorance of their (tenants') rights, and are quite heedless of their grievances," and that much of this is attributable "to a want of practical knowledge and acquaintance with business, to bad advisers, and false representations. He justly remarked that the preserver of game should be the occupier as well as the owner of the land on which the game is preserved, and he would then remember that the game subsists on the same produce as cattle and sheep. The game preserver not only consumes his tenants' crops, but often "promises his tenant that the game shall do him no appreciable harm, and then when the tenant complains of the hordes of hares and rabbits, he calls him a captious fellow and turns him out of his farm." Four hares and six or eight rabbits are commonly estimated as consuming as much in bulk as a sheep, and there is this difference between game and farming stock, that the former animals are constantly roving over the field at all times, while the latter are confined to convenient pastures and seasons. He then suggested various plans for alleviating the injury done by game to tenant-farmers, and suggests that it is doubtful whether poachers or gamekeepers cause most mischief in rural districts. It is said that farmers usually take their farms knowing that game is preserved, and that the rent is fixed accordingly, "but the more common case is that of a tenant taking a farm with a reserved right of sporting, and an honourable understanding that the game shall do him no harm." Such an arrangement is very unsatisfactory; "the indefiniteness of it ill conceals its disingenuousness. For what occurs, the rabbits have spoilt a few acres of wheat, and the damage is assessed at 40*l* or 50*l*. The landlord demurs and the tenant insists, and whether a compromise be made or the whole sum allowed, neither the landlord nor the tenant regard each other with the same feeling as they did before." And Mr Wood concluded with mentioning that, in the past year, when provender has been so unusually scanty, two cases had come under his notice, in one of which eleven hundred couples of rabbits, and in the other seven hundred couples, had been killed on one farm.

The remarks by the farmers present which followed the reading of this paper are highly instructive. Mr Hill had lived on a preserved estate in Norfolk where it was "the custom of gentlemen to have a waggon and two horses on *battue* days to go on the ground and convey away the spoil; and a station-master had told him that in less than a week *five tons of game* had been sent to the station by one gentleman after he had had one of these *battues*." Mr Hill had lost more than 100*l* per annum from game during 20 years on a farm of 350 acres; and he had offered that if the landlord would permit to kill down the game, he would keep 100 sheep for twelve months for the landlord gratuitously. Yet the landlord would not listen to his complaints. "The fact was," said Mr Hill, "gentlemen never could see a game case anyhow."

Mr Damen said, "it was the abuse of sport they had to complain of. He should be sorry to see the day when the country gentlemen could not get a fair day's sport for a fair day's exercise." He

Digitized by Google

was, however, sorry to see them go into the wood blazing away two or three hours without any exercise in return for it." He said, "Let a man become a strict game preserver, and he, however good and charitable he might be in other respects, seemed to become blind to the obligations which he owed to society."

Mr Saunders said the complaints of tenants to the landlord about game damage "were prejudiced by the opposition of gamekeepers, whose word was too often credited before that of the tenant." Two farmers of the district—Mr Brake and Mr Paull—"had made an experiment as to the amount of damage done by the rabbits, and for this purpose they had put four under a crate, which was moved about the field every day. In this way they computed that it would take about an acre of ground yearly to feed four and a half rabbits."

Mr Dugdale thought if a farmer took a game-preserved farm and suffered by it, he had only himself to blame, and it served him right. For partridge shooting and real sport the tenants would always prove the best preservers.

Mr Homer said a tenant knowingly taking a farm full of hares and rabbits had only himself to blame; but when a farm is taken it is often verbally agreed that the tenant may kill the rabbits; yet, when the damage is found to be done, and redress is attempted, the tenant at once receives notice to quit.

All this looks as if the farmers are beginning to stir themselves against game preserving, which has long been their bane.

Literature.

MANUAL OF POLITICAL ECONOMY. By HENRY FAWCETT. Macmillan and Co., London and Cambridge.

Mr. FAWCETT, in his preface, expressly disclaims all thought of putting forward his *Manual* as a rival to Mr J. S. Mill's well-known treatise on Political Economy, which he characterises as "perhaps the most remarkable work of that great author, and one that will be remembered as amongst the most enduring literary productions of the nineteenth century." Indeed, he modestly adds that he would not have published his book if he had thought that it would withdraw students from the perusal of a more complete treatise. But many, he thinks, may be induced to read an easier and much shorter work who would shrink from the labour and thought involved in mastering Mr Mill's. We think he is entitled to the praise of having fully succeeded in his aim, and that his book contains such an explanation of the principles of political economy as enables the reader to obtain a complete view of the science. The value of the book is certainly enhanced by the admirable summary of contents prefixed to it, which is so full and careful as to serve, as the author intended, as a complete analysis.

Mr Fawcett has divided his work into four books, the first three of which treat respectively of the production, the distribution, and the exchange of wealth, while the last is devoted to the consideration of the elementary principles of taxation. He ventures on a very happy emendation of Mr Mill's definition of productive labour, namely, that it is "that which produces utilities fixed and embodied in material objects." This, no doubt, covers by far the greater number of cases of productive labour, which is generally exercised either in combining the raw material which nature furnishes into products which have an exchangeable value, or in conferring upon substances the utility of placing them where they may be required. But according to this definition, as Mr Fawcett remarks, "the labour of the teacher is unproductive, from whose instruction a mechanic acquires his skill. And yet the skill of our workmen ought to be classed as wealth, because the loss of this skill would diminish the wealth of the nation as much as if she were deprived of a great amount of material wealth." Still, if the skill of the workman be termed wealth, the word is forced beyond its popular signification, which always implies something material. He suggests, then, the following definition: Productive labour is that which either directly or indirectly produces utilities fixed and embodied in material objects. Thus amended, the definition would embrace the teacher's labour, as by imparting skill to the workman, it *indirectly* produces utilities embodied in material objects. We must, however, take exception to Mr Fawcett's classification of money spent by a Government on warlike material as unproductive expenditure, though he is careful to guard himself from being supposed to express an opinion adverse to military preparations. He has himself said that the labour of a policeman is productive, inasmuch as he confers on all commodities the essential utility of security; and if so, as the world is now constituted, the labour of the soldier is also productive, as he confers security from foreign aggression as much as the policeman does from domestic lawlessness; and money spent in providing him with the materials necessary to his calling—cannon, bombs, iron-plated ships, &c.—is money spent productively. Of course, however, all sums spent in maintaining troops or providing military stores beyond the amount necessary for security is money spent unproductively.

The true theory of rent has ever, as is well known, been a severe *crux* for the student of political economy. It was reserved for Ricardo to point out the error into which the illustrious founder of the science, Adam Smith, had fallen in enumerating it as one of the elements of the cost of production. *Prima facie* no doubt it *seems* to be such; so much so that Mr Buckle lays it down that it requires a most comprehensive thinker to grasp the true doctrine. Mr Fawcett has given the following proof of Ricardo's great proposition, which seems to us at once clear, brief, and conclusive:—If rent is an element of the cost of production, food could be produced at a cheaper rate if all land were made rent-free. Let us suppose this done. Now, in every country there is certain land so poor that it will only pay to cultivate it if the rent is nominal. When from its gross produce has been subtracted the necessary expenses of cultivation, a sufficient sum to be a fair remuneration to the farmer for his labour of superintendence, together with the ordinary rate of interest on the capital he has invested, the residue is nominal. If the land can be had at a nominal rent, it pays to cultivate it; otherwise not. Now, on our hypothesis all land has been made rent-free; but this, of course, will exert not the slightest influence on the consumption of food. "The same quantity of agricultural produce would be required as before; the same area of land would, therefore, have to be cultivated. That land would, therefore, have to be tilled which previously only paid a nominal rent; but, if food was rendered cheaper by making land rent-free, this land, which before only paid a nominal rent, would be cultivated at a loss. But no farmer would continue to cultivate land at a loss—this land would, therefore, go out of cultivation; but this cannot be, because the demand of the country for food is such that the produce of this land cannot be dispensed with." Therefore, food would not become cheaper by making land rent-free; and, therefore, rent is not an element of the cost of production.

Mr Fawcett has devoted several chapters of his work to a discussion of some of the economic subjects which are exciting special attention at the present day,—Trades unions and strikes, co-operative societies, slavery, &c. &c. With regard to the first of these, he shows that it is impossible for a trades union *permanently* to raise wages in any trade except by restricting the number of labourers employed in that trade, and that all such restrictions are in the highest degree illegal and reprehensible, as involving the overcrowding of other departments of labour, and infringing one of the most indefeasible rights of every human being—that he should be free to employ his labour as he pleases. They can, moreover, only be supported by having recourse to direct social terrorism. Without such restrictions, he considers it impossible that the rate of wages should be permanently raised by a strike among the workmen; for, since there is but a certain sum to be divided between profits and wages, if the latter are increased the former must of necessity be reduced, the speedy consequence of which would be, that capital would be withdrawn from the special industry to seek more advantageous investments elsewhere, and thus the wage fund must be lessened. But that a strike might exert a temporary influence on wages is quite possible, the reason why they so generally fail in doing so being that the labourers, under the impression that capital is their natural enemy, are apt to strike for higher wages at a time when through a natural depression in that branch of industry the rate of profits is exceptionally low, and masters could only pay the higher wages at a direct loss. If, on the other hand, they strike when business is active and profits high, and the employers delay to share this prosperity with their workmen, they are very likely to obtain their demands if not unreasonable, since it would be far more for the interests of the masters to yield rather than by holding out to render themselves unable to avail themselves of the advantages which the time offers them. That employed as well as employers, if they keep within the limits of the law, have a perfect *right* to combine, Mr Fawcett holds as incontestable. He argues the happiest results from the rapid extension of late years of co-operative institutions, as enabling the labourers to enjoy a far more favourable distribution of wealth, and, moreover, securing this advantage to them without the least suspicion of injustice having been inflicted on any other class. But he thinks it important to distinguish between co-operative stores and co-operative trading societies. For the first success may be almost guaranteed. "A certain number of customers are secured before business is commenced; the expenses are extremely small, no credit need be given, and therefore the operations can be extended and contracted, and consequently no great loss need ever be incurred by a falling off in the demand." The wonderful success which has attended the Rochdale Pioneers' store certainly seems to bear him out in his opinion. A co-operative trading society is an affair of greater risk. One of these societies—that of the co-operative masons, established in Paris in 1848, has undoubtedly prospered in the highest degree. When this society was re-organised in 1852, it consisted of only seventeen members, and possessed no capital. "They resolved to create a capital by depositing in a common chest one-tenth of their daily earnings. At the end of the first year, a capital of 14*l* 10*s* was in this manner created. At the end of the year 1854 the capital had increased to 680*l*; and in 1860 the society consisted of 107 members, and the capital possessed by them was 14,500*l*." Some most important buildings in Paris are the work of this society. Still, all such societies are really joint stock companies, and whenever any such company undertakes an ordinary business, there is wanting that energy and watchfulness which an individual displays when the business is his own. On the other hand, as the capital required is supplied by the labourers, each individual employed

Digitized by Google

participates in the profits realised, and has therefore a direct interest in the work in which he is engaged, a consideration which has an undoubted tendency to call forth his energy and activity. But on the whole, as the risks to which such societies are exposed must be allowed to be considerable, Mr Fawcett would have them undertaken not without great caution, and insists that the business ought not to be of a speculative nature.

In a chapter on the recent gold discoveries, Mr Fawcett attempts to investigate the question whether the value of gold has been depreciated, and there has consequently been a rise in prices in consequence of the greatly increased supply from Australia and California. He concludes that the mere fact of the subject admitting of so much doubt and dispute, shows that hitherto at any rate the depreciation can have been but slight. This, however, may be due to two causes, the enormous extension of our trade and commerce consequent upon the adoption of free trade, and the demand for the precious metals made upon us by the East. 12,000,000*l* are exported there annually. The influence which is yet destined to be exerted on prices by the recent gold discoveries must, he thinks, depend mainly on the future position of our trade with India and China. "The balance of trade," as it is called, is now largely against England and in favour of China, but should the Chinese,—which, considering their shrewdness in pecuniary matters, is likely enough,—recognise the advantage of exchanging their tea and silk, not for the precious metals, but for some commodities of European manufacture, the metallic stream being thus as it were turned back upon England, might well cause the value of gold to be rapidly depreciated, and the consequence would be a general rise in prices. "If we carefully weigh all the facts bearing upon the subject," says Mr Fawcett, "we are inclined to believe that the chances are rather against than in favour of such a depreciation; but still its occurrence is by no means improbable, and we, therefore, think it ought to be considered in all transactions involving the continuance of fixed money payments during a considerable time." Our space forbids us from following Mr Fawcett in his exposition of many other important branches of his subject, but we think enough has been said to enable our readers to form a due estimate of the merits of this very useful and interesting volume.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 20th inst. The return for the previous week is added:—

DEBTOR.

	April 20, 1865. f	c		April 13, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,043,377	64	.....	7,042,904	27
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	811,751,175	0	.....	806,557,975	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	6,901,894	14	.....	6,236,498	76

	1,287,610,364	7	.....	1,279,175,042	42

The return of the Bank of France is again more satisfactory in a commercial point of view. It shows a decline of 1,851,000f in the metallic reserve, and an augmentation of 10,708,000f in the discounts, of 5,194,000f in circulation of notes, and of 2,107,000f in the deposits.

The Bourse has been somewhat agitated, and does not take a hopeful view of "the situation." The consequence is that in most quotations there has been a fall, as will be seen from the following:—

	April 13. f	c		April 20. f	c

The new Mexican loan is the grand topic of the day, not only in financial circles, but among the public. Financiers are much struck with the extremely ingenious plan of investing a portion of the proceeds of the loan in the French Three per Cents. at compound interest for fifty years, so as to render absolutely certain at the end of that time the reimbursement of the capital advanced, even in the not very probable event of Mexico itself going to wreck and ruin. The plan is not altogether new in financial speculations, but it is manifestly as applicable to all great enterprises as to loans; and consequently it is calculated, if brought into general use, to produce a marked modification in the employment of a nation's savings, inasmuch as by rendering capital certain to be repaid after a period more or less long, it will encourage investments in the somewhat hazardous speculations which promise a high interest, in preference to Government funds and other solid securities which yield only a low one. The author of the plan is an eminent dignitary of the French Ministry of Finance,—M. Sapia, Directeur-General du Mouvement des Fonds. It is he, also, who devised and settled all the other details of the operation.

The public, whilst not unmindful of this new combination, are much struck with the high interest which the loan is to bear, and still more with the lottery attached to it. The subscription is not to be formally opened until the 22nd, but every day since Saturday last, the Comptoir d'Escompte has been besieged by crowds of people of all classes anxious to put down their names as intending subscribers, and to make the deposit required. The Comptoir has consented to count these enthusiasts as subscribers of the first day; and accordingly all the bonds they ask for will be awarded to them, unless, indeed, the demands exceed the number to be apportioned. In the provinces a very large subscription is calculated on, as, in addition to the patronage of the Comptoir, which establishment possesses vast influence among the trading classes, the Receivers-General of Taxes are by order of the Minister of Finance to accept subscriptions; and some of the latter I perceive are actually advertising in the newspapers their readiness so to do. This interference of the Receivers-General, and the facts that a high official of the Finance Department planned and prepared the loan, and that it is announced by the Comptoir d'Escompte to be issued with the permission of the Minister, evidently engage the moral responsibility of the French Government; and in such a matter moral responsibility is almost as binding as a legal one.

The holders of the Mexican loan of 1864, which, from various circumstances did not obtain the success that was anticipated, complain that the extraordinary advantages accorded to the new loan are calculated to depress their stock, which, though lately improved, stands much below the figure at which it was subscribed. The complaints being considered reasonable, the intention, I hear, exists of converting the stock on terms favourable to the holders. The operation, if definitively resolved on, will probably take place about the 15th May.

M. Michel Chevalier has paid in the *Journal des Debats* a tribute to Mr Cobden, and of the many that the services of the deceased have called forth, none assuredly is more discriminating, more touching, more eloquent. The family and friends of Mr Cobden will probably value no other so highly, as they know the profound esteem in which he held the distinguished commercial reformer of France, and that he cheerfully acknowledged that the

Digitized by Google

work accomplished by M. Chevalier was really greater than that which he did in England, seeing that prohibition and protection were much stronger here than there, were defended by men of a fiercer stamp, and (regard being had to the situation of the country) greater political power,—seeing, too, that the mighty instruments of the press, and of meetings by which public opinion is excited and moulded, could here only be employed, the former on a very restricted scale, the latter not at all.

In order to aid the inquiry into banks, the currency, commercial crises, &c., with which the Superior Council of Commerce is charged, the Governor and Directors of the Bank of France have caused to be published translations of portions of the evidence bearing on such matters, which was given before the Committee of the House of Commons on the commercial crisis of 1847, and before that on the Bank Act in 1857. Naturally, the parts selected are confined to those which tell in favour of the doctrines defended by the Bank. The selection has been made by M. Coullett and and M. Juglar, and it is they who have superintended the translation.

The shareholders of the Northern Railway have held their annual meeting to-day, and the dividend declared was 67f, 5f more than last year.

The meeting of the shareholders of the South of Austria, Lombard and Central Italy railways, which was called for the 22nd April, has been postponed to the 16th May, in consequence of the number of shares deposited not being sufficient to enable a meeting to be regularly constituted, and of the formalities to be executed relative to the vote of the Chamber of Deputies of Italy sanctioning the sale to the company of certain railways requiring delay.

The directors of the Lyons and Mediterranean Railway have resolved that the dividend of 1864 shall be 65f. Of this sum, 25f were paid in November last.

The Seville to Xeres and Cadiz Railway Company has been definitively condemned by the Imperial Court to pay M. de Kerveguen, a contractor, 917,972f for work executed by him and for breach of contract.

In a recent meeting of the shareholders of the Charentes railways, it was stated that the first section, from Rochefort to Cognac, will be opened towards the end of the year, and an account was given of the financial situation, from which it appeared that the 12,500,000f paid up on shares being absorbed, either a new call had to be made, or a loan to be authorised. The directors recommended the latter, and accordingly an issue of 16,000 bonds at 260f, to be paid off at 500f, and to receive 15f a year interest, is now taking place.

The Bank des Depots et Comptes Courants is soliciting subscriptions to 76,000 bonds of the Turin, Savona, and Acqui railways at 215f, to be paid off at 500f, and to bear interest of 15f. The Italian Government guarantees payment of interest and the reimbursement of the bonds. The company's lines, though only of 121 miles in length, are of considerable local importance. It has a highly respectable English board of directors, as well as an Italian one.

From a report of the Federal Bank of Berne just published, it appears that the net profits of 1864 were 367,853f, and that, after carrying a sum to the reserve fund, and deducting the per centage allowed to the founders and directors, a dividend of 5f 50c could be declared, which was rather more than 6 per cent. per annum on the paid-up capital.

It was stated in the ECONOMIST of the 8th, that the Sous Comptoir du Commerce et de l'Industrie of Paris had sustained such heavy losses that it could only declare a dividend of 7f 50c for 1864. According to the report of the directors, which has just been published, the most important of the losses amounted to 707,000f, and was occasioned by a Bordeaux merchant, who obtained advances on forged bills of lading and forged bills. There were also two other losses, but of less importance, and one dating back to 1862 has not yet been received. As the Sous Comptoir does only a modest amount of business, its ill luck has occasioned some surprise.

The Comptoir d'Agriculture has declared a dividend of 17f for 1864; it is equal to 7 per cent. of the paid-up capital.

The Societie des Depots et Comptes Courants has fixed its dividend at 5f for the second half of 1864; that of the first half was 4f Onup this company's shares 125f have been paid.

The Societie des Credits Generaux de Saint Nazaire has been refused official quotation at the Bourse, for the reason that such of its shares as are subscribed being held by an extremely limited number of persons, it would not be possible to ascertain that *bona fide* transactions took place in them. This company is the one with which the Saint Nazaire Company of London voted an amalgamation a few days back.

M. Arles Dufour and Co., of Lyons, have issued a special circular dated the 18th, on the effect produced on the silk market by the recent news from America. "As to raws," it says, "of which the stock is excessively low, there have been few sellers, even at an advance of 3, 4, and 5 per cent. on the prices of the preceding week. The demand has been very active. The effect produced on foreign markets cannot yet be appreciated. According to our last despatches from Switzerland and the Rhine, manufacturers do not display the eagerness to buy which might have been expected."

The quarterly return of taxes has just been issued. Of direct taxes, 119,310,000f were received in the first quarter of 1865. They exceeded by 31,984,000f the amount that could legally have been exacted, the direct taxes being payable in monthly instalments, and a month's credit being allowed. In the first quarter of 1864 the sum paid in advance was 31,559,000f; but whilst in that period the legal expenses to enforce payment were only 43c the 1,000f, they were this year 44c. The total amount of direct taxes due for the year 1865 is 523,954,000f, so that after deducting the said 119,310,000f paid, there remains to be collected 404,644,000f.

The indirect taxes received in the first quarter of 1865 amounted to 272,579,000f; and they were 19,073,000f less than in the corresponding quarter of 1864, and 25,846,000f less than in 1863. These diminutions, which at first glance are rather startling, are thus explained:—In 1864, February being bissextile, the quarter's receipts were augmented by about 3,000,000f, the extra day's revenue, and no reduction in the registration duties had been effected. Moreover, the new system adopted for the payment of the sugar duties this year throws over to other quarters a large sum which last year would have been paid in the first one. Apart from the sugar duties, the first quarter of 1865 would have presented an increase of 1,818,000f compared with the corresponding one of 1864,—deduction made of the extra day of February and of the reduction in the registration dues; in the sugar duties the decline was 20,891,000f. Deducting the 1,818,000f of increase from the latter sum, the diminution of 19,073,000f, above mentioned, is presented. In the comparison of 1865 with 1863, the new *regime* of sugar is alone responsible for the falling off: apart from it, there was an increase of 2,121,000f; and it produced a deficit of 27,967,000f. Deducting the former sum from the latter, the aforesaid decline of 25,846,000f is arrived at. The following is a detail of the indirect revenue for the first quarter of the present and of each of the two preceding years:—

Designation of Taxes.	First quarter of 1865. f	First quarter of 1864. f	First quarter of 1863. f
Registration, mortgage dues, &c.	79,761,000	79,859,000	82,071,000
Stamp duties	19,925,000	18,538,000	18,229,000
Import duties on grain	32,000	54,000	338,000
Do. on different sorts of goods	15,603,000	17,072,000	17,43[illegible],000
Customs duties on exports	46,000	91,000	304,000
Navigation dues	803,000	840,000	774,000
Various Customs duties and receipts	279,000	287,000	297,000
Tax on salt levied in Customs districts	5,683,000	5,391,600	4,777,000
Tax on wines, &c.	52,438,000	52,075,000	51,054,000
Tax on salt levied beyond the Customs districts	2,178,000	2,028,000	1,971,000
Various duties and receipts	12,705,000	11,699,000	11,895,000
Sale of tobacco	56,016,000	55,544,000	54,284,000
Sale of gunpowder	2,230,000	2,921,000	2,606,000
Post office	15,733,000	15,248,000	14,967,000
Tax on French money orders	311,000	301,000	282,000

Duty on articles of value sent by Post	212,000	191,000	170,000
Transit duty on foreign mails	20,000	27,000	112,000
Various receipts	14,000	10,000	7,000
Sugar duties—French colonial	3,003,000	4,940,000	10,005,000
Foreign	2,734,000	18,072,000	9,418,000
Native beetroot	2,848,000	6,464,000	17,129,000
Total	272,579,000	291,652,000	298,425,000

The following is the market report :—

FLOUR.—At *Paris*, yesterday, commercial flour was firm, at the same prices as last week. Six marks more demanded at 47f 75c the sack of 157 kilogs for current month, 48f May, 49f 29c four months of May. Type Paris, the 101 kilogs, 28f 75c disposable.

WHEAT.—At *Paris*, yesterday, choice white was 27f the sack of 120 kilogs; choice red, 26f to 26f 25c; first quality, 25f to 25f 50c; current sorts, 24f to 24f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 4,547 bales and picula, the greater part Indian and China, and the arrivals 1,415. The stock was estimated at 63,055 bales. The closing quotations were 5f higher for Brazil, and all other sorts unchanged. Low New Orleans was consequently 200f the 50 kilogs; good ordinary qualities in Broach 120f; in Tinnevelly, 110f; in Madras, 125f; in China, 115f; in Jumel, 180f. On Saturday, in consequence of the grave news from America, the market was very calm, only 170 bales being sold, and prices fell from 2f 50c to 5f the 50 kilogs. On Monday the fall made greater progress, but on Tuesday the market was firmer. Yesterday also, although the demand was not active, firmness prevailed: American, 185f; Jumel, 175f; Oomrawattee, 110f, 105f, 90f; Broach, 105f and 100f; Tinnevelly, 100f; Madras, 117f 50c; Salem, 100; Coconada, 100f and 97f 50c; Bengal, 72f 50c; Japan, 110f; China, 100f 95c and 90f. According to a telegraphic despatch, prices were firm in the early part of this day.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 2,100 sacks Hayti, Port-au-Prince, Jacmel, and Cayes, 80f to 82f the 50 kilogs in bond; 115 Cayes for delivery, 80f; 2,950 Gonaives disposable, 85f 50c to 87f 50c; 1,700 ditto for delivery, 87f; 200 Saint Marc for delivery, 90f; 1,500 Cape disposable, 84f; 1,300 Rio not washed, disposable, 72f to 76f; 2,560 ditto for delivery, 78f; 53 Cazingo, 84f; 18 Mysore, 95f in bond. By auction, some lots of damaged Hayti, Rio, and Santos were sold. The arrivals exceeded 2,300 sacks. This week, La Guayra, 97f in bond; Rio for delivery, 75f 50c to 76f 50c; Hayti, old, 81f; Porto Cabello, 97f 50c to 101f. Some damaged Hayti and St Marc have been sold by auction. At *Nantes*, last week, 500 sacks Port-au-Prince, 82f; 50 Reunion, sound, 160f, duty paid. This week, Guadaloupe, 158f and 160f; Reunion, 75f. At *Bordeaux*, last week, 300 sacks Mysore, 118f; 1,450 La Guayra grage and non-grage, 65f to 106f; 75 Malabar, 118f. Some bonifieur for delivery, 157f 50c. This week, La Guayra, non-grage, 99f. At *Marseilles*, this week, Rio for delivery, 71f 25c.

SUGAR.—Little business was done at *Havre* in the week ending Friday, but there was not a marked decline in quotations. 200 casks French West India, disposable, 48f to 50 kilogs, bonne quatrieme, duty paid; and 62, for delivery, same price. 1,875 casks Havana, disposable, 30f, and 30f 25c, No. 12 in bond; 1,100 ditto, for delivery by French ship, 30f 50c; and 2,000, expected by Spanish ship, 30f. The arrivals were about 1,000 casks and 600 sacks. This week, French West India second jet, 55f; ditto, bonne quatrieme, for delivery, 48f; and in disembarkation, 47f 75c; usine, 60f 50c; and ditto, bonne quatrieme, 51f; Havana, No. 12, 30f, and 30f 50c. At *Nantes*, last week, business was insignificant, holders not being willing to accord the demand for reductions made by buyers. 1,028 sacks Reunion, 52f, bonne quatrieme; 175, low quality, at prices not stated. This week, French West India, 48f and 48f 50c, bonne quatrieme; Reunion, 47f, and at prices not stated. At *Bordeaux*, last week, there were no sales. French West India was nominally 48f 50c, bonne quatrieme; Reunion, 52f 50c; ditto, Santiago, 48f; Havana, 31f 25c, No. 12 in bond. This week, French West India at prices not stated. At *Marseilles*, last week, Cuba, for delivery, by English ship, 28f 50c, bonne quatrieme, of Havre; French West India, 31f ditto. This week, Reunion, for delivery, 37f, bonne quatrieme of Nantes, duty paid.

INDIGO.—The only sales at *Havre*, in the week ending Friday, were 6 chests Bengal at established prices. There were no arrivals. This week, Kurpah, 4f 70c the ½-kilog. Bengal at prices not stated. At *Bordeaux*, this week, 22 chests Kurpah at prices not stated.

HIDES.—The sales at *Havre*, in the week ending Friday, were 1,380 La Plata dry light, 71f 50c to 75f the 50 kilogs; 357 ditto, not sound, 67f 50c; 4,900 Monte Video salted saladeros ox, at prices kept secret; 100 ditto ditto, 62f; 111 Buenos Ayres salted mataderos ox, 53f; 100 Rio Grande dry, 87f 50c; 700 ditto salted ox, 52f; 550 Pernambuco drysalted, inferior, 63f; 2,800 Valparaiso drysalted ox, 77f 50c to 78f 50c; cow, 68f; 1,300 La Plata horse, salted, 42f 50c and 43f. By auction, 539 Buenos Ayres horse, sound, 41f 50c and 41f 75c; and 59 Hayti, 52f 50c; also some damaged Monte Video dry. The arrivals were about 13,000. This week, Monte Video dry light, 75f; ditto salted cow, 47f; ox, 62f and 62f 50c; Rio Grande salted ox, 52f.

WOOL.—In the week ending Friday, at *Havre*, the demand was active: 170 bales Buenos Ayres and Monte Video, unwashed, 1f 15c to 2f 25c the kilog; 19 Chili, 1f 30c; 2 ditto black, 1f 5c; 89 bales Buenos Ayres sheepskin, unwashed, 1f 25c to 1f 60c. By auction, 6 bales Monte Video, sound, 1f 92½c to 2f 12½c; also some damaged. The arrivals were 416 bales. This week, Buenos Ayres, unwashed, 1f 87½c to 2f 40c, and, per 100 kilogs, 185f to 215f.

SPIRITS.—At *Paris*, to-day, 3-6 90 deg., first quality, disposable, 53f 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f 50c the hectolitre; 3-6 beetroot, first quality, 90 deg., 64f.

City of Glasgow Bank	72921	345813	308783
Caledonian Banking Company	53434	61460	26495
Central Bank of Scotland	42933	52333	28645

The imports of bullion during the week ending April 19, current year, were:—Gold, 205,042*l*; silver, 122,387*l*. The exports were:—Gold, 25,010*l*; silver, 65,669*l*.

A trial has recently been made at Calcutta to produce oil from tea seed. The result would seem to prove that three maunds of tea seed will yield about one maund of oil. The oil is very similar in appearance to olive oil.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of April, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,793,055	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,143,055
		Silver Bullion	...
	28,793,055		28 793,055

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,984,441
Rest	3,183,192	Other Securities	19,277,469
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,020,989	Notes	7,776,995
Other Deposits	14,700.220	Gold and Silver Coin	880,955
Seven Day and other Bills	412,459		
	38,869,860		38,869,860

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,428.519	Securities	30.358.910
Public Deposits	6,020.989	Coin and Bullion	14 974.010
Private Deposits	14,700,220		
	42,149,728		45,332,920

Dated the 20th April 1865. W. MILLER, Chief Cashier

The balance of Assets above Liabilities being 3,183,192*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£322,124
An INCREASE of Public Deposits of	194,635
A DECREASE of Other Deposits of	714,289
No change in Government Securities.	
A DECREASE of Other Securities of	867,493
An INCREASE of Bullion of	36,631
An INCREASE of Rest of	10,916
An INCREASE of Reserve of	299,151

The above return presents few features of importance. There has been a considerable decline in the private deposits,

Digitized by Google

but it has been more than compensated by the decrease in the other securities. A recovery has thus taken place in the reserve. As regards bullion, the change is unimportant, but in a favourable direction.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,211,222	£ 21,655,553	£ 21,413,226	£ 21,672,783	£ 21,425,519
Public deposits	4,450,664	5,534,973	6,316,413	5,787,329	6,020,989
Other deposits	13,019,567	15,915,247	14,739,897	13,684,069	14,700,220
Government securities	14,274,373	11,210,755	12,051,395	11,022,267	10,984,441
Other securities	13,032,442	17,714,373	18,034,138	20,476,912	19,277,469
Reserve of notes & coin	8,772,635	10,797,844	9,236,946	6,251,627	8,607,950

Bank rate of discount	4½ p. c.	2½ p. c.	3½ p. c.	7 p. c.	4 p. c.
Price of Consols	88⅞	93⅝	92⅞	91⅝	90¼
Average price of wheat	68s 8d	57s 9d	45s 6d	40s 1d	41s 1d
Exchange on Paris (short)	25 17½ 22½	25 25 32½	25 17½ 25	25 20 30	25 15 20
— Amsterdam ditto	11 18¼ 18⅜	11 16 16½	11 16 17	11 16½ 17½	11 17 17⅛
— Hamburg (3months)	13 8 8½	13 8 8½	13 7½ 8	13 8½ 8¼	13 8⅛ 9½

In the corresponding week of 1855, the Budget had been brought forward by the Chancellor of the Exchequer, Sir G. C. Lewis, with a deficiency of 17,561,000*l*, which it was proposed to supply by a loan. The Emperor and Empress of the French were on a visit to England.

In 1862, rumours were rife of the approaching introduction of a new Russian loan. The issue of 2,000,000*l* in shares by the East Indian Railway Company for the Jubbulpore line had been announced.

In 1863, the insurrection in Poland was making rapid progress. The Confederate loan was still quoted at over 1 premium. The rate of discount at the Bank of England was 4 per cent.

In 1864, the fall of Duppel had been announced, with a loss to the Danes of 2,000 prisoners. Great rejoicings had taken place in consequence at Berlin. The King of Prussia had left for the seat of war. The Danish army had occupied the island of Alsen. The convention between France and Mexico had been published, and the Emperor Maximilian had left Rome for Mexico. In America, an engagement had taken place near Alexandria, in which the Federals captured 500 prisoners. The United States Senate had passed a resolution amending the Constitution so as to abolish slavery. The Bank of Russia had reduced its rate to 5 per cent. The prospectus of a new Four-and-a-Half per Cent. Swedish loan for 2,230,000*l* had been issued. The demand for money in the London market was extremely active,

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 12,875*l*; in 1862, a deficiency of 1,799,126*l*; in 1863, a deficiency of 3,294,241*l*; and in 1864, a deficiency of 6,792,843*l*. In 1865, the deficiency is 4,577,249*l*.

Discount and Money Market.—The demand for discount was moderate during the early part of the week, but has since become somewhat stronger, especially to-day, owing to a large amount of Indian and Brazilian bills maturing to-morrow. At the Bank this afternoon the applications were upon a rather considerable scale. Although the mercantile failures that have taken place have necessarily contracted the supply of bills offered, and thus relatively augmented the amount of available capital, this favourable movement is in some degree counteracted by the fear that further commercial suspensions are likely to occur, and the consequent shock to general confidence. In the open market the rate however remains a fraction below the official minimum, while long-dated bills are more readily taken. Annexed are the current terms for paper with various periods to run :—

30 to 60 days	3¾ 4 per cent.
3 months	3⅞ per cent.
4 months	4 per cent
6 months—Bank bills	4¼ per cent.
6 months—Trade ditto	4½ 5 per cent.

On the Stock Exchange money has been easy, at about 2 to 2½ per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*.

The sum of 5,000*l* in gold was sent into the Bank to-day. There were no operations yesterday.

The biddings for 300,000*l* Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were, on Calcutta 27,000*l*, and on Madras 3,500*l*. The minimum prices were fixed at 1s 11d on Calcutta and Madras, and 1s 11¼d on Bombay. Tenders on Calcutta and Madras at the minimum received in full. On Bombay all the tenders were below the minimum.

The Union Bank of Australasia, as financial agents of the Government of Queensland, invite tenders for 6 per cent. debentures to the amount of 127,500*l*, being the balance issued under the recent act of the Colonial Legislature. These debentures are of 100*l* each, and become due the 1st January, 1884. The principal and interest are payable in London or Brisbane, at the option of the holder.

The return for the Bank of France for the week shows that a slight recovery has taken place from the stagnation in trade that has lately prevailed. The following are the changes :—

Increase.	£
Bills discounted	426,000
Advances	32,000
Circulation	208,000
Treasury balance	40,000
Current accounts	84,000
Decrease.	
Coin and bullion	72,000

Subjoined are the rates of discount in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3¼ ½
Vienna	5	5⅛
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4¾ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2
St Petersburg	6	5¾

English Government Stocks.—The market opened on Saturday with a very heavy appearance on the American news, and the posibility that an early termination of the civil war may be followed by complications between the United States and England. Throughout the week the tendency has been downward, any rally that occurred being in general only temporary. This afternoon, however, the tone was slightly better. Consols, which left off last Thursday at 91¼ to 91⅜ for the account, declined yesterday to 90⅝ to 90¾, and were last quoted to-day 90¾ to 90⅞, showing a fall on the week of a half per cent. For money the final price was 90⅝. Reduced and New Three per Cents. left off at 88⅞ to 89⅛, and India 5 per Cents., 106¾ to 107¼.

The ease in the money market causes Exchequer bills and Indian bonds to be more in demand, and the respective prices have risen to 4s to 7s prem., and 15s to 19s prem.

Foreign Stocks.—The principal feature in this department is the heavy fall in Confederate bonds to 16 to 18 on the reverses experienced by the South. Turkish Consolides have fluctuated according to the tenour of the various reports on the progress of Mr Laing's negotiations for carrying out the conversion scheme, and at one time declined as low as 53½. A recovery, however, has since taken place to 54⅛ to 54¼. The foreign Turkish loans have been likewise depressed from the expected competition of the proposed new stock in the market. Egyptian and Danubian bonds have been in demand for investment, but have not fully maintained their highest prices. Mexican has fallen on the introduction of the new loan in Paris. Spanish descriptions are lower, owing to the disturbances at Madrid. The general appearance of the market has been rather flat, chiefly in sympathy with the English funds, but partly from the paucity of business and general absence of speculation.

While Confederate bonds have fallen heavily, there has been a considerable rise in all United States securities, the five-twenty bonds having advanced to 65½ to 66.

French Three per Cent. Rentes were last quoted this afternoon on the Paris Bourse at 67f 65c, showing a decline of a quarter per cent. compared with yesterday week, but no alteration from last evening.

Subjoined is a list of the highest and lowest prices of

Italian 5 per cents	65 ⅛	64⅛ ⅛

RAILWAY AND OTHER SHARES.—The railway market has been dull, and most of the principal stocks have fallen during the week from 1 to 2 per cent., London and North-Western and Midland being the heaviest. Metropolitan, in which the fluctuations are usually rather violent, is about 4 per cent. lower. The chief exception to the prevailing heaviness has been Caledonian, which is quoted rather firmer. London, Chatham, and Dover descriptions are also comparatively steady. Apart from the political causes which have recently acted upon all our markets, it would appear that the recent demand for railway securities for investment, and consequent advance in prices, have in some cases led both to over-speculation for the rise, and also to realisations of *bonâ fide* stock.

Indian guaranteed stocks remain firm. An improvement has also taken place in Canadian. Foreign descriptions have been dull at, in some instances, a fractional decline.

In the miscellaneous department there has been a slight rise in the Credit Foncier and Mobilier of England, on the satisfactory report and meeting. The shares of the new companies are also well maintained, City of Milan Improvements especially closing at 5⅞ to 6¼ prem.

Subjoined is our usual list of the closing prices of the principal railway shares on April 13, and this day :—

RAILWAYS.

FOREIGN EXCHANGES.—The rates this week have been generally firm. The quotations for Austria, however, are lower, showing increased confidence in the financial position of that empire.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—Since our circular of the 12th inst. the following arrivals of gold have come to hand :—La Plata, from the West Indies, with 120,000*l*; the Nyanza, from Alexandria, with 24,000*l*; the America, from New York, with 22,000*l*; the Ethiope, from Africa, with 9,500*l*. The demand for gold having experienced a slight revival, the whole of the above has been taken for exportation, the Bank having had but 54,000*l*, consisting of sovereigns, received from Egypt, sent in; the Messageries steamers have also brought 78,000*l* in sovereigns from Alexandria. The Pera has taken only 370*l* to Madras.

Silver.—The La Plata has brought 104,000*l* from the West Indies, which has been sold at the same rate as that by the previous packet, viz: Doro, at 60¾d per oz standard; and fine at 60⅜d per oz standard. At these prices a good demand exists for the continent, and our market is now cleared. The Pera has taken 5,000*l* to China.

Mexican Dollars.—The Pera has taken 10,600*l* to China. The market remains firm at our last quotation of 59½d per oz, and the demand is almost entirely for Holland.

Exchange on India for drafts by the Banks at 60 days' sight may be quoted 1s 10½d to 1s 11¼d. Private bills at very varying rates. For the Council drafts yesterday there were very few applications at the reduced limits of 1s 11d for Calcutta and Madras, and 1s 11¼d Bombay.

India Government loan notes remain about the same. The quotations are for 5½ per Cents. 108 to 110, for 5 per Cents. 101 to 103, and for 4 per Cents. 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d per oz, last price. Silver—Bar silver, 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d per oz std, last price; Mexican dollars, 4s 11½d per oz, nearest; 5-franc pieces, 4s 11½d to 4s 11½d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The failure of Messrs Buchanan, Hamilton, and Co., China merchants, of Glasgow, was announced on Thursday. Their liabilities are estimated at upwards of 1,000,000*l*, of which about 700,000*l* to 800,000*l* are expected to rank upon the estate. The assets are valued at about 630,000*l*. The stoppage is attributed to heavy losses in foreign produce, especially tea.

PUBLIC COMPANIES.—The directors of the Commercial Bank Corporation of India and the East have, in anticipation of the meeting to be held on the 26th instant, declared a dividend for the six months ended Dec 31, at the rate of 10 per cent. per annum.

An extraordinary meeting of the shareholders of the South-Eastern Banking Company has been convened for the purpose of passing a resolution for changing the name of the company to that of "The English Joint Stock Bank.

The second ordinary general meeting of the shareholders of the Land Mortgage Bank of India was held on Wednesday last, when a dividend of 4s, per share, free of income tax, was declared, being at the rate of five per cent. on the paid-up capital.

At the meeting of the Oriental Bank Corporation yesterday, the net profit for the year was stated at 206,089*l*. A dividend and bonus at the rate of 8 per cent. per annum was declared, making, with the dividend paid in June last, a total distribution for the year of 16 per cent. per annum.

At the meeting of the shareholders of the Credit Foncier and Mobilier of England (Limited), held on Thursday last, the accounts showed a net profit, after all payment of charges and expenses, of 394,042*l*. A dividend and bonus, equal to 40 per cent. per annum, were declared, and 200,000*l* appropriated to the formation of a reserve fnnd.

The Directors of the London and Brazilian Bank have concluded a provisional arrangement, subject to the approval of the shareholders, with Messrs Maua and Co., for an amalgamation of the business, including the privilege of issue of bank notes at Monte Video and Rosario, carried on by that firm in Brazil and the River Plate, with the business hitherto carried on by this bank. The amalgamation will be effected by means of the incorporation of a new joint stock bank, with limited liability, having a nominal capital of 5,000,000*l* sterling, in 250,000 shares of 20*l* each, one half of which is to be paid up. Of the 250,000 shares, 150,000, with 10*l* per share paid up, will be allotted to Messrs Maua and Co., in exchange for cash or approved securities to that amount, and the remaining 100,000 shares will be placed at the disposal of this bank.

At the meeting of the Fairbain Engineering Company held on Thursday, a dividend was declared for the half-year at the rate of 10 per cent. per annum free of income tax

Digitized by Google

and the payment of the interim dividend in October last was confirmed.

At the meeting of the shareholders of the Standard Bank of the British South Africa (Limited) held this day, the directors' report was adopted, and a dividend at the rate of 8 per cent. per annum declared.

The thirty-ninth annual meeting of the Scottish Provincial Assurance Company was held at Aberdeen to-day. The usual dividend of 8 per cent. declared, and surplus carried to reserve fund. 930 new life policies issued assuring 461,885*l*, yielding new annual premiums 13,955*l*. Annual revenue, 133,455*l*; accumulated fund, 488,800*l*.

The Colonial Land and General Credit Company (Limited) has been formed for the purpose of carrying on the business of a land and credit company in the British colonies and the adjacent territories. Land in the colonies is constantly rising in value, and many English colonies are signally prosperous. The Company has made arrangements for the acquisition of considerable lands at Port Natal. The Company will also act as trustee and executor for a proper remuneration.

The report of the Directors of the London and South African Bank states after providing for bad and doubtful debts, there remains a balance of 26,984*l*. Having regard to the depressed state of trade in the South African colonies, it was deemed prudent in October last to declare an interim dividend of 3½ per cent. only, but the satisfactory returns since received from the several branches, has enabled the directors to recommend for the approval of the shareholders a dividend of 18s per share, which, with the payment made in October 1864, will be at the rate of 8 per cent. per annum, free of income tax, leaving a balance of 377*l* 9s 4d to be carried forward to the profit and loss account for the next half-year.

The directors of the Amicable Society have now concluded a provisional arrangement with the Norwich Union Life Insurance Society, by which that Society, assuming the assets and liabilities of the Amicable, will guarantee the payment of all claims on charter policies, whenever falling due, at the rate of 227*l* for every share of 200*l*; and also the claims on bonus policies, the future additions being calculated in every year upon the principles dictated by the Society's Act of Parliament and bye-laws, and based upon the sum of 227*l* as the permanent annual actual dividend per share; thus placing the bonus policy-holders upon an equal footing with the holders of charter policies.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 15, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	61,605 6	40 1
Barley	22,977 5	29 6
Oats	5,968 5	22 1

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The condition of the English wheats exhibited for sale at Mark lane, to-day, being somewhat unsatisfactory, the trade as regards good and fine dry produce was firm. The total supply on offer was but moderate, and millers purchased the best samples at the full prices of Monday. In foreign wheat, only a moderate business was transacted, at late rates. Barley and oats were in fair average request at full currencies. Beans and peas—owing to the small supplies on offer—changed hands at fully late prices. The flour trade was rather quiet, at late rates. This week's imports amount to 1,680 quarters of wheat; 8,620 barley; 29,560 oats; and 750 sacks of flour.

At Liverpool, this morning, owing to the limited supplies of produce on offer, the corn trade generally was firm, at full prices. At Wakefield, fine samples of red wheat sold at rather more money.

Under the influence of the news of the fall of Richmond, the Liverpool cotton market on Monday opened very depressed and dull, but on Tuesday a better feeling sprung up, which has been since maintained, and to-day the market closes very firm at hardening rates. Sales to-day, 20,000 bales.

Advices from Bombay to the 29th ult., state that the cotton market was heavy, at drooping prices. The shipments since the 14th of March had amounted to 55,000 bales.

The cotton trade at Pernambuco, during the fortnight ending March 28, was very firm, and an advance took place in prices. Pernams, in warehouse, sold at 16 21.100d to 17 50.100d; Paraibas, on board, 16 47.100d to 16 91.100d; and Maceios, on board, 15 26.100d to 16 04.100d per lb.

Owing to the holidays, very little grocery produce has been brought forward at the public sales this week. As regards sugar and coffee in the private contract market, prices, notwithstanding that the demand has been much restricted, have ruled firm, and tea has changed hands to a fair extent, at full quotations. In the rice trade, there has been considerable animation, and an advance, in some instances, has taken place in prices. A Government contract for 50,000 gallons of rum is announced.

The sugar trade at Havana in April was tolerably active. The amount of business transacted was moderately extensive, and prices, more especially towards the close of the month, improved. The shipments from the above-mentioned port, including Matanzas, was 180,418 boxes and 8,807 hhds. According to Messrs Schmidt and Karch's circular, the prices current on April 1 were as follows:—No. 7 to 10, 17s 5d to 19s 11d; No. 11 to 12, 20s 6d to 21s 2d; No. 13 to 14, 21s 9d to 22s 4d; No. 15 to 17, 22s 11d to 24s 1d; No. 18 to 20, 24s 8d to 25s 10d; whites, low to prime, 26s 5d to 28s 10d per cwt, free on board.

At Pernambuco during the fortnight ending March 28, the sugar trade was firm, at very full prices. The receipts averaged 3,000 bags per day. The following were the rates current:—Whites, No. 1 to 2, 33s 4d to 34s 1d; No 3 superior, 31s 9d to 32s 7d; No. 3 regular, 30s 2d to 31s; No. 4, 28s 6d to 29s 4d; muscovado yellow, 20s 4d to 21s 4d; good brown, 18s 1d to 19s 1d; ordinary unclayed brown, 16s 8d to 17s 3d per English cwt of 3½ arrobas, free on board, with 5 per cent. commission, but without freight and insurance, at the exchange of 26¼d.

The trade for wool in the manufacturing districts having shown more firmness, there is a decidedly better feeling in the market for home-grown produce here. The amount of business doing is by no means extensive, but prices are somewhat above the late lowest point. The supply of colonial wool in the market is about 85,000 bales. Hemp, flax, and jute continue dull.

The silk trade at Lyons, according to Messrs Arles Dufour and Co.'s circular, was dull at the commencement of last month. Towards the close, however, there was a decided improvement in the state of the market, and an advance took place in prices. This is attributed to more favourable accounts from America respecting the sale of silk goods.

The tobacco trade at New York is dull, and prices have a downward tendency. The following table shows the extent of the receipts and deliveries in March, and also the stocks on March 1 and April 1:—

	American. Ky. hhds	Va. and N.C. hhds	Ohio. hhds	Md. hhds	Total. hhds

Same time, 1862	6,314	1,964	460	658	...

In the metal trade, the leading feature is an advance in all descriptions of foreign tin—Straits having sold at 92*l* 10s to 93*l*, and Banca at 98*l* per ton cash. Scotch pig iron has realised 55s cash, mixed numbers. Other metals have ruled firm. Spelter is now quoted at 20*l* 10s to 20*l* 15s per ton, on the spot.

The quarterly meeting of the ironmasters was held at Birmingham yesterday. The business done in finished iron was moderate, and the best makes were disposed of at full prices.

Oils have commanded more attention. Sperm oil has advanced to 90*l* per tun; and linseed to 32s per cwt. P.Y.C. tallow, at one period of the week, was worth 41s 6d; but is now quoted at 41s per cwt.

Owing to the heavy fall in the value of the raw material, the trade for cotton goods at New York during the week ending April 8, was in a most inactive state: purchases were limited to the immediate wants of buyers, and a further decline took place in prices. As regards the trade for wool and woollen goods, considerable depression prevailed, and the small amount of business done was at lower rates. In the grocery produce markets, however, there was a much better feeling, tea, sugar, coffee and most other articles having been in fair average request, on rather higher terms. In breadstuffs, an increased amount of business was transacted for home consumption, but the export demand was very limited. Crude petroleum was scarce, and high in price: the exports from all ports in the United States showed a large falling off from previous years, the shipments in January, February and March being 2,740,697 gallons, against 5,916,907 gallons in the corresponding months last year, and 9,831,717 gallons in 1863. As to the money market, the demand for accommodation was trifling: prime short commercial paper was quoted at 8 to 10 per cent. The stock of bullion in the banks on the 1st inst. was 4,116,940*l*, and the balance in the Sub-Treasury, 7,045,720*l*. The shipments of specie, from Jan. 1 to April 1, reached 894,370*l*, against 2,040,270*l* in 1864; 3,032,270*l* in 1863; 1,777,100*l* in 1862, and 286,000*l* in 1861. The imports of dry goods and general merchandise for the same period were valued at 7,051,470*l* in the current year; 12,914,000*l* in 1864, and 9,516,500*l* in 1863. Gold, in the week ending April 8, fluctuated considerably in value, viz., from 145¼ to 152, closing at 150 per cent.

The Secretary of the Treasury of the United States has published the following statement showing the extent of the public debt on March 31, current year, and Oct. 31, 1864: the calculations are made at 4s the dollar:—

	March 31, 1865. £	Oct. 31, 1864. £
Debt bearing interest in coin	220,072,250	192,284,160
Do. in lawful money	150,211,030	116,807,860
Debt on which interest has ceased	69,884	71,344
Debt bearing no interest	103,037,860	94,306,540
Total	473,391,024	403,419,904

THE COTTON TRADE.

LIVERPOOL—APRIL 21.

The cotton market closed heavily last week, and the advices from New York, of the fall of Richmond, received on Saturday, produced a great sensation. On Monday the trade, as well as some buyers on speculation and for export, seemed to anticipate a further heavy decline, and coming into the market very generally, bought on a larger scale than for some time past at a reduction of about 1d per lb. Each day since a very extensive business has

Digitized by Google

been carried on, accompanied by a recovery in prices, but scarcely so much as to re-establish the quotations of the 13th inst. In Sea Island very little business has taken place, at prices about 2d per lb lower. American has been in extensive demand by the trade as well as speculators, and, after declining 1½d per lb in the early part of the week, closes about ¾d below last week's quotations. Brazil was sold on Monday at a decline of 1d per lb, but has since been in great request, and closes nearly as high as last week's quotations. Egyptian was especially influenced by the American news, and declined 1½d per lb. Large operations were thereby induced, and by a gradual advance, prices have nearly recovered the level of last week. Smyrna, after some irregularity, has settled to about ¼d to ½d per lb below last week's quotations. Surat—On Monday the market opened with a fair inquiry, but very low offers were made, which, in many instances, were accepted. In the afternoon, however, prices closed with more steadiness. Each succeeding day there has been a very good demand, which has been freely met, and, after considerable irregularity, prices close slightly below last week's rates. China and Japan are ¼d to ½d cheaper in the better qualities, but close without change from last week in "fair" and under.

The only transaction to arrive reported during the week was on the 18th, in Bengal fair new, March sailing, 4¾d.

The sales of the week amount to 68,110 bales, including 12,920 on speculation, and 13,010 declared for export, leaving 42,180 bales to the trade. The sales to-day amount to 15,000 or 20,000 bales, the market assuming a still stronger character.

LONDON—April 21.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—There has been an improved demand this week, and although the American news caused the market to open at a reduction of ½d per lb, this decline was soon recovered, and in some instances an advance of ½d has been obtained. As compared with last week, prices of Surat, Coconada, West India and Brazil are unchanged; Tinnivelly, Western and Salem are fully ½d dearer; Scinde is ½d lower; Bengal, China, Japan, Smyrna and Greek are about ¼d per lb higher.

NEW YORK—April 8.

Owing to the nature of the news from the seat of war, very little business has been transacted in cotton this week, the total sales being limited to about 1,800 bales. As compared with Saturday last, prices show a reduction of 12 cents per lb. The arrivals comprise 10,235 bales, consisting of 2,937 bales from Savannah; 1,639 Matamoros; 1,509 New Orleans; 2,795 by rail; the remainder from ports in the West India Islands and in Mexico. This additional import raises the supply received since Sept. 1 to 180,179 bales. According to an official statement, recently published, it appears that the total quantity of cotton captured at Savannah was 38,500 bales, about 6,000 bales of which was Sea Island produce. The following are the prices now current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

Freight to Liverpool, ⅛d to ¼d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

Owing to the holidays, only a limited business has been transacted in goods in the leading markets. Prices, however, have been freely supported. The demand for iron has fallen off. Coals, however, have sold freely for the time of year at steady currencies.

Manchester, April 20.—The depression previously noted was increased on Saturday by the news of Richmond having fallen. On Monday, however, buyers of Indian goods began to make inquiries for cloth, and those who thought that prices had reached the bottom, bought considerable quantities of shirtings at 1s 4d to 1s 5d per lb. Since Tuesday the buying is more general, and makers being well under contract are endeavouring to get some advance. The further news of disaster to Lee's army has had no injurious effect, and the market daily gains in firmness. Other goods have not participated in the demand to any great extent. There is more doing in home-trade yarns, but those for export are generally dull.

BRADFORD.—The improvement which is experienced in the Liverpool cotton trade has had a very beneficial effect on our wool market here. There is still so much irregularity in price that we find it impossible to give reliable quotations, but 23d to 24d per lb has been made for fair Lincoln hogs, while wethers bring very nearly as much money. We cannot hear of any improvement in yarns. Export merchants are making numerous inquiries. Pieces—Light fancy goods move off pretty freely. Sales of plain goods continue very small.

LEEDS.—The tone of the market was steady, and the purchases made, but which were of a miscellaneous character and not large in extent, were at fully late prices.

CARDIFF.—A considerable business continues to be transacted in the steam coal trade, and the principal merchants report that a good inquiry exists. There is a moderately brisk demand from the French, Spanish, and other continental markets, and there is a fair prospect of a full average summer trade.

DONCASTER.—The demand throughout the whole of the South Yorkshire coal district is, considering the season, pretty good. The demand for the metropolitan market has been extremely quiet, and prices have consequently receded, particularly for the common sorts of house coal.

LEICESTER.—Trade is in a healthy state. In the country districts business is quiet. Manufacturers are making to order, and no stocks are allowed to accumulate. Yarns are drooping, and spinners finish only for immediate use. The wool market is dull, and there is not much doing in materials.

DUNDEE.—The flax market had rather a steadier appearance. In goods on the spot there is decidedly more doing, in consequence of the diminishing stocks in consumers' hands. Jute continues very dull, and prices have still a downward tendency, especially of the better sorts, which are still comparatively high. There has been a rather better inquiry for yarns, and a good many small sales have been making at fully former prices. There has also been an increased inquiry for some descriptions of manufactured goods.

GLASGOW.—Iron was 52s 6d eight days; and 52s 7½d one month, buyers offering 1½d less. No. 1, g.m.b., 53s 3d; No. 3, 52s 6d.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 8.—An increased amount of business has been transacted in flour and wheat this week, and prices have improved. The inquiry, however, is still chiefly confined to the wants of the home trade, the export demand being still much restricted. The following are the quotations:—Flour—State, superfine brands, $7.75 to $7.95; State, extra brands, $8 to $8.25; State, choice brands, $8.30 to $8.45; Ohio, common brands, $8.65 to $8.75; Ohio, fancy brands, $8 80 to $8.85; Ohio, good and choice extra brands, $8.90 to $9.75; Michigan, Indiana, Wisconsin, &c., $7.75 to $8.75; Genesee, extra brands, $8.50 to $10; Missouri, $8.25 to $12; Canada, common, $8.30 to $8.55; Canada, good to choice extra, $8.60 to $10.50 per barrel. Wheat—Amber Iowa, $1.63; amber Michigan, $1.80. Corn—New yellow, $1.40 to $1.42 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Coastwise and by land-carriage, the arrivals of English wheat up to our market have been very moderate; nevertheless, the demand for both red and white qualities has ruled very inactive, at about last week's quotations. The imports of foreign wheat have been on a limited scale. Selected samples have been held at full prices. In other kinds, very little business has been passing, on former terms. Malting barley has moved off freely, other qualities slowly, at late rates. The malt trade has continued in a sluggish state. In prices, however, scarcely any change has taken place. The supply of foreign oats has increased considerably; yet the oat trade has been steady, at full prices. Beans have sold at extreme quotations, with very limited supplies on offer. Peas may be considered firm in price. In some instances, they have rather advanced. The flour trade has been devoid of animation.

The country markets have been somewhat heavy for wheat; but the sale for all kinds of spring corn has been tolerably active.

The continental and American markets have continued heavy for both wheat and flour, and prices have not been supported. The supplies continue large.

In Scotland, fine barley and oats have moved off freely, at very full prices. Otherwise, the trade has been in a sluggish state.

The Irish markets have been inactive for most kinds of produce at about stationary prices.

The supply of English wheat on sale at Mark lane, to-day, was but moderate; the condition of the produce was by no means satisfactory, and all good and fine dry samples moved off steadily at full prices. In foreign wheat, a very moderate business was transacted at late rates. Barley ruled firm at full currencies. Oats—with which the market was moderately supplied—were in steady request at quite previous rates. Beans and peas, being in short supply, fully supported Monday's prices. Flour met rather a slow sale at late rates.

Mr George Dornbush reports the arrival off coast of 16 cargoes of grain, and a fair demand for wheat, at 1s per quarter above last week's quotations. Maize has advanced 1s 6d to 2s per quarter. Other produce has ruled steady. Cotton-seed is dull at 6l 16s 6d to 7l 7s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—The market has not shown any change since the 13th inst., and a steady tone prevails. On Tuesday there were not any public sales

Digitized by Google

and since then the transactions have been upon a very moderate scale. Only 650 casks West India had sold to yesterday, including crystallised descriptions at 36s 6d to 38s per cwt. The week's delivery was 3,641 tons, and the stock at the close amounted to 88,000 tons, a quantity still larger than usual at this season.

Mauritius.—Several parcels have changed hands by private contract: grainy and crystallised, 33s 6d to 38s.

Natal.—680 bags muscovado sorts sold at 26s to 31s 6d per cwt.

Foreign.—About 700 casks muscovado kinds sold, chiefly Cuba, at 30s 3d to 31s. A floating cargo of Havana is reported, for the United Kingdom, No. 13, at about 25s 3d per cwt. Yesterday, a floating cargo of Maceio at 19s per cwt.

Siam.—2,500 bags have sold privately at 32s 6d to 36s per cwt.

Refined.—Moderate transactions have occurred at about previous rates, and the market is now quiet.

TEA.—The market is firm, but not generally active. In some cases higher rates have been obtained, especially for common greens taken up on American account. Kison congou has been in demand, and many other kinds are held for enhanced rates.

RUM.—A few contracts have been made in West India at previous rates.

COCOA.—Nothing of interest has been done.

COFFEE.—This market has been favourably influenced by the result of the Dutch sale yesterday, and most qualities of Ceylon show an improvement of 6d to 1s. 332 casks 440 barrels and bags plantation sold at 78s 6d to 86s for fine ordinary to good. 581 bags native, good to fine ordinary, 67s to 69s. 133 casks were withdrawn above the value. 121 bales Mocha were sold, including one lot long berry at 90s per cwt; the remainder sea damaged in proportion. The stock in London is now 2,150 tons larger than at the same date last year.

RICE.—Several parcels of soft grain have changed hands at 8s 7½d to 10s; fine Rangoon, 10s 3d cash; white Bengal, 12s 9d to 15s. Two floating cargoes of Necrancie Arracan are reported at 10s 6d for the United Kingdom, or 10s 1½d per cwt for the continent.

IMPORTS AND DELIVERIES OF RICE to April 15, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports ..... tons	21030	20050	10470	16480
Deliveries	18200	17210	20400	16850
Stock	44050	48800	54180	29550

SPICES.—There were not any public sales on Wednesday, and the business by private contract has been of very limited extent.

SALTPETRE.—Some business has been done in Bengal: refraction 10¼ to 3, 27s to 28s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to April 15, with STOCKS on hand.

	1865	1864	1863	1862
Imports ..... tons	1760	3400	6840	6140
Deliveries	3400	3550	4250	5600
Stocks	5770	7000	6410	3665

DRYSALTERY goods of all kinds have been quiet.

CAMPHOR has further advanced, selling at 6*l* to 6*l* 2s 6d per cwt.

METALS.—The markets have shown some tendency to improvement. A good deal of business has been done in foreign tin, chiefly Straits, recently at 92*l* 10s to 93*l* for cash. English tin is dearer. Scotch pig iron has advanced to 55s 4½d, closing at 54s 9d per ton mixed numbers, for cash. Spelter continues firm. The last sales were at about 20*l* 10s per ton, being rather higher.

OILS.—Olive remains dull. Sperm is held for higher rates. Pale seal quoted 48*l*; fine Southern, 43*l* 10s per tun. Linseed oil is dearer, owing to the decreased production, viz., 31s 9d to 32s on the spot; 32s 3d May to the end of the year. Rape oil has sold largely for delivery in the last four months at 41s, owing to expected short crops of continental seed. Palm oil meets a steady demand at 36s 3d to 36s 6d. Cocoa-nut quiet: best Ceylon quoted 39s 6d to 40s; Cochin, 42s 6d to 43s per cwt.

LINSEED.—A large business has been done in Calcutta seed at 54s 6d to 55s per quarter.

TALLOW.—The market has a firm appearance, and quotations of foreign are slightly in buyers' favour. 1st sort Petersburg Y.C., 41s to 41s 6d; October to December, 42s 3d to 42s 6d. per cwt.

PARTICULARS OF TALLOW.—Monday, April 17, 1865.

	1862. casks.	1863. casks.	1864. casks.	1865. casks.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes steadily. 538 casks West India have sold, making 1,185 for the week. By auction, 3,634 bags Mauritius went as follows:—Soft brown and yellow, 26s to 31s; grainy, 31s 6d to 35s. 143 casks Surinam, 28s to 31s. 2,514 bags Natal sold at 24s to 35s. 580 bags low Gurpatta date Bengal sold at 29s 6d to 30s 6d per cwt.

COFFEE.—68 casks 21 barrels and bags plantation Ceylon, by auction, sold at extreme rates. 1 532 bags native: good ordinary at 67s to 67s 6d. 567 bales and half-bales Mocha were chiefly bought in: a few lots long berry sold at 94s 6d to 95s; short berry, 101s to 102s per cwt, the latter being higher.

COCOA.—165 bags Guayquil were taken in at 72s per cwt.

RICE.—5,941 bags Bassein were taken in at 9s to 9s 6d.

SALTPETRE.—150 bags Bengal, refraction 4½, were taken in at 29s per cwt.

PIMENTO.—760 bags sold steadily at 2⅛d to 2⅜d per lb.

GAMBIER.—1,452 bags offered by auction were chiefly taken in at 22s to 23s per cwt.

OIL.—326 casks by auction chiefly sold at 35s 6d to 36s 6d per cwt.

TALLOW.—At auction, 759 casks Australian two-thirds sold; sheep, 41s to 41s 3d; beef, 38s 6d to 39s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week. Nothing doing for export. The Dutch market for crushed being scarce, is rather firmer for ready goods.

GREEN FRUIT.—Demand continues good, mild weather and Easter holidays increasing consumption. Some parcels oranges from St Michael, Terceira, Valencia and Palermo, sold by Keeling and Hunt at public sale, went at full prices. Lemons, of sound condition and good quality, are in request. Nuts of all kinds have a fair sale. Seville sours cleared off the market.

DRY FRUIT.—During the past week the market has been quiet.

ENGLISH WOOL.—No business.

COLONIAL WOOL.—The market is without change; very little doing.

FLAX.—Market quiet.

HEMP.—Market steady, and more business done during the week.

SILK.—The market has been very active the past week, with an upward tendency in prices.

TOBACCO.—We have had a fair demand for all growths, the late news from America appears to have given even a firmer tone to holders of fine descriptions of both Western leaf and strips. Another large fire is reported to have occurred in Manilla, destroying upwards of 10,000 bales of tobacco.

LEATHER.—In the absence of any public market at Leadenhall this week (being Easter), there is very little alteration to report in the leather trade. The transactions have been limited in extent at former prices.

METALS.—There has not been much business done this week, the chief object of attention being tin. Copper has become very flat for manufactured, and prices are easier, but manufactured retains firmness, although little has been doing. Iron is steady and manufacturers are booking a fair supply of orders. Tin has been a good deal changing hands, mostly Straits, at improving prices. Spelter has advanced about 5s per ton. Lead is very much neglected.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	42	3
Fat by ditto	2	0½
Yellow Russia	42	6
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

There is a fair demand for prime sizeable Waterford bacon. Shippers demanding an increase in prices of 2s has checked sales, although on account of the scarcity of pigs there is a likelihood of the price being maintained, but at the present season the rise is premature. The Hamburg trade very brisk, the price not having risen in proportion to Irish. Friesland butter in good request, quality fine. Although the quality of Jersey is very good, the demand is dull; large supply. The stock of American cheese cleared off, waiting for fresh arrivals.

METROPOLITAN CATTLE MARKET.

THURSDAY, April 20.—Only a limited supply of beasts was on offer in our market to-day, yet all breeds moved off slowly at barely Monday's currencies. The best Scots realised 5s per 8 lbs. We had a good demand for sheep—the show of which was very moderate at extreme rates. Prime Downs and half-breds, out of the wool, sold at 5s 10d to 6s per 8 lbs. Our quotations now refer solely to shorn sheep, which formed at least seven-eighths of the supply. Lambs were in demand at full prices—viz., from 6s 4d to 8s per 8 lbs. Calves advanced 2d per 8 lbs, with a steady inquiry. The pork trade was firm on rather higher terms. Milch cows ranged from 13*l* to 21*l* each.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	to 3	10	Prime Southdown sheep	5	10	to 6	0
Second quality ditto	4	0	4	4	Large coarse calves	4	4	5	0
Prime large oxen	4	6	4	8	Prime small ditto	5	2	5	6
Prime Scots, &c.	4	10	5	0	Large hogs	3	4	4	0
Coarse and inferior sheep	4	0	4	8	Small porkers	4	2	5	0
Second quality ditto	4	10	5	2	Suckling calves ..... each	18	0	21	0
Prime coarse-woolled do.	5	4	5	8	Quarter old store pigs...	20	0	25	0

Lambs 6s 4d to 8s.

Head of stock on sale.

Total Supply—Beasts, 950; cows, 142; sheep, 4,700; calves, 150; pigs, 210.
Foreign Supply—Beasts, 420; cows, —; sheep, 1,050; calves, 137; pigs,—.

NEWGATE AND LEADENHALL.

Per 8 lbs by the carcass.

Prime small ditto	4	0	4	6	Large pork	3	4	4	6
Veal	4	0	4	10	Small pork	4	8	5	0

Lambs, 6s to 7s 4d.

HOP MARKET.

BOROUGH, Friday, April 21.—The supply of English hops on sale continues small, and the trade is firm at full currencies. Foreign hops, of which there is a moderate supply on offer, move off slowly, but at fully late rates, as regards all good and fine samples. Mid and East Kents, 110s to 120s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 130s; American, 80s to 130s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, April 21.—Moderate supplies of potatoes are on sale, the trade for which is steady, at about stationary prices. Yorkshire Regents, 90s to 120s; Ditto Flukes, 130s to 150s; Scotch Regents, 90s to 100s; Ditto Rocks, 70s to 85s; Dunbar Regents, 100s to 120s; Foreign, 60s to 70s per ton.

HAY MARKETS.

THURSDAY, April 20.—The various markets are but moderately supplied with hay and straw, yet the trade is dull, with a downward tendency in prices.

	Smithfield. s	s	Cumberland. s	s	Whitechapel. s	s
Meadow hay	90	to 110	90	to 110	90	to 110

COAL MARKET.

FRIDAY, April 21.—Wallsend: Hetton 19s—Haswell 19s—Hartlepool 18s 6d—Braddyll's Hetton 17s 3d—Hetton Lyons 16s—Kelloe 17s 3d—Eden Main 17s—Cowpen Hartley 16s 9d—Buddle's West Hartley 16s 9d—West Hartley 16s 9d—Holywell Main 16s 6d—Wylam Moor 16s. Ships at market, 39; sold, 14: gas contracts, &c., 15—29; unsold, 10; ships at sea, 35.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 21.—The demand by private contract continues very languid. The public sales of East India opened on Thursday the 20th inst. Prices ruled rather lower than in January, as was expected. The total quantity to be brought forward of this description will be about 11,000 bales, and the sales will close on the 25th or 26th inst.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 21.—Although the weather has been as fine as could be desired, the absence of supplies gives confidence to holders, and has enabled them to insist on the extreme prices of Tuesday for all articles.

The Gazette.

TUESDAY, April 18.

BANKRUPTCIES ANNULLED.

H. H. Creed, St James's square, clerk—C. Holt, East road, City road, tailor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 8th of April, on 11,841 miles, to 627,580*l*, and for the corresponding week of last year, on 11,490 miles, to 596,295*l*, showing an increase of 351 miles, and of 31,285*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,374 miles, to 511,356*l*. and for the corresponding week of 1864, on 8,097 miles, to 484,489*l*, showing an increase of 277 miles, and of 26,867*l*.

THE CENTRAL RAILWAY OF VENEZUELA.—The directors have received despatches from Venezuela, stating that the line was being rapidly constructed, and the company's chief engineer had informed a meeting of merchants that the first section to Palito would be opened in June or July.

RAILYAW AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 17.—The railway share market was closed to-day.

TUESDAY, April 18.—In the share market to-day there was not much activity, but a rather general tendency towards improvement was shown in the closing prices, particularly in English railways. The banks, however, were an exception, the majority of the movements being in a lower direction. Of the English lines, Midland (Birmingham and Derby) recovered 1; ditto (original), North-Eastern (Berwick), ditto (Leeds), and ditto (York), ½ each; North-Western, ¾, and Great Western, ¼; and Caledonian and Metropolitan advanced 1¼ each, Lancashire and Yorkshire, ¾, and South Devon, ½. In foreign, Antwerp and Rotterdam and Great Luxembourg advanced ⅛ each. In American, United States further advanced 2¼, Illinois Central (shares) 1¾, and Erie shares (paid up) further 1½. In British mines, East Lovell recovered 1; Devon Great Consols and West Chiverton improved 5 each, and South Condurrow ⅛, and Wheal Bassett receded 4, and East Bassett and East Caradon 1 each. In foreign mines, there was no alteration.

WEDNESDAY, April 19.—In the share market to-day dulness was the prevailing feature, and English and foreign railways, foreign mines, and miscellaneous shares closed with an adverse tendency, but some of the American securities again showed buoyancy, and the other descriptions were without material average change. Of the British railways, Scottish Central advanced 2, Metropolitan District 1, North British (Edinburgh, Perth, &c.) ½, and Metropolitan (new) ¼; ditto (stock) relapsed 1, Great Western, North-Western, and Midland ¾ each, North-Eastern (Berwick), ditto (Leeds), and ditto (York) ½ each, and Lancashire and Yorkshire ¼; and Great Eastern and Great Northern declined ½ each, ditto (A stock) 1½, and South-Eastern ¼. In colonial, Great Western of Canada (shares of both descriptions) further improved ⅛. In foreign, Great Luxembourg relapsed ⅛; Paris and Orleans receded ½, and Lombardo-Venetian ¼. In American, United States (5-20) further improved ½, Erie shares (paid up) 5¼, and Illinois Central (shares) 2¼. In British mines, South Condurrow further improved ⅜, and Grenville declined ¼. In foreign mines, St John del Rey improved 2; East del Rey and Washoe Gold (ordinary) receded ¼ each, and Don Pedro North del Rey, Port Phillip, and Vallanzasca Gold ⅛ each.

THURSDAY, April 20.—In the share market to-day the transactions were not numerous, and the tendency at the close was generally towards flatness, but Canadian and American securities were firmer. Of the English lines, Great Western (Hereford) improved 1; ditto (original) and North-Western declined a further ¼ each, Bristol and Exeter 1, Chatham, and Manchester, Sheffield, &c., ½ each, Great Northern, Metropolitan, South-Eastern, and North-Eastern (York) a further ½ each. In colonial, Atlantic and St Lawrence, Grand Trunk of Canada (2d preference), ditto (4th preference), and ditto (deferred) advanced 1 each. In foreign, Northern of France and Paris and Mediterranean declined 1 each. In American, Virginia (6 per cent.) advanced 2½, United States (5-20) further 1¼, Illinois Central shares further 2½, and Erie shares (paid up) further 3¼. In British mines, South Condurrow further improved ½. In foreign mines, St John del Rey improved 2.

FRIDAY, April 21.—The railway market was dull to day, and the few variations which occurred in prices was in an unfavourable direction.

The annual meeting of the National Institute and Home for Ladies was held at 23 Easton-road, on the 19th inst., when a favourable report was read by the Secretary. The object of this institution is to provide a temporary home for ladies seeking situations as superior housekeepers, as companions, matrons, &c. We trust that it will be successfully carried out; but funds are wanted to secure so desirable a result.

Librarian and Keeper of the Papers, Foreign Office.
William Ridgway, 169 Piccadilly, and all booksellers.

N.B.—The subsequent Volumes are in active preparation, and the work will shortly be brought down to the latest date.

IMPORTANT TO DIRECTORS OF JOINT STOCK COMPANIES

RE SHIP, SCOTTISH FINANCE BANK.

The Judgment of the Lords Justices in the above case, will be found in the "Solicitors Journal and Weekly Reporter," of this day, 1s, by post 13 stamps.

Office, 59 Carey street, W.C.

Gracechurch street, City.—First-class Freehold Investment, as safe as a ground rent, with very valuable reversion in less than 18 years.

MESSRS DEBENHAM, TEWSON, and FARMER will SELL, at the Guildhall Coffee House, near the Guildhall, on Tuesday, May 2, at 1, an important FREEHOLD PROPERTY, known as No. 79 Gracechurch street; comprising the extensive premises for many years in the occupation of Messrs Richard Howell and Co. The property is let on lease to Mr Joseph Robinson for a term, having 18 years unexpired at Lady-day, 1865, at a rental (now considerably less than a ground rent) of £400 per annum, but is of the estimated value of from £1,000 to £1,200 per annum. May be viewed by cards only, to be obtained of the auctioneers.—Particulars of Messrs Church and Sons, solicitors, 9 Bedford row; and of the auctioneers, 80 Cheapside.

Broad street buildings and Liverpool street, City.—Important Sale of very extensive and valuable Leasehold Property, covering an area of nearly 8,000ft, immediately facing the new Termini of the North London, London and North-Western, and Great Eastern Railways.

MESSRS DEBENHAM, TEWSON, and FARMER will SELL, at the Guildhall Coffee House, on Tuesday, May 2, at 1 punctually, in five lots, Nos. 37, 38, and 39 BROAD STREET BUILDINGS and the extensive PREMISES known as Stapleton's Horse and Carriage Repository, together with the Public House known as the Railway Tavern, the whole forming a square block, covering an area of nearly 8,000ft, and offering one of the finest sites in London for an hotel or stack of first-class offices and shops. The property is held under four separate leases, direct from the Corporation of the City of London, for terms of from 16½ to 56½ years unexpired, at low ground rents. Its commanding position, fronting one of the most important of the City railway termini, renders it extremely valuable. The buildings are all substantial and good, and with a moderate and judicious outlay in alterations they would unquestionably realise a very large rental. The Railway Tavern is let on lease for 29 years, at £550 per annum. The remainder of the property is nearly all in hand.—Particulars of Messrs Sole, Turners, and Hardwick, solicitors, 68 Aldermanbury; and of the auctioneers, 80 Cheapside.

SALE OF SOUTH AUSTRALIAN GOVERNMENT RAILWAYS.

Public Works Office, Adelaide, February 23, 1865.

Notice is hereby given, that Tenders will be received at this office, until 19th August next, to be addressed to the Commissioner of Railways, Adelaide, South Australia, and marked "Tender for purchase of Railways," from parties willing to purchase the lines of Railway in South Australia, from Adelaide to the Port, and from Adelaide to Kapunda, in accordance with the conditions and specifications published in the South Australian Government Gazette of this date, copies of which, with plan attached, may be obtained on application at the Office of the Commissioner of Railways, Adelaide; or of the Agent-General of South Australia, 5 Copthall court, E.C., London.

The Acts referred to may be also seen at the above offices.

The Government will not necessarily accept the highest or any tender.

W. MILNE, Commissioner of Railways.

N.B.—All Tenders should be despatched from England not later than by the June mail.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

PARTNER WANTED, IN THE Woollen Trade, with a capital of not less than £4,000, and a competent knowledge of counting-house duties.—Apply to Thos. McGregor, 150 Cheapside.

METAL TRADES.—WANTED AN experienced CLERK. He must be a good correspondent and be thoroughly well qualified to purchase and sell Iron, Tin Plates, Copper and other Metals. Commencing salary about £250 per annum. Previous occupation and other particulars to be communicated by letter to, N.T.D., Messrs Dawson and Sons, 74 Cannon street, London, E.C.

CORRESPONDENT OR MARKET CLERK.—Re-engagement wanted, by a Young Man who is able to speak and to correspond in English, French, German, Italian, and Spanish, and is well acquainted with the export of cotton and other dry goods. Best references and testimonials.—Address Beta, Messrs Dawson and Sons, 74 Cannon street, London, E.C.

A YOUNG GENTLEMAN, OF Liberal Education and Seven years' Business Experience, with a knowledge of British Manufactures, is desirous of going Abroad. Salary not so much an object as introduction to good business. First-class reference.—Address "Scott," 14 Beaufort buildings, Strand.

A THOROUGHLY COMPETENT Gentleman, who is now, and has been for some years, engaged as buyer for the East India, China, and other markets; who has a practical knowledge of cloth and yarn from having been engaged in their production, would be glad to arrange with any first-class house, to act for them in Manchester.—Address P. 6, Post office, Manchester.

A FRENCH GENTLEMAN, 30 years of age, who has had three years' experience in one of the largest firms in London, is open for an engagement as AGENT in France for a Commission House or Manufacturer. He would have no objection to represent an English or Foreign house at the International Exhibition at Dublin. He speaks French, English, and German, and has a perfect knowledge of the Lyons trade. Unexceptionable references given and required.—Address Z. N., care of Davies and Co., Advertising Agents, Finch lane, Cornhill.

TO CAPITALISTS.—FOR A HOUSE of first-rate standing and credit there is an opportunity of acquiring, on favourable terms, a business yielding at present £7,000 to £8,000 commissions per annum, and capable of further development.—Address, in the first instance, M., care of Davies and Co., Advertising Agents, Finch lane, Cornhill.

TO JOINT STOCK BANKS AND FINANCIAL COMPANIES.—A gentleman, who has had great experience in Banking and Eastern Exchanges, is desirous of obtaining an APPOINTMENT in LONDON. Unexceptionable references.—Address, by letter only, K.A., care of Mr Vickers, 2 Cowper's court, Cornhill, E.C.

TO PROMOTERS OF PUBLIC COMPANIES.—Wanted, the co-operation of four or five influential gentlemen, for the purpose of introducing a Financial Association connected with the East, the operations of which promise to be most lucrative.—Address "Midas," Messrs Smith and Co., Advertisement Contractors, 181 Fleet street.

TO MERCHANTS, SHIP CHANDLERS, and SHIPPERS of HARDWARE.—A commission firm in Birmingham of forty-five years standing, well acquainted with the requirements of every foreign and colonial market, purchases hardware, machinery, &c., at a commission of 2½ per cent. References exchanged. Prices sent on application.—Apply, Merchant, Messrs Courtenay and Groome, Solicitors, 9 Gracechurch street, London.

TO MERCHANTS, PUBLIC COMPANIES, and OTHERS.—A Gentleman of considerable experience in the East India and China and Brazilian Trades will be shortly disengaged. He is thoroughly conversant with the Colonial Produce Markets, has conducted the correspondence and understands the general details of a merchant's business. He wishes to join a Firm as Working Partner or a Company as Manager, or with a view to prospective partnership or advancement.—Address A.Z., care of W. Hopecraft, 1 Mincing lane.

TO CAPITALISTS.—The advertiser is desirous of meeting with a Gentleman, who has about £25,000 at command, to join with him in purchasing one of the most promising shipbuilding and engineering works on the Thames. The advertiser can put a small sum in the concern, and would be the active partner, with a proportionate share of the profits, he having already been an acting partner in a similar concern. To any one who has a good connection in the shipping trade this is a most favourable opportunity for investment.—Address Telford, Deacon's News Rooms, Leadenhall street, E.C.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

SIX PER CENT. ON FREEHOLD SECURITY IN LONDON.

—The Directors of the Inns of Court Hotel Company (Limited), are now issuing Debentures of £50 or £100 and upwards, for three, five, and seven years, with coupons attached for payment of interest half-yearly.

The debentures will form a first charge upon the very valuable freehold hotel property of the Company in Holborn and Lincoln's inn fields, estimated as worth not less than £120,000.

The sum of £70,000 has been already expended in purchase of site and on the building.

All payments to the contractors are made in cash.

The powers of the Company to borrow on these debentures will be limited by deed to £80,000.

For further particulars and forms of application, apply to the Secretary, at the offices, 63 Lincoln's inn fields, W.C. H. T. BEWLEY, Secretary.

COLONY OF QUEENSLAND LOAN of 1863.

TENDERS for BALANCE, £127,500.

The Union Bank of Australia, as Financial Agents of the Government of Queensland, being empowered to negotiate the sale of the remainder of the Debentures issued under Act of the Colonial Legislature, 27th Victoria, No. 25, entitled "An Act to Authorise the Raising in Loans, £707,436, on the Security of the Consolidated Revenues of the Colony, for the Execution of certain Public Works,"—

Notice is hereby given, that the Board of Directors are prepared to receive, up to Wednesday, the 3rd May, at Twelve o'clock precisely, Sealed Tenders in writing, of parties who may forward the same, addressed "Tenders for Queensland Loan," or attend in person therewith, for any portion of £127,500, being the balance of the above Loan. Such tenders will then be opened in the presence of all so attending and read publicly, and the purchasers be forthwith declared, provided the price be not under the minimum fixed, which will be placed on the table under seal.

These debentures of £100 each, with coupons attached, will become due 1st January, 1864, and bear interest at the rate of six per cent. per annum from 1st January, 1865, said Debentures, principal and interest, being made payable in London or Brisbane, at the option of the holder.

Payment for the amounts that may be allotted will be required as follows: £10 per cent. on the purchaser being declared, and the balance on 1st June, 1865.

Forms of application are provided at this office.—By order of the Board,
H. W. D. SAUNDERS, Secretary.
38 Old Broad street, London, April 18, 1865.

THE INVESTMENT AND FINANCE AGENCY.

Established for the purpose of effecting purchases and sales on commission in every description of public securities, and for affording the necessary precautionary information for the safe investment of capital, &c., &c.

A record is kept of the status and prospects of the various public companies and foreign stocks; and as this Agency scrupulously declines speculative transactions upon its own account, the public have, first, the security of being protected by unbiassed information, based upon twenty-seven years' experience in the stock and share markets; and, secondly, the guarantee that any business which this Agency undertakes will be completed with the strictest fidelity.

During the past year 1864, no less than ten new foreign loans, constituting an aggregate capital of £22,271,000, and 282 new joint stock companies with an authorised capital of £155,887,500, were introduced upon the London market.

Never were there times which inculcated more forcibly than the present the necessity of experience and caution prior to the investment of capital, or when reliable services, such as this Agency specially renders, were more requisite.

The Finance Department includes the Agency of public companies, loans, deposits, &c., and advances are negotiated on public securities having a market value.

An important feature of this Agency is, that the same uniform system of strict attention is paid to transactions of small, as well as large amounts,—the object being, to increase its facilities for carrying out its operations to the greatest possible advantage by embracing the business of every description of investors.

Cheques to be drawn to the order of Mr Charles Peters, Secretary, and crossed The Agra and Masterman's Bank.

No 12 Clement's lane, Lombard street, London, E.C.

BROKERS.

Messrs Robins, Barber, and Dalley, Threadneedle street.

AUDITORS.

Messrs C. F. Kemp, Cannan, Ford, and Co., 7 Gresham street.
Robert Smith, Esq., 6 Great Winchester street.

SECRETARY (pro tem.)—Courtenay Clark, Esq.

Offices—9 Great Winchester street, Old Broad street.

This Company is formed for the purpose of acquiring and extending the well-known iron works, which have been established and in successful operation for a long period at Vuiksa, in Russia.

The estate, which covers an area of 405,000 English acres and containing 35,000 inhabitants, is most advantageously situated on the navigable river Oka (which flows into the Volga at Nijni Novgorod), and is within 66 miles of the railroad which connects Nijni Novgorod with Moscow.

The profits at the present time amount to about 537,000 silver roubles (about £70,000 sterling) per annum, subject, however, to a deduction of 72,000 roubles, being interest at 5 per cent., and sinking fund on a debt of 1,200,000 roubles due to the Russian Government, thus leaving a net annual profit of 465,000 roubles (£60,000). By arrangement with the proprietors, and hypothecation or mortgage to the Company of their reserved interest in the estate, 87,000 roubles (£11,000), being about 7 per cent. per annum upon the whole capital proposed to be called up, is guaranteed to be first paid to the shareholders of the Company; of the surplus profits (378,000 roubles or £49,000), three-fifths will belong to the present proprietors, and two-fifths to the shareholders, for a period of 37 years. Thus, on an estimate of the profits at the present time, and without considering the improvements likely to result from an increase of capital, a dividend of about 20 per cent. per annum is shown upon the capital (£165,000) required to be called up. In the above estimate no account has been taken of the profits upon the manufacture of steam engines, boilers, &c., and it is anticipated that by the introduction of further capital and the development of the works, the returns will be more than doubled.

It is intended to create a sinking fund for the purpose of returning to the shareholders, at the expiration of the thirty-seven years, when the interest of the Company will cease, the whole amount of the capital called up. On the determination of the lease, the proprietors bind themselves to have a valuation made of all the property above ground, and after deducting the present value, to pay to the Company one-half of the difference in cash. Thus, in addition to receiving a highly remunerative dividend during the thirty-seven years, at the end of that time the whole of their capital will be returned to the shareholders with a considerable bonus.

Plans of the estate and works, the engineer's report, and other documents on which the above statements are founded, may be inspected at the offices of the Company.

Applications for shares to be made in the accompanying form. In the event of no allotment being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the bankers, brokers, and solicitors.

FORM OF APPLICATION FOR SHARES.
(To be retained by the bankers.)

No.——

To the Directors of the Russian (Vyksounsky) Iron Works Company (Limited).

WOTHERSPOON and CO., Glasgow and London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILCE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, ROCKSTRO'S "Hints to Flute Players," price 6d.

CONCERTINAS.—At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS, by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES, by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 80 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sadley, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendat on of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

CAPITAL, £150,000, IN 15,000 SHARES OF £10 EACH.

Power is reserved for the Company by special resolution to increase the capital.

A minimum dividend of 10 per cent. per annum, payable in January and July, is guaranteed by the vendors on the amount paid up during the current and three following years. Deposit, £1 per share on Application, and £1 per share on Allotment. No Call to exceed £1 per share, or to be made at a less interval than Three Months from a previous Call. Should no allotment be made to an applicant his deposit will be returned in full.

DIRECTORS.

Lt.-General Sir Richard Birch, K.C.B., late Military Secretary to the Government of India, Chairman.
William Clode Braddon, Esq., 3 East India avenue, formerly of Calcutta.
Robert G. Lancaster, Esq., 86 Wimpole street, Cavendish square, formerly Manager of the Oriental Bank Corporation, Calcutta.
Charles F. Weber, Esq., 2 Royal Exchange buildings, proprietor of the Alleepore Tea Estate, Cachar.
* George Williamson, Esq., formerly the Chief Manager of the Assam and Jorehaut Tea Companies' Plantations in India.
* James H. Williamson, Esq., late Director of the Bishnauth Tea Company, Calcutta.

* These Gentlemen joined the Board after the Contracts of Sale were signed.

BANKERS—The Agra and Masterman's Bank, Nicholas lane, Lombard street.

SOLICITORS—Messrs Courtenay and Croome, 9 Gracechurch street, London.

AUDITORS—Messrs Alison and Waddell, 14 Walbrook, Public Accountants.

BROKER—John Inchbald, Esq., 2 Copthall court, and Stock Exchange, London.

SECRETARY (PRO TEM.)—J. C. Gray.

OFFICES—No. 17 Gresham House, Old Broad street, London.

This Company has been formed for the purchase and cultivation of one or more tea estates in Assam, and the Directors have entered into provisional contracts for the acquisition of two valuable groups of plantations, situate chiefly in the district of Luckimpore, in that province, the property of Messrs Williamson and Lyell.

The estates comprise 11,000 acres of land, of which 1,250 are under cultivation. The price is £112,000, payable by instalments extending to 1st January, 1870. The vendors take shares to the extent of one-fourth of the purchase.

A minimum dividend of 10 per cent. for the current and three following years is guaranteed.

The Company will take immediate possession and be entitled to the crop of the present year.

No promotion money will be paid, and the estates are made over by direct purchase between the owners and the Company, without any intermediate agency.

Full prospectuses, with map, may be obtained of the bankers, brokers, and solicitors, and at the offices of the Company, where a copy of the articles of association, and of the agreements for purchase, may be inspected.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.
N.B.—Lists of Heirs at Law, Next of Kin.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.
BRIGHTON	At 6 Marine Parade.
LIVERPOOL	At Cook street.
MANCHESTER	At Ducie place.
LEEDS	At Commercial buildings.
BIRMINGHAM	At Upper Temple street.
DERBY	At the London road.
LEICESTER	At 52 Granby street.
WOLVERHAMPTON	At Exchange street.
SHEFFIELD	At Exchange buildings.
NOTTINGHAM	At Maypole yard.
CHESTERFIELD	At the Low Pavement.
STOKE-UPON-TRENT	At Wharf street.
DUDLEY	At Burnt Tree.
WORCESTER	At the [illegible]
BATH	At 5 Edgar buildings.
SOUTH WALES	At King street, Bristo
DUBLIN	At Crampton quay.
CORK	At Cook street.
EDINBURGH	At 47 North bridge. At 11 Union street lane.
GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré;

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

H. J. AND D. NICOLL, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 50 Bold street, Liverpool; and 10 Mosley street, Manchester.

EARLY SPRING FASHIONS FOR GENTLEMEN, Overcoats, Morning Coats, Trousers, and Vests.

BOYS' NEGLIGE AND OTHER SUITS, Knickerbockers, &c.

LADIES' RIDING HABITS, Jackets, Overcoats, Cloaks, &c.

NAVY, MILITARY, DEPUTY-LIEUTENANTS' OUTFITS and COURT DRESSES completed on the shortest notice: the embroidery and appointments kept ready, and may be inspected. Court Dresses may also be had for a levee, &c.

SERVANTS' LIVERIES, &c.—Current list of prices, with particulars for self-measurement, sent on application. The prices are for cash payments. In each department garments are kept ready for immediate use.

H. J. AND D. NICOLL'S GUINEA TWEED WATERPROOF COATS, for gentlemen, and Guinea Cloaks, for ladies, are patronised by travellers all over the world.

NEW THEATRE ROYAL ADELPHI, Sole Proprietor and Manager, Mr B. Webster.
Great attraction. By desire, the popular Comedy of MASKS AND FACES. Mr B. Webster and Mrs Stirling. The highly successful New Extravaganza of PAN; or, the LOVES of ECHO and NARCISSUS. Mr J. L. Toole, and Mrs A. Mellon. And THE STEEPLE CHASE; or, In The Pigskin. Mr J. L. Toole.

Monday, and during the week, MASKS AND FACES. Messrs B. Webster, Billington, P. Bedford, Stuart, Ashley; Mrs Sterling, and Miss H. Simms. PAN; or, the LOVES of ECHO and NARCISSUS. Messrs J. L. Toole, P. Bedford, C. J. Smith, Romer; Mrs A. Mellon, Miss K. Kelly, Miss C. Denvil, Miss L. Bruce, and Miss A. Seaman. And THE STEEPLE CHASE. Mr J. L. Toole. Commence at 7.

ROYAL POLYTECHNIC.—Patron H.R.H. the Prince of Wales.—Easter Holidays.—"Proteus; or, We are here, but not here." This startling illusion (J. H. Pepper and Thomas Tobin joint inventors) daily at 2.30 and 7.30.—Captain Richard Burton's Pilgrimage to Mecca and Medinah, illustrated by novel effects, under the direct superintendence of the above distinguished traveller.—Engagement of George Buckland, Esq., for his new Musical Entertainment, entitled—An old picture in a (n)ice new frame; or, Mont Blanc remounted and varnished.—Mr G. W. Jester's Ventriloquial Frankenstein.—Mr James Matthews's Curiosities of Manual Magic.—Exhibition of Inventions for saving life in Railway Travelling, and Lecture by J. L. King, Esq.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

E. DENT AND CO., WATCH, CLOCK, and CHRONOMETER MAKER to Her Majesty, H.R.H. the Prince of Wales, and H.I.M. the Emperor of Russia, and Maker of the Great Clock for the Houses of Parliament.
61 Strand, W.C., and 34 and 35 Royal Exchange, E.C.

	Guineas.		Guineas.
Gold Lever Watches from	16 to 30	Silver Lever Watches from	5 to 15
Gold Half Chronometers winding with or without a key from	35	Silver Half Chronometers	25
Gold Hunting, Case extra	5	Silver Half Chronometer in Hunting Case	26
Gold Geneva Watches examined and guaranteed from	7 to 20	Marine Chronometers from	35
		Gold Chains, quality 16 and 18 Carats fine, from	6 to 25

An elegant assortment of Drawing-room Clocks of the newest Designs.
Astronomical, Turret, and other Clocks made to order.
E. DENT and CO. 61 STRAND W.C. (adjoining Coutt's Bank); and at 34 and 35 ROYAL EXCHANGE, E.C.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.
*** No connection with any one of the same name.

THE PHOSPHORISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.

LONDON AGENTS: — Cleaver, 63 Oxford street Hooper, 43 King William street, London bridge; Prout 229 Strand.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BUDGET.

IT is of great importance that the Budget should be given as soon as possible after the close of the financial year. Not only does even a surplus of the first magnitude—a surplus of 4,000,000*l*, as that of this year—lose much of its freshness if people have a month to talk it over, but much more important consequences ensue. The *secret* is divulged. We see by what has just happened that it is impossible to keep for a long period an important matter of finance known to several persons. When direct taxation alone is in question, it is of little consequence who knows it or who is ignorant. No one can make money by knowing it. But the reduction of indirect taxation is a secret far more delicate. Three hours at particular conjunctures may make the fortune of a lifetime, and all official information which bears or may be thought to bear on the *prices* of articles should be guarded with sedulous care. We need not say that, on the present occasion it has not been so guarded.

The budget of this year is in comparison with many budgets of late years very simple. It deals with large figures, but if we may use so familiar a phrase, it *lumps* those figures together. The estimate of future revenue and future outlay, on which, as in all such cases, everything hinges, is as follows:—

EXPENDITURE.

	£
Interest on Debt	26,350,000
Charges on Consolidated Fund	1,900,000
Army	14,348,000
Navy	10,392,000
Civil Services	7,650,000
Revenue Departments	4,657,000
Packet Service	842,000
	66,139,000

REVENUE.

	£
Customs	22,775,000
Excise	19,030,000
Stamps	9,550,000
Taxes	3,350,000
Property Tax	7,800,000
Post-office	4,250,000
Crown Lands	315,000
Miscellaneous	2,650,000
China Indemnity	450,000
	70,170,000

showing a surplus of 4,031,000*l*, supposing no change of taxation to be made—supposing the taxes of last year to be continued through the ensuing year.

This great sum is the raw material with which Mr Gladstone works—the *corpus vile* on which he operates—and he does a great deal with it. After certain minor changes, which we enumerate elsewhere, he begins in earnest. He reduces—

	£
Duty on tea	2,300,000
Income tax	2,600,000
Fire insurances	520,000
Total relief	5,420,000

This, of course, is greater than the sum which this year is at Mr Gladstone's disposal, but he deals with next year also, and his reductions are divided thus between the years:—

TO OPERATE THIS YEAR.

	£	£
Tea duty	1,868,000	
Income tax	1,650,000	
Fire insurance	260,000	
		3,778,000

TO OPERATE NEXT YEAR.

Tea duty	267,000	
Income tax	950,000	
Fire insurance	260,000	
		1,417,000
To be made up by increased consumption of tea		225,000
TOTAL RELIEF		5,420,000

The objections to this simple Budget are also simple. 1st. That Mr Gladstone does not do what he ought to do; that his *selection* is mistaken. 2ndly. That he does more than he should, that the *extent* of his operations is excessive. We will briefly consider both objections.

As to the first we think it not only true, but almost indisputable, that the Chancellor of the Exchequer has exercised a wise

Digitized by Google

discretion. It has been generally and justly agreed that all remission of taxation should be divided between taxes which press upon property and taxes which press upon labour; it is not easy to prove that each class now pays what it ought, but on the other hand it is not easy to prove that any class does *not* pay what it ought. A rough approximate justice has been tentatively obtained, and that rough justice we wish by all means to preserve. Taking the two classes of civilised society—as we are obliged roughly to divide them, and as unhappily too strictly they divide themselves—the class which lives on wages and the class which lives on property, we wish in our reduction of taxation not to impair, not to mar the vague, *prima facie* equality which now exists between them, and which, considering the complexity of human affairs, and the impossibility of tracing the incidence of taxes through a ramified society with accurate minuteness is sufficient, is as much as a grave man who considers the matter will ever hope for.

But if a considerable tax on the working class is to be reduced, the tax on tea is clearly that tax. It is the tax consumed by the poorest of the working class, the poorest working women; it adds between 40 to 50 per cent. to the price of the article, a greater augmentation than that caused by taxation to any similar article: it is the article of which the need is the most extreme, and also in all comparable articles, the one inwhich the tax presses the most heavily. And, therefore, it is the fittest subject for relief.

The practical competitor is the repeal of the malt duty, and on this subject we need scarcely refer to the admirable though concise paper which we last week communicated to our readers from the pen of one of our oldest and most cautious economists. The objections to reducing the malt tax are three: first, that it does not press on the poorest of the poor, on the class most wanting relief, to the same extent that the tax on tea does. Secondly, that it is a tax only affecting the price of beer, Mr Gladstone says by 20 per cent., but we should have rather estimated by 15 per cent. Thirdly, that it would require a very great reduction of the duty much to reduce the price to the consumer. The consumer only now pays a comparatively small part of the price of this article *to the Government*, and whatever the Government gives up will be longer in reaching him, and will be less felt and appreciated when it does reach him.

If malt had been an article produced abroad, we should have heard little of reducing the duty upon it. But being a visible *hateable* excise duty levied within this country it is much blamed; and a large political party, now that it is in opposition, seems to ask for its removal. We say *seems* to ask, for we do not believe that the more considerate leaders of the Conservative party, that Sir Stafford Northcote or Lord Stanley, would either vote for the abolition of the malt duty while out of place or propose it when in place. Nine-tenths of the country members, and nine-tenths of the farmers had rather have twopence off the income tax than a total abolition of the malt tax. They know they shall gain much by the one, and they do *not* know, upon a strict examination they do not much believe, that they would acquire much by an abolition of the other.

It has, indeed, been contended that the removal of the malt tax would be a great stimulus to the employment of labour and to industry; that it prevents poor land being used for barley which is now otherwise used, and that it compels good land to be used for barley which would otherwise not be used. But it is only a very sanguine imagination, little acquainted with the bare facts of rural society, which can expect a relief to industry and an augmentation of general wages through the removal of what is (taking it at the utmost) an infinitesimal reduction operating on a few acres here and there in a few counties. But the reduction of the tea duty will certainly augment home industry. More tea will be drunk in England, and more English things must therefore be sent to pay for it. Our operatives will be benefited in two ways, by having more to do, and having more tea for what they do. We can scarcely bring ourselves to discuss the repeal of the malt duty as an economical proposal; it is, in fact, a political proposal.

It has been said that there are other Customs duties which should have been taken off in preference to tea, but, except the duty on currants, which is in comparison of small magnitude, none of these press very heavily on the labouring class, and it is only in an indirect manner, and after an interval more or less long, that this class would be benefited by their abolition. The duty on timber is objectionable;—all duties are objectionable;—but it is impossible to say that it is a grievous impost,—that it produces evils *loudly* crying for a remedy. Most of what has to be done in tariff reform, though important, is not pressing or urgent; it can *wait* to be done.

As to the selection of the reductions, therefore, we believe that the purest and most critical finance will decide in favour of this year's Budget; but we are not sure that it will so decide in favour of the amount of such reductions. In plain English, we would rather have taken 1d than 2d off the income tax; we know that our opinion is unpopular; we know that this is the part of the Budget which the whole House most cheered; we know, too, that we shall not attract much attention to our objection, for we well know that there is no serious danger. But still on account of the precedent, and perhaps as it will be said out of abundant caution, we would rather have paid more income tax than is asked of us.

The Budget throws, in seeming, upon next year's surplus a burden of 1,417,000*l*, or more than 1d of the income tax, which is now reckoned at 1,300,000*l*, and we are dubious as to whether this is wise. We do not see any financial reason for it. In pure political economy at least every year should be made to provide as near as possible for itself, and for no more than itself.

We do not indeed believe that there is serious risk on this ground. If our readers will compare the estimate for next year's hypothetical income with the statement of last year's real income, they will see that it has been made with studious caution:—

	Actual income, 1864-5.		Estimated income, 1865-6. Taxation remains as before.
	£		£
Customs	22,572,000	.....	22,775,000
Excise.....	19,558,000	.....	19,032,000
Income tax...	7,958,000	.....	7,800,000
Total of these three principal heads of revenue.....	50,088,000	.....	49,607,000

so that not only is there no increase in these three important items of income, but a diminution. The other items are much the same in this year's estimate as in last year's reality, and therefore the whole annual increase of revenue, an increase which may be reckoned at 1,000,000*l*, even when the income tax is reduced to 4d, remains as a reserve fund. If the revenue augments as usual, nothing will be thrown upon next year.

In the Budget of 1863, Mr Gladstone postponed 890,000*l* to the next half year, and in the Budget of 1864, 531,000*l*, and in both cases, when the time came, no one knew anything about it. The revenue had so increased beyond the estimate, that there was no postponed charge—no mortgage upon next year's surplus.

Perhaps these reasons may prove to more sanguine minds that we should be wrong in objecting on this occasion to the postponed charge. We *were* wrong in 1863, when we objected strongly. Still, out of an obstinate caution which is habitual to us in money matters, and which will not yield even to plausible arguments, we *should* again object were it not for a single consideration. A postponed reduction of the income tax is hardly a real reduction; it is, if we may use a Latin word which the proceedings in the divorce court have rendered familiar even to ladies, a reduction *nisi*. It is a provisional reduction. Let us suppose the worst,—that by a bad harvest, by foreign war, and derangement of domestic industry—the three great causes which impair revenue—at the next 1st of April, the aspect of the finance of 1866-7 is changed; that it then looks gloomily just as it now looks cheerfully. We can then again reimpose the income tax we now take off. The greatest evil to be feared is a new return to the old rate of taxation, and this is not a great evil. We are not abandoning a permanent source of revenue; we are only adjusting a variable machine, which, if we find we are in error, we can readjust again.

There is no other ground for objecting to this year's Budget, and the greatest ground for praising it, and the series of which it forms a part. The expiring Parliament ought to be called Mr Gladstone's Parliament, for all which it has done that is worth doing is his doing.

	66,462,000
Surplus	3,851,000
	70,313,000

THE ASSASSINATION OF MR LINCOLN.

The murder of Mr Lincoln is a very great and very lamentable event, perhaps the greatest and most lamentable which has occurred since the *coup d'etat*, if not since Waterloo. It affects directly and immensely the welfare of the three most powerful countries in the world, America, France, and England, and it affects them all for evil. Time, circumstances, and agent have all conspired as by some cruel perversity to increase the mischief and the horror of an act which at any moment, or under any circumstances, would have been most mischievous and horrible. It is not merely that a great man has passed away, but he has disappeared at the very time when his special greatness seemed almost essential to the world, when his death would work the widest conceivable evil, when the chance of replacing him, even partially, approached nearest to zero, and he has been removed in the very way which almost alone among causes of death could have doubted the political injury entailed by the decease itself. His death destroys one of the strongest guarantees for continued peace between his country and the external world, while his murder diminishes almost indefinitely the prospects of reconciliation between the two camps into which that country has for four years been divided. At the very instant of all others, when North and South had most reason to see in his character a possibility of reunion, and to dread the accession of his inevitable successor, a Southerner murders him to place that successor in his chair, gives occasion for an explosion of sectional hate, and makes a man who has acknowledged that hate master of armies which can give to that hate an almost limitless expression in act. At the very moment when the dread of war between the Union and Western Europe seemed, after inflicting incessant injury for four years, about to die away, a murderer deprives us of the man who had most power and most will to maintain peace, and thereby enthrones another whose tendencies are at best an unknown quantity, but who is sure, from inexperience, to sway more towards violence than his predecessor. The injury done alike to the North, to the South, and to the world, is so irremediable, the consequences of the act may be so vast, and are certainly so numerous, that it is with some diffidence we attempt to point out the extent of the American loss, and the result that loss may produce.

The greatness of the American loss seems to us to consist especially in this. To guide and moderate a great revolution, and heal up the wounds created by Civil War, it is essential that the Government should be before all things strong. If it is weak it is sure either to be violent, or to allow some one of the jarring sections of the community to exhibit violence unrestrained, to rely on terror as the French Convention, under a false impression of its own dangers, did, or to permit a party to terrorise, as the first Ministry of Louis the Eighteenth did. The "Reign of Terror" and the "Terreur Blanc" were alike owing, one to an imaginary the other to a real weakness on the part of the governing power. There are so many passions to be restrained, so many armed men to be dealt with, so many fanatic parties to convince, so many private revenges to check, so many extra legal acts to do, that nothing except an irresistible Government can ever hope to secure the end which every Government by instinct tries to attain, namely, external order. Now, the difficulty of creating a strong Government in America is almost insuperable. The people in the first place dislike Government, not this or that administration, but Government in the abstract, to such a degree that they have invented a quasi philosophical theory, proving that Government, like war or harlotry, is a "necessary "evil." Moreover, they have constructed a machinery in the shape of States, specially and deliberately calculated to impede central action, to stop the exercise of power, to reduce government, except so far as it is expressed in arrests by the parish constable, to an impossibility. They have an absolute Parliament, and though they have a strong Executive, it is, when opposed to the people, or even when in advance of the people, paralysed by a total absence of friends. To make this weakness permanent they have deprived even *themselves* of absolute power, have first forbidden themselves to change the Constitution, except under circumstances which never occur, and have then, through the machinery of the common schools, given to that Constitution the moral weight of a religious document. The construction of a strong Government, therefore, *i.e.* of a Government able to do great acts very quickly, is really impossible, except in one event. The head of the Executive may, by an infinitesimal chance, be a man so exactly representative of the people, that his acts always represent their thoughts, so shrewd that he can steer his way amidst the legal difficulties piled deliberately in his path, and so good that he desires power only for the national ends. The chance of obtaining such a man was, as we say, infinitesimal; but the United States, by a good fortune, of which they will one day be cruelly sensible, had obtained him. Mr Lincoln, by a rare combination of qualities—patience, sagacity, and honesty—by a still more rare sympathy, not with the best of his nation but the best average of his nation, and by a moderation rarest of all, had attained such vast moral authority that he could make all the hundred wheels of the Constitution move in one direction without exerting any physical force. For example, in order to secure the constitutional prohibition of slavery, it is absolutely essential that some *forty-eight* separate representative bodies, differing in modes of election, in geographical interests, in education, in prejudices, should harmoniously and strongly co-operate, and so immense was Mr Lincoln's influence—an influence, it must be remembered, unsupported in this case by power—that had he lived, that co-operation, of which statesmen might well despair, would have been a certainty. The President had, in fact, attained to the very position—the dictatorship—to use a bad description, required by revolutionary times. At the same time, this vast authority, not having been seized illegally, and being wielded by a man radically good,—who for example really reverenced civil liberty and could tolerate venemous opposition,—could never be directed to ends wholly disapproved by the ways of those who conferred it. It was, in fact, the authority which nations find it so very hard to secure, which only Italy and America have in our time secured,—a good and benevolent, but resistless temporary despotism. That despotism, moreover, was exercised by a man whose brain was a very great one. We do not know in history such an example of the growth of a ruler in wisdom as was exhibited by Mr Lincoln. Power and responsibility visibly widened his mind and elevated his character. Difficulties, instead of irritating him as they do most men, only increased his reliance on patience; opposition, instead of ulcerating, only made him more tolerant and determined. The very style of his public papers altered, till the very man who had written in an official despatch about "Uncle Sam's web feet," drew up his final inaugural in a style which extorted from critics so hostile as the *Saturday Reviewers*, a burst of involuntary admiration. A good but benevolent temporary despotism, wielded by a wise man, was the very instrument the wisest would have desired for the United States; and in losing Mr Lincoln, the Union has lost it. The great authority attached by law to the President's office reverts to Mr Johnson, but the far greater moral authority belonging to Mr Lincoln disappears. There is no longer any person in the Union whom the Union dare or will trust to do exceptional acts, to remove popular generals, to override crotchetty States, to grant concessions to men in arms, to act when needful, as in the Trent case, athwart the popular instinct.

2. The consequences of this immense loss can as yet scarcely be conjectured, for the one essential datum, the character of the President, is not known. It is probable that that character has been considerably misrepresented. Judging from information necessarily imperfect, we have formed an *ad interim* opinion that Mr Johnson is very like an average Scotch tradesman, very shrewd, very pushing, very narrow, and very obstinate, inclined to take the advice of any one with more *knowledge* than himself, but unable to act on it when opposed to certain central convictions, not oppressive, but a little indifferent if his plans result in oppression, and subject to fits of enthusiasm as hard to deal with as fits of drunkenness. Should this estimate prove correct, we shall have in the United States a Government absolutely resolved upon immediate abolition, whatever its consequences, foolish or wise according to the character of its advisers, very incapable of diplomacy, which demands above all things knowledge, very firm, excessively unpopular with its own agents, and liable to sudden and violent changes of course, so unaccountable as almost to appear freaks. Such a Government will find it difficult to overcome the thousand difficulties presented by the organisation of the States, by the bitterness of partisans, or by the exasperated feelings of the army, and will be driven, we fear, to overcome them by violence, or at least to deal with them in a spirit of unsparing rigour. It is, therefore, we conceive, *primâ facie* probable that the South will be slower to come in, and much less ready to settle down when it has come in, than it would have been under Mr Lincoln; and this reluctance will be increased by the consciousness that the North has at length obtained a plausible excuse for relentless severity. It will also be much more ready to escape its difficulties by foreign war. Beyond those two somewhat vague propositions, there are as yet too few data whatever for judgment. Least of all are there data to decide whether the North will adhere to the policy of moderation. Upon the whole we think they will, the average American showing in politics that remarkable lenity which arises from perfect freedom, and the consequent absence of fear; but he is also excitable, and it is on the first direction of that excitement that everything will depend. If it takes the direction of vengeance, Mr Johnson, whose own mind has been embittered against the planters by family injuries, may break loose from his Cabinet; but if, as is much more probable, it takes the direction of over reverence for the policy of the dead, he must coerce his own tendencies until time and the sobering effect of great power have extinguished them. He is certainly a strong man, though of rough type, and the effect of power on the strong is usually to soften.

COUNTRY ISSUES.

Mr Gladstone's Bill, respecting the country issues, stands for Monday next, and as amendments have been made in it which are satisfactory to the country bankers, and do not impair the principle of the Bill, it will probably pass into a law. The issuing bankers in England have, as we understand, undertaken to promote this Bill, and as it is likewise supported by the strength of Government, no opposition to it is either likely to be attempted, or likely to be successful. We wrote so fully on this subject upon a very recent occasion that we have little to say now.

We then showed that the country issues have in times past been of vital benefit to this country. In conjunction with the Scotch issues they founded the London money market. The great peculiarity of Lombard street is the quantity of money to be found there; not merely of transitory money, passing to and fro in the changes of trade and for the monetary convenience of nations, but permanent money which is of English or at least British origin, and which, if invested at all, is to be invested on English account. If it were not for this great domestic accumulation, England would not be the great storehouse of loanable capital,—the place where every one comes who wants such capital. It became that storehouse by its banking system, and that banking system was in its origin, and is still in remote and rude districts entirely dependent on the bank note issue. You cannot diffuse a banking system over a vast country so well as by subsidising it with the profits of note issue: perhaps we should not be wrong in saying that without such a subsidy you can hardly diffuse it at all.

Those who doubt the truth of this assertion should consider the state of France. Paris is not a great money market, because French money does not come there. The Bank of France is the sole bank of issue in France, the great instrument by which the money of the rural districts is transmitted to the central market. But the rural deposits, the actual money deposits in the branches of the Bank of France, were on an average:—

	£
1861	1,264,000
1862	1,386,400
1863	1,246,000

and yet the Bank of France has fifty-three branches. Of its notes, it is believed that about three-fifths are issued in Paris, leaving only two-fifths for the whole of the rest of France.

Let us compare this with the state of England, Scotland, and Ireland. France has fifty-three *emitting* places. The United Kingdom has as follows:—

England	660
Scotland	594
Ireland	191
Total	1,445

This is the reason why the savings of France have not been economised, and why those of England have been economised,—why London is a great money market, and Paris is not a great money market.

We are not prescribing as to the future policy of France. We are indicating the disease, not prescribing the remedy. A very able writer in the *Semaine Financière* has discussed the advisability of an issue of 2*l* notes by the Bank of France; a writer of European reputation, M. Leonce de Lavergne, has recommended the establishment of departmental banks, not so as to compete with one another, but each with a radius of its own. But we are not now concerned with the merits of this or any other proposal as to the French paper currency; we are but saying that the country issues in England and Scotland, having been the prime medium by which our banking system was established, have made London the money market what it is, and that the want of these issues and of that banking system has kept Paris as a market in the backward state in which we see it.

It is, however, worth remarking that the system which M. Lavergne proposes to found in France is nearly that which a long course of historical antecedents seems likely to create in this country. We observed in our previous article, that in matter of fact a limited but considerable number of country banks now possessed the exclusive right of local issue in the rural districts of England; and that for many reasons, some economical and others political, it would be nearly impossible to deprive those banks of such issue: and we therefore suggested that they should—not immediately, but in time to come,—be made to conduct these peculiar powers of issue as trustees for the State, and for the benefit of the State. We proposed that they should be agents for the State in their districts, just as the Bank of England is agent for the State in its district. This is what M. Lavergne proposes for France; he calls it the *planetary* system, in which banks revolve round a given centre, each in its own sphere, in place of the *solar* system, in which one bank only, one single monopolist, absolutely rules the entire country from the capital.

Mr Gladstone's Bill, as amended, does not indeed introduce such a system, but it is compatible with it: it fixes a time at which Parliament can establish such a system if it thinks fit. The Parliamentary influence of the country banks would, in any probable state of parties, forbid any direct attack upon the privileges; and an abrupt confiscation of these issues would be in a high degree tyrannical and unjust; no English Minister would even plan it, much less propose it. It is only by a gradual and cautious policy that the present anomalous state of the country issues can be amended; any direct assault upon them would be futile, for it would leave them as they are.

Mr Gladstone proposes in substance that all restrictions be removed from such country bankers as are willing to *conform* to his Bill, on two conditions; first, that the conforming bankers shall pay the sum of 1*l* per cent. on their circulation, including what they now pay; and secondly, that at the end of 15 years the Chancellor of the Exchequer shall, by a year's notice, have the power to put an end to such issues, if Parliament do not otherwise determine. At that date, which, though distant, is far sooner than we expected a systematic treatment of the subject, we scarcely doubt that the country banks of issue will, after a due inquiry by Parliamentary committee, be compelled to assume the only position by which their present rights can either be justified or excused.

MR MILL'S ADDRESS TO THE ELECTORS OF WESTMINSTER.

WHETHER it be wise for Mr Mill to enter Parliament; whether the position he will take there will be adequate either to his great abilities or to his paramount reputation; whether the time and strength which he will have to spend within its walls, listening to dreary speakers and grappling with wearisome details, would not be better employed in following out those philosophical principles which he, far beyond any other writer of this age, is fitted to handle; whether in a word the man of speculation and of thought will not be somewhat lost and wasted among the men of action and routine;—these are questions which may well admit of doubt. But that his presence in the House of Commons will be an ornament and a strength, an addition to its wisdom and its fame; that it ought to contain such men as he, though not to consist of such; that the electors of Westminster will do themselves singular credit by choosing him; and that the Representative System, under which so fearless a thinker and so independent and uncompromising a candidate is returned to Parliament by one of the most numerous and most popular Constituencies in the Kingdom, will stand in far less need of reform than we are accustomed to believe;—these are points which admit of no doubt whatever. For ourselves, differing as we do in the strongest manner from many of Mr Mill's political opinions, we should vote for him in preference to any other candidate, partly because we know no man whose voice is better entitled to be heard in the Senate of a great country, and partly because *our* Senate is conspicuously distinguished by the absence of that original, philosophic, and thorough-going honesty of thought which Mr Mill would bring into it;—and if the Radical electors of Westminster have the manhood and good sense to select a wise and good man as their representative merely because he is wise and good, though he will neither spend money nor canvas votes, though he will repeat none of their favourite watchwords, though he has stripped bare many of their commonest fallacies, and though he caricatures, by transcending, some of their most cherished doctrines,—why we shall think more highly of them than we ever did before.

Mr Mill's confession of political faith, as contained in his letter (through Mr Beal to the electors of Westminster), is one of the most remarkable addresses ever delivered by any candidate to any constituency,—especially in respect to the qualities of honesty, simplicity, and courage. It shows the lofty vantage ground which on such occasions is occupied by a man who cares little whether he enters Parliament or not, but who cares much that if he does enter it, he shall enter it without having paid down a single concession as the price of his success, without having stooped to ask election as a favour, without having condescended to modify or to conceal a single opinion, or to fetter himself by a single pledge. It is almost the first time within our remembrance when the relation between a candidate and a constituency has been placed on its true footing; and the electors of Westminster will do themselves signal honour if they answer to the implied appeal in a corresponding spirit.

It is astonishing how a thorough logical capacity, unflinching integrity of purpose, and a profound knowledge of the facts and principles involved, even in the hands of a Radical, shatter all the ordinary Radical fallacies into dust. Mr Mill assuredly is an advanced Liberal, if ever there was one; yet there is scarcely one of his doctrines which does not fly in the face and strike at the root of the official creed of the advanced Liberal party. His differences with *them* are differences of principle not of detail:—*we* on the contrary can agree with him in everything, except in the degree to which he would push some of the applications of his principle;—and even there we differ with him chiefly because we think his practice would negative his principle and defeat his aim. We need scarcely say a word as to his claim for the extension of the suffrage to all adult women:—no party, and scarcely any individual politician save himself, holds this theory, and it will be long before it becomes a practical question. When it does, we entertain little doubt that Mr Mill will have altered his views on the matter, as he has done on the ballot; for he will probably have discovered that out of the two or three million of women whom he would thus endow—including half-a-million of maid-servants—not above ten thousand would have any political opinions at all, or any *political* preferences for one candidate over another; and that in consequence to give them votes would merely be giving extra votes vicariously to their fathers, their husbands, their masters, their lovers, or their priests. Mr Mill, of course, would hope and wish that all women should be enlightened and rational enough to hold his enlightened and rational opinions;—but conceive the position of an unhappy woman, embracing his views, to whom an "advanced Liberal," a Radical of Mr Bright's school, stood in any of the relations we have specified! how she would be snubbed by her father, *boudé* by her husband, deserted by her lover, bullied by her master, and excommunicated by her priest! But to proceed to the other and more practical items of Mr Mill's creed.

The Radicals pin their faith upon the Ballot:—Mr Mill, as we know, repudiates it altogether;—deeming that it is unnecessary, that the evil of it would outweigh the good, and considering also, as we gather from his language, that a constituency, meriting the suffrage he would bestow upon it, ought not to require or wish for the secrecy solicited for it. *Again*:—the Radicals are vehement in their clamour for the substitution of exclusively direct taxation instead of our present mixed system,—wishing, in the first place, to exonerate the working classes from taxation altogether, and, in the second place, to diminish the revenue insidiously by making a large revenue difficult if not impossible of collection. Mr Mill, on the contrary, like all thinkers, prefers the combination of direct with indirect taxes, on the double ground of justice and morality. *Thirdly*, the Radicals are striving hard to erect into an article of the national creed that England must never interfere in foreign affairs except where her own national interests are concerned:—Mr Mill, more nobly and more justly, declares that such interposition on the side of liberty, to countervail interposition on the side of oppression, is a right and may become a duty. *Fourthly*, the Radicals go in for retrenchment and the reduction of our armaments wholesale and without reference to possible danger or ultimate consequence:—Mr Mill will have nothing to say to such short-sighted and unpatriotic parsimony; he would economise, not by cutting down either army or navy, but by spending our money more efficiently upon both. The Radicals would at once abolish purchase in the army as utterly bad:—Mr Mill reminds them that there is one system which is worse, and which, as matters at present stand, would probably be substituted for it; and hints that it can scarcely be considered a reform to get rid of one evil merely to replace it by another. The Radicals, true to their shallow system of going, *tête baissée* and with their eyes shut, at a practice which is abused, instead of at the abuse of the practice, insist upon the total abolition of flogging. Mr Mill quietly corrects their blindfold zeal, and, like most sensible men, would abolish it only where indefensible, and retain it where it is specially appropriate. And, lastly, Mr Mill with all his leanings towards the claims of labour and of the poor, is too sound an economist and too just a man not to see the fallacy and the hopelessness of the schemes, now so popular among many philanthropists and Radicals, for legislating between masters and men, and preventing strikes and lock-outs by arbitrary arbitration, and hits the nail on the head in one single sentence. "I see nothing which law can do in the "matter, *except to protect from violation the equal liberty of all "to combine or to refrain from combining.*" This one phrase contains the gist of the whole matter. When once workmen shall be effectually liberated from the tyranny of their fellow-workmen and left free to belong to Trades' Unions or not as they please, and to work or leave work as they individually wish, secure against intimidation from any quarter, no lock-outs and few strikes will be needed to adjust the disputes between capital and labour. Labour, if thoroughly free, will always command its own fair terms; and capital, if unterrified by its dangers, be always too selfish to combine to defraud labour or oppress it.

It is, however, Mr Mill's views in regard to the extension of the suffrage which most gratify us (with one exception), and which we apprehend will most disgust the ordinary and *doctrinaire* Radical. While, with the courageous simplicity of a man who has laid firm grasp upon a principle, he goes much further towards Universal Suffrage than any leaders of the advanced party have yet ventured, he declares that class ascendancy in any shape or in any hands is such an abomination in his eyes, that in any system of franchise extension ample precautions must be taken to "prevent any class, even "though it be the most numerous, from being able to swamp

Digitized by Google

"all other classes taken together." He is resolute for the representation of minorities. "I think (he says) that all con-"siderable minorities in the country, or in a locality, should "be represented in proportion to their numbers." This, as our readers know, is the great principle for which we have always contended. If it can be secured and practically carried out, the most liberal extension of the franchise may be comparatively innocuous and even to a certain extent just and beneficial. If it be neglected, then such extension will assuredly become an injustice, a mischief, and a danger. But it is precisely this provision for the fair representation of minorities that Mr Bright and the Radicals as a party most utterly detest. With the instinct of hatred—far more unerring in its sagacity than the instinct of love—they perceive that it would be virtually fatal to that class ascendancy, that preponderance of mere numbers, that transfer of political power into the hands of that section of the community they hope and believe would be their votaries, which it is the object of all *their* Reform schemes to secure. They are well aware that an extension of the franchise to something even far short of universal would place the (potential) command of the Representation in the hands of the working class and the lower portion of the middle class, whenever they could induce these to pull together; they believe that these classes, as a rule, would adopt their dogmas and return their nominees; and their aim, therefore, is to obtain the virtual disfranchisement of the educated and propertied portion of the nation which it is the object of Mr Mill to preserve from such virtual disfranchisement. Thus the objects and purposes of Mr Bright and Mr Mill are altogether discrepant and at variance; —and the candour with which the one leader avows his ultimate design, and the disingenuousness with which the other evades that avowal, are more at variance still.

We have left ourselves little room to comment on almost the only point of Mr Mill's creed from which we seriously dissent; and indeed there is little need. We said a few words on the subject last week. But few more are wanted. Mr Mill would so arrange the suffrage and the securities against the exclusion of minorities as practically to "give to the "labouring classes a clear half of the national representation." Now to this proportion there seem to us to be at least two conclusive objections (not to mention minor and secondary ones)—objections so conclusive that we are satisfied that Mr Mill himself will be among the first to admit their cogency. *First*, such an arrangement would give the absolute command of a Parliamentary majority,—that is virtually the decision of the nation's policy,—into the hands of the members returned by the working men, whenever they chose to pull together, and whenever, as a matter of bad political economy, of vicious temper, of jobbing, of ultra-montanism, of anti-Saxonism,—or from any motive of intrigue whatever—they could induce any considerable section of the Irish members to coalesce with them,—a danger neither the probability or the gravity of which should be underestimated or overlooked.—And *secondly*, such an arrangement, Mr Mill we apprehend would agree with us in thinking, would often entirely sacrifice what is the second, if not the first, purpose of the representative system, —*viz.*, to secure the selection of the wisest and ablest and fittest men in the nation to be its legislators and rulers, and not merely those who most accurately mirrored the *average* mind of the nation,—to make the House of Commons the faithful representative of the people in the sense of being the representative of all classes in their best moods, in their best influences, in their best specimens.

THE HEALTH OF THE SOLDIER.

THE annual average cost of a private soldier is about 33*l*, but before the soldier is wrought from a raw recruit into a warrior qualified to take his place in line of battle it is estimated that 200*l* has been expended on his education. Viewed with reference to his qualifications, he is cheaper now than he was twenty years ago;—for now he is a marksman at 900 yards; then he was a most uncertain shot at 60. Skill in the use of arms can only be attained through expensive teaching, but such skill trebles the value of man in actual combat. If he fall in action, 200*l* is sacrificed, unavoidably; if he die from sickness, which the chances are he would have escaped in civil life in the same place, 200*l* is vainly thrown away by an act of culpable neglect.

Yet, notwithstanding the great cost of the trained soldier and the time and expense necessary to replace him, the deaths in our army from preventible causes—though happily decreasing—are many times as numerous as those from the sword. For more than forty years of this century the army authorities were content that the men should exist under circumstances which, when we now look back upon them, only cause wonder that the soldiers could live at all. They commonly slept four in a bed; and the beds were often in strata like the berths in a steamer's cabin, one side against the wall, and the bed itself of great width. Provision having been in this manner made for the maximum exclusion of fresh air from the sleepers, the same amiable purpose was carefully extended to the general barrack atmosphere, where every sort of ventilation was prevented. The air of a crowded apartment thus charged with the exhalations of closely-packed men, not too clean, may be imagined. If we add that decency was in no way thought of, that the soldier paraded in the stiffest of upright stocks, with a coatee, which had a little tail to tantalise but not protect the wearer, and that he spent much time in the furbishing of arms and pipe-claying of strangulating belts, we complete a picture of life and health struggling under the most disadvantageous conditions.

In 1839-41, the first publication of military statistics exhibited the frightful mortality of the army as compared with civil life. Amelioration, to the extent mainly of inquiries, commenced, but the economists held the purse-strings; and Joseph Hume was not the man to let money pass for what he would denounce as the mere luxury of the soldier. Little, except with regard to new structures, was attempted before the Crimean war: and while that lasted, and we had evidence of what mortality in the field could be induced by mismanagement, there was no opportunity for sanitary work at home. But immediately the troops returned to this country, earnest men,—prominent among whose names are Sutherland, Balfour, Galton, and, chief of all, Sidney Herbert,—embarked zealously in the cause of cleansing our Augean stable of disease. Barracks and hospitals were examined, altered at great expense; ventilation was attempted, and in some cases overdone. The occupants of each were reduced in number: 600 cubic feet of air were secured, under ordinary circumstances, to each sleeper, and superb structures were commenced, of which several have been finished, to receive the redundant men from the older pest-houses. As examples of these, are the Victoria Hospital at Netley, the Herbert Hospital at Woolwich, the Guards Barracks at Chelsea. The old form of the quadrangle, convenient for supervision, but unhealthy, with its enclosure of stagnant air, is abandoned, and air and the light of heaven have free access to the lines of huts or houses in which troops are quartered at the great camps.

Side by side with this development of the study of military health, an analogous progress has been made in civil life under the Boards of Health. Towns are ceasing to be large cesspits, pure water is becoming less rare, crowded crooked streets are making way for straight and broad ways,—air-shafts of the towns. Meanwhile, though glaring evils remain, the laws of bodily health are becoming understood more widely each year. Air, water, and exercise will ere long be fully appreciated by all classes, as they already are by the upper and middle sections of society.

These improvements, with the need for more, have necessarily led to the systematising of the laws of health and disease, and a science has gradually arisen bearing that relationship to medicine which prevention does to cure. The functions of the medical man are no longer limited to curing one disease, more or less by the substitution of another, but it is now his duty to remove from our paths those obstacles to health which formerly threw us into his hands. One among the incidental effects of this change must be to throw the remuneration of the officer from off the individual and on to the public, which will in the end involve a total change in the system of doctors' bills. But especially does this sanitary duty combine with the other duties of the military medical officer; and under Lord Herbert's regulations he has to be consulted in the choice of encampments as to site, air, water, &c. Now this science has taken to itself the unpalatable name of Hygiene; and as a text book for medical officers of the army, Dr Parkes has produced an admirable work which well deserves some notice from true economists.* It is an epitome of all that has been discovered or thought upon the

* A Manual of Practical Hygiene, prepared especially for use in the Medical Service of the Army. By Edward A. Parkes, M.D. Churchill.

Digitized by Google

subject, in fact of the whole inductive and deductive philosophy of health. Avowedly written for the military service, it is really almost equally for the civilian practitioner—for the laws of sanitary science touch both alike. Our dwellings suffer from causes near akin to those which, on a greater scale, decimate the military ranks; our domestic theories of health are often as faulty as those against which this book is written; and we dare assert that there are few in civil life—certainly few medical men—who will not read with gain this work of the Professor of Hygiene in the Military Medical School at Netley.

The worst part of the subject is its name. To English tongues and ears, Hygiene is simply an abominable word. It sounds like a Franco-Greek intruder without a stake of any sort in the land. It is true sciences must generally look abroad for their nomenclature, because English words are too home-thrusting to generalise: but it is doubtful whether "Health" in its broader sense does not comprehend as much as Hygiene. However, the science is named; its disciples accept its heathenish title, and we have only to consider it as it stands.

Dr Parkes defines Hygiene as "the art of preserving health: "that is, of obtaining the most perfect action of body and "mind, during as long a period as is consistent with the laws "of life. In other words, it aims at rendering growth more "perfect, decay less rapid, life more vigorous, death more "remote."

Touching on the commonest necessities for health as good water, air and food, soil, drainage, habitation, and bodily covering, there is not a point on which the author does not furnish useful instruction, and his theories are supported by the force of numerous examples. The following remarks on the question of water show that the well is by no means the best supply on all occasions.

"Spring water is both pure and impure in different cases; "and the mere fact of being a spring is not, as sometimes "imagined, a test of goodness. Frequently, indeed, river "water is purer than spring water, especially from the deposit "of carbonate of lime; organic matter is, however, generally "in greater quantity, as so much more vegetable matter and "animal excreta find their way into it. The water of a "river may have a very different constitution from that of "the springs near its banks. A good example is given by the "Ouse, at York; the water of this river is derived chiefly "from the millstone grit which feeds the Swale, the Ure, and "the Nid, tributaries of the Ouse; the water contains only "9 grains per gallon of salts of lime, magnesia, soda, and a "little iron. The wells in the neighbourhood pass down into "the soft new red sandstone which lies below the millstone "grit; the water contains as much as, 64·96 grains, and "even, in one case, 96 grains per gallon: in addition to the "usual salts there is much chloride of calcium, nitrates of "lime, soda, and magnesia. Shallow well water is always to "be viewed with suspicion: it is the natural point to which "the drainage of a good deal of surrounding land tends, and "heavy rains will often wash many substances into it.

Dr Parkes analyses the various contaminations of the atmosphere resulting from the presence of healthy and diseased human subjects respectively. He shows the abstraction of air from several causes, and the supply necessary to compensate for the exhalations of the body. He is especially minute on that very interesting question, the suspension in the atmosphere of epithelium and pus cells given off from lungs and cuticle. This medium of contagion it is the object of ventilation to disperse, and the Professor glides naturally into a dissertation on the principles which should be observed in purifying the air of public buildings, private rooms, and sick wards.

As an instance of the effect of ventilation on health is adduced a comparison between the Leopoldstadt prison at Vienna and the House of Correction in the same city. The circumstances of life are believed—ventilation excepted—to be alike; yet of the prisoners in the former exactly twice as many died annually (5.6 against 2.8) as in the latter. The Leopoldstatdt has a defective, the rival establishment an admirable, system of ventilation. But these prisons point the moral still more strongly; for not only is the Leopoldstadt mortality double that of the House of Correction, but the difference is precisely accounted for by diseases of the lungs.

Dr Parkes treats at length on the subject of soldiers' diet, comparing the rations of the various European armies, and showing that the British soldier eats more than his comrade in any other country. The author also enters minutely into the adulterations of food, and the degree to which those adulterations are injurious to health.

As regards individual habits and their effect on health, the learned Professor necessarily addresses himself to the military subject exclusively. He handles the subject boldly; points out the shortcomings while admitting the progress made; and gives sound advice to guide the military departments for the future. The fearful bane of a soldier is his life of listless idleness: thence spring dissipation, debauchery, disease, and death. India may be an extreme case, consequent on the heat; but the following is given in a recent Parliamentary report as the programme of a soldier's day:—

Bed till daybreak;
Drill for an hour;
Breakfast, served to him by native servants;
Bed;
Dinner, served to him by native servants;
Bed;
Tea; served to him by native servants;
Drink;
Bed;—and *da capo*.

No doubt in colder climates there is less bed; and perhaps a little more drill: but the result is merely more ennui. Dr Parkes would give more occupation to the men; work at their trades, gardening, or even, like Roman legionaries, road-making; and it is an apt corollary on this last suggestion, that no troops were ever healthier than those whom Sir Duncan Cameron kept, a year or two ago, hard at work in driving a metalled road through eleven miles of Maori bush and native thickets in New Zealand. The doctor would also remove temptation from the soldier, as far as possible; he would have neither spirits nor courtesans in open market: each should be sought, and only found by exertion. He would much increase the proportion of men allowed to marry, making provision for wives both when with and when away from their husbands. It may, however, be doubted whether short enlistment would not be better for man, woman, and the State, than a larger force of married soldiers. But admirable and quite to the point are the author's remarks on prostitution, the main sap of health in all armies and scarcely less in civil communities. He advocates the continental system of forced registration and control; admitting that the evil of prostitution must, under present circumstances, exist. He ridicules the notion of the liberty of the subject being infringed, comparing the trade to any other pursuit dangerous to human health or life, which is unhesitatingly subjected to inspection and curb.

But diversions are essential as well as preventions,—gymnasia, bowling alleys, fives courts, cricket clubs, should all be encouraged; swimming should be taught as a part of drill, and that *savoir faire* for which the French soldier is so remarkable. Dr Parkes looks kindly on libraries, reading rooms, and lectures, but he evidently puts little faith in them, doubting whether a body of young men collected for military purposes will ever contain many readers. Considering the class whence our recruits are drawn, we think the doctor is right: physical, rather than mental exercises, are the best antidotes we can offer to the untutored passions of adolescence. The reforms instituted by Lord Herbert have already *halved the mortality* of the army: and he has left in Lord de Grey a successor able and willing to follow boldly in sanitary reforms.

STOCK OF COTTON IN AMERICA.

We give the following extracts from a letter addressed by a Boston manufacturer to Mr Bright. It will be seen that the writer estimates the quantity of cotton now stored in the States much higher than we placed it a fortnight ago. Our estimate was based upon the best information we could collect; but was of course conjectural. So is that of the letter we quote.

Mr Bright says, "the writer has paid great attention to the "subject, and his opinion is valuable at a moment when the "course of the Liverpool market depends so much upon our "knowledge of the cotton now stored in the Southern States." The following is the main portion of the letter:—

"There is no positive information to be obtained in regard to the quantity of cotton in the South. The most reliable estimate which I have been able to obtain comes from an English agent of a Boston cotton house, who landed at Mata-

Digitized by Google

moras about six months since, travelled as a neutral through Texas and Western Louisiana, down the Red River to New Orleans, and who has obtained information from the interior of Alabama and Mississippi. His estimate was that there were in the South, on the 1st of January, 1865, not less than 2,500,000 bales of baled cotton, and a very large quantity of loose cotton piled up in gin houses and sheds, certainly sufficient to make good any damage upon the baled cotton, and to give an available stock of two and a half million bales of sound cotton. The larger portion of cotton held in any one section is in the South-west. The negroes were removed from the Mississippi river and from Missouri early in the war and concentrated upon the plantations of the South-west. If employed on grain they would have made far more than could be consumed in the section named, and it could not be moved to the Atlantic States. We believe that a very considerable crop of cotton has been made in every year since the war began in the Trans-Mississippi department. The estimates which come to us from Savannah and Charleston are that there are not over 1,500,000 bales of cotton in the Southern States, but these estimates come chiefly from persons who have a pecuniary interest in cotton, and they come from a section which has supplied blockade runners, and which contained the only cotton mills in the South. It may also be stated that the amount of cotton captured at Savannah was estimated at 25,000 to 33,000 bales. We have already received 38,000 and have information of 9,000 more. I have also seen letters from Charleston stating that large quantities of cotton were being found buried in the sand and hidden in cellars. I am informed that 8,000 bales have already been seized in and around Charleston. There are a much larger number of well-informed persons who believe in a stock of over two and a half million bales than of those who place the quantity at a less number. Thus, while there is no positive information to be obtained, the general conclusion is that two and a half to three million bales will be found, and upon that estimate I am guiding the business of the cotton mills under my control."

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending April 22, 1865 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS :—	£ s d	£ s d
In money and interest credited	13,739 8 5	264,572 19 10

MINOR CHANGES IN THE BUDGET.

1. The duty on the transfer of shares and all conveyances of property which now ceases at 2s 6d for sums not exceeding 25*l*, is to be graduated as follows :—

£	Shillings
20	2
10	1
5	Sixpence

2. The ad valorem duty in transfer shares and conveyances is to be modified when the consideration is over 600*l*, in respect of parts of 100*l*.

3. The stamp on scrip certificates and receipts thereon is to be extended to *foreign* loans and *foreign* companies.

4. The tax on agreements for letting tenements for periods less than a year at weekly or monthly rates not exceeding 3s 6d per week, is to be reduced from 6d to 1d.

5. Appraisement duty. Minimum is to be lowered from 50*l* to 5*l*, pursuing the present rate of 6d for every 10*l*; and when not exceeding 5*l*, is to be lowered to 3d.

6. Stamp duty on licence to practise as a special pleader and conveyancer to be charged one-half for the first three years after admission, as in the case of attorneys.

7. Stamp duty on ecclesiastical licences to be reduced, in certain cases, to 10s.

8. Charter parties. If drawn on stamped paper, 6d; if not so drawn, present law as to stamping to remain in force.

9. Marine policies.

a. Policies issued abroad not to be renewable here unless brought to be stamped withing two months of arrival.

b. Re-assurance. The limit of time to be removed at which a claim may be made for allowance of duty on policies of re-assurance.

c. The rate of duty on time policies to be altered.

10. Stamp duty to be allowed on assurances.

1. Accidental death.
2. Personal injury.
3. Plate glass, to be reduced in cases of fracture.

THE FINANCIAL RESOLUTIONS.

THE following are the resolutions to be moved by Mr Gladstone :—

Reducing the Duty of Customs on Tea.

1. That, towards raising the supply granted to Her Majesty, in lieu of the duties of customs now charged on tea, the following duties of customs shall, on and after the 6th day of May, 1865, until the 1st day of August, 1866, be charged thereon on importation into Great Britain and Ireland, viz. :—

Tea ....the lb £0 0 6d

[This was proposed on Thursday, 27th April, and progress reported thereon.]

Income Tax.

2. That, towards raising the supply granted to Her Majesty, there shall be charged, collected, and paid for one year, commencing on the 6th day of April, 1865, for, and in respect of all property, profits and gains mentioned or described as chargeable in the Act passed in the 16th and 17th years of Her Majesty's reign, chapter 34, for granting to Her Majesty duties on profits arising from property, professions, trades, and offices. the following rates and duties (that is to say) :—

For every twenty shillings of the annual value or amount of all such property, profits, and gains (except those chargeable under Schedule (B) of the said Act), the rate or duty of four pence.

And for and in respect of the occupation of lands, tenements, hereditaments, and heritages, chargeable under Schedule (B) of the said Act, for every twenty shillings of the annual value thereof,

In England, the rate of duty of twopence;

And in Scotland and Ireland respectively, the rate or duty of one penny halfpenny.

Subject to the provisions contained in section 3 of the Act 26th Victoria, chapter 22, for the exemptions of persons whose sole income from every source is under 100*l* a year, and relief to those whose income is under 200*l* a year.

Fire Insurance Duty.

3. That, towards raising the supply granted to Her Majesty, and in lieu of the duties now payable in respect of insurances against loss or damage by fire only, there shall be charged, collected, and paid for the use of Her Majesty, her heirs and successors, the following duties (that is to say) :—

For and upon every policy of assurance or insurance, or other instrument, by whatever name the same shall be called, whereby any insurance shall, on or after the 25th day of June, 1865, he made of or upon any building, goods, wares, merchandise, or other property, from loss or damage by fire only, the duty of one penny. And for and upon any note or memorandum given as a receipt on the deposit of any sum of money preparatory to making out or issuing of any such policy as aforesaid, the duty of one penny. And for and in respect of every such insurance as aforesaid, which shall be made, or continued, or renewed, on or after the said 25th of June, 1865, a duty of one shilling and sixpence for every 100*l* insured for a year, and at and after that rate for any fractional part of 100*l* insured, and for any fractional part of a year, as well as for any number of years for which the insurance shall be made, or continued, or renewed, but no fraction of a penny shall be charged; and when any such insurance as aforesaid shall be made or renewed at any time between the 27th day of April, 1865, and the said 25th day of June, for any period of time extending beyond the said last-mentioned day, there shall be charged and paid for, and in respect of the time intervening between the making or renewing of the said insurance and the said 25th day of June, the yearly per centage duty at and after the rate chargeable on the 27th day of April, and for and in respect of any subsequent period including the said 25th day of June, the rate of duty chargeable according to this

Digitized by Google

resolution; and no return or allowance of duty, except at and after the last-mentioned rate, shall be made in respect of time unexpired or otherwise, on any such insurance as aforesaid, which shall have been made or renewed before the said 27th day of April, 1865.

Agriculture.

RAW OR MALTED BARLEY FOR STOCK FOOD.

The superiority of malted barley as food for stock over barley in its natural state has been loudly asserted by some farmers and others who have been anxious to obtain the repeal or diminution of the tax on malt. In support of such assertions, various statements have been made of benefits derived by this or that farmer from the use of malt as feeding stuff. Such use had, however, been very limited, and the particular experiments relied on had not been conducted with much care or accuracy, while more careful experiments as had been undertaken had tended rather to show the alleged superiority of malt over barley to be purely imaginary. Still the farmers occupying barley land cherished the notion that in being denied by a fiscal law the opportunity of malting barley for their stock, they were suffering some sort of injury at the hands of Government, and this served to rally them, in many districts, to the support of the opponents of a free-trade administration, and to a certain extent forced the subject on the attention of the Government and the House of Commons.

It is to be noticed, however, that, with a few marked exceptions, the most earnest demanders of the malt tax repeal are just those individuals and classes, both amongst farmers and landlords, who were the most energetic and tenacious asserters of the value of "protection to British Agriculture." Whether a feeling that untaxed malt might afford a compensation for the removal of duty on foreign grain is not at the bottom of the desire for repeal of the malt duty which is said to exist in the agricultural mind, may be a question. At all events an effort has been made by the Board of Trade to ascertain whether there is or not any truth in the assertion that malt is far superior to raw barley as food for live stock. The well-known agricultural experimentalist, Mr John Bennet Lawes, of Rothamsted, Herts, was commissioned to make a series of experiments to test the comparative values of malt and barley as stock food, and we have now his preliminary report of the results of his experiments.

First, he took seventy quarters of barley "of fair but not first-class malting quality," of which "one-half was malted and screened in the usual way." The other half of this barley was used raw. The process of malting increased the measure of 280 bushels by 10 bushels, but reduced the weight per bushel from 54 lbs 10 ozs to 41 lbs 10 ozs, making a total reduction of 100 barley to 81.1 when converted into malt.

A second lot of barley "of fair feeding quality" was dealt with in the same way. The measure was increased from 280 to 284, and the weight reduced from 100 barley to 77.8 malt. In short, the second lot of barley was of the sort farmers say it would best answer their purpose to make into malt for their stock.

Experiments were made with milking cows to show the effect of malt on the production of milk. On oxen, sheep, and pigs, to test its feeding quality as compared with barley. The cows were selected from a large herd belonging to Mr J. A. Campbell, of Rugby, ten cows in each of two lots. The exact experiment commenced on the 21st December, 1863, when the animals were weighed, and it was continued for 10 weeks to the 29th February, 1864. Both lots received the same food as they had previously been fed on,—*i.e.*, 5 lbs rape-cake and 2 lbs bean-meal per day, and a mixture of clover-chaff, straw-chaff, and swedes, which averaged of clover-chaff about 14 lbs, of straw-chaff between 7 and 8 lbs, and of swedes about 50 lbs per head per day, except, that lot 1 had 3 lbs of rape-cake per day replaced by 3 lbs of barley; and lot 2 had 3 lbs of cake replaced by the amount of malt and malt-dust produced from 3 lbs of barley. Tabular results in great detail are given, of which, as relating to the cows, the following is a summary:- "The 10 barley-fed cows gave, during the 10 weeks, 10 lbs less increase in live weight, but 1,067 lbs, or more than 100 gallons, more milk than the 10 malt-fed cows. More of every description of food was required to be consumed for the production of 100 lbs of milk by the malt-fed than by the barley-fed cows." As to the quality of the milk, "a mixed sample of the milk of each lot was tested once a week, morning and afternoon, by the lactometer, and that from the barley-fed invariably showed the higher proportion of cream."

The oxen consisted of two lots of 3 years old polled Scots, 10 in each lot, so selected as to render each lot as nearly alike as possible. These animals were fed on clover-chaff and swedes *ad libitum*. On the 1st December, 1863, they were weighed, and the exact experiment commenced, which was continued for 20 weeks to April 19, 1864. During that period lot 1 had 4 lbs of barley of the 2nd class above mentioned, and lot 2 the malt and malt-dust produced from 4 lbs of the same barley. The results as to the oxen were, that both lots "gave more than an average amount of increase, whether reckoned in proportion to a given live-weight within a given time, or to a given amount of food consumed; but the 10 having the unmalted barley gave during the 20 weeks 408 lbs more increase in live-weight than those having an equivalent of the same barley malted. *Less* of every description of food was required to be consumed to produce a given amount of increase in live-weight by the *barley-fed* than by the *malt-fed* oxen."

Five lots of Down wethers, consisting of 12 in each lot, were selected and weighed on the 2nd of December, 1863, and the experiment was continued to the 20th April, 1864. They were fed under cover and on rafters, receiving 1 lb of clover-chaff per head daily, and cut swedes *ad libitum*. In addition, lot 1 had unmalted barley, for 16 weeks ¾ lb, and for 4 weeks 1 lb per head per day. Lot 2, malt and malt-dust, produced from equivalent quantities of barley. These had the best barley. Lots 3 and 4 were given equal quantities of barley and malt respectively, from the second quality barley. Lot 5 had a mixture of barley and malt, the daily weight per head being the same.

"All five lots of sheep gave an average amount of increase, reckoned both in relation to a given live-weight within a given time, and to the amount of food consumed. Nor was there much difference in the result obtained with unmalted as compared with malted barley. Such as it was, however, it was, upon the whole, in favour of the unmalted."

Pigs were bought and divided into six lots of eight each, and the experiment, as detailed, was continued for ten weeks, from the 24th December, 1863, to the 3rd March, 1864. The pigs fed on unmalted barley, or on only a small proportion of malted barley, "gave fully an average increase," but those fed on malted barley entirely gave a defective result, "both in relation to their weight within a given time, and to the amount of food consumed..... Where not more than one-sixth or one-seventh of the total food was in the form of malted barley, more food was required to produce a given amount of increase than where the whole of the *ad libitum* food was unmalted barley." The general result was, that with the exception of one lot of sheep, "all the other comparative trials, whether with oxen, sheep, or pigs, the advantage was with the unmalted barley; and it was so in a greater degree than it was against it in the single instance quoted."

The general conclusion drawn by Mr Lawes from these experiments is, "that a given weight of barley is more productive both of milk (of cows) and of increase in live-weight of fattening animals, than the amount of malt and malt-dust that would be produced from it. There is, besides, the cost of the malting process to be taken into account." For ordinary dairy or feeding animals there is, according to these experiments, no advantage in malting barley, but the reverse. This agrees with the experiments made by Drs Thomas and R. D. Thomson with cows and oxen in 1845-46, and by Mr Lawes himself with sheep in 1848-49.

Whether malt may be useful as a kind of condiment for young or weakly animals, or in making them up for exhibition or for sale, irrespective of economy, is thought by some persons to be another question. That for general and economical feeding purposes malt is *inferior* to raw barley, these experiments scarcely leave room for doubt.

Literature.

THE LINEN TRADE ANCIENT AND MODERN. By ALEX. J. WARDEN. London: Longmans. 1864.

THE AUTHOR of this book, Mr Alex. Warden, himself a linen merchant of Dundee, has been moved he tells us to undertake the task by the conviction "that the history of so ancient and important a manufacture as that of linen, and of the commerce connected with it, ought to be given to the world." He modestly professes his consciousness of his own deficiencies with respect to mere literary qualifications, but hopes that the results of his many years' intimate practical acquaintance with the trade in all its branches may, in some sort, atone for them; and would ask "that the book may be received and judged of not as a literary effort, but as an attempt to compile a full and reliable record of the rise, progress, and present condition, of an important department of manufacture and commerce."

We think Mr Warden may fairly be said to have accomplished his object, and that this thick volume of 700 odd pages contains *all* that any man is likely to want to know about linen and the commerce connected with it. To criticise the style of such a book, especially after the writer's disclaimer, would of course be altogether out of place. Those who want to get at the facts, will not greatly care how they are given; those who do not, are not in the least likely to open the book. At the same time we cannot pass over without censure graver faults than mere imperfection of style. It would have been better had Mr Warden's consciousness of his own deficiencies led him to be more mindful of the rule *ne sutor ultra crepidem*. He may be an authority on linen, but on many other points he has clearly no right to be heard. He is not sure whether Adam should be held to have obtained the idea of textile fabrics from watching the spider or from special revelation; and he thinks the glory of the trade is greatly enhanced by the consideration that "its use will not cease when time has passed, as the last mention of linen in the Bible is in reference to the glorious hereafter in the heavenly Jerusalem." The contemplation of the "fine linen, clean and white," of the Bride, evidently gives him immense satisfaction. That he has im-

Digitized by Google

plicit faith in Usher's chronology is a minor failing; but we would strongly recommend him to restrain the ebullitions of his Presbyterian wrath against the Roman Catholic religion, and if possible uproot the ignorance and intolerance which are the cause thereof. It is at once silly and vulgar to speak of Catholicism as consisting in "the performance of unmeaning forms and ceremonies by an ignorant and debased priesthood." However, we have no wish to dwell unduly on these failings, and having eased our conscience by this protest, we gladly turn to the pleasanter task of giving some account of the plan of the book before us, and pointing out the really great mass of information with which its pages are filled.

In his first section Mr Warden treats of the raw material of the linen manufacture. The three principal fabrics, flax, hemp, and jute, are described at some length. The native country of the first of these flax is, we are told, unknown, but it is probably of Oriental origin, whence it has travelled Westward and Northward into Europe. It has been cultivated from the very earliest times, since, though it requires careful nurture to produce it of a superior quality, it is not difficult to rear, and it is capable of being grown throughout a great range of latitude. It is grown extensively and profitably in the Northern districts of Russia, as well as in the plains of India and Egypt. But it undoubtedly thrives best in a temperate climate, and one having a regular supply of genial moisture in spring, without an excess of wet in autumn, and where the temperature is pretty equable throughout the season. Short hot summers induce too rapid a growth, and although the quantity of fibre produced is large, the quality is never fine. Thus Mr Warden informs us that the climate of Egypt as well as the hot summers of Russia and Prussia are inimical to the fineness of the fibre, and the flax of these countries wants that elasticity, pliancy, and oiliness which is found in that of Belgium for instance or Ireland. The flax plant is valuable not only for its fibre but also for its seed; and Mr Warden proceeds to make some remarks on the methods that should be employed for insuring that both should be produced by the same crop—an object which, he says, necessitates great care. He adds some minute directions on the soil and rotation of crops, on the preparation of the soil, on sowing, pulling, rippling, watering, &c., &c., issued by the North-Eastern Agricultural Association of Ireland. Of hemp he speaks more briefly, seeing, that although in former times it was largely used in the manufacture of linens, very little of it is now consumed in that way. Its fibre is too harsh and strong for the finer class of goods, and, indeed, must undergo some softening process before it can be properly spun over machinery at all. As from various causes the cultivation of flax has not kept pace with the demand of the world for linen, so that its price has continued high, and had the linen trade been confined to it, it must have been circumscribed within narrow dimensions, it was in a happy hour that jute, a cheap substitute for either flax or hemp, was introduced into Dundee. Since then, "this useful and beautiful, though not sterling linen fibre,"—a native of India,—has made most rapid progress, and has already supplanted both flax and hemp for many fabrics to which they were long supposed to hold a prescriptive right. 47,575 tons of it were imported at London and Liverpool in the year 1862. Mr Warden is, however, of opinion, that all attempts to *cottonise* jute, so as to adapt it to be spun over cotton machinery, must be unavailing,—at least, until radical changes are introduced into the cultivation and preparation of the plant.

Mr Warden devotes his second section to an account of ancient linen,—its manufacture and use in Egypt, Palestine, Greece, Rome, Colchis, and other countries. This he does by carefully collecting and arranging the detached sentences or short paragraphs referring to the subject which may be found in ancient writers, sacred and profane. For this part of his work he acknowledges his obligations to Mr W. Miller, banker, of Dundee, who has collected a great mass of curious details bearing on the point. Mr Miller dwells much on the light thrown on the ancient flax manufacture by recent excavations in Egypt. Subterraneous grottoes have been discovered, the walls of which are covered with paintings of a date long prior to the commencement of authentic history, illustrating with remarkable fidelity and minuteness the various processes connected with the manufacture, from the pulling of the flax to the weaving and finishing of the cloth. Many of these, we are told, do not very essentially differ from those employed to effect the same ends at the present day. The following passage from a lecture of Mr Miller's is not without interest:—

It is worthy of remark that linen has in all ages, and in every nation, been regarded as the only fabric suitable to be used for sacred purposes. The Egyptian priests were forbidden to wear anything but linen while engaged in their religious observances, and it was strictly enjoined that no dead body should be buried in woollen. The Jewish priests were clothed in linen when performing the most sacred services of the temple; as, for example, on the great day of Atonement, according to the directions given in Leviticus. Plutarch remarks that the priests of Isis wore linen on account of its purity, and Apuleius argues as to the reason for this preference in the following manner: "Can any one impressed with a sense of religion wonder that a man who has been made acquainted with so many mysteries of the gods should keep at home certain sacred emblems, and wrap them in a linen cloth, the purest covering for divine objects? For wool, the excretion of a sluggish body taken from sheep, was deemed a profane attire even according to the early tenets of Orpheus and Pythagoras. But flax, that cleanest and best production of the field, is used not only for the inner and outer clothing of the most holy priests of the Egyptians, but also for covering sacred objects." The lawn of the bishop and the linen surplice of the priest give evidence that a similar feeling has all along prevailed in the prelatical churches: and Geneva herself, jealous of symbol though she be, finds a fitness and propriety in this fabric for articles connected with some of her most solemn observances.—(Pp. 214-5.).

Under the head of "Modern Linen," Mr Warden gives a sketch of the rise, progress, present condition, and prospects of the linen trade in the various countries of the world in which it is pursued, concluding with the United Kingdom. Scotland, in particular, is treated at great length, as is natural, both from the important place the manufacture there holds, and from the author's special information. In Leeds, the metropolis of the trade in England, as Belfast is in Ireland, and Dundee in Scotland, there were, eight years ago, no less than 37 works devoted to the manufacture of linen, with an aggregate of 1,831 horse-power, containing 198,076 spindles, and 140 power-looms, and employing 9,458 hands. These numbers Mr Warden thinks might now be considerably increased, but they are, however, much surpassed by Dundee, the chief seat of the industry in these islands. The statistics of last year give her 160 steam-engines engaged in the staple trade, of the aggregate of 4,621 horse-power. The number of spindles is 170,552, and the power-looms 6,709. The total number of hands employed is 36,020. Mr Warden estimates the present probable value of the linen manufactures of the United Kingdom at about 25,000,000*l*, of which about one-half is exported. This, as he says, "is enough to show that it forms one of the most important branches of the trade of the country. Its extension has of late years been marvellously rapid, and its elasticity is commensurate with its importance."

Mr Warden, however, cannot help apprehending that the supply of the raw material may run short. He quotes some remarks from the reports of Mr Baker, the factory inspector, to the effect that "the growth of flax seems to be decreasing everywhere whence we have been accustomed to be supplied; and though an annual knowledge of the average sown is as essential to the vitality of the linen trade as where cotton is to come from is to the cotton trade, the growth of flax is exciting no very extraordinary attention. We can neither produce from abroad nor induce our farmers to grow the raw material in sufficient quantity. The same complaint is made in the Federal States of America, where the production has fallen off enormously. If there should be a flax famine as there has been a cotton famine, we should again suffer severely, with a consciousness that by a little timely forethought those sufferings might have been alleviated, if not averted." These words certainly deserve attention, as do also some extracts to the same effect from Messrs Dewars' monthly report for July, 1864, which Mr Warden gives in his appendix. We may add in conclusion, that in addition to the points already specified, the volume contains ample tabular statements of imports and exports, prices current, factories, &c., &c., besides a complete account of the processes of manufacture.

The return of the Bank of France of to-day compared with that of last week is not satisfactory, since it shows a diminution of 705,000f in the discounts, and an increase of 11,696,000f in the stock of coin and bullion. In the note circulation there is a decline of 2,933,000f. The private deposits have increased 18,183,000f.

The Bourse has been much agitated during the past week,—more than once by apprehensions of grave disturbances in Spain. The terrible events in the United States have naturally increased its anxiety. The following are the quotations:—

The subscription for the new Mexican loan was opened on Saturday, and kept open on Sunday and Monday. All the subscriptions on the first two days, and those made in writing previous to Saturday, were accepted; but the subscriptions of Monday having exceeded the number of bonds disposable, a reduction in them of 10 per cent. is to be made in all above ten Owing to the attraction of high interest, and of the certainty of M. Sepie's ingenious compound-interest combination of the *eventual* restitution of the money advanced, and owing above all to the lottery by which great prizes are to be won every six months,—the subscriptions made by people of moderate means have been unusually large; and as most people have subscribed with the intention of keeping their bonds, not of speculating in them, the expectation is that the loan will remain tolerably steady in the Bourse quotations. As was inevitable in an affair so important and so singular, the loan has encountered opposition in certain circles; the French Government ought not, it is said, to have sanctioned it, inasmuch as it excites cupidity by promising, all things counted, about 14 per cent., and with its lottery, encourages the spirit of gambling, which is already widely developed among the French. In a secret sitting in the Corps Legislatif, M. Berryer has *dit-on* spoken strongly to this effect, and no doubt he intends to deliver an oration in the same strain in a public sitting. The answer to the first of these objections will probably be, that as Mexico absolutely needs money to pay what she owes France, and to consolidate her new government, she must borrow at a high rate of interest, since no one is disposed to lend to her at a low one; and that regard being had to the price at which her former Governments have borrowed, 14 per cent. is not excessive. The answer to the second objection will no doubt be that there is more affectation than sincerity in the condemnation of the lottery, seeing that in France it is an accepted thing, the City of Paris and the Credit Foncier being allowed by law to borrow in that way, churches being built, and charities being supported by lotteries, and in private life lotteries literally swarming.

The meeting of the shareholders of the Northern Railway held recently was presided by Baron James de Rothschild. The report presented by the directors was more satisfactory than that of any other railway company in this country. The gross receipts of the working in 1864 were 71,561,571f 34c, the expenses 25,622,710f 93c, leaving a sum of 45,947,208f 27c, which was 3,726,503f 10c more than in 1863, and sufficient (as stated last week) to allow a dividend of 67f to be declared. This dividend is not only 5f more than that of 1853, but is the largest yet earned. Of the 67f, 25f have been distributed, and the rest will be paid from the 1st July.

The directors of the Lyons and Mediterranean Railway announce the intention to propose in the next general meeting of shareholders a dividend of 65f for 1864, of which 25f are already paid on account.

In the meeting of the Southern Railway, held yesterday, under the presidency of M. Emile Pereire, a dividend of 42f for 1864 was declared.

The report of the Directors of the Credit Industriel et Commercial Bank presented at the recent annual meeting of shareholders, states that the deposits made in 1864 were 150,617,120f, whilst in 1863 they were 166,988,900f, but that the number of depositors was greater. The discounts were 494,889,216f; in 1863 they were 454,038,705f. The clear profits were 2,548,419f, and they enabled a dividend of 25f 50c to be declared. Of that sum, 13f have already been paid. The bank has resolved on abandoning the discount of warrants, which at one time it regarded as likely to constitute a most important branch of business.

The Cab Company (Petites Voitures) of Paris, though a monopoly, is only able to pay 5f 45c per share as dividend of 1864. The receipts, however, were 400,000f more than in 1863; but it employed a great number of vehicles.

A number of the principal cotton merchants of Havre have written to the President of the Chamber of Commerce to represent that in the present state of the cotton trade, it is of the highest interest to know exactly the importance of the stock at Havre; and that, as it has not been revised for several years, there is reason to believe that the figures given weekly by the brokers are erroneous. In consequence, they pray that measures may be adopted for taking stock on the 30th April, as exactly as possible.

Under the convention relative to sugar between France, England, Belgium, and Holland, it was stipulated that delegates of the powers should settle the details of experiments for fixing definitively the proportion of refined sugar to be produced from a given quantity of raw. The journals announce that after long discussions carried on at London these details have been arranged, and that the experiments are to be commenced immediately after the Parliament shall have sanctioned the treaty. The Belgium Chamber of Representatives has just passed a bill for carrying the treaty into effect.

Subjoined is the market report:—

FLOUR.—At *Paris*, yesterday, prices were pretty nearly the same as last week, with the exception of choice, which were at 48f;—other sorts 42f to 47f the sack of 157 kilogs. Six marks current month were 49f; May, 49f to 49f 25c; June, 50f; July and August, 51f 75c. Type Paris the 101 kilogs, 29f 50c current month.

WHEAT.—At *Paris*, yesterday, holders demanded an advance, but buyers would not consent to it, and the business done was not important. Choice white was 27f the sack of 120 kilogs; choice red, 26f 25c to 26f 50c; first quality, 25f 50c to 24f; other sorts, 24f to 24f 50c.

COTTON.—In the week ending Friday, at *Havre*, the news of the taking of Richmond produced a fall, but afterwards the market became firmer, from the belief that even if peace should be definitively established in America, prices canot decline much below what they have latterly been. The sales of the week were 4,738 bales, the greater part, as usual, Asiatic, and the arrivals were 3,675. The closing quotations were 10f lower for United States, 5f lower for Brazil, Peru, French West India, and Egypt; 5f higher for Madras; other sorts unchanged. Low New Orleans was consequently 190f the 50 kilogs; good ordinary qualities in Broach, 120f; in Madras, 130f; Tinnevelly, 110f; China, 115f; Jumel, 175f. This week, business has not been very active. Yesterday, the market was calm in the earlier part of the day, and American was 180f; sawginned, 150f; Oomrawattee, 130f; Tinnevelly, 115f and 112f 50c; Madras, 145f; Coconada, 105f; Bengal, 70f; Japan, 115f; China, 110f and 107f 50c. After the receipt of the news of the assassination of President Lincoln, little was done. According to a telegraphic despatch, the demand was brisk this morning, and prices rose from 2½f to 5f.

COFFEE.—The sales at *Havre* in the week ending Friday were 900 sacks Port-au-Prince and Cayes, disposable, 80f to 82f the 50 kilogs in bond; 80 Cape, 83f 50c; 55 Gonaives, 88f; 980 Rio, not washed, disposable, 75f 50c to 76f 50c; 475 ditto, for delivery, 76f; 950 La Guayra and Porto Cabello grages and non-grages, for delivery, 97f to to 105f; 92 Cazongo, 79f. Some damaged Hayti was also sold. The arrivals exceeded 17,000 sacks and some casks. This week, Hayti, 81f and 81f 50c; Gonaives, 87f and 88f; Cape, 84f 50c; Rio, 75f; Cayes, 80f. At *Nantes*, last week, some Guadaloupe bonifieur went at 316f and 320f the 100 kilogs, duty paid; 147 bales Reunion, 150f the 50 kilogs. For 1,204 sacks Port-au-Prince, 82f were offered, and this week some sales have been made at that price. At *Bordeaux*, last week, 800 sacks Guayaquil, grages and non-grages, 96f to 106f the 50 kilogs; 300 Rio at prices kept secret, and 188 Bahia, 84f. By auction, 690 sacks Mysore, 111f 50c to 112f. This week, La Guayra, 105f to 109f. At *Marseilles*, last week, 280 sacks Rio, in the port, 71f 25c. By auction, 625 Brazil, sound, 70f 25c to 71f.

SUGAR.—At *Havre*, in the week ending Friday, 460 casks French West India, disposable or in port, and 185 ditto for delivery, 48f the 5$_0$

Digitized by Google

kilogs, bonne quatrieme, duty paid; 68 ditto, disposable, 51f ditto; 55 at 55f 50c on sample; a quantity of usine, first jet, 60f 50c to 61f 50c; and second jet, 55f; 1,226 Havana, 30f to 30f 50c, No. 12 in bond. The arrivals were not considerable, and were entirely of French West India. This week, French West India usine, 49f; bonne quatrieme, 53f to 88f; Havana, No. 12, 31f. At *Nantes*, last week, sales were large, but without improvement in prices. 2,000 sacks Reunion at prices not stated; 50 low quality, 47f; 100 at 43f 50c; 10,394 disposable, 51f 62½c, bonne quatrieme; 11,000 Mauritius, 52f 12½c ditto; 3,906 Pernambuca at prices not stated; some French West India at 48f 50c, afterwards at 48f, bonne quatrieme. This week, Reunion on the basis of 52f, bonne quatrieme; French West India, 48f ditto; Demerara, 56f; Havana at prices kept secret. At *Bordeaux*, last week, some French West India, 47f 50c and 47f 75c, bonne quatrieme; 1,500 sacks Mauritius, 53f ditto. This week, Reunion on sample, 53f; Martinique usine, 52f and 60f 50c; Guadlaoupe usine, 65f. At *Marseilles*, last week, some French West India, 31f and 32f, bonne quatrieme; 1,300 bales Reunion, 51f ditto; 3,300 sacks Brazil, 29f 50c, No. 10; also some damaged Havana by auction. This week, Santiago, 29f 75c, bonne quatrieme of Havre.

COMMERCIAL AND MISCELLANEOUS NEWS.

Copies of the newly proposed tariff for Austria have been transmitted to the various Chambers of Commerce in this country, prior to the official investigations of the Anglo-Austrian commission. The proposed rates of duty are lower than those at present in existence, but still these rates in many instances are regarded as too high to admit of much increase in the direct commercial intercourse between Austria and this country. On cotton yarns and iron manufactures in particular the rates in the new tariff are much higher than those at present imposed upon similar productions from the Zollverein, though this preference will cease on the 1st of July. The Bradford Chamber of Commerce, who have taken an active part in the endeavour to obtain a good working tariff between England and Austria, regard the proposed tariff as still prohibitory, and will no doubt seek, before the official investigation of the Anglo-Austrian commission, to effect some satisfactory modification of the proposed rates, especially with regard to Bradford manufactures. The following are some of the principal charges in florins per cent. :—

	New duty.	Present duty.	Differential duty in favour of the Zollverein.
Cotton yarn, gray	4·00	5·25	2·62½
Do. do. bleached	6·00	10·50	2·62½
Do. do. manifold	10·00	10·50	2·62½
Cotton goods, middle fine	45·00	78·75	45·00
Worsted yarn, gray	4·50	5·25	5·25
Do. do. dyed or manifold	10·00	13·15	13·15
Worsted goods, middle fine	45·00	78·75	45·00
Iron, wrought and rails	1·50	2·00	1·00
Do. plates and T-iron	2·50	4·20	1·50
Do. manufactured common	4·50	5·25	3·00
Do. do. fine	12.00	15.75	4·75

The following table shows the state of the cash balances in India in December last:—

According to the present limits of the several Governments.	Dec., 1862. £	Dec., 1863. £	Dec., 1864. £
Government of India	5,881,690	3,209,906	1,429,909

	6,078,853	5,851,536

In reference to the state of the money market at Calcutta, a report, dated March 21, says :—"The pressure has been relieved sooner than was anticipated, very large supplies of specie having come in from Bombay, the Straits, and China, with a marked falling off in the demand for silver from the interior, and the reaction in the value of money has been rapid. On the 16th inst., the Bank rate was reduced from 12 to 11 per cent., but money was offering outside on easier terms, and is available to-day at 10 per cent. on Government securities; in the bazaar first-class native acceptances are discounted at 8 to 9 per cent., or 3 per cent. lower than the rates ruling on 4th instant: while the present inactivity of trade lasts, we may look for a continued decline in the value of money."

As regards the position of the money market at Bombay, Messrs Clason, writing on the 28th ult., observe :—"European telegrams created serious apprehensions amongst our banks at the beginning of the fortnight, on account of the heavy losses holders of cotton and shares have to sustain; the suspension of two or three European firms further increases the existing fears, and some misgivings are felt with regard to the future. Our native houses keep up pretty well, but money is so extremely scarce in the bazaar that failures amongst the natives also are anticipated. The position amongst the majority of our banks is a good one, some of them hold a large capital which they retain, believing, as they do, that more difficult times are in store for us. The cash balance of the Bank of Bombay has slightly increased, and it has reduced the rates of discount 1 per cent."

Annexed is Messrs Sharp and Co.'s bullion circular, dated Hong Kong, March 15 :—Gold—The steady and regular absorption of large quantities of this bullion continues, the amounts received during the fortnight being $610,000, and the sums sent away, including those by the Behar on the 1st inst., and excluding those to leave to-morrow, are $550,000. Silver—The amounts received including the indemnity payments are equal to $350,000, and only about $50,000 worth of this is sent on to India. There have been but few transactions in bar silver. —Dollar Currency—The receipts of the two weeks past are $420,000; the sums sent away, including a shipment per last mail to Singapore, are only $190,000. There will probably be no immediate further shipments South. Discounts and Mortgages—We are unable to report any considerable improvement in the value of money since our last; transactions of importance having been made at only a very trifling advance, and others at the rates then ruling. Exchange—There has been more business this mail in private bills, which have been very readily taken up at last mail's rates, and we close again without a shade of alteration. Rupees have ruled higher. Exchange and Bullion—Closing Quotations —On London, 6 month's sight, 4s 6¾d; on Calcutta, 3 days' sight, 216 rs; on Bombay, 3 days' sight, 217 rs; on Shanghai, 3 days' sight, 72 tls; on do., 30 days' sight, 73 tls. Bar silver, 17 dwts *B*., 10½ per cent. prem.; Sycee, Hyquan duty, 9 per cent. prem.; clean Mexicans, ½ per cent. prem,; gold leaf, $22.90 per tael; gold bar, $22.85 per tael, equivalent 100 touch; sovereigns, $4.50 each; discount, 6½ per cent.; Hongkong and Shanghai Banking Company shares, 20 per cent. premf

During the week ending April 26, current year, the imports of bullion were :—Gold, 134,219*l*; silver, 29,113*l*. The exports were :—Gold, 219,404*l*; silver, 195,560*l*.

The Coal Trade Committee of Northumberland and Durham have just issued their annual report. The following table gives a general view of the progress of the trade during the year 1864 with regard to general demand and supply :—

	London.	Coast.	Foreign.	Total.
1864	2,967,940	3,217,329	2,920,060	10,105,329
1863	3,153,180	2,921,312	3,797,397	9,871,889
	185,240 Total decrease.	296,017 Increase.	122,663 Increase.	233,440 Increase.

Thus it appears that, with the exception of the London market, the demand for north country coals of every description has been steadily growing. That the demand for London has been proportionately less than that elsewhere may be accounted for by the steadiness of the supplies which now reach the metropolis by railway, by the low differential rates now charged by railway companies upon coals sent to London, and by the impulse to the consumption of second coals which the higher level of price has given. The following tabulated returns show the average prices of first and second coals for each month in the London market, together with the rates of freight for each month :—

1864.	Best Coals. s d	Second Coals. s d	Freight. s d
January	22 3½	20 7½	7 5½
February	19 4½	17 0½	6 11½
March	18 10½	16 7	6 3½
April	19 10½	17 6½	6 4
May	17 17½	15 7½	6 8
June	17 6	15 8½	6 6½
July	18 8	16 8½	6 5½
August	19 0	17 1	6 7
September	20 4½	18 9½	6 11
October	21 4	19 7	7 3½
November	22 10	21 6½	7 10½
December	23 3½	21 5½	8 4½
	12) 241 0	218 4	83 9½
Average	20 1	18 2½	6 11½

The general result thus is, the committee remark, that, in company with an average increase in freight of 5½d per ton, there is upon best coals an advance of 1s 10¾d per ton, and upon second coals an advance of 2s 4d per ton, an improvement which was not anticipated at the commencement of the year, and which has taken place notwithstanding

Digitized by Google

the adverse state of the money market. It must also be borne in mind, when looking at the decrease in seaborne coals imported into the London market, and the increase of coals by railway, that a portion of this increase is from this district. In 1863, the coals sent by railway to London from this district were 132,112 tons; in 1864, we have sent by railway to London 196,853 tons, the increase last year being 64,741 tons. The following is a classified table, as furnished by the Factors' Society, of the various descriptions of seaborne coal imported from these counties into the port of London:—

	1863. Tons.	1864. Tons.
Tyne—House coals	133,345	119,473
Sunderland and Seaham	902,457	797,034
Hartlepool and Tees	578,160	478,285
Total house coals	1,613,962	1,394,792
Steam coals	309,914	288,064
Gas coals	923,322	974,083
Coking and smiths' coals	156,832	158,815
Manufacturing coal	134,100	128,157
Small coal	55,419	53,685
Total	3,192,546	2,997,596

The foregoing returns and remarks apply principally to household coals; but the lively demand, and consequent improvement in prices, which this description of coal has experienced have been equally apparent in steam, gas, coking, and manufacturing coals. In steam coal alone the increase of consumption in the year 1864, as compared with 1863, may be stated at 70,610 chaldrons, or 186,576 tons. It is observable, however, that the increase of export of coal from this district has not quite kept pace with the total export:—

	Tons.
1864.—The total export for the kingdom is	8,600,420
1863.—The total was	8,275,212
Increase	325,208

Whereas the net increase from this district is only 122,663 tons, which is less, comparatively, than it ought to be. For gas and manufacturing coal the same growing demand has been experienced.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of April, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,560,445	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,910,445
		Silver Bullion	...
	28,560,445		28,560,445

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,984,441
Rest	3,192,175	Other Securities	19,057,968
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,298,382	Notes	7,551,410
Other Deposits	13,965,270	Gold and Silver Coin	844,350
Seven Day and other Bills	429,342		
	38,438,169		38,438,169

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,438,377	Securities	30,139,409
Public Deposits	6,298,382	Coin and Bullion	14,754,795
Private Deposits	13,965,270		
	41,702,029		44,894,204

Dated the 20th April 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,192,175*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

AN INCREASE of Circulation of	£9,858
AN INCREASE of Public Deposits of	277,393
A DECREASE of Other Deposits of	734,950
No change in Government Securities.	
A DECREASE of Other Securities of	219,501
AN DECREASE of Bullion of	219,215
AN INCREASE of Rest of	8,983
AN DECREASE of Reserve of	212,190

The decrease of 734,950*l* in the private deposits is the chief feature in the return published this week by the Bank. There is an increase of 278,293*l* in the public deposits, and a decrease of 219,501*l* in the private securities; but the reserve has been drawn upon to the extent of 212,190*l*. The stock of coin and bullion has been reduced by 219,215*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,331,752	£ 21,946,997	£ 21,452,805	£ 21,484,602	£ 21,438,377
Public deposits	4,468,013	6,867,378	7,178,312	6,217,965	6,298,382
Other deposits	13,173,482	14,357,007	13,606,959	12,620,036	13,965,270
Government securities	14,214,376	11,210,755	12,051,395	11,022,267	10,984,441
Other securities	12,944,224	17,856,320	17,845,954	19,842,368	19,057,968
Reserve of notes & coin	9,139,729	10,479,756	9,130,027	6,261,541	8,395,760
Coin and bullion	15,499,409	17,089,446	15,348,492	12,567,776	14,754,795
Bank rate of discount	4½ p. c.	2½ p. c.	3 p. c.	7 p. c.	4 p. c.
Price of Consols	88⅞ 9	94	93½	91⅛	90⅜
Average price of wheat	68s 4d	58s 2d	45s 8d	39s 7d	41s 1d
Exchange on Paris (short)	25 15 22½	25 22½ 30	25 15 22½	25 20 25	25 15 22½
— Amsterdam ditto	11 18 18¾	11 15¾ 16	11 15½ 16	11 16 17½	11 18½ 17⅝
— Hamburg (3 months)	13 7¾ 7½	13 8 8½	13 7¾ 7½	13 9 9¼	13 8½ 9½

In the corresponding week of 1855, great complaints had been made in the public journals as to the management of the Russian war. Business was reviving at Paris. At Berlin a debate had taken place on the abolition of the Sound dues. The money market was easy, and the supply of money abundant.

In 1862, the money market continued easy, and several new foreign loans were expected. The stock markets were dull from the competition of the newly-created foreign securities.

In 1863, subscriptions were being invited by the agencies of the Imperial Ottoman Bank in London and Paris for a new Turkish 6 per Cent. loan of 6,000,000*l* at 72. Prince William of Denmark had signified his acceptance of the Greek Crown.

In 1864, a naval engagement had taken place between a Prussian gunboat and a Danish iron-clad off Rugen Island. The King of Prussia had arrived at Flensburg. The Prussians had made a further advance in Jutland. The King of Denmark had issued a proclamation to the army. Advices had been received from Constantinople, announcing a great battle between the Russians and Circassians, in which the latter were defeated. Fresh negotiations had been entered into, relative to a treaty of commerce between France and Switzerland. In America, General Forrest's forces had captured Fort Pillow, on the Mississippi, by assault. General Grant had left for the army of the Potomac. The prospectuses of the Mexican loan of 12,365,000*l* and the Russian loan of 6,000,000*l* stock, had been issued. The Bank had raised its rate of discount to 7 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 229,258*l*; in 1862, a deficiency of 3,499,313*l*; in 1863, a deficiency of 4,238,995*l*; and in 1864, a deficiency of 7,222,332*l*. In 1865, the deficiency is 5,092,698*l*.

DISCOUNT AND MONEY MARKET.—The news received this week from America has exercised considerable influence on the money market. Increased activity in the colonial and produce markets followed the announcement of the surrender of General Lee with his army, and a more general demand for money was at once experienced in commercial circles. The intelligence published relating to the assassination of President Lincoln in New York gave rise to a general feeling of horror in this country; but the effect on the money market was slightly increased stringency, owing to the greater caution of lenders. Little disposition is shown for the moment by discounters to engage their resources; doubt being freely expressed as to the consequences of the change brought about by such violent means in the American Cabinet.

The rate for money has approached more nearly to the Bank minimum, the close of the month, as usual, inducing a greater degree of firmness, while the advance in produce, already referred to, is also calculated to add strength to quotations. The manufacturing trade of the country, notwithstanding partial interruptions, is steadily improving, now that we are developing increased commercial relations with every part of the world in which the search for new cotton fields has also opened fresh markets for the produce of our own industry; and, under the uncertain currents that in some instances obscure the direction of our progress, the steady increase of employment amongst the manufacturing population of the North, is the truest indication of the general advances toward prosperity.

Money has been inquired for during the day at 3½ per cent., and there has been a fair amount of business at the Bank.

As the proposed conversion of the Turkish home stocks has been freely discussed of late, the following details relating thereto will be read with interest by the public. The follow-

Digitized by Google

ing are the present denominations and amounts of the home debt :—

Consolidés.	L. T.	Annual Charge. L. T.	Interest.	Sinking Fund.
1st issue	2,151,240			
2nd —	1,710,955			
3rd —	585,300			
4th —	11,985,000			
Total Consolidés	16,432,495	1,400,000	6 per cent.	2 per cent.
Tavilhati Mumtazé	1,953,180	275,000	6 per cent.	5 per cent.
On Seneliks	3,703,325	222,199	6 per cent.	20 prc (not paid.)
Total to be converted	22,089,000	1,897,199		

The terms of the consolidation, as now projected, are as follows :—

L. T. New Stock.		L. T.	
121	for every	100	Consolidés.
143	—	100	Tavilhati Mumtazes.
100	—	100	On Seneliks.

The holders of the latter security are to abandon their claim for unapplied sinking fund, no part of which has yet been paid. The capital amount of the stock is to be converted, and the arrears of interest for 1863, 1864, and the first three months of 1865, which amounts to L. T. 684,099 are to be paid in three instalments.

The conversion on these terms would involve the emission of about 26,000,000 L. T. As it is proposed to issue 33,000,000 L. T. new stock, of which 4,000,000 L. T. is to be offered for public subscription, the produce of the remaining 3,000,000 L. T. will probably be devoted to the payment of the overdue interest on the On Seneliks, and the commission and expenses on the operations involved in the conversion and loan. A further sum of 7,000,000 L. T. is reserved for future issue during the succeeding three years.

The annual charge on the Turkish Internal debt in its actual state is 1,897,199 L. T., part of which has hitherto remained unpaid. The charge on 33,000,000 L. T. 5 per cent. stock, with 1 per cent. to be devoted to its extinction by purchases in the market, will amount to 1,980,000 L. T. Including the 7,000,000 L. T. reserved for future issue, the annual payments to be made by the Ottoman Government will reach 2,400,000 L. T.

It is remarkable that in this instance the "Grand Livre" of the Turkish debt is to be opened in a value other than national currency. Heretofore, the Consolides have been in amounts of 100 L. T. It is now proposed to issue bonds in amounts of 2,500f, 100*l*, or 100 L. T. ; this measure being probably contemplated with the view of rendering the new securities additionally attractive to the foreign investor. The charges on the foreign debt may be stated as follows :—

Loans issued in	Amount of Interest. £		How secured.
1854	210,000		Secured upon the Egyptian tribute
1855	250,000		Secured upon balance of the Egyptian tribute and on the Smyrna Customs duties.
1858	350,009		Secured upon the Customs duties of Constantinople.
1860	145,000		Secured upon special security not named.
1862	640,000	including 2 per cent. sinking fund	Secured upon tobacco, stamp, and salt licences.
1863-4	640,000		Secured on balance of surplus 1862, loan revenues, and by 1st claim on direct taxes.
	2,235,000		

In addition to these sums, a debt of 1,060,000 L. T. for the Syrian indemnities exists. The repayment of this debt is secured upon the Syrian Customs duty for an annual sum of 240,000 L. T., by which it is to be extinguished in 5 years.

Annexed are the current rates for mercantile paper of different dates :—

30 to 60 days	4 per cent.
3 months	4 per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	4¾ 5 per cent.

On the Stock Exchange there has been more inquiry, and 3 to 3½ per cent. has been paid for loans on Government securities for short periods.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

No bullion operations are reported at the Bank of England to-day.

Subjoined are the rates of discount in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3⅜
Vienna	5	5¼
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3⅜
Turin	5	4¾ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2
St Petersburg	6	5¾

The Committee of the Stock Exchange have appointed Wednesday, the 3rd of May, a special settling day in the shares of the Varna Railway Company. It was also resolved that "the arrangements for the issue and the allotment of shares in the Company being irregular and unsatisfactory, a quotation be refused." The Committee have ordered the new 9*l* shares of the Midland Railway Company to be quoted in the official lists.

The following changes result from a comparison of the accounts issued by the Bank of France on the 27th and on the 20th instant :—

	£
INCREASE.	
Cash in hand	466,660
Current accounts	744,000
DECREASE.	
Commercial bills	26,660
Notes	120,000
Treasury balance	26,660

ENGLISH GOVERNMENT STOCKS.—The upward course of the funds has been checked, first, by the news of the surrender of the army of General Lee, and subsequently by the grave intelligence of the assassination of President Lincoln. The decline that followed this last announcement nearly amounted to 1 per cent. in Consols, and there was a corresponding depression in other Government securities. The financial statement of the Chancellor of the Exchequer published this morning, produced a rally at the opening of the markets; but in the absence of any important operations the price has subsequently relapsed, and closing quotations are dull. Consols, 90¾ to 90⅞ for money, and 90⅞ to 91 for the May account. New Three per Cents. and Reduced, 89 to 89¼. India Five per Cents., 106⅞ to 107⅛.

Exchequer bills are slightly higher at 5s to 8s prem., and India bonds steady, at 14s to 19s prem.

FOREIGN STOCKS.—Attention has been chiefly directed to Confederate security, and to those of the United States. The former have declined still further, in the absence of accounts in any degree favourable to the Southern cause. United States 5-20's, which had advanced to 68, receded yesterday to58, and close to-day at rather higher quotations, although inferior to those attained after the opening of the markets. Turkish Consolides have also fluctuated, and declined near 1 per cent., on the intimation that the Imperial Ottoman Bank and the Societe Generale Ottoman institutions, whose intervention is considered important in any measure connected with Turkish financial operations, had declined to take part in the plan for consolidation of the home debt proposed by Mr Laing. Spanish securities, after having been dull, rallied slightly to-day, on the announcement that commissioners had been sent to London from Madrid. Business generally is restricted in amount, and speculation almost inactive. The closing quotations of stocks dealt in to-day are subjoined :—Brazilian, 4½ per Cent., 83¾; Buenos Ayres, 6 per Cent., 91½ to 92¼; Danubian Seven per Cents., 83¾; Egyptian Seven per Cent., 96½; ditto 1864, 93½; Greek Five per Cents., 21⅛ to 21¼; Italian Scrip, 1865, 42*l* 10s paid, 4⅝ dis ex div; Mexican Three per Cent., 26¾ to 26⅞; ditto 1864, 25⅝; Moorish (Imperial) Five per Cent., 96; Portuguese Three per Cent., 48¼ to 48⅜; Russian Five per Cent., 1822, 93; ditto, 1862, 93 to to 93⅛; ditto 1864, 92½; Spanish Three per Cent., 48; ditto New Deferred, 40¾; Passive, 31¼; ditto Certificates, 17 to 17¼; Turkish Six per Cent., 1854, 90 to 91; ditto 1858, 71; ditto 1862, 73¼ to 73½; Dutch 2½ per Cent. ex 12 guil., 63; Four per Cent. ditto Certificates, 96¼; Turkish Consolides close 53⅞ to 54⅛, and United States 5-20 Bonds, 61½ to 62; Italian 5 per Cent., 64½ to 65.

The closing price of French 3 per Cent. Rentes telegraphed this evening from Paris, is 67f 40c for money and account.

Railways and Other Shares.—While the American news has exercised adverse influence on the Government and foreign stock markets, railway stocks have improved owing to the increased traffic returns. Caledonian stock is 1 per per cent. higher than the price quoted last week. Great Eastern ½ per cent. higher. Great Northern stocks are unaltered, and Great Western ¼ per cent. higher. Lancashire and Yorkshire notes 2 per cent. advance. London and North-Western are firm, and London and South-Western ⅛ per cent. higher. Metropolitan stock has improved 5½ per cent.

Indian stocks continue in demand. Colonial securities generally are little altered. Canadan, after some slight fluctuation, rather firmer.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

RAILWAYS.

	Closing prices 1st Friday.	Closing prices this day.

Foreign Exchanges.—There were few transactions, and very little alteration is to be noted. Bills on Paris were in rather better demand.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—An amount of 300*l* in sovereigns was withdrawn from the Bank yesterday for exportation; the operation was, however, exceptional and the arrivals mentioned belaw are quite sufficient to supply all existing orders for abroad. The Asiatic has brought 35,000*l* from Melbourne; the Queen of the Colonies has brought 12.000*l* from Melbourne; the London s.s. has brought 123,000*l* from Melbourne; the Scottish Chief has brought 19,000*l* from Melbourne; the Asia has brought 7,000*l* from Boston. The Massila has taken 2,000*l* to Bombay, and the Bank has received 5,000*l* and sold 6,000*l* in bar gold during the week.

Silver.—The price of fine bars improved yesterday to 5s 0¾d per oz. standard, owing to an order for a small amount having been received. We do not consider the market firm, however, at this rate, and we quote the price the same as last week, viz., 5s 0⅝d per oz. standard.

Mexican Dollars.—Our market is entirely bare of this coin, and we are therefore without any business to report.

Failures and Mercantile Embarrassments.—A meeting of the creditors of Messrs Buchanan, Hamilton, and Co., of Glasgow, took place on Wednesday last. The balance sheet presented showed direct liabilities amounting to 752,588*l*, and assets to 632,068*l*. It was unanimously resolved to adjourn the meeting till the 3rd of July next, and in the meantime the business is to be carried on under inspection.

Public Companies.—The meeting of the Royal Mail Steam Packet Company took place on Wednesday last, when the directors' report, recommending the payment of a dividend of 8*l* 10s per share out of the ordinary profits of the undertaking, and a bonus of 1*l* per share from the insurance fund, both free from income tax, was adopted.

At the meeting of the Commercial Bank Corporation of India and the East, held on Wednesday, a dividend was declared for the six months ended the 31st December, at the rate of 10 per cent. per annum.

The first report of the directors of the Otago and Southland Investment Company (Limited), recommending a dividend at the rate of 6 per cent. per annum, has been issued.

At the annual meeting of the Scottish Provincial Assurance Company, held on the 21st instant, the report was adopted, the usual dividend of 8 per cent. declared, and a surplus carried to the reserve fund. The increase of income from new premiums was stated at 13,955*l*.

The first report of the City of London Real Property Company (Limited) has been issued. The balance in favour of the company is stated at 7,397*l*, out of which the directors recommend a dividend of 7 per cent. per annum.

The report of the Asiatic Banking Corporation to be presented on the 4th May has been issued. The net profits, after making provision for all bad and doubtful debts, are stated at 70,439 4s 8d. The directors propose a dividend of 15 per cent. per annum, and a bonus of 10s per share, being together equal to 20 per cent. per annum, both free of income tax.

The report of the Chartered Mercantile Bank of India, London, and China, has been issued in anticipation of the meeting. The net profit is stated at 126,082*l*, to which has to be added a sum of 75,831*l* undivided profit brought forward from the preceding year, making a total of 201,913*l*. Out of the above sum 136,153*l* has been paid in two half-yearly dividends, making together 20 per cent, on the paid-up capital of the bank.

At the meeting of the East India Financial Association (Limited) held to-day, the report presented showed a net profit of 9,746*l* 1s 3d. An interim dividend of 7s per share was declared, and 2,716*l* 1s 3d carried forward to new account.

The annual meeting of proprietors of the Natal Bank was held in the colony on the 3d January, when a half-yearly dividend at the rate af 16 per cent. per annum was declared, and 4,894*l* carried to the credit of new profit and loss account.

The meeting of the International Contract Company (Limited) was held yesterday. The directors presented their first report and balance sheet for the nine months ended the 31st ult., which showed profits amounting to 96,121*l*. A dividend was agreed to at the rate of 10 per cent. per annum, and the sum of 60,000*l* was ordered to be placed in reserve.

The Ottoman Company (Limited) is formed to act as commission merchants and financial agents in the trade with the Ottoman Empire. A business of sixty years standing has been secured to the company at Smyrna as a commencement. The business will be strictly confined to Turkey, and will be under the management of M Lewis Farley. The capital is 500,000*l*, in 25,000 shares of 20*l* each. First issue, 15,500, of which 10,000 have been already applied for, and 2,500 have been reserved for Turkey.

The Plymouth Ship-building, Dock, and Iron Works Company (Limited)—capital 250,000*l*—is formed for the purpose

Digitized by Google

of purchasing a freehold property of value, called Queen Anne's yard, at Plymouth, and the businesss of iron ship-building and repairing which is there carried on. At present there is no iron ship-building at Plymouth, and iron ship-owners are often put to much inconvenience and expense in consequence.

The Lion Brewery Company (Limited) is formed for the purpose of purchasing and extending the well-known business of Goding, Jenkins, and Co. The vendors will take the amount of the good-will in the ordinary and preference shares of the Company. The capital is 400,000*l*, in 12,000 shares of 25*l* each, and 5,000 perpetual 6 per cent. preference shares of 20*l* each. Four thousand of the ordinary shares and three thousand of the preference shares have been privately subscribed. This Company has been favourably received.

The London and Mediterranean Bank (Limited)—capital 2,000,000*l*, in 100,000 shares of 20*l* each, of which 80,000 shares have been already subscribed—is formed to accomplish the union of the Continental Bank with that of Messrs Landau and Co. for facilitating the commercial and monetary transactions between this country, the Continent, and Egypt. The sphere of operations is large, and the two establishments purpose liquidating all their transactions to the date of amalgamation.

MISCELLANEOUS.—Messrs Baring Brothers and Co. have announced the dividends due the 1st proximo on Quebec City Sterling Six per Cent. Bonds, also on Louisiana State Sterling Five per Cent. Bonds, issued in favour of the Second Municipality of New Orleans.

At a meeting of the members of the Amicable Society, held on Wednesday, for the purpose of considering the provisional arrangements for the transfer of the business of the society to the Norwich Union Life Office—Sir William Millman in the chair, and upwards of a hundred members being present, the meeting unanimously approved and adopted the terms proposed between the two societies, and without a dissentient authorised the court of directors to take measures for carrying the same into effect. A vote of thanks was passed to the directors for the great care and consideration shown by them in making the proposed arrangements, and to express the entire confidence of the members in their measures to promote the interests of the society.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, the trade for English wheat, notwithstanding that the show of samples on offer was very moderate, was in a somewhat inactive state, and Monday's advance in the quotations was with difficulty supported. In foreign wheat, sales progressed slowly, but at full prices. The trade for barley, oats, beans, and peas was firm, at quite Monday's currency. Flour was in fair demand, at full quotations. This week's imports consist of 7,150 quarters of wheat; 2,890 barley; 49,180 oats; and 1,410 sacks of flour.

At Liverpool and Wakefield, this morning, only a moderate business was transacted in cereal produce. Prices, however, ruled firm.

There has been an excited cotton market at Liverpool this week, and the demand from the trade on an extensive scale, especially for long-stapled cottons. On Wednesday, the market opened with a quieter tone, and the news of President Lincoln's assassination, which became known at noon, for a while checked business and paralysed temporarily the market. In the afternoon, business was again resumed with increased activity, and prices again advanced. Yesterday and to-day, the demand is well maintained, and the market closes with an upward tendency.

We have letters from Bombay to March 28. During the fortnight prior to that date, the cotton trade was in a most inactive state, owing to the receipt of telegrams from England announcing the probable approaching termination of the American civil war, and all descriptions of produce changed hands at further reduced rates. "The total business reported in ready cotton," oberve Messrs Nicol and Co., "aggregates upwards of 8,000 candies, principally Dhollera, Broach, and Oomrawatty, almost wholly on native account. The arrivals from the Northern and Eastern districts are on a full scale, and stocks are of course accumulating. Sawginned Dharwar is arriving slowly, and so far the quality is pretty fair, though there is more leaf than there should be. No Comptah has come in yet, but it is looked for shortly." The following tables of prices and exports are from the circular of the above-mentioned firm:—

CURRENT PRICES of COTTON at BOMBAY, March 28.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0¼d. Freight 2l 15s. per lb
	rs	d

Grand total	237,937½	208,284½

Advices from Tinnevelly state that the cotton trade was very dull, at drooping prices.

The cotton trade at Calcutta, during the fortnight ending March 21, was somewhat more active, at full prices. Bengal produce was quoted at 14 to 18 rupees per maund.

The cotton trade at Madras, from March 11 to March 25, was very dull, at reduced rates. Western, Salem, and Coimbatore produce was quoted at 10⅞d to 10¾d per lb. The stock of cotton was between 10,000 and 12,000 bales at latest date, chiefly of inferior quality.

From Shanghai, we have letters to the 8th ult. During the fortnight preceding that date, the cotton trade was very dull, the amount of business transacted having been small, at a decline in prices of 1 tael per picul. Shanghai was quoted at 15.5 to 16 taels; and Kongpoo, 17 to 17.1 taels per picul.

The sales and prices of cotton at Hong Kong, for the fortnight ending March 14, were as follows:—Shanghai, $24.50 to $25.50; Ningpo, $26 to $27 per picul; sales, 12,000 bales. Japan, $28 to $29 per picul; no sales.

At Yokohama, on the 28th February, the cotton trade was very inactive, at $25.50 to $27 per picul. The report form June 1 to date, was 15,457 bales to England, and 7,453 bales to Hong Kong—total, 22,910 bales, against 44,925 bales in 1863-4.

During the week ending April 13, cotton declined in value at Alexandria to the extent of 3d per lb. On the 20th inst., fair opengiuned was quoted at 12¾d; and good fair ditto at 14d per lb, free on board. According to the Egyptian Commercial and Trading Company's circular, the shipments of cotton from Oct. 3 to April 1, in the last six seasons, were as follows:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 3 to April 1.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1859—1860	66,820	14,999	5,504	87,323
1860—1861	65,071	22,273	4,319	91,633
1861—1862	81,190	18,525	4,155	103,870
1862—1863	97,681	25,319	4,539	127,719
1863—1864	139,282	47,966	10,638	197,886
1864—1865	173,633	27,977	6,528	208,138

The following table shows the rates of freight for cotton to London and Liverpool, at the leading ports at which that staple is exported, at the date of our latest postal advices:—

	London.			Liverpool.		
	£ s d	£ s d		£ s d	£ s d	
Bombay	2 5 0	to 2 7 6		1 10 0	to 2 15 0	
Calcutta	3 7 6	3 10 0		3 10 0	3 12 6	
Madras	2 15 0	3 0 0		0 0 0	0 0 0	
Shanghai	0 0 0	0 0 0		2 0 0	2 10 0	
Canton	3 0 0	0 0 0		0 0 0	0 0 0	
Hong Kong	3 0 0	0 0 0		0 0 0	0 0 0	
Yokohama	3 0 0	3 10 0		0 0 0	0 0 0	
Alexandria	0 0 0	0 0 0		0 0 0¼	0 0 0	

In the markets for colonial and foreign grocery produce, there has been a moderate amount of activity during the week. In tea, sugar and rice, a fair business has been transacted, and prices have ruled firm. Very little coffee has been brought forward at the public sales, and the small supplies offered have been disposed of at slightly enhanced quotations.

At the leading Chinese ports, at the date of our latest advices, the tea trade was in a somewhat inactive state. Holders, however, were decidedly firm, and in some instances a slight advance took place in prices. At Shanghai, gunpowder was quoted at 1s 7d to 3s 4¼d; imperial, 1s 5d to 2s 4¾d; young hyson, 1s to 2s 4¾d; hyson, 1s 6½d to 3s 3d; and twankay, 9½d to 1s 3¾d per lb. The shipments to Great Britain from all ports since the commencement of the season had amounted to 110,679,810 lbs, against 103,689,760 lbs in 1863-4. By the Indo-Persian telegraph intelligence has been received that the exports to Great Britain had reached 111,500,000 lbs.

Large shipments of coffee were made from Colombo during the fortnight ending March 30: the arrivals of plantation produce had been large; but native qualities—owing to limited supplies—improved in value 6d per cwt. Plantation coffee was quoted at 12s 6d per bushel; native, unpicked, 43s to 45s; picked and dried, 50s to 52s per cwt. The annexed table of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from CEYLON from Oct. 1 to March 30.

Europe	207,665
Straits and China	2,435,238
Calcutta and India	150,960
Total	2,794,563

The quarterly public sales of cinnamon were held on Monday. The quantity offered amounted to 2,384 bales 43 boxes broken Ceylon, and 140 bales 42 boxes Tellicherry. The biddings ruled inactive, at a decline in prices of 1d to 4d per lb. First pile Ceylon realised 1s 4d to 2s 8d; second ditto, 1s 3d to 2s 2d; third ditto, 1s 3d to 1s 9d; fourth ditto, 10d to 1s 4d per lb.

Advices from Ceylon state that, owing to the prevailing drought, all descriptions of cinnamon were very scarce. Plantation was quoted at 13d to 14d; inferior ditto, 10d to 11d per lb. The shipments, from Oct 1 to March 25, were 443,176 lbs, against 299,964 lbs during the same period in 1863-4; 376,811 lbs in 1862-3; and 485,424 lbs in 1861-2.

The English wool trade has been without activity; nevertheless, prices have ruled firm. Flax has commanded more attention, and jute is rather dearer.

Most descriptions of silk are in slow request. Both Asiatic and European qualities, however, are selling at fully late rates.

A report from Shanghai, dated March 8, thus alludes to the state of the silk trade:—The transactions of the fortnight have been very trifling, barely amounting to 50 bales. The local trade has taken off a large proportion of the supply for native consumption at extreme prices, and the remaining stock is chiefly composed of inferior, and very foul parcels of Hainings and Taysaams, the refuse of the season. The arrivals from the interior have again been very small, but it is reported that some 500 bales may be expected down in the course of the month. The arrivals of Japan silk have been 332 bales, and the unsold stock by latest advices from Yokohama was about 1,000 bales. Prices had declined $10 per picul, and from the best native sources it was ascertained that the supply would be short as compared with last year. It is not expected to yield over 15,000 to 17,000 bales. The exports since the commencement of the season have been 36,688 bales, against 31,514 bales in 1863-4.

The value of metals has fluctuated considerably. The principal movement has been in tin, Straits' having sold at 95*l* per ton, cash. Spelter is quieter, at 20*l* to 20*l* 2s 6d per ton, on the spot. Scotch pig iron is now worth 54s cash, mixed numbers.

Oils and tallow have been rather quiet. Linseed oil is quoted at 31s 9d; and P.C.Y. tallow at 41s per cwt., on the spot.

Trade at New York, during the week ending April 15, was decidedly quiet. As regards prices, however, both of imports and exports, the markets presented a firm appearance. In cotton, considerable business was transacted at full quotations. Breadstuffs changed hands at rather more money. In the money market, the best short-dated paper was quoted at 7 to 7½ per cent. The gold market was tolerably steady, the latest quotation being 146 per cent. The stock of bullion held by the banks on April 8, was 4,009,200*l*.

THE COTTON TRADE.

LIVERPOOL—April 28.

Cotton has been in extensive demand throughout the week, particularly from the trade, and prices have steadily advanced, On Monday the advices from New York of the surrender of General Lee by no means tended to check the disposition to buy, and a large business was done on Tuesday also. On Wednesday morning there was less animation and a more limited business, until the appalling news arrived of the assassination of the President, which for a moment put a stop to all business. In the course of the afternoon many holders withdrew their stocks, and considerable purchases were made at enhanced prices. Yesterday the demand continued good, the market closing steadily, though without excitement, with a general and very decided advance on last week's quotations. Sea Island continues neglected, and the few transactions are at prices showing a further decline of about 1d per lb. American has been in good demand throughout the week, and has advanced 1d to 1½d per lb. In Brazil, large purchases by the trade, as well as a moderate demand for export, have further advanced prices 1½d to 1½d per lb, at which the market is freely supplied. In Egyptian a large business has been done daily, at steadily advancing rates, and the quotations for fair qualities are raised fully 1½d per lb. Smyrna has advanced about 1d per lb. For Surat there has been an active inquiry, and prices have advanced ½d per lb upon the ordinary, and about 1d on the current and better qualities. China and Japan have been in extensive demand at an advance of about 1d per lb. The sales of the week amount to 105,900 bales, including 17,820 on speculation, and 25,100 declared for export, leaving 62,980 bales to the trade. The sales to-day amount to about 10,000 bales.

LONDON—April 28.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market at its opening was very active, and continued so until Wednesday, when the American news announcing the assassination of President Lincoln caused great excitement, and many holders at once withdrew their stocks; exporters and the home trade have since been free buyers, and the market closes firmly at an advance on last Friday's prices of ½d per lb on Surat, ¾d to 1d on Tinnivelly, ½d to 1d on other descriptions of Madras, Bengal, Scinde, China and Japan, and 1d on West India, Brazil, Smyrna and Greek.

NEW YORK—APRIL 15.

Very little change has taken place in the value of cotton since our last report. At the closing prices of last week, however, considerable business has been transacted. The total import since Sept. 1 is now 187,611 bales. The export, from April 1 to April 11, amounted to 1,951 bales, against 3,105 bales last year. Annexed are the prices current:—

MARKETS IN THE MANUFACTURING DISTRICTS

On the whole, a full average business has been transacted in goods in most of the leading markets, and prices have been well supported. The iron trade has continued firm at full quotations; but the demand for coals, both for home use and export, has fallen off.

MANCHESTER, April 27.—Towards the close of last week the feeling of confidence in the strength of the market gained ground very observably, and a large business was done at advancing prices. On Monday and Tuesday this week, the news of General Lee's capitulation caused the market to be rather less active, but owing to the strong position of manufacturers, the giving way in prices was almost nominal. To-day, the idea that the North may have internal troubles, owing to the assassination of President Lincoln, has caused manufacturers and spinners to raise their prices, notwithstanding which, they have been able to do a moderate business, when the time required for delivery has not been too long. It is at present exceedingly difficult to place orders for early delivery, especially in the case of the better makes of shirtings for India and China, which are largely contracted for. Printing cloths are in increased demand, and are becoming scarce. Domestics and T' cloths are still comparatively abundant, but they are commanding increased attention. In yarns, a large business has been done at advancing prices, and spinners are generally well in order for both home trade and shipping qualities.

BRADFORD.—The tendency of prices in the wool market has been upward. In yarns there is little change to note. The little speculative feeling which was springing up has, in a great measure, disappeared. Business in piece goods is restricted, and the disposition of all our traders is, as far as possible, to defer their purchases, and await the arrival of further news from America.

HUDDERSFIELD,—A better feeling has pervaded the market. Purchases of better class heavy trouserings have been made more freely, and plain goods of all kinds have received more attention. There have been also inquiries for light goods.

LEEDS.—Plain and ordinary cloths have had quite as much demand as summer and fancy fabrics. The Australian and the French demands for the Yorkshire woollen goods appear to be both on the increase. Wools are rather stiffer, holders showing less disposition than last week to sell on any but the topmost quotations.

NOTTINGHAM.—There has been a slight improvement in the demand for silk mechlins. Black silk laces do not sell freely, but the demand for these goods is expected shortly to improve. The cotton lace trade remains inactive.

BIRMINGHAM.—The trade of this town continues dull. Manufacturers in all the principal branches report to that effect, and as a rule there are very few orders on the books beforehand.

GLASGOW.—To-day warrants are quoted 55s 3d cash, and 56s 3d three months, sellers at close. G.M.B. No. 1, 55s 6d; No. 3, 54s 9d; No. 1 Coltness, 61s; Gartsherrie, 60s; Calder, 57s; Glengarnock, 57s; Eglinton, 54s; Kinniel, 55s.

DUNDEE.—The better qualities of flax, on the spot, have been much inquired for. There has also been more inquiry for flax on contract, and business has been done, in some instances, at 1*l* to 2*l* per ton advance. Jute is also somewhat firmer, and although prices cannot be said to have improved, no further decline has taken place. The demand for linens has improved.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 10.—There was less activity in the market for state and western flour, and prices of all grades declined 10c to 20c, owing to the fall in gold. We quote:—Flour—Superfine State and Western $7.40 to $7.75; common to medium extra Western, $8.00 to $8.50; common Canadian, $8.10 to $8.55; rye flour, superfine, $5.70 to 6.50; corn meal, Brandywine, $6.50. The wheat Market ruled very quiet, and prices were nominally 2c lower. The corn market was scarcely so firm.

NEW YORK, April 15.—Rather more business is doing in wheat and flour, and prices are somewhat irregular.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land-carriage, have been on a moderate scale, and in improved condition. Both red and white qualities have changed hands steadily, at an advance in the quotations of 1s per quarter, and at which good clearances have been effected. The imports of foreign wheat have been on the increase. Selected qualities have produced quite as much money as of late; but low and damp parcels have ruled heavy, on former terms. There has been a good demand for English barley, at very full prices. Foreign samples have changed hands slowly, at late rates. Although large supplies of foreign oats have come to hand, the oat trade has continued steady, at full quotations. Both beans and peas have come slowly to hand, and the sale for them has been firm, at full currencies. Both English and foreign flour has maintained its previous value. The imports have been moderate. Most of the continental markets have ruled steady for wheat, at extreme prices, although the export demand has not increased. In barley, oats, and some other kinds of produce, a good business has been passing on English account. In America, the export trade has continued heavy. The stocks of wheat held in the Western States are represented as very large. The various local markets have been firm for wheat, and the currencies have had an upward tendency. All spring corn has produced very full prices.

In Scotland, the wheat trade has been firm, and a steady business has been doing in barley and oats at fully previous rates. Otherwise, the trade has been in a sluggish state.

The Irish markets have been moderately firm; but the business doing in them, generally, has not increased.

At Mark lane, to-day, although the supply of English wheat on sale was very moderate, the trade was dull, and Monday's advance in prices was barely supported. In foreign wheat, sales progressed slowly, but at full currencies. Barley ruled firm, at quite Monday's quotations. Oats were in good supply, and steady request, at quite previous rates. Beans and peas ruled firm, at extreme quotations. The flour trade was steady, at full prices.

Mr George Dornbusch reports the arrival off coast of 9 cargoes of grain. The demand for wheat for forward shipment has ruled steady, at late rates. Maize has produced rather more money. Other produce has ruled about stationary. Cotton seed has sold at 6*l* 5*s* per ton.

The London averages announced this day are:—

	qrs	s	d
Wheat	2437	at 43	1
Barley	856	32	2
Oats	156	23	6

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY NIGHT.

SUGAR.—A large business has been done at 1s advance, or, in some cases, even 1s 6d to 2s 6d per cwt recovery on the late lowest quotations, including clayed and unclayed Manilla. The market is still active, although the speculatiae demand which occurred on Monday and Friday has partly abated. Importers remain firm, and some will not sell in anticipation of a demand for America. Floating cargoes of foreign have sold freely at higher rates. Extensive transactions occurred in West India, 4,360 casks selling to yesterday (Thursday) afternoon.

Mauritius.—Several parcels have sold by private contract during the week: fine yellow and white grainy, 38s 6d to 40s (11s 8d duty); grainy and crystallised (10s 6d duty), 32s to 37s; soft brown and yellow, 23s 6d to 32s. These quotations are included in 4,617 bags sold by auction.

Bengal.—15,000 bags have been sold by auction and privately. White Benares, 34s to 36s 6d; Gurpatta date, 32s 6d to 33s 6d; low soft brown, 23s to 25s 6d per cwt.

Madras.—3,480 bags offered by action, chiefly met with buyers: soft brown and yellow, 26s to 31s; grainy, 35s to 37s. Considerable business is reported by private contract: Jaggery, 23s 6d to 24s; date kind, 25s; and native, 25s to 26s 6d; grainy Jaggery, 25s to 25s 6d per cwt.

Natal.—1,716 bags sold at 26s to 34s per cwt.

Manilla.—Extensive transactions have taken place: clayed at 29s to 29s 6d; unclayed, 25s to 26s per cwt.

Other Foreign.—Five floating cargoes of Havana are reported sold for the United Kingdom, No. 11½ to 12½, 24s 6d to 25s 6d. Three of Cuba, at 21s to 22s. One of Porto Rico, at 22s. One off the coast, at 32s 3d. About 1,800 casks Cuba on the spot have realised 31s 6d to 32s. 650 casks Porto Rico, at 34s. 2,800 boxes Havana, at 34s 6d to 39s. By auction, 289 casks Cuba sold as follows: brown and grey, 27s to 32s; grocery, 35s to 36s 6d; grainy, 32s 6d to 36s. 592 boxes Havana were taken in above the value. 2,250 boxes Cuba were sold: grainy, 34s 6d to 41s 6d; brown and yellow, 27s to 34s 67 cases 188 bags Bahia sold at 28s to 35s. 306 casks Porto Rico sold at 31s to 35s 6d per cwt.

Refined.—Sales of dry goods have been made at 1s per cwt recovery, from the late lowest point, including the lower qualities at 43s per cwt.

TEA.—There has been some further speculative buying, and the importers generally require higher rates. Yesterday, 892 packages of Indian growths went with spirit, 676 packages finding buyers at enhanced rates.

COFFEE.—A firm tone prevails in this market, although the transactions have not been so large as last week. A floating cargo of good firsts Rio has sold at 68s 6d for Gottenburg, one of ordinary at 57s 6d for a near port, and other business done in this description, of which particulars do not transpire.

RICE.—A large business has been done in soft grain descriptions at rather higher prices, ranging from 9s to 10s. Some white Bengal is reported at 11s 6d to 15s 3d, and pinky Madras at 11s 6d. Since last Friday a floating cargo of Necrancie Arracan has sold: 10s 9d for the United Kingdom; 10s 4½d for the continent. 5,294 bags common Bassein, by auction, sold at 8s 9d per cwt.

SAGO.—503 boxes offered by auction, sold at 19s to 19s 6d per cwt for fair small grain.

CINNAMON.—The quarterly sales went off at 1d to 4d per lb decline. 3,000 bales about three-fourths sold, at and afterwards.

OILS.—Linseed rather quiet, at 31s 9d to 32s per cwt on the spot here. Rape oils tend upward, owing to the favourable advices respecting the continental crops.

IMPORTS and DELIVERIES of SALTPETRE to April 22, with STOCKS on hand.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar opened very animated at an advance of 1s to 1s 6d of most descriptions of goods, but closes rather quieter. In Dutch crushed several sales have been made at rather improved prices for forward delivery, 100 tons of fine French loaves landed, sold at 31s 6d, usual conditions.

TOBACCO.—We have to report a quiet market; holders are firm for good and fine descriptions. The late news from the States has not in the least influenced the market.

TIMBER.—The large consumption of wood since last importation closed has made a sensible reduction in the dock stocks, and of some classes of colonial deals, viz., pine and spruce, the quantity is short, and the prices have advanced. With pine timber and colonial hard woods the market is still overladen, and lower prices are consequently quoted. Baltic fir timber does not lift in price, though the stock is not extensive; indeed the trade in square timber has for many months been comparatively a forced one. Baltic deals are steadily maintained at uniform prices, while they are gradually passing into consumption. Shipbuilding hard woods are further depressed, stocks and supplies being excessive.

LEATHER.—The leather trade of the past week has shown rather more activity. At Leadenhall on Tuesday, however, there was a large supply of fresh goods, without any corresponding increase in the demand. The articles of light common dressing hides, good light English butts, English shoulders, bellies English and foreign, light calf skins, and good East India kips have been the most saleable. Prices are unaltered.

METALS.—A moderate amount of business has been reported this week. Copper is quiet and without change. Iron is in better demand with prices a shade stiffer. Tin—Straits fell 2*l* a ton on receipt of the American news on Wednesday, but shows signs of rally again at the close. Lead and spelter but little inquired for. Tin plates find a more ready sale.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	42	3
Fat by ditto	2	0½
Yellow Russia	42	6
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, April 27.—The supply of beasts on sale at our market today was tolerably large, and the general quality of the stock was good. For all breeds the trade was very dull, and prices declined 2d per 8 lbs. Prime Scots, crosses, &c., sold at 4s 10d per 8 lbs. Most breeds of sheep were in moderate supply. Good and prime Downs and half-breeds changed hands at full prices, viz., at 5s 10d to 6s per 8 lbs out of the wool; but inferior breeds were somewhat lower in value than on Monday. All good and fine lambs sold at high prices, viz., at 7s 8d to 8s, to, in some instances, 8s 4d per 8 lbs; inferior lambs, however, moved off slowly, at late rates. Calves were in large supply and heavy request, at a decline in prices of 6d per 8 lbs—the top figure being 5s 2d per 8 lbs. Pigs met a slow sale, at late rates. There was a large supply of suckling calves.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	to 3	8	Prime Southdown sheep	5	10	to 6	0

Meadow hay	90 to 110	95 to 115	90 to 110
Clover	110 to 130	110 to 130	110 to 130
Straw	28 to 34	30 to 38	28 to 34

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 28.—The East India wool sales were brought to a close on Wednesday. The total quantity offered was 11,700 bales, which, however, did not comprise much of good wools; the bulk, in consequence, sold at a reduction in price from last sale rates in January, whilst the better kinds realised a small advance. The sundry other descriptions will be brought forward on the 2nd to 5th proximo, amounting to about 19,000 bales.

The Railway Monitor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 15th of April, on 11,841 miles, to 659,958*l*, and for the corresponding week of last year, on 11,490 miles, to 603,882*l*, showing an increase of 351 miles, and of 56,076*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,374 miles, to 541,158*l*. and for the corresponding week of 1864, on 8,097 miles, to 491,782*l*, showing an increase of 277 miles, and of 49,376*l*.

Annexed are the returns of some of the American railways for March :—

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 24.—In the share market to-day, although the transactions were few, English and Canadian railways, American securities, and British mines closed with buoyancy. Of the English lines, Lancashire and Yorkshire and North-Western improved 1 each, Midland ½, Great Western and Metropolitan (new) ¼ each, and ditto (stock) further 2½; and North-Eastern (Leeds) and ditto (York) declined ½ each, and ditto (Berwick) ¼. In colonial, Atlantic and St Lawrence and Great Western of Canada (6 per cent. bonds) advanced 2½ each, ditto (5½ per cent.) 3½, ditto shares (of both descriptions) 1 each. In foreign, West Flanders improved ¼, and Dutch Rhenish and Lombardo-Venetian recovered ⅛ each. In American, Illinois Central shares recovered 7½, Erie shares (paid up) 4, and United States (5-20) 1½; and Virginia (6 per cent.) advanced 6, Pennsylvania Railroad (shares) 1½, and Atlantic and Great Western (Pennsylvania 1st mortgage) 1. In British mines, West Seton advanced 17½. In foreign mines, St John del Rey declined 1½.

TUESDAY, April 25.—In the share market to-day the actual transactions were very few, and in most of the descriptions the variations from yesterday's closing quotations were nearly equal in both directions. The exceptions were the English and Canadian railways, which showed generally a firm tendency. Of the English lines, North-Eastern (Berwick), and ditto (York) recovered ½ each; Edinburgh and Glasgow and Glasgow and South-Western improved 1 each, Caledonian, Great Northern (A stock), South-Western, North Staffordshire, and South-Eastern ½ each, Manchester, Sheffield, &c., 1¼; Great Western a further ½; Midland a further ½, Lancashire and Yorkshire further 1¾, Metropolitan further 2, and ditto (new) a further ⅛. In colonial, Madras (4¾ per cent.) advanced 1, Grand Trunk of Canada (all the ten descriptions) an average of nearly 1¼ each, and Great Western of Canada shares (paid-up) a further ¼, and ditto (ordinary) a further ⅛; and Great Indian Peninsula and Scinde receded ½ each. In American, Atlantic and Great Western (New York, both mortgages) and ditto (Pennsylvania second mortgage) advanced 1 each; and Virginia (6 per cent.) relapsed 2, United States (Five-Twenties) 1, and Erie shares (paid up) and Illinois Central shares ½ each. In British mines, Tin Croft recovered 1; South Wheal Frances improved 2½, Providence 1, East Carn Brea and North Wheal Crofty ¼ each, and Great Wheal Vor a further ½; West Seton relapsed 17½ and Herodsfoot 1, and Wheal Seton declined 2½, East Gunnisfake a further ½ and South Condurrow a further ¼. In foreign mines, St John del Rey further declined ½.

WEDNESDAY, April 26.—In the share market to-day there was a very small amount of business, and, in sympathy with Consols, nearly all the descriptions closed with a downward tendency, mines being the exception. Of the English railways, Metropolitan District alone improved ½; Metropolitan relapsed 2, Great Western and South-Eastern 1 each, Manchester, Sheffield, &c. ¾, and Great Northern (A stock) and North-Eastern (Berwick) ½ each, and Lancashire and Yorkshire and North-Western declined 2 each, Midland 1¾, ditto (Birmingham and Derby) and South Devon 1 each, and Brighton ½. In colonial, Grand Trunk of Canada (of all descriptions, except the Equipment bonds and second and third preference deferred) relapsed an average of about 1 each, Great Western of Canada shares (paid up) ⅝, and ditto (new) ⅜, and Atlantic and St Lawrence declined 2, Eastern Bengal 1, Great Southern of India, Madras (5 per cent.), and East Indian ½ each, ditto (J extension) ¼, and Great Indian Peninsula a further ½. In foreign, Great Luxembourg relapsed ⅜, and Dutch-Rhenish ⅛, and Northern of France declined ½, and Antwerp and Rotterdam and Namur and Liege ⅛ each. In American, Erie shares (paid up) further declined 8½, Illinois Central shares 7, United States (5-20) 5¼, and Virginia (6 per cent.) 3.

THURSDAY, April 27.—This being the day for the settlement at the end of the month, the majority of the transactions in the share market were for the account, and there was rather a general, but slight, tendency to improvement in the closing prices. Of the English railways, North-Western recovered 1½, Midland 1½, ditto (Birmingham and Derby), Great Western, Lancashire and Yorkshire, and Metropolitan 1 each, and South-Eastern ¼; and Great Eastern receded ¾. In colonial, Atlantic and St Lawrence recovered 1½, Great Western of Canada shares (of both descriptions) ¼ each, Grand Trunk of Canada ½, ditto (1st preference) and Eastern Bengal 1 each, and East India, Great Indian Peninsula, and Madras (5 per cent.) ½ each; and Scinde, Delhi (stock), and Punjaub advanced ½ each.

FRIDAY, April 21.—In the railway market to-day there was little business apart from that connected with the settlement, and, with the exception of a decline of ¼ per cent. in Great Eastern, the principal stocks were quoted the same as yesterday.

COMMERCIAL BANK
CORPORATION of INDIA and the EAST.

Incorporated by Royal Charter.
Capital £1,000,000 (one million) sterling.
Reserved fund, £169,301.
Head office, 64 Moorgate street, London, E.C.
Branches and Agencies at Bombay, Calcutta, Foochow, Hankow, Hongkong, Shanghai, Singapore, and Yokohama.

COURT OF DIRECTORS.
John James Lowndes, Esq., Chairman.

John Campbell, Esq.	Alfred Middleton, Esq.
Henry D. Cartwright, Esq.	Robert Ryrie, Esq.
John James Cater, Esq.	E. Thornton, Esq., C.B.
Frederick Chapman, Esq.	R. Angus, Esq. (ex officio).

CHIEF MANAGER—Robert Angus, Esq.
LONDON MANAGER AND SECRETARY.
David Allardice, Esq.
BANKERS—London Joint Stock Bank.

At the First Ordinary General Meeting of the Shareholders of this bank, held at the London Tavern, on Wednesday, the 26th of April.

John James Lowndes, Esq., in the Chair.

the following Report and balance sheet were read by the Secretary:—

The Royal Charter incorporating the bank having passed the great seal on 19th February, 1864, the Directors took immediate steps to carry out the arrangements made with the Commercial Bank of India.

The allotment of shares was made on the 22nd April, 1864, in accordance with the terms of the prospectus previously issued; and the calls on these shares have, with some trifling exceptions, been since paid.

The amount received up to the 31st December last in respect of the new capital was £355,590, and of the premiums on shares allotted in England £91,282 10s.

It was not until the 11th November that all the requirements of the Lords of the Treasury could be complied with; but on that day the requisite certificate was obtained, and business was commenced at the head office, under the Charter, on the 21st of the same month.

On the 1st January, 1865, the business of the Commercial Bank of India was transferred, at all the branches, to the Commercial Bank Corporation; and the former bank now exists only for the purpose of liquidation.

The assets and liabilities of the Commercial Bank of India have been taken over exactly as they stood on the 31st December last.

	£	s	d
The capital of that bank was	500,000	0	0
The new capital when fully paid up will be	500,000	0	0
Making the total capital of the Corporation	1,000,000	0	0
The net profits of the year 1864, after writing off all known bad debts up to 31st December, were	154,426	11	4
A dividend and bonus for the first half of the year were paid to the shareholders of the Commercial Bank of India in Bombay, amounting to £45,000 0 0			
And a dividend has since been paid in London, at the rate of 10 per cent. per annum on the whole paid-up capital as it stood on the 31st December, for the second half of the year, amounting to 39,925 0 0	84,925	0	0
Leaving balance	69,501	11	4

The Directors regret to report that several failures have taken place since the commencement of the present year, involving losses, which in the unsettled state of the produce markets it is not easy to estimate accurately; but they have deemed it prudent to carry forward the entire balance, after paying the above dividends, as a provision for them, in the hope that such a course will, under the circumstances, meet the approval of the shareholders.

	£	s	d
The reserve fund of the Commercial Bank of India, transferred on the 1st of January, amounted to	73,301	0	0
And the premiums on shares allotted in London, already stated £91,282 10 0			
Amount outstanding on the 31st December 4,717 10 0	96,000	0	0
Making the reserve fund of the Corporation	169,301	0	0

In addition to which a sum of £16,703 17s 7d has been transferred to the Corporation by the Commercial Bank of India, being the balance standing to the credit of the insurance account.

An agency in Singapore had been decided upon by the Commercial Bank of India in the beginning of last year, and this agency was established in November last.

The Directors have had under their consideration the acquisition of suitable premises for the Bank. In the mean time they have, at a moderate expense, so far improved the present accommodation as to be enabled to await, without inconvenience, a favourable opportunity of securing more commodious premises.

In pursuance of the terms of the Deed of Settlement, the Directors, viz., John Campbell, Henry Durance Cartwright, J. J. Carter, F. Chapman, J. J. Lowndes, Alfred Middleton, Robert Ryrie, and Edward Thornton, Esqs., go out of office, but, being qualified, offer themselves for re-election.

The Auditors, Robert Strong and John Ball, Esqs., also offer themselves for re-appointment, and their remuneration will be fixed by the meeting.

The Directors regret that, owing to the delay which has occurred in getting the balance sheet and accounts from abroad (which has been purely of an exceptional character and will not recur), they have been unable to lay this Report before the shareholders at an earlier period.—By order of the Court,

D. ALLARDICE, Secretary.

ROBERT ANGUS, Chief Manager.
W. J. YOUELL, Accountant.
JOHN JAS. LOWNDES, Chairman.
EDWARD THORNTON, } Directors.
JOHN CAMPBELL, }

We find the above balance sheet and profit and loss account to be correctly set forth, and in due accordance with the statements of details transmitted by the officers of the Corporation at Bombay.

R. STRONG, } Auditors.
JOHN BALL, }

London, 24th April, 1865.

The following resolutions were carried unanimously:—

It was moved by the Chairman, and seconded by Mr Thornton;

That the report as read be received and adopted.

It was moved by the Chairman, and seconded by Mr Diggles;

That J. Campbell, Henry Durance Cartwright, J. J. Cater, F. Chapman, J. J. Lowndes, Alfred Middleton, Robert Ryrie, and Edward Thornton, Esqs., who go out of office in pursuance of the terms of the deed of settlement, be re-elected Directors for the current year.

It was moved by the Chairman, and seconded by Mr Leggatt;

That John Ball and Robert Strong, Esqs., be re-elected Auditors for the ensuing year, and that their remuneration be fixed at 100 guineas each.

A vote of thanks to the Chairman and Directors was unanimously adopted.

Extracted from the minutes.

PROSPECTUS.

This Company is formed for the purpose of converting the £100 shares of the Continental Bank Corporation into shares of £20, and to carry out the amalgamation of that Bank with the Bank of Messrs E. Landau and Co., of Alexandria, and for facilitating commercial, financial, and monetary transactions between this country, the Continent, and Egypt.

Five of the £20 shares of this Company will be allotted to the shareholders in the Continental Bank in exchange for each of their present £100 shares. The £20 shares allotted in exchange for shares, on which £25 has been paid, will be credited with £5 paid up; and those allotted in exchange for shares, on which £15 only has been paid, will be credited with £3 paid up.

The arrangements which have been made for amalgamating and managing the business of the above establishments are such as, aided by the high Egyptian connections of Messrs Laudau, cannot fail to secure to this Company a very extensive and profitable business.

The establishment of Messrs Landau and Co., at Alexandria, in addition to its regular banking operations, has long enjoyed an extensive connection with producers and exporters of produce in Egypt. This business has always yielded most favourable results; and no better proof of this can be given than the fact that the firm, during the whole of its existence, as well as the other banks lately established in Egypt, have experienced an absolute immunity from loss in their transactions of this class of business.

The daily increasing trade of Egypt with Europe, and especially with England, is also a sure guarantee for the enhanced future success of this Company; the profits hitherto realised by Messrs Landau and Co., are alone sufficient to yield a large return upon the capital proposed to be called up; and the several partners of the firm, in order to show their confidence in the future success of the Company, have taken a large number of shares, and will continue in the active management of the business at Alexandria.

The Bank has also secured the co-operation, as a Director, of Mr Bravay, whose exertions will be especially devoted to the extension of the Bank's relations with the Egyptian Government, a class of transactions in which he has hitherto engaged with very successful results.

The amalgamated establishments propose liquidating all their present transactions up to the date of amalgamation.

The articles of association of this Company, and the agreement entered into for acquiring the business of Messrs Landau and Co., can be seen on application at the office of the Solicitors.

A deposit of £1 upon each share must be paid at the offices of either the Bankers of the Company, on application, according to the annexed form.

Forms of application for shares may be obtained of the Secretary, at the Company's offices, and of the Bankers and Brokers.

FORM OF APPLICATION FOR SHARES.

To be Retained by the Bankers.

No.——

To the Directors of the London and Mediterranean Bank, Limited.

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share on shares in the above Company. I hereby request that you will allot me that number; and I agree to accept such shares or any less number that you may allot to me, and to become a member of the Company in respect of the shares allotted to me. I further authorise you to forward by post, to my address, as below, the certificates for the shares which may be allotted to me.

BANKERS.

The National Bank. | The Bank of London.

At the FIRST GENERAL ORDINARY MEETING of the Shareholders, held at the Offices of the Company, 85 Cannon street West, on Thursday, the 27th day of April, 1865,

GEORGE PAYNE KITSON, Esq., in the Chair,

The following Report was presented:—

REPORT of the Directors for the Nine Months ending the 31st March, 1865.

The Directors have the pleasure to submit their first report and balance sheet to the 31st ultimo.

The statement of account shows a profit of £96,121 7s 7d, with which, after deducting expenses amounting to £7,843 4s 1d, the Directors propose to deal as follows:—By recommending the payment of a dividend at the rate of £10 per cent. per annum, amounting to £20,000, inclusive of the interim dividend already paid; by placing to a reserve fund the sum of £60,000; by allocating £5,000 in discharge in full for the preliminary expenses; and carrying the balance forward to next account.

The Directors venture to think they may congratulate the shareholders upon the successful results of their operations at the very outset of their career. They wish at the same time to explain that in dealing with the large profits which have been made, they have decided upon limiting their recommendation of a dividend to 10 per cent. per annum, and recommend the appriating of the balance in the manner before mentioned, because, from the peculiar character of their business, the actual profits, although positively earned, have not yet been wholly received in cash.

The Directors are restrained from entering into any detail of their transactions, for the obvious reason that their business is also the business of other Companies and persons, whose affairs they are not warranted in disclosing; and besides, their doing so could not be otherwise than detrimental to the interests of this Company.

The Directors have, however, much pleasure in stating, for the information of the shareholders, that the portion of the business secured which has already arrived at a condition to be, and has actually been, turned over to the Company, will yield such large and certain profits, so secured as to be free from all contingencies whatever, that your Directors feel justified in giving the assurance, that out of the profits from these alone, without at all calculating on the business which is to be turned over to the Company when fully matured, they will be enabled to recommend during each of the next four or five years, annual dividends considerably exceeding that which you are now called on to declare.

In conclusion, the Directors wish to express their conviction that the position of the business of the Company renders it unnecessary to make any further call.

GEO. KITSON, Chairman.

THE INTERNATIONAL CONTRACT COMPANY (Limited).

SECRETARY—William Cooper, Esq.

TEMPORARY OFFICES—85 Cannon street West, E.C.

This Company has been formed for the purpose of purchasing the freehold property known as Queen Anne's Shipyard, and the valuable ship-building business now carried on by private capitalists therein; of carrying on shipbuilding in iron and wood, and of mechanical engineering in all its brauches.

The ship-building yard possesses a frontage to the sea of upwards of 1,200 feet, in which there will be capacity for laying down 20 ships, taking an average of 60 feet in width for each ship. As at present constituted, the establishment comprises a first-class stone-built dry dock, 260 feet by 52 feet, in perfect working condition, with steam engine, circular-saw gear, smiths' shops, timber sheds, offices and buildings, with slips, quays, and other necessary appliances, all in good repair. On the premises there is a capital lime kiln, four extra dwelling-houses, suitable for the manager and employes of the Company, six cottages for foremen, &c.; a good supply of fresh water, and an abundance of lime and building stone.

It is proposed to lengthen the present dry dock fifty feet, to construct two additional dry docks, and one large floating dock, to be divided by caissons, also additional frontage quays, and to extend the appliances generally with the view to the construction and repair of iron and wooden ships, the manufacturing of marine and other engines, armour and other plate, angle iron, and every description of iron work.

For the purposes of the Company the position of the premises is not to be surpassed; they are in close proximity to Sutton Harbour, forming the sea-board of cutwater anchorage, and are completely sheltered, first by the Plymouth breakwater, and next by the peninsula of Mount Batten, in addition to which the approaches to the premises are completely commanded by the guns of the citadel. The branch station of the South Devon Railway Company is situated in the immediate vicinity, and Her Majesty's Dockyard, Devonport, is within an easy distance.

The Company will offer unusual facilities for carrying on the proposed business, in consequence of both labour and the freight of iron, coal, and timber being extremely low, added to which much expense will be saved, as the materials will be delivered on the quays of the Company free of all dues and charges.

At present there are no iron ship-building works at Plymouth, and much inconvenience and expense often result to shipowners in consequence of vessels outward bound having to put back to London for repair.

The Directors consider it unnecessary to allude to the other advantages possessed by this Company, further than to state that there is a great and growing demand for such works as they propose to carry on.

The operations of the Company will be conducted by Mr Joseph Banks, who will devote his well-known experience exclusively to the interests of the Company, aided by gentlemen of acknowledged mechanical skill. As the whole of the valuable property has been ceded to the Directors upon terms which are considered highly advantageous, the profitable result of the undertaking may be deemed as assured.

Interest at the rate of 6*l* per cent. is guaranteed for three years by the International Contract Company (Limited).

In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance (if any) returned to the applicant.

A copy of the Memorandum and Articles of Association can be inspected at the office of the solicitors, brokers, and 85 Cannon street West.

Prospectuses and forms of application for shares may be obtained at the Offices of the International Contract Company, 85 Cannon street West, and of the bankers, brokers, and solicitors.

FORM OF APPLICATION FOR SHARES.

No.——

To the Directors of the Plymouth Ship-Building, Dock, and Ironworks Company (Limited).

Gentlemen,—Having paid to your bankers, Messrs the sum of £ , being a deposit of 1*l* per share on shares in the above Company, I request that you will allot me that number of shares, and I hereby agree to accept such shares, or any less number that may be allotted to me, and to pay the deposit on allotment, and to sign the articles of association of the Company when required, and I authorise you to place my name on the register of members in respect of the shares allotted to me.—I am, Gentlemen,

The Political Economist.

We have received a copy of Sir C. Trevelyan's Budget, but too late to give full attention to all the very peculiar assertions which it contains. Next week we hope to present an account of it to our readers.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

RISE IN THE RATE OF DISCOUNT.

MANY people were surprised at the rise of the rate of discount to 4½ per cent., and but a few days since there was no special ground for immediately expecting it. We have often warned our readers that the money market was in a very sensitive state, in which a very small change might at once cause an increase of the rate. But there was no momentary indication a short time ago that such a step would be immediately necessary.

The Bank of England were certainly justified in what they have done: *perhaps* they were obliged to do as thay have done. We do not lay any stress on the large diminution in the reserve of notes, because it is generally admitted that a *sudden* diminution of this kind, when caused by an increase in the active circulation, and when unconnected with a foreign drain for bullion, is not a sound reason for raising the rate of discount. Very accidental causes, as all issuing bankers know, act *for a moment* on the active circulation, and any inferences from rapid alterations of its magnitude, therefore, require to be drawn with care and caution. As far as the mere diminution of the reserve for the week goes, we do not believe that the Bank Directors rely upon it for their justification.

Their real reason is elsewhere. The demand on them has augmented. Their private securities have increased more than 1,200,000*l*, and there is no better *prima facie* reason for an augmentation of price than a sudden extra demand. *Why* the demand increased so rapidly it is very difficult to say; in the great complication of our present commerce it is exceedingly difficult to assign the precise cause for slight changes. And in general it is unimportant. Little changes commonly produce little effect, and there is no reason for taking account of them.

But there is a reason why a small cause at this moment—a small additional demand for capital—may produce a considerable effect—may raise the rate of discount. We have such a large amount of capital now locked up. First, we hold a very large amount of produce of various kinds selling at low prices, but bought at high prices, and absorbing capital in proportion not to their present value, but to their past value.

2ndly. We have locked up a large capital in Companies of one kind and another. Some not inconsiderable amount of this is mercantile money, and the depression in the share market combines with that in the produce market to keep merchants poor.

3rdly. Our trade has not so much diminished as is fancied. Its profits may be far less, but its aggregate is not enormously diminished.

The exports of the three months ending March 31 were—

	£
1864	36,667,381
1865	35,635,707

The imports for the two months ending Feb. 29 were—

	£
1864	20,734,897
1865	19,290,174

so that, as compared with last year—the year *par excellence* of elasticity and advance—there is no astonishing decline.

And as compared with three months since there is an augmentation in both the import and export trade, as far as the accounts are made up. Such an increase is normal and usual, and it prevails in the present year as in other years. The exports of the three first months of the year are—

	January.	February.	March.
	£	£	£
1863	8,045,155	9,298,576	10,217,473
1864	10,413,586	12,698,121	13.555,674
1865	10,489,339	11,376,214	13,770,154

The imports of the first two months are all we know—

	January.	February
	£	£
1863	8,009,684	11,211,216
1864	7,520,356	13,214,541
1856	6,398,922	12,891,252

Now, this shows a considerable increase of trade, as compared with three months since, and is one of the causes which have tended to increase the value of money. Our produce and our shares still lock up a large sum, and the usual spring increase of our trade, therefore, produces an unusual effect.

Confidence, too, is better. After a time, the greatest forces of commerce, as elsewhere, work themselves out. The effects of last autumn are still felt, but they are not felt so much. Prices of several articles begin to recover—not only in figures, but in what is technically termed strength. They are becoming no longer nominal, but real. Sales *can* be effected at them, if it is wished.

Such is the simple explanation of the late rise,—a slight accession of demand in a market very sensitive to demand.

Digitized by Google

What the future course is likely to be, no sensible man would be likely to predict with confidence. When causes so slight can produce even a sensible effect, foresight becomes impossible.

Two things, however, may be observed, first, as we have seen that any tendency to a revival of trade produces now an unusual effect on the value of money; a conclusion of some importance when the recent news from America *tends* to augment future trade if not present trade. Secondly, that the diminution in the bullion of the Bank has been considerable since the rate was reduced to 4 per cent.—

	£
On the 29th of March the coin and bullion in both departments was	15,358,999
It now is	14,679,974
Diminution	679,025

—a result not to be deplored, for we have no reason to wish to keep the money here. We ought to wish to *utilise* our surplus funds by sending them abroad. But though not an effect to be lamented, it is a fact to be observed. It shows that a rate of 4 per cent. is a rate at which money leaves us, not at which it stays with us, and, therefore, a rate which, if a popular foreign investment should be brought forward, would aid it rather than counteract it.

THE LORDS' REPORT ON THE EDMUNDS AFFAIR.

THE inquiry made by a Select Committee of the House of Lords into the affair known as the "Edmunds scandal" has ended in a report which crushes Mr Edmunds, exonerates Lord Brougham, reflects severely on Mr James Brougham, and casts grave discredit upon Lord Westbury. In analysing its statements, however, we shall for the sake of simplicity omit all reference to the question relative to the Broughams, which, the really guilty party being dead, is of comparatively little importance, and confine ourselves to those portions of the case which affect the Lord Chancellor and Mr Edmunds himself. The public, we think, will understand them most easily from a simple narrative. It appears then from the report, that on 3rd May, 1864, the Commissioners of Patents having heard of serious quarrels in the office, directed Messrs Greenwood and Hindmarch, two barristers of the highest standing, to inquire into them. They commenced the inquiry early in June, and speedily discovered facts in connection with Mr Edmunds' disposal of public moneys which induced that person to send in an application to resign. This application would have been acceded to, but that the Lord Chancellor was warned by Mr Greenwood that "circumstances of a very fear-"ful character" had come out about Mr Edmunds, whereupon his Lordship warned the Treasury that those facts "must in his judgment be strictly examined before any retir-"ing pension could be awarded." These were Lord Westbury's own words given in writing, and if he had only adhered to them all would have been well. On the 14th July, however, Messrs Greenwood and Hindmarch sent in their preliminary report, in which Mr Edmunds, upon grounds which the Select Committee of the Lords think substantially correct, was charged, not to mince the matter, with embezzling public moneys for his own advantage. The Lord Chancellor accordingly summoned Mr Edmunds to appear before him to show cause why he should not be dismissed, but on Mr Edmunds applying to be permitted to resign, and promising to pay all sums due to the Treasury, the Lord Chancellor abandoned his purpose. In other words, he enabled a public officer, who in his judgment was a defaulter, to escape even the public censure involved in a dismissal. In taking this course Lord Westbury had the approval of the Master of the Rolls and the Attorney-General; but, nevertheless, it is formally condemned by the Committee, who "are still of "opinion that the inquiry ought to have proceeded, and if the "charges which Mr Edmunds had been formally called upon "to answer had been proved (as it will be presently seen that "in the judgment of the Committee the principal part of them "must have been) he should at once have been dismissed, "leaving it open to future consideration whether ulterior pro-"ceedings ought to be taken against him." In that opinion we most cordially concur; and it might have been made stronger with advantage to the public service. The practice of permitting defaulters to resign and pay up is a most fatal one, for it permits all dishonest public servants who happen not to be wasteful men, to play a winning game. If not found out they keep the plunder, and if detected they simply restore it.

Mr Edmunds, however, besides his appointments in the Patent Office, was also Reading Clerk to the House of Lords, a pleasant and easy post, worth then 1,500*l* a year. This post he still retained, but the Lord Chancellor, who did not see the necessity of dismissing him from an office in which he had been guilty of peculations, did see the need of dismissing him from one in which he had done no harm. He proposed to call upon Mr Edmunds for his defence, but finding that the matter rested with the Lords, and not with himself, he abandoned the original intention, and proposed to bring the matter before the House. Mr W. Brougham, however, who was exceedingly averse to too much inquiry into Mr Edmunds' affairs, wrote to Lord Westbury, saying, if "you will do what you "can to help him to a pension, I will advise him to resign," to which the Lord Chancellor replied on the 29th October, "if Mr Edmunds thinks proper to resign, I will do all that I can with propriety to obtain for him a pension." In other words, the Lord Chancellor was ready to assist actively in obtaining some thousands of public money for a man whom he himself believed to be guilty of appropriating public moneys and had himself proposed to dismiss. After this letter, we do not see the use of inquiring whether Mr Leman did or did not make the pension the condition of his client's resigning. Lord Westbury had promised Mr Brougham, who was in constant communication with the defaulter, to assist actively as well as passively in obtaining the pension, to "do," in his own words, "all he could with propriety." Mr Leman distinctly states that Mr Edmunds resigned on that understanding—that he was very reluctant—and that on the 13th February the Lord Chancellor threatened, if he had not resigned in twenty-four hours, to move for a committee of inquiry with a view to dismissal. Mr Edmunds accordingly resigned, and the Lord Chancellor, actually knowing all that had occurred, himself presented the petition for pension to the House without informing it by a single word of Mr Edmunds' position. He was, in fact, party to an arrangement under which the House of Lords was deceived into granting a pension to a public defaulter. The motive of the act matters nothing; the act itself was totally repugnant to any theory of public duty, and the decision of the Committee is only too mild in tone:—

"The Committee cannot coincide with the Lord Chan-"cellor in the view thus taken by him of his public duty. "In their opinion it was incumbent on him, who presented "the petition of Mr Edmunds to the House of Lords, in some "manner to have apprised the Parliament Office Committee "of the circumstances under which the resignation of Mr "Edmunds of the clerkship had taken place, and with which "the Lord Chancellor was officially acquainted, and not to "have left them to decide the question of a pension with no "clearer light than that which could be derived from vague "and uncertain rumours. The Committee have, however, "no reason to believe that the Lord Chancellor was influ-"enced by any unworthy or unbecoming motives in thus "abstaining from giving any information to the Committee."

This emphatic censure was substituted for sentences still more severe by a majority of one, the more lenient paragraph being carried exclusively by the Whig Lords; but even as it stands it amounts to a distinct opinion that the Lord Chancellor had failed to do his duty. How, after such an expression of opinion, and after so narrowly escaping a much stronger one, Lord Westbury can remain a member of Her Majesty's Government we are at a loss to perceive. Great as his value must be to any Cabinet—and we admit that notwithstanding his talent for making enemies it is great—it is not sufficient to cancel the discredit which must attach to a man who, while presiding over the House of Lords, agreed to allow that House to be deceived into granting a pension to a defaulter whom he himself, as the Committee show, refused to permit to appear in his official place.

We have already pointed out that the true lesson of this sad affair is the necessity of re-arranging the system of keeping miscellaneous receipts in the smaller departments, and we are happy to find that Mr Gladstone coincides. The Committee asked Mr Gladstone how it happened that Mr Edmunds' accounts had never been audited, and the reply of the Chancellor of the Exchequer promises a much-needed reform. It is, he says, "a true description of that officer that "he may hold in his hands just as much public money "as he thinks fit, and pay it if he thinks fit, and "if he pay nothing at all there are no means of calling "him to account for such non-payment." The Chan-

Digitized by Google

cellor of the Exchequer also stated that, "as regards the cus- "tody of money and accounting for money, the present state "of the law is very deficient indeed, not with respect to the "great branches of revenue, but with respect to the miscel- "laneous heads of receipt, relating to a great variety of funds "which come into the hands of public officers without be- "longing to the public." If this great defect in our administration should be finally cured, the public will only have to regret the Edmunds scandal, because it has diminished its historic respect for the occupant of the woolsack.

THE NEW TURKISH LOAN AND TURKISH FINANCE

So much controversy has been excited by the proposals now before the public for raising a new loan for the Turkish Government that it is worth while to ascertain what are the material facts of the case.

The public debt of Turkey is divided into two very different and distinct classes,—internal and external.

The external debt is composed as follows:—

		£		
1854...	English loan 6 per cent.	3,000,000	issued at	80
1858...	— —	5,000,000	—	85
1860...	French loan —	2,000,000	—	62
1862...	English loan —	8,000,000	—	68
1863...	French loan —	8,000,000	—68 and 72	
		26,000,000		
1855...	French and English Guaranteed loan 4 per cent.	5,000,000		
		31,000,000		

The internal debt is composed as follows:—

	£
Consolidés, 1st, 2nd, 3rd issues, 6 per cent....	4,000,000
— 4th issue	11,000,000
Ten years bonds, &c.	5,150,000
	20,150,000

The Consolidés bear 6 per cent., payable in Constantinople half-yearly, and are reimburseable at par by half-yearly drawings provided for by a sinking fund of 2 per cent.

The interest on the external debt may be said to amount, with charges, to 2,000,000*l* per annum, and the interest on the internal debt to, say 1,500,000*l*. The total gross revenue of Turkey is said to be at present about 13,000,000*l* per annum. How much the real *net* revenue may be is, we believe, unascertainable. It is certain, however, that every Budget for the last six or seven years or longer has been closed in deficit.

The proposal now before the public is in substance to do three important things, viz.:—(1) to "unify," as it is called, or place on the same level, except as regards certain specific branches of receipt specially pledged for certain classes of the foreign debt, all the debts of Turkey both internal and external; (2) to consolidate all the existing internal debts into one category by means of a "Grand Livre de la Dette Generale de l'Empire Ottoman"; and (3) to raise a considerable further sum by increasing what is at present an internal debt of 20,000,000*l* to an "inscription," or nominal capital of 36,000,000*l*.

The Consolidés, as they stand at present, bear 6 per cent., and are repaid at *par* by half-yearly drawings. In about twenty-three years the whole amount would be so repaid. The New Stock offered in exchange for the Consolidés is *Five* per Cents., at 121*l* for each 100*l*, but *without* any provision for the half-yearly repayments at par.

The total 36,000,000*l* now advertised is divided as follows:—

	£
Conversion of existing internal debts.....	26,400,000
Loan immediately required	3,600,000
Further loan for public works	6,400,000
	36,400,000

The 3,600,000*l* immediate loan in 5 per Cents. is offered at 47½ cash for 100*l* stock, or at a rate which gives the purchaser say 10½ per cent. per annum on his investment. There is a provision for redemption by means of a sinking fund of 1 per cent. operating during thirty-seven years by means of purchases of the bonds in the market at current prices.

If it be assumed that the whole 36 millions of 5 per Cents. be issued, the total charge from first to last of the "unified" debt of Turkey would be scarcely less than 4,000,000*l* per annum,—equal to perhaps quite 40 per cent. of the *net* available revenue,—and of course the whole, or nearly the whole of the 4,000,000*l* will fall due at fixed half-yearly dates in London, Frankfort, and Paris, and be payable punctually on those dates, under the penalty of severe discredit of Turkish securities of every class.

Apart from any calculations founded on the condition of the market at the present moment, it is urged by many persons who interest themselves in Turkish finance, not for speculative purposes, but as a problem involving many important and interesting considerations of permanent value, that the present scheme is too large to be sustained by the resources of Turkey in their actual state of development,—that by one rash and premature step, it exhausts for a long time to come Turkish credit in foreign markets by raising the debt from 30 to 66 millions sterling,—that it greatly imperils the credit and stability of all Turkish securities, by binding the Government to provide punctually in foreign markets half-yearly interest on 66 millions instead of 30 millions of debt, in the face of the notorious circumstance that the interest of the internal debt has been constantly in arrear, and has been only met at all by resorting to expedients which may be possible in Constantinople, but which certainly are not possible in any Western market.

It is felt, also, that the time has fully come when the only solid foundation of Turkish finance must be—not ingenious adjustments and unifications of debts of different descriptions—all directed to the same end of providing make-shift means of escape from the results of ignorant and culpable extravagance—but a reconstruction of both sides of the Budget on principles which will bear minute and scientific scrutiny. The curse of the Turkish Government, and of every person who has a claim upon it, is the host of people who infest every avenue of the Court, and spend their time in concocting schemes by which the vices of the present financial system may be made to appear like virtues, and may be used in that masquerade dress as continually fresh excuses for appealing to Western lenders.

For the present we believe that Turkish credit has been strained to the uttermost. In prudent and skilful hands, Turkey will improve in solvency as in in every other advantage accruing to a frugal and fertile country. But there is no chance of either frugality or solvency, so long as Turkish Ministers are encouraged in deceptive plans for escaping from the positive grip and pressure of those yearly deficits, produced by nothing but obstinate perseverance in a system so bad that it will infallibly end in revolution and beggary. Since the proposals were issued for even the small sum of 3,600,000*l*, the Consolides (6 per cent.) have fallen to a price which renders them by comparison the cheaper security, and hence the progress of the new subscription has been very small. The absence of influential names in former operations of Turkish Finance is remarked, and there is happily a pretty strong feeling that for some time to come a check should be placed on Constantinople projectors.

MR LOWE'S SPEECH ON REFORM.

THE country owes a debt of gratitude to those educational gentlemen who last Session brought about the resignation of the Vice-President of the Council. Mr Lowe is a man who, for the good of his country, ought to be always out of office. No one doubts his remarkable abilities either in or out of place; but useful as he may as an administrator, he is ten times more useful as an unfettered speaker. The thing most wanted, and most rare among us, is a politician at once able to grasp and fathom a great question, and courageous enough by nature and independent enough by position to say just what he thinks, without circumlocution and without compromise. The man who can do this may be pretty sure that he will think what hundreds of his fellow-citizens would think if they had his capacity for reflection and research, and that he will say what they would say if they, like him, dared to speak out. Mr Lowe has made this Session three most remarkable speeches—not one of which he could have made as a member of the Government;—and of these three the one he delivered on Wednesday against Mr Baines' Bill was about the boldest, the most timely, the most impressive, and (except in one point of omission) the most sound. It startled the House not a little; it startled the House the more on account of the benches from which it came;—and yet it was just from those benches that it ought to come; for it is only

Digitized by Google

by the Liberal party that the Democratic party can be successfully and fitly met. It is to the earnestness, the sense, the righteous purpose of true Reformers, that we must trust to combat the dangerous fallacies and the insidious aims of the unsound and the uncandid ones.

The strong points of Mr Lowe's argument were these:—that no one wanted Mr Baines' Bill, and that no pleas were put on record for it; and that what its supporters did want was something for which no case had been made out, which they did not venture to demand, and did not even attempt to show could justly or possibly be granted. One man wants household suffrage, another wants manhood suffrage, a third wants universal suffrage; no one wants a 6*l* suffrage. A 6*l* franchise would satisfy nobody, because nobody desires it except as a stepping-stone to something further. Once conceded, it would be simply impossible, because obviously illogical, to stop there. Every argument that is good for that is good for more. 10*l*, it is true, is not a *principle* any more than 6*l*; but the 10*l* franchise, as Mr Lowe expressed it, is, "if not venerable, at least respectable"; the seven Parliaments which it has given us have done more for the country and more for the poor than seven centuries before; it has lasted thirty-three years and has done wonders:—a 6*l* franchise would probably not last ten years and could do little or nothing in comparison. The one is, therefore, though an artificial, still a defensible entrenchment. The other is not. "With all "our continued peace, contentment, happiness, prosperity, if "the 10*l* franchise cannot maintain itself, what chance have "we of maintaining any other franchise whatever? It is "simply ridiculous to suppose that we could do so. The "thing is fated from the moment that the House, abandoning "a position that should never be yielded while hope remains, "consents to take up another not one-hundredth part as "strong, on the road to universal suffrage."

Mr Lowe did good service by placing the advocates of this incipient and somewhat insidious but manifest step towards universal suffrage in their proper position of *defendants*. He showed that the *onus probandi* lay with them. The moment you deprive them of the untenable, and indeed in this country almost unarguable, theory of indefeasible natural right, you drive them to produce some distinct practical grievance arising from the non-representation of the working classes, or some proof that a *better result* will be secured by adopting their schemes, and you call upon them to suggest some arrangement by which the extension of the franchise to those who have it not can be made compatible with wise justice to those who possess it and have long enjoyed it and not used it ill. Now the inherent weakness in the position and the tactics of the Reformers of Mr Baines' school is that they not only have made no attempt to solve this difficult and yet inescapable problem, but that they have never yet frankly acknowledged that there is such a problem to be solved. They seem to be conscious of no difficulty and to admit no danger and no injustice in measures which, in their ripe and inevitable issue, would transfer political power from the educated to the uneducated classes. The ECONOMIST, as our readers well know, has suggested various means of meeting this difficulty; so has Lord Grey; so has Mr Hare; so has Mr Mill; so have many other earnest and sincere Parliamentary Reformers. The Radicals alone have been too blind to see it, or too timid to face it, or too uncandid to admit it. They alone have never made an effort in the right direction. They alone have not contributed one single suggestion towards the doing of that which yet—if they do not utterly delude themselves as to the relative strength of parties, and of principles, and of arguments, and of national good sense—they can scarcely fail to see *must* be done, before Parliament or the country can be persuaded to admit large bodies of the working classes to the suffrage. Till they recognise and buckle to this task, all their bills and motions and agitations will, and ought to be, unavailing. For surely these two things must be clear to all who have any insight into political reasoning or political life;—the *first* is, that any scheme of which the naked operation would be to transfer the command of the representation from the classes who monopolise nearly all the property and most of the education of the nation to the classes who subsist on wages, and whose education is, to say the least, comparatively imperfect and superficial, would be a measure fraught with danger, signally unwise and still more signally unjust. The *second* is, that wise or foolish, just or unjust, dangerous or safe, the classes who now possess the franchis are strong enough, resolute enough, united enough to prevent such a measure from being carried. The Radical party—by which we mean those whom we should designate as mere *numerical* Reformers—would do well to show that they design no such measure, that their plans do not tend that way undesignedly, and that they are anxious and willing to take every possible precaution to avert the admitted mischief. Till they do this they merely waste wind and muscle in their declamations. England, they may be assured, will never set off downhill towards pure democracy *intentionally*; and she has been too well awakened by this time to be likely to do so unconsciously.

The weak point—or rather the *wanting* point—in Mr Lowe's masterly exposition was this. While showing that, as a rule, the poorer classes did not practically suffer from the non-possession of the electoral franchise; that thousands on whom it is proposed to confer it are not fitted to exercise it for their country's good; and that those who are *political* enough to desire it strongly and intelligent enough to use it serviceably might always obtain it even now by a little effort and self-denial;—he left the impression that he did not desire or anticipate their admission to the franchise under just and fitting limitations. He did not seem to recognise that, however fair and wise and considerate the House of Commons may actually be, the representation of the nation is incomplete and partial so long as the working classes have no share, or an imperceptible share in it, so long as they return no members and decide no elections; and that therefore—not as a matter of abstract right, not to remove any oppressive legislation, not to secure any ideal symmetry, but as a distinct *improvement*,—the admission of them to the franchise in sufficient numbers and in real practical fact is desirable in itself. Here it was that he failed to carry our sympathies and those of the more liberal portion of his audience along with him; and the omission was unfortunate, as it marred the completeness of his exposition. It is the whole nation, and not selected portions of it, that Parliament should represent; and the working classes are a most vital as well as a very large element of the nation. We want to hear their sentiments, we want to feel their influence, we want to bring them and to be brought within the range of common sympathies; and for these reasons it is that we would confer upon them such a participation in the representation as should be a reality and not a sham, without asking ourselves whether they are earnest enough to wish for it, or strong enough to extort it.

Mr. Lowe concluded his speech with a solemn warning to the great Liberal party—that if they linked their fortunes with the fortunes of the Democratic leaders, as they would do by adopting Mr Baines' Bill, they would ruin their country if they succeeded, or their party if they failed. We echo his warning—but with this proviso, which we trust they will lay carefully to heart before they go to meet their constituents:—that they must meet and discomfit their Radical and their Tory antagonists alike, not by maintaining that the working men do not need the franchise and ought not to have it, but by showing how they may be admitted to it with justice to other classes, with service to themselves, and with safety to the country.

THE SECULARISATION OF CHURCH PROPERTY IN ITALY.

THE reports of the debates in the last Turin sittings of the Italian Parliament on the Bill for the suppression of the monastic orders and of its failure have conveyed no very distinct idea to the English mind. Why it failed, whether the Church party were too powerful for it, or whether the Government did not carry out with sufficient energy the wishes of the reformers, was scarcely understood here, and as the course of the conflict is one of some interest in its bearing on the affairs of Italy, and illustrates clearly enough some of the difficulties to which the unification of Italy is still exposed, it will not be uninteresting to our readers to have some distinct account of this incipient reformation.

The Committee to which the preparation of a measure on the ecclesiastical property of Italy had been confided consisted of some of the ablest statesmen of the kingdom. Signor Corsi and Baron Ricasoli especially had given their fullest consideration to the subject, and the *projet de loi* which their Committee introduced was one that was founded on broad and deeply-considered principles. It was intended to deal with the whole ecclesiastical property of the kingdom—

Digitized by Google

to capitalise the whole income of the Church—to make the State give a guarantee for the whole of that income (by which process, as capitalisation of landed property is reckoned in Italy at about twenty years' purchase, and, if judiciously sold, would be really worth more, it was believed the State would gain nearly 25 per cent. on the capital amount), and then to determine the application of the annual interest of the property thus funded, according to the most urgent wants of the nation. The project of law, of course, did not presume to alter the application of the funds which now go to pay the officers of the Church in the narrower sense, but it did propose to deal in a large and statesmanlike manner with the Charitable Trust property as we should call it—the property of the monastic orders—and to utilise it for the best interests of the community. Excepting a few distinguished houses—Benedictine and others—in different parts of Italy, it proposed to suppress these orders altogether; but to give the communes—(each town in Italy generally forms a single commune, and sometimes a commune comprehends much more than the town, but the country communes are of very different magnitudes, probably intermediate between our unions and our parishes)—very considerable power as to the appropriation of the funds so placed at their disposal. For it must be remembered that the monastic orders in Italy do, in fact, dispose chiefly of the trust property left for the purposes both of education and of charity. The hospitals, the schools, the poor-houses of Italy are in a very large degree—completely in many parts of Italy—dependent on monastic institutions for their support, and many of the best common schools in Italy, though many also of the very worst, are in fact now conducted and supported by the monastic orders. Baron Ricasoli's scheme contemplated carrying out, as far as the changes in modern knowledge and modern culture would permit, the trusts intended to be impressed on this property by its original donors. For this purpose he intended to give very large powers to the communes to apply the property gained by the suppression of the monastic orders to the educational and curative and other useful institutions of the commune, and even to permit the commune, if it thought proper, in places where the monastic orders contained in it were already doing their duty either as school managers, managers of hospitals, or otherwise, to continue the property in them instead of applying it to any new purpose.

But the scope of this *projet de loi* was altogether too large and statesmanlike for the Financial Minister. It gave too much influence and property to the local administrators of the communes, and far too little to the needy Central Government. He wanted he said to gain 40,000,000*l* by the measure,—this scheme of Baron Ricasoli's and Corsi's would give him scarcely 16,000,000*l*. Accordingly the Government refused to adopt it, and after much discussion it was decided to narrow the scope of the measure altogether,—to deal not with the Church property at large, but with the monastic orders alone, and even so, not with the orders of mendicant friars (which were too poor and their numbers too numerous to admit of any profit to the Government from suppressing them if their life-pensions were to be secured); but then the ministerial scheme proposed to secure the bulk of the gain by the measure, not to the communes, but to the Central Government. None of the true statesmen of Italy were satisfied with this shifty bit of legislation, and some of the most masterly speeches were made against it which have ever been heard in the Italian Parliament. A great sensation was especially excited by a speech from an entirely new man, a Sicilian priest, formerly Garibaldian, now more moderate,—Uugdulena, who has been four years in the House, and had never spoken before, but on this measure spoke for two hours and a half with a breadth of knowledge, a strength of logic, and an eloquence of expression, which fascinated all who heard him. He pointed out the especial injustice of any sequestration of monastic property in Sicily which was not for the benefit of the communes. *Two-thirds* of the whole of Sicily, he said, is Church property, and of this nearly one-half is possessed by the monastic institutions. Ignorant and mischievous as those monastics often are, they support almost the only charitable institutions in Sicily. Even the hospital at Palermo, which is so poor that it has only room for 300 patients, and cannot even afford beds or mattresses for its patients but is obliged to lay them on litter, could not exist at all but for the aid constantly given it by one of the monasteries of Palermo. In the rest of Italy, said the speaker, the secularisation of Church property had long been going on, and the present Government measure would only glean the fields, the harvest whereof had been carried long ago. Moreover, in Italy the local charities and educational institutions had already appropriated much of the property formerly Church property. But in Sicily it had to be commenced from the very beginning; and if it were done by the present measure of the Government, its localities would in fact be robbed of their principal charitable funds in order to enrich the Central Government of Italy. No measure could be more shortsighted or foolish.

Yet, in spite of the great effect of this speech of Ugdulena's and of many of the greatest statesmen of Italy, the Parliament, in its blind zeal against the Church, seemed intent on passing the Ministerial measure. In vain it was urged that if the Government was afraid of waiting till after the dissolution, it could only be because the measure was unpopular and was unwelcome to the nation,—a most unconstitutional reason for passing it. No argument was of any avail, and the Opposition had already desisted from pressing its amendments, when a ludicrous opening occurred, of which, with true Parliamentary tact worthy of the best English party leaders, the Opposition dexterously availed themselves to defeat it. Two extreme Ultramontanists, representatives of the Marches, Luzi and Silvestrelli, proposed as an amendment to the Bill, that the monastics, if they should accept the alternative offered to them of leaving their monastery and engaging in secular life, should be prohibited from ever again wearing the monastic dress. A sillier amendment could not be imagined than one which proposed to prohibit a peculiar style of dress in a free Italian citizen, but it received a certain support from the bitter Ultramontanes, and the *statesmen's* party then felt that their opportunity was come. They determined to vote *en masse* with Luzi and Silvestrelli. And they carried the day amid immeasurable confusion and merriment. Of course the Government was compelled to withdraw a Bill on which so absurd a provision had been engrafted, and thus it happens that the subject is postponed for the consideration of the next Parliament.

Our readers will see, therefore, that the withdrawal of the measure for suppressing conventual institutions in Italy was no triumph of the Church. It was, on the contrary, the triumph of the statesmen who wish to see Italy reformed from the *base*, from the communes, rather than from above, from the Central Government. After the discussion which has taken place, the elections will probably declare, in a very unequivocal manner, the opinion of the people on this great question. The next Italian Parliament will be probably quite as eager for the secularisation of Church property as this one, but it will take care that the charitable trust funds are not the spoil of the Central Power, but are reformed in the interest of national education and generally of the national welfare.

IMPORT AND EXPORT TRADE OF AUSTRIA 1863-64.

THE official returns of the imports and exports of Austria for the year 1864 have just appeared at Vienna, and present the following results:—

	£
The total *imports* for Austria amount in value to	25,318,013
— — Dalmatia	750,998
Together	26,069,011
The total value for 1863 was for Austria	26,690,813
— — — Dalmatia	815,401
	27,506,214
Giving in the year 1864 a decrease of *imports* of ...	1,437,203
The total *exports* for Austria amount to	33,358,391
— — Dalmatia	549,113
	33,907,504
The total value for 1863 was for Austria	30,621,568
— — — Dalmatia	609,262
	31,230,830
Leaving an increase of *exports* of	2,676,674

In these calculations the florin is taken at 10 florins = £

Digitized by Google

The above figures show that in a tolerably favourable year the trade had expanded very little indeed, and they are conclusive evidence that a change is required in the tariff, ift he imports are not continually to decrease.

Another fact which tends the same way is that in 1863 the *export* of cotton, linen, silk, and woollen goods exceeded the import in specific quantity by nine times, and in 1864 it has exceeded it by twelve times. It is tolerably certain that so great a disproportion does not in reality exist, and that the difference is to a large extent made up of smuggled goods. It is to be hoped that the reductions in the tariff, which are expected shortly to take place in connection with the International Commission now sitting at Vienna, will bring about a change in this respect.

As the general result, we see that Austria collects about 1¼ millions sterling as gross Customs revenue on an export trade of 31 millions. But when from this 1¼ millions are deducted the enormous expenses of frontier guards, Custom-house patrols, and the endless other out-goings of a similar kind, it is, we believe, very doubtful whether Austria does not positively lose money by its Customs legislation,—that is to say, that the whole 1¼ millions and a large sum besides is swallowed up in maintaining a Protectionist system. There surely must be intelligent men in Austria who can see the prodigious difference between such a disastrous and absurd result and the spectacle furnished by free-trade England, where we raise 23 millions sterling by Customs duties on less than twenty articles.

The following tables give the details. The returns for Dalmatia are rendered separate from those of the rest of the Empire :—

AUSTRIA (excluding Dalmatia).

BOARD OF TRADE RETURNS.

FROM returns issued by the Board of Trade, it appears that the total value of the exports of British and Irish manufactured goods and produce during the first three months of the present and two previous years was as follows:—

	£
1863	27,561,204
1864	36,607,381
1865	35,635,707

In March only the shipments were:—

	£
1863	10,247,473
1864	13,555,674
1865	13,770,154

The following table shows the increase and decrease of the most important articles of export in the first three months of the current year, compared with the corresponding period in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease. £
Alkali	200,891	227,670	16,779	...
Apparel, &c.	553,939	536,493	...	17,446
Arms (small fire)	53,046	85,849	32,803	...
Beer and ale	474,565	594,559	119,994	...
Coals, &c.	903,023	904,778	1,755	...
Cotton yarn	2,103,329	1,708,151	...	395,178
Manufactures—Piece goods	9,957,538	10,543,073	585,535	...
Thread	212,768	158,727	...	54,041

All the principal items of the Bank return present an increase compared with last week :—9,077,000f in the coin and bullion, 9,641,000f in the discounts, 3,259,000f in the circulation of notes, and 21,247,000f in the deposits.

On the Bourse want of confidence continues to be manifested, and consequently the ascensional movement which has long been predicted does not take place. The following are the quotations :—

People had begun to think that the inquiry respecting banks, the rate of interest, and commercial crises which the Superior Council of Commerce was charged to make, had been abandoned, nothing having been heard of it since the first sitting of the Council in February last, when Mr Bagehot, Editor of the ECONOMIST, was the only witness examined. But on Saturday the Council held a second sitting, and the tissue dealers of the Rue du Sentier, who had petitioned for the inquiry, and who ought to have appeared on the first day, but had not got up their case, were in attendance. These gentlemen, it will be remembered, complained of the Bank of France for raising its rate of discount above 5 per cent.; from which it followed that they thought themselves capable of showing how that extremity might be avoided. Their appearance accordingly excited considerable interest,—not, of course that any of the long-headed members of the Council expected for a moment that they could make good their position, but because it was curious to hear what, as practical men of business, they would say in support of a position so untenable. They broke down most completely as was to be foreseen. They could not possibly explain how the rate of discount is to be kept below 5 per cent., when circumstances make money dearer than 5. They nevertheless disputed the right of the Bank to go beyond that figure, and when it was put to them that that establishment really had no power in the matter, they said that if a higher rate were called for it ought to be fixed not by the Bank, but by — the Government! One or two of them expressed the opinion that the rate of discount might be kept permanently low if the Bank of France, like private deposit banks, were to allow interest on deposits; from which it appears they are perfectly ignorant that the Joint Stock and other banks in England which give interest for deposits, raise or lower their discount, according to the demand for money, absolutely as the Bank of France does. Some other of the deponents thought that French commerce would get cheaper discount if the Board of Directors of the Bank were composed principally of merchants instead of bankers. The wonder is that none of them struck out the bright idea that the colour of the directors' coats may also influence the value of money. That idea is really not more absurd than the others. After the good men of the Rue du Sentier had said their say, the inquiry was adjourned *sine die*. It is now evident that the inquiry will result in a great triumph for the Bank of France. The *fiasco* of the petitioners for the investigation must prove clearly to French traders, that, as economists have all along told them, neither the Bank nor any body else can fix the value of money any more than farmers can fix the value of wheat, or planters that of sugar; whilst as to the monopoly of the issue of notes which the Bank possesses, there will be among the French an overwhelming weight of evidence in favour of it, notwithstanding monopoly is condemned by Political Economy, and liberty is proved by the example of England, Scotland, and the United States, to be advantageous to commercial communities.

The revenue of Mexico is improving. According to an official publication of the French Government, the custom house of Vera Cruz received in the first quarter of the present year 1,254,874 piastres; in the corresponding period of last year it only collected 395,600. A proportionate augmentation is stated to have taken place latterly in other parts, but the figures are not given.

Some German and Italian bankers are stated to have resolved on establishing a Credit Mobilier in Greece.

The shareholders of the Credit Foncier have held their annual meeting, and M. Fremy, Councillor of State, Governor, presented a report on the operations of 1864. It said that the high rate of interest which prevailed during the year had called for the exercise of great prudence, but, nevertheless, considerable business had been done. The loans on mortgage for long periods amounted to 75,065,500f, and those to municipalities of communes to 37,084,753f. The former made the total lent for long periods since the foundation of the Company 546,299,664f, of which 47,434,844f have been paid back, leaving due on the 31st Dec., 498,864,829f; and the total lent to communes, 156,528,423f, of which 147,856,360f remained due on 31st Dec. The annuities due to the Company for mortgage loans were 29,013,369f, and all were paid in the course of the year except 936,758f; for communal loans 4,663,718f, of which all were paid except 71,292f. In addition to all this the Company has consented to loans in Algeria, which on the 31st December last amounted to 4,661,345f. In 1864, the 3 and 4 per cent. bonds issued were 46,248 in number, and

Digitized by Google

20,412,100f in amount; the 5 per cent. 73,560 in number, and 36,780,000f in amount. The balance of communial bonds in circulation on Dec. 31, 1864, was 144,451,317f. The amount of deposits made with the Company in 1864 was 252,530,549f, and after deducting withdrawals, there remained in hand on Dec. 31, 662,955,551f. The advances made on deposits of bonds were 33,370,184f, and, deducting repayments, the balance due at the end of the year was 13,588,582f. The report gave a detail of various other operations, and it then stated that the profits of the year were 5,599,664f, to which is to be added a reserve of 2,099,578f made specially for 1864, in consequence of the new shares issued in 1862 being from that year allowed to enter into a full division of the profits like the shares of 1852. These two items enabled 47f 50c to be awarded to each share, after deducting 409,966f for the statutory reserve fund, and leaving a balance of 1,589,275f to be carried over to 1865. Of the 47f 50c, 12f 50c have already been paid. The reserve of the Company amounted at the end of 1864 to 6,882,429f.

The Credit Agricole, which is an off-shoot of the Credit Foncier, realised in 1864, profits of 1,058,712f, and out of these 17f per share are to be distributed, leaving 95,000f for bad or doubtful debts, and 147,500f to be carried over. The dividend is equal to 17f per cent. of the paid-up capital.

The shareholders of the Lyons and Mediterranean Railway have held their annual meeting. The report stated that the total receipts of the working in 1864 were 138,809,564f, the expenses 52,261,802f, leaving a balance of 86,547,762f. Adding to the latter sum the profits on investments, the Company's share in the receipts of the Ceinture Railway, and the balance from the preceding year, and deducting the interest on bonds, there remained a net balance of 60,943,703f. Of this sum, it was determined to employ 8,021,863f in repairs of the line, and distribute 52,121,899f to the shareholders, being at the rate of 65f a share. In 1864 the average receipts per kilometre, owing to the opening of some prolongations, were 71,551f; whereas, in 1863, they were 78,720f. As to the "new network," the gross receipts were only 33,800,000f, and after deducting expenses, 15,000,000f, which were carried to the account of capital. The sum spent in execution of the Algerian lines was, including subvention, about 16,500,000f. Notwithstanding the dividend of 65f, some of the shareholders were not satisfied. One of them complained rather strongly that the directors made the reserve too large, whereby the revenue of the shares, and consequently their selling value in the market, was reduced. Another declared that a permanent committee for the examination of the accounts ought to be established. In order probably to show that it approved of these complaints, the meeting declined to appoint a gentleman specially recommended by the directors for a vacant seat on the board. It, however, elected to another vacancy, M. Real, who for many years has been connected with the Company. The dissatisfaction manifested has occasioned considerable sensation, as it is rare in France for discussions to arise between shareholders and directors of great companies.

The annual meeting of the shareholders of the Southern Railway has also been held, M. d'Eichtal in the chair. The receipts of the old network in 1864 were 32,413,640f, and the expenses 11,643,001f. Adding the revenue from the canals and the balance from the preceding year, and deducting the interest and sinking fund of bonds, the net balance remaining was 10,873,953f. This sum was sufficient to allow 42f 50c per share to be declared, of which 30f have already been distributed. The balance is to be paid on the 1st of July next, and at the same time 10f on account of interest of the present year are to be given.

In a meeting of the Eastern Railway which has likewise been held, M. Thouvenel presiding, a dividend of 33f, as announced beforehand, was declared.

The directors of the Transatlantic Steam Navigation Company, in the meeting of their shareholders, reported that the net profits of 1864, for the working of the New York and Mexican lines, and of the subsidiary lines of the latter, were only 2,700,000f, and that the sum was reduced to 702,907f by the payment of losses coming from the liquidation of the Maritime Company, to which the Transatlantic has succeeded. On the proposition of the directors, this sum was set apart to the reserve fund for assurances. In consequence the shareholders get no dividend. But they are to receive 12f 50c per share on the 1st July next, for the profits realised by the contract for carrying Austrian volunteers from Trieste to Vera Cruz.

The meeting of the Company Immobilere which has also been held, has excited great interest on account of alarming statements relative to the situation of the Company having been deliberately made for many months. The report of the Directors proved that they are unfounded. The total receipts of the Company in 1864 were 16,127,551f; and after paying expenses of management, and interest on loans, there was a balance of 9,446,166f. Of this sum, 944,616f were appropriated to the reserve, 5,833,350f were ordered for distribution among the shareholders, and 2,668,199f were carried over to 1865. The 5,833,350f are sufficient to allow 37f 50c per share to be paid. Of that sum, 25f have already been distributed. The report replied to the attacks that have been made on M. Emile Pereire in connection with the Company. It showed that in amalgamating the Ports of Marseilles with the Immobilere, he saved the former from bankruptcy, and that in transferring to the Immobiliere the building ground he had purchased at Marseilles he derived no personal profit.

The Compagnie Generale des Eaux, of which the chairman is Mr Blount, pays a dividend of 18f per share. Its clear profits for 1864 were 1,440,000f.

The new joint stock bank at Lyons, called the Credit Lyonnais, has declared a dividend of 26f 25c for 1864; it is equal to 7 per cent.

The annual meeting of the Messageries Imperiales is fixed for the 31st May.

The Discount Bank of Dinan has suspended payment.

The Factage Parisien (Paris Parcel Delivery) Company has been declared bankrupt by the Tribunal of Commerce. It was English people who subscribed almost all the capital in this affair. A little reflection would have told them that if the Parisians themselves did not see the advantage of establishing a parcels delivery company, such an affair could not succeed in the hands of foreigners.

The market report is as follows :—

FLOUR.—At *Paris*, prices are higher. Yesterday choice was 49f the sack of 157 kilogs; first marks, 47f to 48f; good, 46f; other sorts, 44f to 45f. Six marks, current month, 49f; June, 50f 25c. Type Paris, the 101 kilogs, disposable, 29f 50c.

WHEAT.—In many provincial markets there has been a rise. Rain is beginning to be needed for the crops, and it is said that forty-eight hours of it would give the fields a splendid appearance. At *Paris*, yesterday, prices were higher: choice white, 27f 50c the sack of 120 kilogs; choice red, 26f 50c to 27f; first quality, 26f and oven 26f 25c; other sorts, 24f 50c to 25f.

COTTON.—The news from America produced a profound impression on the market at *Havre*, in the week ending Friday, but prices advanced. The closing quotations compared with three of the preceding weeks were 10f higher for United States, 15f higher for Jumel, 5f to 10f for Brazil and Peru, 5f to 15f French West Indies and Cote Ferme, 10f to 15f Surat, 10f Madras and Tinnevelly, 5f to 10f Kurrachee and Bengal, 5f to 7f China. Low New Orleans was consequently 200f the 100 kilogs; good ordinary qualities in Broach, 135f; in Tinnevelly, 120f; Madras, 140f; China, 122f; Jumel, 190f. The total sales of the week were 8,478 bales, and the arrivals 4,658 bales. The stock was estimated at 53,975. This week the market has been calm, and yesterday, America was 205f and 202f 50c; Jumel, 205f; Ingelghaut, 145f; Oomrawattee, 130f and 120f; Dhollerah, 125f; Tinnevelly, 117f 50c; Madras, 152f 50c, 105f, 102f 50c; Coconada, 120f and 115f; Bengal, 90f and 75f; Japan, 117f 50c. A telegraphic despatch says that this morning there was a decline of 2f 50c on China and Tinnevelly; other sorts firm.

COFFEE.—Business was somewhat more active at *Havre*, in the week ending Friday, and prices improved. 2,680 casks Port-au-Prince disposable, or in the port, went at 81f to 85f the 50 kilogs in bond; 2,200 Cayes, 80f to 80f 50c; 1,000 Cape, 84f to 84f 50c; 250 for delivery, 84f; 560 Gonaives, 87f to 88f; 375 Saint Marc, 90f; 4,460 Rio, not washed, disposable, 75f to 79f; 116 for delivery, 75f; 500 Bahia, for delivery, 72f; 1,000 La Guayra non-grages, 96f to 97f 25c; 1,500 for delivery, 93f 50c; and 95 Cazengo, 82f to 83f. Some damaged Cayes were sold by auction. The arrivals exceeded 8,500 sacks. This week, Guadaloupe bonifieur for delivery, 150f; Rio, 73f 50c to 85f; Hayti, 81f to 83f; Saint Marc, 90f; Cape, 87f; La Guayra, 99f. At *Nantes*, last week, there were no sales, and there has been none this week. At *Bordeaux*, last week, 828 sacks Mysore, 112f; 500 La Guayra grage, 105f; 1,150 at 100f; 100 non-grage, 98f 50c; 300, 108f; 115, 99f; 200 Rio washed, at prices not stated. This week, Mysore, disposable, 117f and 117 50c; La Guayra at prices not stated, and at 103f; Guadaloupe, 145f. At *Marseilles*, no sales last week, and none this week.

SUGAR.—In the week ending Friday, at *Havre*, 606 sacks French West India, of which 100 for delivery, 49f the 50 kilogs, bonne quatrieme, duty paid; 34 usine, disposable, 53f to 54f on sample; and a small quantity at 57f to 64f 50c; 1,012 bales Reunion, 51f 50c, bonne quatrieme; 525 casks Havana, 31f No. 12 in bond. The arrivals were 250 sacks. This week, Havana, No. 12, old, 30f; French West India, bonne quatrieme, 49f 50c and 49f, and for delivery 51f 50c; Havana, 30f. At *Nantes*, last week, 9,589 sacks Reunion were taken at 52f 50c; 7,820 Mauritius, 53f 50c; 1,191 casks Havana, for delivery; some Demerara and Guatemala at prices not stated. Of Reunion, the stock was 102,640 sacks. This week, Havana at prices kept secret; and Reunion at the advanced price of 53f 25c, bonne quatrieme, and at prices kept secret. At *Bordeaux*, last week, some Froneh West India went at 47f 50c, bonne quatrieme; and various lots usine at 52f to 65f; 1,200 sacks Reunion, 53f on sample; and 1,300, for delivery, 52f 75c, bonne quatrieme. This week, French West India, 48f 50c and 48f, bonne quatrieme; usine, 60f 50c; Reunion, at prices not stated. At *Marseilles*, last week, 117 casks French West India, for delivery, 32f, bonne quatrieme of Havre; 200 sacks San Yago, by French ship, 21f 75c, ditto; 100 casks Cuba, 28f 75c, ditto; 4,000 sacks Pernambuco, by Spanish ship, 31f 50c No. 12 of Holland; 2,000 bales Reunion, 52f, bonne quatrieme of Nantes. This week, Havana, by Spanish ship, 31f No. 12; and in store, 30f 75c same number. Afterwards, however, it would have been difficult to obtain these prices.

WOOL.—At *Havre*, in the week ending Friday, there was an auction of 2,795 bales, of which 1,422 were sold. It was well attended by French buyers, but there were few foreigners. Buenos Ayres, fine and light, obtained prices fully equal to those of March; but other sorts were less firm. The common sorts of Monte Video and Rio Grande were not much demanded, and in order to realise easily, a reduction of 15c to 20c would have been necessary. Apart from the auction, 32 bales Buenos Ayres, unwashed, went at 1f 85c and 2f 17½c the kilog. The arrivals were 67 bales. This week, Buenos Ayres, unwashed, 1f 5c to 2f 15c, and per 100 kilogs, 200f; Monte Video, unwashed, 2f 60c.

TALLOW.—The demand at *Havre*, in the week ending Friday, was a little more active: 25 pipes La Plata, disposable, went at 51f 50c the

Digitized by Google

50 kilogs; 240 ditto for delivery, 50f 50c to 51f. No arrivals. This week, New York a la marque, 52f. At *Paris*, yesterday, the 100 kilogs. octroi duty included, were 104f 70c.

HIDES.—Business at *Havre*, in the week ending Tuesday, was not animated. 1,250 La Plata, dry, 67f 50c to 90f the 50 kilogs; 787 ditto, salted saladeros, 51f for ox, light, indifferent quality; 46f for cow; 1,537 Rio Grande, salted, very light, 43f; 425 Pernambuco, salted, 46f; 1,000 Bahia, drysalted, 60f; 96 Martinique, salted, 29f; 200 horse, Buenos Ayres, salted, 42f. The arrivals were about 1,700. This week Buenos Ayres, salted ox, 58f; Monte Video, ditto, 92f; horse, 42f; Rio Grande salted ox, 52f; ditto heavy, 66f; cow, 45f,

COMMERCIAL AND MISCELLANEOUS NEWS.

The duty on merchandise imported into the Dominican Republic is now 15 per cent.

The following are the rates of duty on cereals in Portugal:—Wheat, 600 reis; wheat flour, 800; Indian corn and rye, 500; Indian corn and rye meal, 700; barley and oats, 400; barley and oat meal, 600.

The coasting trade of Denmark has been thrown open to foreign vessels.

The imports of bullion during the week ending May 3, were:—Gold, 506,210*l*; silver, 327,583*l*. The exports were:—Gold, 420,888*l*; silver, 161,839*l*.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending April 1, 1865, compared with the previous month:—

	March 4, 1865.	April 1, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	19951941	19750334	...	201607
Private Banks	2954480	2894084	...	60396
Joint Stock Banks	2738606	2756205	17599	...
Total in England	25645027	25400028	...	244404
Scotland	4069154	3972632	...	96522
Ireland	5702589	5694360	...	8229
United Kingdom	35416770	35067615	...	349155

And, as compared with the month ending the 2nd of April, 1864, the above returns show a decrease of 722,638*l* in the circulation of notes in England, and a decrease of 511,235*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,295,007*l*, the English joint stock banks are below their fixed issue 470,152*l*,—total below fixed issue in England 1,765,159*l*: the Scotch banks are above their fixed issue 1,223,361*l*; the Irish banks are below their fixed issue 660,184*l*. The average stock of bullion held by the Bank of England in both departments during the month ending March 29 was 15,077,125*l*, being an increase of 460,355*l* as compared with the previous month, and an increase of 966,112*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,416,713*l*; gold and silver held by the Irish banks, 2,111,291*l*; total 4,528,004*l*; being an increase of 6,331*l* as compared with the previous return, and an increase of 268,807*l* when compared with the corresponding period last year.

Mr J. R. Scott, the Registrar of the London Coal Market, has published the following statistics of the imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during April, 1865:—

IMPORTS.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 3rd day of May, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,506,015	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,856,015
		Silver Bullion	...
	28,506,015		28,506,015

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,984,441
Rest	3,192,566	Other Securities	20,274,907
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,712,465	Notes	6,902,615
		Gold and Silver Coin	823,959
Other Deposits	14,059,280		
Seven Day and other Bills	468,611		
	38,985,922		38,985,922

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,072,011	Securities	31,356,348
Public Deposits	6,712,465	Coin and Bullion	14,679,974
Private Deposits	14,059,280		
	42,843,756		46,036,322

Dated the 4th May 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,192,566*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

AN INCREASE of Circulation of	£633,634
AN INCREASE of Public Deposits of	414,063
AN INCREASE of Other Deposits of	94,010
No change in Government Securities.	
AN INCREASE of Other Securities of	1,216,939
A DECREASE of Bullion of	74,821
AN INCREASE of Rest of	291
A DECREASE of Reserve of	669,186

The decrease of 1,216,939*l* in the private securities has been in part met by that of 414,083*l* in the Government deposits, and 94,010*l* in the private deposits. The difference has fallen on reserve, the account of which shows a decrease amounting to 669,186*l*. The reduction in the stock of coin and bullion is only 74,821*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	21,258,966	21,752,884	21,376,999	22,045,792	22,072,011
Public deposits	4 337,590	7,503,991	7,241,739	6,981,132	6,712,465
Other deposits	12 645,651	13,866,643	13,122,087	12,279,908	14,059,280
Government securities	13,591,373	11,231,368	12,151,395	11,072,267	10,984,441
Other securities	12,721,050	17,632 846	17,470,207	20,901,160	20,274,907

Average price of wheat	69s 5d	58s 10d	45s 9d	39s 2d	39s 5d
Exchange on Paris (short)	25 15 22½	25 22½ 30	25 15 22½	25 30 40	25 15 22½
— Amsterdam ditto	11 18½ 18⅝	11 15½ 16	11 15 15½	11 17 18	11 16½ 17
— Hamburg (3months)	13 7½ 7⅝	13 8½ 8⅝	13 7½ 7⅝	13 10½ 11	13 8⅝ 9½

In the corresponding week of 1855, an unsuccessful attempt had been made on the life of the French Emperor. Great anxiety prevailed as to the situation of the allied armies before Sebastopol. Commercial advices from New York were more favourable. The Bank of England had lowered its rate from 4½ to 4 per cent.

In 1862, the distress in the manufacturing districts was creating serious attention. The international exhibition of 1862 had been opened. A Russian 5 per cent. loan of 15,000,000*l* sterling had been simultaneously announced in London and Paris and on other Bourses at 94 per cent.

In 1863, the rate of discount had again been reduced by the Bank of England, and at 3 per cent. the tone of the market was firmer.

In 1864, Fredericia had been evacuated by the Danish troops. The Prussians had imposed a contribution on Jutland to the amount of 72,000*l* sterling. At Lisbon, the Bill abolishing the tobacco contract had been passed by the Chambers, with few modifications. In Algeria, the junction of the columns of Generals Deligny and Martineux had prevented the further spread of the insurrection. Sir Charles

Digitized by Google

Trevelyan had introduced his Budget in the Legislative Council of India. The surplus for the year 1863-4 amounted to 34,000*l*. In America, three Federal gun-boats had been sunk off Plymouth. General Banks had been defeated near Red River, with great loss. The Bank of Prussia had raised its rate to 5 per cent. The Bank of England had raised its rate of discount to 9 per cent., making a total rise of 2 per cent. within four days.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 75,399*l*; in 1862, a deficiency of 3,766,203*l*; in 1863, a deficiency of 4,348,120*l*; and in 1864, a deficiency of 8,622,257*l*. In 1865, the deficiency is 6,215,627*l*.

Discount and Money Market.—The Bank Directors, at their court yesterday, announced the advance in the rate of discount from 4 to 4½ per cent. The immediate consequences have been a diminution in the demand for money, and a relapse in the prices of foreign and colonial produce. The exchanges are also rather higher.

A fair inquiry has been experienced at the Bank to-day; there has been, however, little business in the open market, and a good supply of money at the Bank rate.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	4⅛ per cent.
3 months	4¼ per cent.
4 months	4⅜ 5 per cent.
6 months—Bank bills	5 per cent.
6 months—Trade ditto	5½ per cent.

On the Stock Exchange there has been a strong demand for short loans, which in the morning commanded from 4 to to 4½ per cent. Later in the day money was offered at 3 to 3½ per cent.

The return issued yesterday by the Bank of France shows the following changes, as compared with that published last week :—

	£
Increase.	
Cash in hand	360,000
Commercial bills	344,000
Advances	50,000
Notes	130,000
Current accounts	850,000
Decrease.	
Treasury balance	292,000

The joint stock banks and discount houses have advanced their terms for money on deposit from 3 to 3½ per cent. The following are the rates allowed :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*

Bullion.—About 155,000*l* in bar gold has been sent into the Bank to-day.

The following are the current rates of discount in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½
Vienna	5	5¼
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4⅜ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2¾
St Petersburg	6	5¾

English Government Stocks.—The depression in the market has continued during the week, and prices have receded ⅜ to ½ per cent. below those quoted last Friday. No special reason is to be adduced for the fall; but as, previous to the statement of the Chancellor of the Exchequer, many if not most bear accounts had been closed and some speculations entered into in the opposite direction, the alteration in the money market occasioned a reaction in the minds of operators, who hastened to pour upon the market the amounts of stock they had only just before purchased. The action of the public, who have for a long time back sold stock on balance, is still adverse, and hence the effect of sales by speculators was the more marked. It is, however, to be doubted whether the tone of the market will continue unsatisfactory in face of the purchases on account of the Commissioners for the reduction of the National Debt, which are to be resumed, and the deduction of the dividend at hand, and which always induces a certain number of investors to come forward at this period of the year. Consols close at 90½ to 90⅝ for money, and 90⅞ for June account. New 3 per Cents. and Reduced, 88½ to 88⅝. India 5 per cents. 106½ to 107.

Exchequer bills remain dull at 3s to 6s pm., and India bonds quiet at 14s to 19s pm.

Foreign Stocks.—No particular feature is to be noted in connection with foreign securities. The advent of the Ottoman 5 per cent. loan has evoked a certain amount of controversy, but although the success of the operation is said to be assured, no disposition on the part of the public is shown to take any large part therein. The price of the new scrip is sustained, owing to the difficulties interposed to sales by the announcement that scrip issued abroad will not be received here. This regulation is usual, but can only be regarded in present times as a hindrance to business. It may formerly have been necessary, when greater difficulties impeded the verification of documents, to confine such to the markets in which they were issued. At present the same reasons do not exist, and the issue of scrip, common to the markets between which arbitrage operations are extensively carried on, would assist and facilitate business, to the advantage of the public investor in stock. Spanish Passive and Certificates have been rather firmer, and the Confederate loan is slightly higher at 14 to 16. The closing prices of stocks dealt in to-day are subjoined :—Brazilian 4½ per Cent., 81 to 81½. Danubian Seven per Cent., 82 to 84. Egyptian Seven per Cent., 96; ditto 1864, 93 to 93½. Italian Scrip, 57*l* 10s paid, 5 to 4½ dis. Mexican Three per Cent., 26¼. Portuguese Three per Cent., 48 to 48½. Five per Cent. Russian, 90. Sardinian Five per Cent., 78. Spanish Three per Cent., 47⅝; ditto Certificates, 16⅝ to 16¾. Turkish Six per Cent., 72½. Venezuela Six per Cent., 38 to 40. Italian Five per Cents.. 64¼ to 64¾.

French 3 per Cent. Rentes are telegraphed this evening at 67.45 for money, and 67.55 for the account.

Proposals for subscription to the Imperial Ottoman Five per Cent. Loan, issued under Laws of 17-29, 18-30, and 19-31 March, 1865, are invited by the General Credit Finance Company of London—the terms published are as follows :—

Nominal capital, 4,000,000 medjidies d'or, or 3,636,363*l* sterling, in bonds to bearer of 100*l* sterling—110 gold medjidies—2,500 francs; 50*l* sterling—55 gold medjidies—1,250 francs; 10 sterling—11 gold medjidies—250 francs; with interest at 5 per cent. per annum, payable half-yearly, on 1-13 July and 1-13 January, in sterling in London, francs in Paris, Frankfort, and Amsterdam, and medjidies d'or in Constantinople. Redeemable in thirty-seven years by 1 per cent. sinking fund applied in purchase.

The first law creates a "Grand Livre de la Dette Generale de l'Empire Ottoman," guaranteed by the general revenues of the Empire.

The second law authorises the inscription in this "Grand Livre" of 40,000,000 medjidies d'or, to be applied as follows :—For the conversion of the existing internal debts, 29,000,000; for the present loan, 4,000,000; reserve, specially destined for public works, not to be issued sooner than 2,000,000, one year after the present loan; 3,000,000 at the soonest after two years; and 2,000,000 at soonest after three years, 7,000,000—total, 40,000,000, or 36,363,363*l*.

The laws provide that no further inscription of debt is to take place unless by a special law duly published, and after provision has been previously made for the interest and sinking fund of any such new inscription by sufficient increase of revenue or reduction of expenditure.

The general debt inscribed in the "Grand Livre" is guaranteed by the reserve fund; by the general revenue of the Empire actually free; and by all revenues previously charged, as they become disposable by the amortisation of the existing foreign debts, of which they constitute the special guarantee.

The third law provides for the conversion of the existing internal debts, the Consolides being converted at the rate of 110*l* sterling of the new 5 per cent. stock, for each 100*l* Turkish, and the other classes of internal debt on terms, the particulars of which will be announced in a few days, when the necessary certificates of conversion are ready.

The price of issue for each bond of 100*l* sterling (bearing interest from 1-13 January, 1865), is 50*l*.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

RAILWAY AND OTHER SHARES.—The operations in the railway stock markets have not been very numerous, and a slight reaction is to be noted in many of the quotations. A moderate degree of firmness however prevails, and prices close without material change.

Indian guaranteed stocks are steady, and colonial securities are rather duller.

Foreign exchanges are somewhat firmer, in consequence of the rise in the Bank rate.

The traffic of the Grand Trunk Railway of Canada exhibits the following very large increase for the last three weeks:—

Weeks ended,	1865. £	1864. £	Increase. £
April 1, 1865	28,702	22,664	6,038
8,	27,248	22,021	5,227
15,	28,351	22,043	6,308
	84,301	66,728	17,573

The increase is equal to 23 per cent.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our circular of the 27th ultimo have been rather considerable; they comprise:—The Seine, from the West Indies with 147,500*l*; the Yorkshire, from Melbourne, with 33,500*l*; the Wave of Life, from Melbourne, with 13,000*l*; the Mediator, from Melbourne, with 8,000*l*; the Star of Tasmania, from Otago, with 14,500*l*; the Oneida, from the Brazils, with 43,900*l*, making a total of 260,400*l*. The steamers of the Messageries have also brought about 55,700*l* in sovereigns; of these amounts the Bank has only received up to the present time 106,600*l*, in bars and coin, and although 175,000*l* was taken out from that establishment in sovereigns, the operation is now not likely to be repeated, and it is probable that the rise in the rate of discount at the Bank may cause further sums of gold to be sent in. The Atrato has taken 17,600*l* to the West Indies.

Silver.—The Seine has brought about 134,500*l* from the West Indies. The demand for Holland has been sufficiently good to maintain the price mentioned in our last, viz., 60¾d per oz standard. There is not the slightest inquiry for fine bars for the East, and the Nyanza has sailed without taking any for India or China. The undermentioned quotations for Dore and fine silver may be considered as tolerably firm.

Mexican Dollars—The Seine has brought about 140,000*l*, the greater part of which consists of Mexican dollars; these have been sold at 59½d per oz., chiefly for Holland, the demand for the East being so slight that the Nyanza took only about 20,000*l* to China.

Exchange on India for Banks' drafts at 60 days' sight, ranges from 1s 10⅞d to 1s 11d per rupee. There were no bids for the Council drafts yesterday on Bombay at the minimum of 1s 11¼d. The allotments were only 44,500*l*., viz., on Calcutta 32,500*l* at the minimum of 1s 11d, and 12,000*l* on Madras at the same rate.

India Government Loan Notes—Our quotations are, for the 5½ per Cents, 109 to 111; for the 5 per Cents, 102 to 103, and for the 4 per Gents, 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d to 76s 3d per oz, last price. Silver—Bar silver, 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 1d per oz std, last price; Mexican dollars, 4s 11½d per oz, nearest; 5-franc pieces, 4s 11½d to 4s 11½d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The biddings for bills on India, which were offered to the usual extent of 300,000*l*, took place at the Bank of England on Wednesday last, but only 44,500*l* was taken, being 32,500*l* to Calcutta, and 12,000*l* to Madras. The minimum prices were 1s 11d on Calcutta and Madras, and 1s 11¼d on Bombay. Tenders on Calcutta and Madras at the minimum will receive in full; on Bombay all the tenders were below the minimum.

The Crown agents for the Colonies have invited tenders for a small loan of 30,000*l* for the Government of Antigua on 6 per cent. debentures, having 20 years to run. The money is required to construct works for supplying the principal town of the island with pure water. The securities offered are, first, the water rates and plant, &c.; and secondly, the general revenue of the colony, which is stated to have been in excess of the expenditure during the last eight years.

Tenders for the balance (127,500*l*) of the Queensland Government 6 per cent. debentures lately offered, were opened on Wednesday at the Union Bank of Australia, when it was announced that the whole amount had been subscribed for at prices ranging from 102*l* 11s to 103*l* 11s per cent., or above the official minimum.

The Committee of the Stock Exchange have appointed Friday, 5th May, a special settling-day in the shares of the following Companies:—

Reuter's Telegram Company (Limited). To be marked in the twice-a-week lists.

West London Docks and Warehouses Company. To be marked.

Trinidad Petroleum Company (Limited). Not to be marked, the mode of issue and allotment being unsatisfactory and irregular.

The Stock Exchange Committee have appointed Tuesday, May 9th, a special settling-day in the shares of the Darjeeling Company (Limited). To be marked in the daily lists.

The Committee have also ordered the shares of Bolckow, Vaughan, and Co. (Limited), and of the London and Lisbon Cork Wood Company (Limited), to be officially quoted, the former in the daily, and the latter in the twice-a-week list.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension of Messrs De Mattos and Godefroi was announced on Tuesday last. The debts and liabilities are estimated at about 130,000*l*, of which 60,000*l* to 70,000*l* may rank against the estate.

An order has been made by the Master of the Rolls for the winding-up of the Joint Stock Companies Association (Limited), under the supervision of the Court. Mr G. Scott, of Bond court, Walbrook, has been appointed liquidator.

An extraordinary meeting of the London Dock Graving Dock Company (Limited) is called for the 12th inst., to confirm the resolution passed on the 18th ult. for a voluntary winding-up.

A petition for the winding-up of the Great Tywarnhaile Mining Company (Limited), is to be heard before the Vice-Warden of the Stanneries at Truro on the 13th instant.

Notice has been given that Vice-Chancellor Kindersley has fixed the 9th inst. for the appointment of an official liquidator of the Portsmouth, Portsea, Gosport, and South Hants Banking Company.

Digitized by Google

A petition for the winding up of the European Central Railway Company (Limited) is to be heard before the Master of the Rolls on the 6th instant.

Advices from Stockport refer to the embarrassments of of Messrs Marshall and Son of that town, spinners and shippers of manufactures. Their difficulties are said to have contributed to the stoppage of Messrs De Mattos and Godefroi.

PUBLIC COMPANIES.—At the special meeting of the Scottish Australian Investment Company (Limited), held on the 29th ult., it was resolved that no more of the Five per Cent. Guaranteed Preference Stock of the Company, beyond the 18,410*l*, the portion already taken and fully paid up, shall be issued; and that the Company's capital shall be increased by the creation and issue of 179,220*l* New Six per Cent. Guaranteed Preference Stock.

The report of the Telegraph Construction and Maintenance Company (Limited) has been issued. The directors recommend the payment of a dividend to the 31st of December last of 5 per cent., which, with the interest at 5 per cent., will be equal to 10 per cent. per annum. This will leave a balance of 43,425*l* to be carried to the next year's profit and loss account.

The directors of the London and Brazilian Bank (Limited) have issued their report to be presented at the extraordinary general meeting on the 11th instant. The object of this meeting is to communicate the details of the arrangement which the Board has made with Messrs Mauá and Co., and to advise the proprietors as to the mode of raising additional capital. The net profit for the half-year ended 31st December last amounted to 28,052*l*, which will enable the directors to declare a dividend of 7½ per cent. per annum, and to carry forward 8,522*l*.

The annual meeting of the Indian Tea Company of Cachar took place on Wednesday last, when the directors' report, recommending a dividend for the half-year at the rate of 8 per cent. per annum, was adopted.

At the meeting of the Asiatic Banking Corporation, held on Thursday last, the directors' report was adopted, and a dividend and bonus equal together to 20 per cent. per annum, free of income tax, was declared.

At the meeting of the Sovereign Life Office, held on the 4th inst., it was stated that the new premiums for 1864 amounted to 8,786*l*, assuring 266,450*l*, or 73,000*l* more than the preceding year.

The report submitted to the proprietors of the London and South African Bank, at the meeting on Thursday last, was unanimously adopted, and a dividend at the rate of 8 per cent. per annum declared.

At the meeting on Wednesday last, of the Anglo-Austrian Bank at Vienna, the report recommending a dividend of 6s 5d per share, making (with 3s 6d paid in October) a distribution at the rate of 8½ per cent. per annum, after setting aside 10 per cent. of the net profits as a reserve fund, was adopted.

MISCELLANEOUS.—The General Credit and Finance Company of London are in receipt of advices from their agents, Messrs H. L. Boulson and Co., dated La Guayra, April 8, 1865, of duties collected as follows on account of the Venezuela Six per Cent. Loan, 1864:—Per statement, No. 25, from La Guayra. 10,651 dols 60c; No. 35, from Puerto Cabello, 415 dols 35c; No. 36, from Puerto Cabello, 17,895 dols. Total, 28,961 dols 95c.

The Chichester and Midhurst Railway—capital 370,000*l*, in 37,000 shares of 10*l* each: first issue, 10,000 shares—has been projected to establish the much required communication between Chichester and the town of Midhurst and Hazlehurst. Contractors of responsibility have agreed to complete the line in two years, and 6 per cent. will be paid on share capital paid up by instalments, and 7 per cent. on all shares fully paid up till the line is opened.

The share list of the Ottoman Company will close on Wednesday next, 10th May.

The share list of the London and Mediterranean Bank, will close on Tuesday, 9th May, for London, Wednesday the 10th, for the country, and Thursday 11th for the Continent.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 29, 1865:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	62,756 0	39 5
Barley	16,974 0	30 0
Oats	3,612 5	22 7

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold.			Average Prices.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The trade for English wheat at Mark lane, to-day, was by no means active. Selected runs, however, were firm in price, Monday's advance being well supported; but for inferior qualities, the trade was slow, on former terms. Foreign wheat of all descriptions was very firm, and, in some instances, prices were the turn higher. Barley, oats, beans, and peas fully supported previous quotations; and, with the exception of oats, the supplies on offer were small. Flour moved off steadily, at fully late rates. This week's imports amount to 2,170 quarters of wheat; 5,550 barley; 29,760 oats; and 170 sacks of flour.

At Liverpool, this morning, wheat and flour changed hands at very full prices. Maize was firm in value. At Wakefield, good and fine wheats were 1s per quarter dearer than on Friday last.

In the Liverpool market there has been a very good demand for cotton this week from the trade and exporters at steady rates. Yesterday, however, the raising of the Bank rate, and the arrival of many vessels laden with cotton, tended somewhat to quiet the market, and prices irregularly receded ¼d. To-day, the market continues quiet, and prices the turn in favour of buyers. The sales of the week reach 59,590 bales.

In the early part of the week, the tea trade was very firm, and prices were 1d to 2d per lb higher than on the 27th ult. During the last three days, however, there has been less activity in the trade, and the above advance in the quotations has been with difficulty supported. Sugar has been in steady request, at fully last week's currency. Very little coffee has been brought forward at the public sales, and all descriptions have sold at full prices. In rice, considerable business has been done, at extreme quotations. As regards other descriptions of grocery produce, very few changes of importance have taken place.

An increased amount of business was transacted in sugar ta Havana towards the close of March, resulting chiefly from an improvement in the European demand. According to Messrs Morales and Co's circular, the prices current on April 6 were:—Cucuruchos, Dutch numbers, 8 to 10, 19s 4d to 21s 2d; ordinary yellows, ditto, 11 to 12, 21s 9d to 22s 9d; middling ditto, ditto, 13 to 14, 22s 4d to 22s 11d; fine ditto, ditto, 15 to 16, 24s 2d to 25s 4d; florette ditto, ditto, 17 to 19, 26s 6d to 27s 9d; ordinary whites, 27s 2d to 27s 9d; middling ditto, 28s 11d to 30s 1d; fine and florette ditto, 32s 6d to 35s 1d; crystallised, No. 15 to 16, 22s 11d to 23s 7d; ditto, 17 to 20, 25s 4d to 25s 11d; muscovados, fair to good refining at outports, 16s 3d to 18s per cwt, free on board. The following table shows the extent of the shipments from Havana and Matanzas from Jan. 1 to March 31, in the last three years:—

Exports of Sugar from Havana and Matanzas.

	1865. boxes.	1864. boxes.	1863. boxes.
Great Britain	75,645	76,819	131,867

Total	394,974	288,294	330,518
In tons	75,045	54,776	62,798

The sugar trade at Pernambuco, during the fortnight ending April 12, was firm, and muscovados changed hands at slightly enhanced rates. The transactions, however, were far from extensive. Annexed were the prices current at latest dates:—Whites, No. 1 to 2, 32s 8d to 33s 6d; No. 3, superior, 31s 2d to 31s 11d; No. 3, regular, 29s 6d to 30s 4d; No. 4, 27s 10d to 28s 8d; Somenos, 25s 7d to 26s 5d; muscovado yellow, 20s 1d to 20s 11d; good brown, 19s 9d to 19s 8d; ordinary unclayed brown, 16s 7d to 17s per English cwt of 3½ arrobas, free on board, with 5 per cent. commission, but without freight and insurance, at the exchange of 25¾d.

The demand for coffee at Rio de Janeiro, during the fortnight ending April 7, was in a most inactive state. Fine parcels chiefly commanded attention, whilst the business done in medium and inferior produce was at reduced prices. The rates current were:—Ordinary quality, 49s 9d to 52s 10d; regular first, 54s 5d to 56s 1d; good first, 57s 8d to 58s 10d; prime good first and superior, 60s 10d to 64s 1d; round lots, 53s 7d to 56s 11d: better selections, 58s 6d to 60s; washed coffees, 67s 9d to 75s per cwt, free on board.

We extract the following from Messrs Trueman and Rouse's circular:—

Imports and Stocks of Sugar and Coffee at the Principal European Ports, for the Three Months ending March 31, 1864 and 1865.

The public sales of colonial wool will be commenced here on Thursday next. The arrivals, according to the latest statement, amount to 114,916 bales, consisting of 11,855 bales from Sydney, 62,176 Port Philip, 2,711 Van Diemen's Land, 16,010 Adelaide, 6,625 New Zealand, 997 Swan River, and 14,542 bales from the Cape of Good Hope. The business doing in wool is very moderate.

Digitized by Google

Prices, however, both of colonial and home-grown produce, rule firm.

Hemp continues very inactive, at 28*l* to 30*l* for clean Russian. Flax is firm, and jute, at public sale, has somewhat improved in value.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on May 1, 1863, 1864, and 1865, Dealers' Stock included.

In reference to the state of the leather trade, last month, Messrs Powell write as follows:—The supplies have rather increased, but the demand has sufficed to prevent any accumulation of stock. Prices generally are unaltered. English butts of intermediate weights have receded in value; and foreign, except well-selected parcels suitable for army purposes, scarcely support the rates of the previous month. Raw goods have been to some extent affected by the state of the leather trade.

Messrs Grant, Hodgson, and Co. report as follows as regards last month's tobacco trade:—The transactions in American tobacco last month were generally of a very limited character, and in most instances consisted of selections for immediate consumption, and a few small lots for exportation. Sales of all sorts have not exceeded 500 hhds. Imports—809 hhds. Deliveries—927 hhds, against 1,091 hhds in the corresponding month of last year. Stock—20,898 hhds, against 16,983 hhds in 1864, 18,443 hhds in 1863, 23,389 hhds in 1862, 18,988 hhds in 1861, and 17,326 hhds in 1860.

The metal trade has been rather rather quiet. Scotch pig iron has sold at 54s 6d to 54s 9d cash, mixed numbers; Straits tin, at 93*l* 10s; and spelter, at 20*l* 5s per ton, on the spot. Lead is very dull, on easier terms. The following relates to Banca tin in Holland:—

	1865	1864	1863
	slabs	slabs	slabs

Quotation, April 29	60fl	67½fl	76½fl

Very few changes of importance have taken place in the value of oils. French spirits of turpentine are selling at 58s to 59s per cwt. Tallow is dull, at 40s 6d for P.Y.C., on the spot.

No alteration took place in the value either of raw produce or of manufactured goods at New York during the week ending April 22. Generally speaking, trade was quiet, and the business done was chiefly to meet the immediate wants of buyers. As a rule, however, there was a fair amount of firmness apparent, and most transactions were at the full rates of the previous week. In financial circles, the leading feature to notice is an upward movement in the value of Government securities. For money, there was very little demand: 60 to 90 days' bills were quoted at 7 to 8; and 4 to 6 months' ditto, 8 to 9 per cent. The stock of bullion held by the banks on the 15th ult. was 3,906,750*l*; and the balance in the Sub-Treasury, 6,870,000*l*. The shipments of specie, from Jan. 1 to April 15, were 1,020,700*l*, against 2,356,200*l* during the same period last year; 3,221,760*l* in 1863; 2,213,000*l* in 1862; 466,630*l* in 1861; 1,041,700*l* in 1860; and 2,203,270*l* in 1859. The foreign imports, from Jan. 1 to April 15, were valued at 8,753,050*l*; against 14,198,500*l* last year; and 11,024,100*l* in 1863. The latest quotation for gold was 149½ per cent.

THE COTTON TRADE.

LIVERPOOL—MAY 5.

Cotton has been in good demand throughout the week by the trade as well as exporters, but holders have offered their stocks freely, and there has been less animation than last week. The advance of the Bank rate to 4½ per cent. yesterday exercised but little influence. For Sea Island an improved inquiry has prevailed, a further concession of about 2d per lb having induced more general business. American has been in good request, particularly for export, but during the last two days has been dull of sale, and closed partially ¼d per lb below last week. In Brazil large purchases have been made; but holders continue to supply the market very freely, and prices closed with a decline of ¼d to ½d. In Egyptian an extensive business has been done; but prices are barely supported. Smyrna continues in good request, and without material change in value. In East India a steady business has been transacted, the better qualities, from their scarcity, commanding advancing rates. China and Japan continue in fair demand, and generally full prices have been paid, especially in the higher grades.

The only transactions, to arrive, reported have been in Pernam and Paraba, first quality, at sea 13¾d per lb, and ex quay 14d. The sales of the week amount to 59,590 bales, including 4,800 on speculation, and 18,890 declared for export, leaving 35,900 bales to the trade. The sales to-day amount to about 8,000 bales, without change.

LONDON—MAY 5.

Annexed is a portion of the statement issued this week by the London Cotton Brokers' Association:—There has been a fair demand on the spot throughout the week, from both exporters and the home trade, and some speculative enquiry for parcels to arrive. The quotations on Friday last, for most descriptions, remain without change, but here and there a little irregularity is observable.

NEW YORK—APRIL 22.

Consideraqle business has been done in cotton, this week, on higher terms. The sales amount to about 8,800 bales. The arrivals have amounted to 6,670 bales, of which 2,264 bales are from New Orleans. The total import since Sept. 1 is now 193,281 bales. The export from April to April 18 reached 4,157 bales, against 3,878 bales last year. The following are the prices current:—

MARKETS IN THE MANUFACTURING DISTRICTS

As regards prices, trade in the manufacturing districts has ruled firm; but the total amount of business transacted, owing, chiefly, to the high rates demanded for certain manufactures, has been far from extensive. For coals and iron, there has been a fair demand.

MANCHESTER, May 4.—The firmness which characterised our market last week has in no ways diminished, but at the now generally advanced requirements of sellers, buyers are much less disposed to operate. This has been more particularly the case with India goods, in which the large transactions recently reported have fully satisfied buyers, especially as the Indian telegrams have advised discouraging markets. There has continued a fair demand for the better classes of printing cloths, and for certain T'cloths and domestics. Yarns are nominally about ½d to 1d per lb dearer, and the production well engaged forward, but there has not been so much doing even in this department as there was, though there is still a moderate business at full rates.

BRADFORD.—There is a fair inquiry for most classes of wool, and the average price of good Lincolns is about 2s 1d for hogs, and for wethers 1s 11d. The demand for yarn is improved, and prices have also become steadier. Pieces—The American houses have, we learn, been buying to some extent, but the continental trade is still very limited.

LEEDS.—The woollen cloth markets in the halls have not been active, and the business done is chiefly retail. There is no improvement in the general demand for exportation. For Germany a moderate business is doing, and there is a fair demand for the East and for Australia.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 22.—Prices of flour and wheat have fluctuated considerably since our last. The total amount of business transacted is very moderate, and chiefly for home consumption. The following are the quotations:—Flour—State, superfine brands, $7 to $7.45; State, extra brands, $7.65 to $7.75; State, choice brands, $7.80 to $8; Ohio, common brands, $8.25 to $8.40; Ohio, fancy brands, $8.45 to $8.50; Ohio, good and choice extra brands, $8.55 to $9.60; Michigan, Indiana, Wisconsin, &c., $7 to $8.30; Genesee, extra brands, $8.20 to $10; Missouri, $8 to $12; Canada, common, $8 to $8.20; Canada, good to choice extra, $8.25 to $10.50 per barrel. Corn—New yellow, $1.35 to $1.37; new white Southern, $1.27½ to $1.30 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, have been only moderate, but in excellent condition. All kinds have moved off steadily at an advance in the quotations of 1s 6d per quarter, and at which good clearances have been effected. Fine foreign wheats have commanded quite as much money as of late; but inferior kinds have continued a dull inquiry. There has been a steady consumptive inquiry for both English and foreign barley—the supplies of which have been by no means extensive—at very full prices. The sale for malt has not improved; nevertheless, the quotations have been supported. For oats, the inquiry has been less active at last week's currency. Both beans and peas have moved off freely at extreme rates. The flour trade has continued in a healthy state.

The leading country markets have been firm for wheat, and the quotations have had an upward tendency, although it is admitted that the stocks in the hands of the growers are unusually large. Barley, oats, beans, peas, and flour have realised full rates.

Throughout the Continent, there has been rather more business doing in wheat for export purposes. In prices, however, very little change has taken place. Spring corn has moved off freely, at extreme currencies. The latest advices from New York state that both wheat and flour were very dull, and that scarcely any business has been doing on English account.

The Scotch markets have been tolerably firm for wheat, at very full prices, to a slight advance. Barley and most other produce have changed hands freely, on former terms.

In Ireland, the corn trade, almost generally, has shown more firmness. Prices may, therefore, be considered firm. The shipments of produce to England have not increased.

The trade for English wheat at Mark lane, to-day, although the supply of produce on sale was small, was decidedly less active than on Monday. The late advance in prices was, however, supported. The trade for barley, oats, beans, and peas ruled firm, and late rates were well maintained. Flour was in fair demand, at full quotations.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—The market opened firmly, and has since been steady, but less animated during the past two days. Numerous floating cargoes of foreign have sold for the United Kingdom at higher rates, and clayed Manilla is 6d per cwt dearer. Quotations of other descriptions remain nearly the same as on Friday last. About 1,120 casks West India have sold in the three days. There were 2,975 tons landed last week, and the deliveries reached 5,330 tons, making a total increase of 28,300 tons since the beginning of the year, in contrast with 1864. The stock is 83,510 tons, against 63,700 tons last year, and 69,000 tons in 1863 at the corresponding date.

Mauritius.—4,975 bags, offered by auction, were chiefly disposed of at and afterwards: soft brown and yellow, 27s 6d to 32s; grainy, 33s to 36s 6d; grainy white, 11s 8d duty, at 39s 6d. A few parcels have sold on the spot, and a floating cargo of 14,000 bags for France, No. 12, at 26s 3d per cwt.

Bengal.—1,465 bags, in public sale, were partly disposed of: low to fair soft brown, 22s 6d to 27s; Khaur taken in at 25s to 25s 6d; brown and yellow Gurpatta date realised 29s to 33s 6d per cwt. 2,000 bags have sold by private contract.

Madras.—1,900 bags have found buyers: native, at 26s 6d to 27s; date sort, 24s to 24s 6d per cwt.

Manilla.—About 10,500 bags clayed have sold privately at 29s 6d to 30s. 870 bags very good, by auction, sold at 30s 6d to 31s. 3,372 bags grainy sorts were taken in at 36s to 37s 6d: syrups, at 31s 6d per cwt.

Other Foreign.—A floating cargo of Havana has been sold for a near Continental port at 26s, No. 12. Five of Havana for the United Kingdom, No. 13, at 26s. Two of Cuba muscovado, at 22s 3d to 22s 6d. 2,500 boxes Havana and Cuba on the spot, have sold at 33s 6d to 36s 6d. 300 casks Cuba muscovado, at 32s. 570 boxes Cuba florettes by auction, chiefly sold at 39s to 39s 6d. 735 casks muscovado, at 28s 6d to 35s. 326 casks Porto Rico were taken in at 31s to 35s per cwt.

Refined.—The market is quiet, but prices without material change. Low qualities of dry goods quoted 43s to 43s 6d per cwt.

MOLASSES.—A few small parcels of West India have sold at 14s to 15s per cwt.

RUM.—A good deal of business has been done in West India at full rates: proof qualities, 1s 6½d to 1s 8½d. Some Mauritius reported at 1s 6d per gallon, in puncheons and casks.

COFFEE.—The small quantity brought forward has realised full prices. 131 casks 448 barrels and bags Jamaica have sold at 68s 6d to 82s 6d. 36 casks plantation Ceylon, small berry to middling, 80s to 83s 6d. 240 casks native were bought in. 1,115 bags sold at 68s to 68s 6d for good ordinary quality. A parcel in casks has sold privately at 67s 6d per cwt.

TEA.—The market has become quiet, and the partial advances established when it became known that the duty would be reduced to 6d per lb, cannot now be obtained in the absence of speculative business. Public sales, comprising 23,237 packages, were held on Tuesday and the two following days, about 10,193 packages without reserve finding buyers. These, however, went heavily.

RICE.—A moderate quantity of soft grain has sold during the week, principally the lower qualities, at 8s 9d to 10s 3d. A parcel of pinky Madras has realised 11s 9d. No sales are reported for arrival. 682 bags cargo Bengal, offered by auction, sold at 10s to 11s 6d. 4,009 bags white Bengal were partly disposed of at 12s 9d to 13s per cwt.

IMPORTS AND DELIVERIES of RICE to April 29, with STOCKS on hand.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet at the close to-day. 1,706 casks West India have sold for the week. By auction, 240 casks Barbadoes realised 29s 6d to 37s 6d. 4,436 bags Mauritius and 6,135 bags Bengal partly sold at previous quotations. 1,000 bags Manilla, privately, on terms which do not transpire. A floating cargo of Cuba, for the United Kingdom, at 22s 6d per cwt.

COFFEE.—88 casks 139 barrels and bags Jamaica sold steadily at 67s to 85s. Other qualities were in limited supply, and unchanged.

COCOA.—111 bags Bahia sold at 38s to 40s; 30 bags Grenada at 56s to 58s per cwt.

SALTPETRE.—1,563 bags Bengal were taken in, refraction 4½ to 3½, at 27s 6d per cwt.

RICE.—13,000 bags have sold privately: Bengal, at 13s to 13s 6d; Madras, at 11s to 11s 9d; and Bassein, at 9s 4½d per cwt.

TALLOW.—410 casks Australian about half sold at easier rates: 39s for beef; 40s 9d per cwt for good sheep.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar was very well supported at the beginning of the week, but has closed rather in favour of the buyers. The foreign markets for crushed sugar continue firmly supported.

GREEN FRUIT.—The market continues good, and prices for oranges advancing; some parcels Valencia, Terceira, and Palermo, sold by Keeling and Hunt at public sale, went at 2s to 3s per package higher. Lemons of good quality in request. Barcelona nuts meet with a fair sale; moderate price, and increasing consumption. Walnuts dull. No Para as yet to hand; some parcels daily expected.

DRY FRUIT.—Currants are rather easier since the Budget came out, many holders having been induced to put their samples away, anticipating a reduction of the duty. Raisins show an improvement, specially in Valencias, which are very scarce.

SEEDS.—The grass seed trade may be considered over for this season, quotation must be reduced as holding over values. Other seeds are all firm, and the present weather beneficial for the growing production.

ENGLISH WOOL.—Rather more demand.

COLONIAL WOOL.—The next sale will commence on the 11th inst. The quantity will be large—about 150,000 to 160,000 bales—but as the continental demand is likely to be very good, no serious fall is anticipated.

FLAX.—Market firm.

HEMP.—Market steady for Russian. In Manilla a very large business done during the week, and now but little offering for sale.

SILK.—The market still remains the same as reported last week. A fairly current demand at very firm rates; stocks continuing small, and some uncertainty prevailing as regards the progress of the European crops.

TOBACCO.—There is no new feature to report; our market is extremely quiet, but prices continue firm.

METALS.—We have not had much life in metals this week. Copper is quiet with manufactured firm in prices, and the same may be said in foreign, but sheet copper is easier to buy. Iron is very firm for Welsh kinds, and the full demand for rails must for the present support the market. Staffordshire makes are steady. Tin is fairly maintained, but less has been changing hands for a few days past. Spelter is quiet, and lead continues to be neglected. Tin plates are in better demand and firmer in prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	42	3
Fat by ditto	2	1
Yellow Russia	42	0
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good drags	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, May 1.—The total imports of foreign stock into London last week, amounted to 9,214 head. In the corresponding week in 1864 we received 5,844; in 1863, 4,518; in 1862, 2,148; in 1861, 2,095; in 1860, 4,229; and in 1859, 1,485 head.

There was a large supply of foreign beasts and sheep on sale at our market to-day, for the most part in very middling condition. With foreign calves the market was moderately supplied. Generally speaking the trade was slow on rather easier terms. Fresh up from our own grazing districts the arrivals of beasts were good, both as to number and quality. The receipts from Scotland were large, and the condition of the stock was very prime. For all breeds of beasts the trade was in an inactive state, and prices declined 2d per 8 lbs from Monday last, being 4s 10d per 8 lbs. Prime heavy Scots and crosses sold at 4s 8d per 8 lbs. The supply of sheep on sale was moderate, and the quality of the stock was tolerably good. The mutton trade was decidedly quieter than on Monday last; nevertheless, good and prime Downs and half-breds changed hands, in most instances, at that day's currency. Inferior sheep declined in value 2d per 8 lbs; the top price was 6s per 8 lbs out of the wool. There was a fair supply of lambs on sale, and the lamb trade was dull. Prices ranged from 5s 8d to 8s per 8 lbs, showing a decline of 2d to 4d per 8 lbs from Monday last. Calves met a slow sale, at Thursday's decline in prices, of 6d per 8 lbs. The top price

Digitized by Google

was 5s 2d per 8 lbs. The supply on offer was only moderate. Prime small pigs were firm in price; but large hogs were a dull inquiry.

SUPPLIES

	May 2, 1864.	May 1, 1865.
Beasts	5270	4810
Sheep and lambs	25820	24160
Calves	209	199
Pigs	480	375

THURSDAY, May 4.—The total supply of beasts on sale here to-day was tolerably large. For good and prime breeds there was a fair demand, at full prices; otherwise, the beef trade ruled quiet, at Monday's currency. Prime Scots, &c., realised 4s 10d per 8 lbs. As regards all good and prime sheep the trade was firm, at full prices, the top figure being 6s per 8 lbs. Inferior sheep moved off slowly, at late rates. There was a steady demand for good and prime down and half-bred lambs, at full quotations; but the trade was decidedly quiet for inferior qualities. The top price was 8s for 8 lbs. Calves moved off steadily, at full prices. The pork trade was quiet, on former terms.

Per 8 lbs to sink the offal.

	s d	s d		s d	s d
Coarse and inferior beasts	3 4 to 3 8		Prime Southdown sheep	5 10 to 6 0	
Second quality ditto	3 10 4 2		Large coarse calves	4 4 4 8	
Prime large oxen	4 4 4 6		Prime small ditto	4 10 5 4

Lambs, 6s 4d to 7s 8d.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, May 5.—These markets are well supplied with potatoes. In all descriptions sales progress slowly, at about previous rates. Yorkshire Regents, 90s to 120s; ditto Flukes, 130s to 150s; ditto Rocks, 85s to 100s; Scotch Regents, 90s to 100s; ditto Rocks, 80s to 90s; Dunbar Regents, 100s to 120s; Foreign, 70s to 85s per ton.

HAY MARKETS.

THURSDAY, May 4.—Only moderate supplies of hay and straw are on sale, yet the trade is dull, at barely late rates.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Meadow hay	90 to 110	95 to 115	90 to 110
Clover	110 to 130	110 to 130	110 to 130
Straw	28 to 34	30 to 36	28 to 33

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 5.—At the public sales of sundry kinds of foreign wool, held here from the 2nd to the 5th inst., 19,290 bales were brought forward, but only a small portion of them has been disposed of, as the competition was very languid and prices have ruled in favour of buyer

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 5.—Wheat in fair demand at Tuesday's rates. Flour firmly held at late quotations. Beans, oats, and oatmeal without change. Indian corn weak. Galatz, 29s 6d.

GAZETTE OF LAST NIGHT.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 1.—The Stock Exchange having been closed to-day, no business was transacted in the railway share market.

TUESDAY, May 2.—In the share market to-day the actual transactions were few, and English railways were rather disposed to weakness at the close; banks, Canadian railways, and American securities were, however, firm, and the other descriptions showed no material average change. Of the English lines, South-Western alone showed an advance of ½; Caledonian, Lancashire, and Yorkshire, North-Western, and Midland relapsed ½ each; and Great Northern (A stock), North British (Edinburgh, Perth, &c.), North-Eastern (Berwick), ditto (Leeds), and ditto (York) declined ½ each, South-Eastern and Great Western ¼ each, ditto (South Wales) ¼, and Metropolitan a further ¼. In colonial, Grand Trunk of Canada (1st preference deferred) improved 3, ditto (2nd preference deferred) 1½, and Great Indian Peninsula ½. In foreign, Paris and Mediterranean receded 1, and Paris and Orleans ½. In American, the four descriptions of Atlantic and Great Western advanced 1 each, Virginia (6 per cent.) further 2, Erie shares (paid-up) a further 1, and United States (5-20) further ¾; and Illinois Central shares relapsed ¾. In British mines, Vigra improved 1, Tin Croft ½, and East Lovell further 1½; and Great Wheal Vor declined ½, East Grenville, Great South Tolgus, and Marke Valley ¼ each, and East Wheal Russell a further 1. In foreign mines no alteration appears in the closing quotations.

WEDNESDAY, May 3.—In the share market to-day there was no recovery of animation, and the principal English railways and American securities were further depreciated, but bank were firmer, and in the other descriptions there was no material average change. Of the English lines, Brighton and Great Northern declined ½ each, ditto (A stock) further 1½, Metropolitan (new) 1, ditto (stock) further ¾, Caledonian, North-Western, Midland, North-Eastern (Berwick), ditto (Leeds), and South-Eastern a further ½ each, and Great Western a further ¼. In colonial, Great Indian Peninsula relapsed ½, and East Indian declined ½. In foreign, Pernambuco improved ½, and Great Luxembourg ⅛; and Western and North-Western of France receded ½, Namur and Liege and Lombardo-Venetian ⅛ each, and Paris and Orleans a further ½. In American, Erie shares (paid-up) further improved ½, United States (5-20) relapsed 1¼, and Illinois Central shares further declined ¼. In British mines, Great Laxey and West Caradon advanced 1 each, East Gunnislake ½, and East Lovell a further 1; and North Roskear receded 1, Great Wheal Vor a further 1, and East Wheal Russell a further ½. In foreign mines, United Mexican improved ¼.

THURSDAY, May 4.—In the share market to-day there was again a rather general tendency towards depreciation, which chiefly affected English railways, of which South-Western alone improved ½; and Shropshire Union, and Great Western (Oxford), and Midland (Birmingham and Derby) declined 1 each, ditto (original), Caledonian, and Great Northern a further 1 each, North Staffordshire and North-Eastern (York) ½ each, ditto (Berwick), ditto (Leeds), Metropolitan, and South-Eastern a further ¼ each, and Lancashire and Yorkshire and North-Western a further ¼ each. Colonial are without alteration. In foreign, Pernambuco further improved ½, and Great Luxembourg ¼; and Eastern of France, Paris and Mediterranean, and Lemberg-Czernowitz declined ½ each, Bahia ¼, and Dutch-Rhenish and West Flanders ½ each. In American, Atlantic and Great Western (Pennsylvania, 1st mortgage) advanced 2, and ditto (all other descriptions) 1 each; and United States (5-20) further declined ¾, and Illinois Central shares ¼. In British mines, East Lovell relapsed ½. In foreign mines, St John del Rey improved 1.

FRIDAY, May 5.—In the railway share market to-day there has been rather more animation, and prices have shown more firmness. Bristol and Exeter have advanced £1 10s; Metropolitan, £1; North-Western, Midland, and South-Eastern, each 10s; and Great Eastern, Great Western, and Lancashire and Yorkshire, each 5s. Foreign and colonial lines remain without any material alteration as regards prices. Bank and miscellaneous shares are in moderate request, at about previous quotations.

THE RECENT ROBBERIES FROM IRON SAFES.
GEORGE PRICE CALLS attention to his TREBLE and QUADRUPLE PATENT FIRE-RESISTING (212°) and BURGLAR-PROOF SAFES now making on his improved principle to resist every kind of violence, as well as drills, gunpowder, and picklocks. These unrivalled Safes are made of half-inch boiler plate, with one-inch solid case-hardened doors. New illustrated Price-lists are now ready, and may be had post free, from the sole Patentee and Manufacturer, George Price, Cleveland Safe and Lock Works, Wolverhampton; 18 Blackfriars street, Manchester; and Wade lane, Leeds.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.
N.B.—Lists of Heirs at Law, Next of Kin.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

MORE CURES OF CONSUMPTION, COUGHS, ASTHMA, and DISEASES of the CHEST and LUNGS, by DR. LOCOCK'S PULMONIC WAFERS.—From Mr C. Ward, Stationer, &c., Market place, Heckmondwike:—"Cures of consumption, asthma, and other diseases of the chest and lungs, are regularly occurring. One person in Liversedge, named James Richardson, who has been an asthmatical man for nearly twenty years, declares that they are worth £1 a box (using his own words). He feels quite a new man through this truly valuable medicine." To singers they are invaluable. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS, by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES, by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

SKIN DISEASES AND THEIR REMEDIES.

By ROBERT J. JORDAN, M.D

Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood, causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.

"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—MEDICAL TIMES AND GAZETTE, August 4th, 1860.

To be had direct from the Author, 27 George street, Hanover square, London, W.

NEW EDITION.—POST FREE.

GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive).

Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.

These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.

London:—27 Harley street, Cavendish square, W.
City Establishment:—36 Ludgate hill.
(Four doors from the railway bridge).
Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.

Messrs GABRIEL guarantee every case they undertake.

No. 52 Threadneedle street, London, E.C.

REPORT OF THE DIRECTORS OF THE

LONDON AND SOUTH AFRICAN BANK

(incorporated by Royal Charter) to the Proprietors, at the Fourth Ordinary Annual General Meeting, to be held at the London Tavern, Bishopsgate street, on Thursday, 4th May, 1865, at 12 o'clock noon precisely.

1. The Directors have the satisfaction of submitting to the shareholders the audited accounts of the Company to the 31st December, 1864.

2. After deducting all charges for the past year, and providing for bad and doubtful debts, there remains a disposable balance of £26,984 8s 4d. From this sum £2,500 will have to be placed to the reserve fund, which will then amount to £18,053 6s 3d, and £1,608 6s to preliminary expenses. At the end of the next year this latter account will be closed,

3. Having regard to the depressed state of trade in the South African colonies, it was deemed prudent in October last to declare an interim dividend of 3½ per cent. only, but the satisfactory returns since received from the several branches enable the Directors to recommend for the approval of the shareholders a dividend of 18s per share, which, with the payment made in October, 1864, will be at the rate of 8 per cent. per annum, free of income tax, leaving a balance of £377 9s 6d to be carried forward to the profit and loss account for the next half-year.

4. A branch has recently been opened at Richmond, with a prospect of success.

5. The Directors who retire by rotation are Messrs John Barry, Colonel J. Holland, W. Nicol, M.P., and Major-General G. B. Tremenheere, who, being eligible, offer themselves for re-election.

6. It is with great regret that the Directors report the death of Mr Henry Sherman, one of the auditors of the Bank.

7. It will be necessary to appoint auditors for the ensuing year.—By order of the Court,

WILLIAM MORRIS JAMES, Manager.

The following resolutions were carried unanimously:

1. That the report and statement of accounts to the 31st December, 1864, as now submitted, be approved and adopted.

2. That in addition to the payment of 14s per share made in October last, a dividend of 18s per share be now declared, payable on the 9th instant, free of income tax, making a dividend of 8 per cent. for the year 1864.

3. That John Barry, Esq., be re-elected Director of this Company. That Colonel James Holland be re-elected Director of this Company. That W. Nicol, Esq., M.P., be re-elected Director of this Company. That Major-General G. B. Tremenheere be re-elected Director of this Company.

4. That Frederick Maynard, Esq., be re-elected as Auditor for the ensuing year.

5. That William Anastasius Jones, Esq., be re-elected as Auditor for the ensuing year.

6. That the thanks of this meeting be given to the Chairman, Court of Directors, and officers of this Bank for the efficient manner in which they have conducted the affairs of the Company.

7. That the thanks of the meeting be given to the Chairman for presiding.—By order of the Court,

WILLIAM MORRIS JAMES, Manager.

PROSPECTUS.

This Company is formed for the purpose of converting the £100 shares of the Continental Bank Corporation into shares of £20, and to carry out the amalgamation of that Bank with the Bank of Messrs E. Landau and Co., of Alexandria, and for facilitating commercial, financial, and monetary transactions between this country, the Continent, and Egypt.

Five of the £20 shares of this Company will be allotted to the shareholders in the Continental Bank in exchange for each of their present £100 shares. The £20 shares allotted in exchange for shares, on which £25 has been paid, will be credited with £5 paid up; and those allotted in exchange for shares, on which £15 only has been paid, will be credited with £3 paid up.

The arrangements which have been made for amalgamating and managing the business of the above establishments are such as, aided by the high Egyptian connections of Messrs Landau, cannot fail to secure to this Company a very extensive and profitable business.

The establishment of Messrs Landau and Co., at Alexandria, in addition to its regular banking operations, has long enjoyed an extensive connection with producers and exporters of produce in Egypt. This business has always yielded most favourable results; and no better proof of this can be given than the fact that the firm, during the whole of its existence, as well as the other banks lately established in Egypt, have experienced an absolute immunity from loss in their transactions of this class of business.

The daily increasing trade of Egypt with Europe, and especially with England, is also a sure guarantee for the enhanced future success of this Company; the profits hitherto realised by Messrs Landau and Co., are alone sufficient to yield a large return upon the capital proposed to be called up; and the several partners of the firm, in order to show their confidence in the future success of the Company, have taken a large number of shares, and will continue in the active management of the business at Alexandria.

The Bank has also secured the co-operation, as a Director, of Mr Bravay, whose exertions will be especially devoted to the extension of the Bank's relations with the Egyptian Government, a class of transactions in which he has hitherto engaged with very successful results.

The amalgamated establishments propose liquidating all their present transactions up to the date of amalgamation.

The articles of association of this Company, and the agreement entered into for acquiring the business of Messrs Landau and Co., can be seen on application at the office of the Solicitors.

A deposit of £1 upon each share must be paid at the offices of either the Bankers of the Company, on application, according to the annexed form.

Forms of application for shares may be obtained of the Secretary, at the Company's offices, and of the Bankers and Brokers.

FORM OF APPLICATION FOR SHARES.

To be Retained by the Bankers.

No.——

To the Directors of the London and Mediterranean Bank, Limited.

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number; and I agree to accept such shares or any less number that you may allot to me, and to become a member of the Company in respect of the shares allotted to me. I further authorise you to forward by post, to my address, as below, the certificates for the shares which may be allotted to me.

Usual Signature .....
Name in full.....
Residence .....

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of issue at par, what is equivalent to interest at the rate of from Six to Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of transacting the safe and highly profitable business of Commission Merchants and Financial Agents in connection with the Trade and Commerce of the Ottoman Empire.

TRADE OF THE EMPIRE.

Throughout the greater part of the Empire the soil and climate permit of almost inexhaustible production, in excess of the wants of the inhabitants, of those ordinary raw materials which form everywhere the great staples of food and manufacture. Grain, wool, cotton, hemp, hides, tallow, are produced in abundance; while, in addition, Turkey yields in profusion those rarer articles of merchandise, such as drugs, dyes, gums, fruit, vegetable oils, silk, sugar, and tobacco, which can only be abundantly and profitably produced under conditions of special advantage of climate and geographical position.

In the year 1860, it was estimated that the annual trade of Turkey with Foreign countries amounted to £48,000,000, and that between the Provinces to £20,000,000; giving a total of £68,000,000 per annum. Judging, however, from the increase of the trade between Turkey and Great Britain during the past few years, this total must now be considerably increased. In the year 1854 the imports and exports between Great Britain and Turkey (exclusive of Egypt) amounted to £6,251,131, and in 1859 to £9,620,536, but in the year 1863, according to the last Annual Statement published by the Board of Trade, they increased to £13,303,682. The trade between this country and Egypt has also risen from £11,118,922 in the year 1859, and £10,796,971 in 1861, to £21,006,964 in 1863, making a total between the Ottoman Empire and Great Britain alone of £34,310,646. This increasing trade is capable of almost indefinite extension.

BUSINESS OF THE COMPANY.

As Commission Merchants, the Company will receive, on the usual terms, consignments of goods for sale in English and Foreign markets from merchants and others in the Ottoman Empire, as well as from merchants, manufacturers, and others in this country and abroad for sale in Turkish markets, and will execute orders for their correspondents both in Western Europe and the Ottoman Empire.

An important branch of the Company's business will consist in making Cash advances to the native cultivators. The rate of interest usually paid for such loans is very high, ranging from 1½ to 4 per cent. per month (from 18 to 48 per cent. per annum), the security consisting of standing crops, articles of value easily convertible, and, when required, responsible personal guarantee.

As Financial Agents the Company will give its assistance to the Ottoman Government in the promotion of reproductive public works, conducing to the improvement of internal transit and the development of external trade, and act generally as Financial Agents in, and in connection with, the Ottoman Empire.

The Company is prevented by the terms of the Memorandum of Association from trading for its own account.

GENERAL ARRANGEMENTS.

The Head Office of the Company will be in London, with Agencies in Leeds, Liverpool, and Manchester. Branches will be established at the Ports of Constantinople, Smyrna, and Beyrout, and Agents will be appointed in the interior, subject to the superintendence and control of the branches to which their districts may be attached.

The exclusive services of gentlemen of established reputation and acknowledged local experience having been obtained, the operations of the Company will immediately commence at Smyrna, where a valuable and old-established business of sixty years' standing has been secured.

APPLICATIONS FOR SHARES.

Detailed prospectuses and forms of application for shares may be obtained at the Temporary Offices of the Company, or at the Offices of the Bankers, Brokers, and Solicitors; but no application will be considered unless a deposit of £1 per share on the number of shares applied for has been paid.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. STARCH MANUFACTURERS TO
H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.
WOTHERSPOON and CO., Glasgow and London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.
*** No connection with any one of the same name.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufactuer
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.
NEW PATENT.
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly London.

COMPAGNIE IMMOBILIERE OF FRANCE.

REPORT

Presented by the Board of Directors, in a General Meeting, held at Paris, on the 27th April, 1865.

M. VINCENT CIBIEL, Vice-President, in the Chair.

GENTLEMEN,—It is with extreme satisfaction that we hail the moment for rendering you an account of the works accomplished during the past year, and of laying before you a statement of the favourable position of our social affairs.

We are all the happier at having to make known to you such a situation, because it has been secured in the midst of the gravest and most complicated circumstances, in spite of an outburst of passions, equally unexampled and causeless, and under the attacks of which enterprises less strongly constituted than ours must have inevitably succumbed.

We have no need to describe to you in detail the difficulties of all sorts thrown in the way of building enterprise by the financial crisis which has so cruelly tried the country, for a time exceptionally prolonged beyond the ordinary limits. You are aware that building operations can only prosper when money is abundant and cheap: when it is scarce and dear, all the works are suspended, and the value of house property is depreciated as well as that of personal property. The consequence has been that in the circumstances through which we have just passed, enterprises connected with the purchase of ground and building have been almost completely paralysed, especially in Paris.

However, gentlemen, notwithstanding these circumstances, these difficulties, and the general embarrassment experienced, our society has not suffered. Aided by the co-operation of the Societe Generale de Credit Mobilier, we have not permitted ourselves to be turned aside from our object, and during the prevalence of the crisis, far from neglecting the care of our interests, we have, on the contrary, redoubled our efforts to assure the success of our affairs by the rapid development of our works.

You well know how much the circle, in which our Society has been called to move, has extended since its last constitution.

We have now not only to manage properties built, and the letting of which is only a question of time.

Possessing, at Paris and Marseilles, extensive tracts of ground, which represents a considerable value, we were placed in the alternative of turning them to use, or realising them with the least possible delay, in order not to leave improductive an important part of our capital.

But, to build, it was necessary to have great resources at command; no less were indispensable to determine, in the height of the crisis, substantial contractors to build on their own account, for in that case it was necessary to assure them important financial assistance.

We have solved this double problem; we have ourselves built, on the one hand, and we have grouped around us, on the other, a certain number of reliable contractors who, certain of the future and supported by the advances we made to them, have not hesitated to take part in our enterprise, and devote themselves to its development.

Our works at Paris, as well as at Marseilles, have thus been prosecuted without the least remission.

And thus, now capital has again become abundant and business active, we find ourselves in a position to reap the fruit of our perseverance.

The means employed have been different at Paris and Marseilles.

At Paris, we have thought best to continue ourselves the buildings undertaken on the Boulevard Malesherbes and the Boulevard du Prince Eugene.

All these buildings may now be regarded as completely finished.

The chapter of houses built and already occupied, which on the 31st December, 1863, presented a total of 77,955,000f, amounted on 31st December last to 111,032,561f 19c; which represents for last year in the productive portion of our assets in Paris an increase of 33,077,561f 19c.

At Marseilles we have ourselves built a certain number of houses, but the contractors have built still more.

The constructions we have ourselves raised at Marseilles, and which may now be considered as finished, represented on the 31st December last a capital of 11,979,974f 43c. On the 31st December of the previous year the capital was only 4,147,923f 5c; which gives in the productive part of our assets at Marseilles, for the last year, an increase of 7,832,051f 38c. The whole of the houses now productive, as well at Paris as at Marseilles represents a total outlay of 123,012,535f 62c. The produce will be all the more favourable as these houses are placed in the best conditions.

The following is a list:—

	f.	c.
At Paris.		
Hotel du Louvre	20,000,000	0
Grand Hôtel	30,000,000	0
Boulevard des Capucines, nine houses	17,925,000	0
Boulevard Malesherbes, eleven houses	9,630,000	0
Rue de Marignan, nine houses	6,640,000	0
Boulevard du Prince Eugene, 102 houses	25,334,061	19
Quartier Monceau, two houses and the Blanchisserie	1,503,500	0
At Marseilles.		
Rue Imperial, eleven houses	3,539,398	88
La Joliette, sixty-four houses	8,240,062	55
Les Catalans, ten houses	200,513	0
Total	123,012,535	62

The returns which these houses begin to yield justify our anticipations.

Our hotels are in a prosperous state; their total produce, in 1864, was 2,905,045f 19c, instead of 2,465,251f, 50c in 1863: increase, 439,793f 69c.

The following are the details:—

	1863. f.	c.	1864. f.	c.	Excess in favour of 1864. f.	c.
Grand Hotel—Shops	151,750	0	253,500	0	101,750	0
Profits of Hotel	1,253,141	11	1,517,492	14	264,338	73
Hotel du Louvre—Shops	304,537	0	305,100	0	563	0
Profits of Hotel	755,811	9	828,953	5	73,141	96
	2,465,251	50	2,905,045	19	439,793	69

This improvement is in great part due to economies realised; it is especially owing to the fact that, above a certain figure of business, the gross receipts of the hotels increase without the general and other expenses augmenting in the same proportion. The results given by the hotels will increase when the movement, already very perceptible, which tends to create for each of them a special connection, shall be fully developed.

The Cafe de la Paix gave in 1864 a net profit of 222,713f 53c. This advantageous result induced us to found a similar establishment at the corner of the Rue Scribe and of the Boulevard, to utilise the spacious premises which we possess there, and which had till then remained unoccupied. This new Cafe, fitted up in a style suited to its situation and size, has from its first opening been completely successful. The number of people, too, which it attracts, gives to that part of the boulevard a degree of animation and activity which will not be without influence on the letting value of our shops.

The Furnished House on the Boulevard des Capucines produced in 1864 a net revenue of 112,000f. The connection of this house is becoming every day more extensive.

The Blanchisserie (Laundry), built expressly for our hotels, has procured them the advantage of a better organised service; the repairing of the linen and making new are there executed with much greater care, which allows us to realise an important saving in that branch of expenditure.

Our other houses are also in a very favourable state.
